PHYSICAL REVIEW D **THIRD SERIES, VOLUME 53, NUMBER 12** **15 JUNE 1996**

Zel'dovich-type approximation for an inhomogeneous universe in general relativity: Second-order solutions 6881
Heinz Russ, Masaaki Morita, Masumi Kasai, and Gerhard Börner
Cosmological model with a traversable wormhole 6889
Sung-Won Kim
Description of chaos in simple relativistic systems 6893
Marek Szydłowski and Adam Krawiec
Spectral representation of the spacetime structure: The ''distance'' between universes with different topologies 6902
Masafumi Seriu
Transport processes in the gravitational collapse of an anisotropic fluid 6921
J. Martínez
Three generations or more for an attractive gravity? 6941
Masahiro Tanaka
Search for ''polarized'' instantons in the vacuum 6946
M. Yu. Kuchiev
Validity of the ADM formulation in two-dimensional quantum gravity 6960
K. Ghoroku and K. Kaneko
Is the third coefficient of the Jones knot polynomial a quantum state of gravity? 6966
Jorge Griego
Path integrals and instantons in quantum gravity: Minisuperspace models 6979
Donald Marolf
Initial singularity problem in two-dimensional quantum cosmology 6991
J. Gamboa
Soluble models in two-dimensional dilaton gravity 6995
A. Fabbri and J. G. Russo
Stochastic theory of accelerated detectors in a quantum field 7003
Alpan Raval, B. L. Hu, and James Anglin
Principle of nongravitating vacuum energy and some of its consequences 7020
E. I. Guendelman and A. B. Kaganovich
Field theoretical quantum effects on the Kerr geometry 7026
Y. Satoh
Quasinormal modes of maximally charged black holes 7033
Hisashi Onozawa, Takashi Mishima, Takashi Okamura, and Hideki Ishihara
Quantum stability of accelerated black holes 7041
Piljin Yi
Decoherence of black holes by Hawking radiation 7050
Jean-Guy Demers and Claus Kiefer
Fundamental thermodynamical equation of a self-gravitating system 7062
Erik A. Martinez
Hawking radiation entropy and horizon divergences 7073
F. Belgiorno and M. Martellini
On the origin of the outgoing black hole modes 7082
Ted Jacobson
Validity of the semiclassical approximation and back reaction 7089
Sukanta Bose, Leonard Parker, and Yoav Peleg
Black hole in thermal equilibrium with a spin-2 quantum field 7094
David Hochberg and Sergey V. Sushkov
Pair creation of black holes by domain walls 7103
R. R. Caldwell, H. A. Chamblin, and G. W. Gibbons
