

The Table of Contents is a total listing of Parts A, B and C.

Part A consists of articles 111101–114027, Part B articles 114028–115025, and Part C articles 115026–119904(E)

### PART A

#### LETTERS

|                                                                                                                                                                    |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Observation of the electromagnetic Dalitz transition $h_c \rightarrow e^+e^-\eta_c$ (8 pages) .....                                                                | L111101 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                    |         |
| Observation of $D \rightarrow a_0(980)\pi$ in the decays $D^0 \rightarrow \pi^+\pi^-\eta$ and $D^+ \rightarrow \pi^+\pi^0\eta$ (9 pages) .....                     | L111102 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                    |         |
| $CP$ asymmetries corresponding to the imaginary parts of the interference terms in cascade decays of heavy hadrons (6 pages) .....                                 | L111301 |
| Jing-Juan Qi, Jian-Yu Yang, and Zhen-Hua Zhang                                                                                                                     |         |
| $W$ -boson exotic decay into three charged leptons at the LHC (7 pages) .....                                                                                      | L111302 |
| Yifan Fei, Peiran Li, Zhen Liu, Kun-Feng Lyu, and Maxim Pospelov                                                                                                   |         |
| Influence of magnetic field-induced anisotropic gluon pressure during pre-equilibrium in heavy-ion collisions: A faster road toward isotropization (6 pages) ..... | L111501 |
| Alejandro Ayala and Ana Julia Mizher                                                                                                                               |         |
| Color coherence effects in dipole-quark scattering in the soft limit (7 pages) .....                                                                               | L111502 |
| Daniel Pablos and Sergio Sanjurjo                                                                                                                                  |         |
| Vacuum pair production in zeptosecond pulses: Peculiar momentum spectra and striking particle acceleration by bipolar pulses (7 pages) .....                       | L111901 |
| I. A. Aleksandrov and N. N. Rosanov                                                                                                                                |         |
| Finite-temperature instantons from first principles (7 pages) .....                                                                                                | L111902 |
| Thomas Steingasser, Morgane König, and David I. Kaiser                                                                                                             |         |
| Pair production in circularly polarized waves (7 pages) .....                                                                                                      | L111903 |
| Christian Kohlfürst                                                                                                                                                |         |
