|                                                                                                                                      |         |
|--------------------------------------------------------------------------------------------------------------------------------------|---------|
| Crossing the phantom divide in scalar-tensor and vector-tensor theories (8 pages) .....                                              | L041301 |
| Shinji Tsujikawa                                                                                                                     |         |
| Locating the QCD critical point with input from neutron-star observations (8 pages) .....                                            | L041302 |
| Christian Ecker, Niko Jokela, and Matti Järvinen                                                                                     |         |
| Verifying the failing supernova constraint on dark photons with two-dimensional hydrodynamic simulations (7 pages) .....             | L041303 |
| Kanji Mori, Tomoya Takiwaki, and Kazunori Kohri                                                                                      |         |
| Nonminimally coupled gravity constraints from DESI DR2 data (7 pages) .....                                                          | L041304 |
| Jiaming Pan and Gen Ye                                                                                                               |         |
| Anomalous energy injection in the Gross-Pitaevskii framework for turbulence in neutron star glitches (7 pages) .....                 | L041305 |
| Anirudh Sivakumar, Pankaj Kumar Mishra, Ahmad A. Hujeirat, and Paulsamy Muruganandam                                                 |         |
| Postmerger emissions: A new and dominant contribution to the gravitational-wave background from binary neutron stars (7 pages) ..... | L041306 |
| Léonard Lehoucq, Irina Dvorkin, and Luciano Rezzolla                                                                                 |         |
| Rehabilitating the hyperextreme Kerr-Newman spacetimes: The end of cosmic censorship? (7 pages) .....                                | L041501 |
| V. S. Manko, I. M. Mejía, and E. Ruiz                                                                                                |         |
| Neglected solutions in quadratic gravity (6 pages) .....                                                                             | L041502 |
| Breno L. Giacchini and Ivan Kolář                                                                                                    |         |
| Effective dynamics of loop quantum Kaluza-Klein cosmology (7 pages) .....                                                            | L041503 |
| Shengzhi Li, Yongge Ma, Faqiang Yuan, and Xiangdong Zhang                                                                            |         |
| Celestial symmetries of black hole horizons (7 pages) .....                                                                          | L041504 |
| Romain Ruzziconi and Céline Zwikel                                                                                                   |         |
| Bondi-type accretion onto a Kerr black hole in the kinetic regime (6 pages) .....                                                    | L041505 |
| Ptryk Mach, Mehrab Momennia, and Olivier Sarbach                                                                                     |         |
| Primordial black hole ringdown: The irreducible stochastic gravitational wave background (6 pages) .....                             | L041506 |
| Valerio De Luca, Antonio J. Iovino, and Antonio Riotto                                                                               |         |
| ☞ Spread complexity rate as proper momentum (7 pages) .....                                                                          | L041901 |
| Pawel Caputa, Bowen Chen, Ross W. McDonald, Joan Simón, and Benjamin Strittmatter                                                    |         |
| Trivialization of the gravitational Green-Schwarz transformation in the nonrelativistic limit of string theory (6 pages) ....        | L041902 |
| Eric Lescano                                                                                                                         |         |
