THIRD SERIES, VOLUME 56, NUMBER 8 ***CONTENTS*** **15 OCTOBER 1997**

RAPID COMMUNICATIONS

CDM models with a smooth component R4439
Michael S. Turner and Martin White

Exact solutions in two-dimensional string cosmology with back reaction R4444
Sukanta Bose and Sayan Kar

ARTICLES

Gravitational waves from inspiraling compact binaries: Second post-Newtonian waveforms as search templates 4449
Serge Droz and Eric Poisson

Binary pulsars as detectors of ultralow-frequency gravitational waves 4455
Sergei M. Kopeikin

Maximum likelihood analysis of clusters of ultrahigh energy cosmic rays 4470
Günter Sigl, Martin Lemoine, and Angela V. Olinto

Microwave background anisotropies from scaling seed perturbations 4480
Ruth Durrer and Mairi Sakellariadou

Cosmic microwave background anisotropies from second order gravitational perturbations 4494
Silvia Mollerach and Sabino Matarrese

Skewness in the cosmic microwave background anisotropy from an inflationary gravity wave background 4503
Somnath Bharadwaj, Dipak Munshi, and Tarun Souradeep

Getting around cosmic variance 4511
Marc Kamionkowski and Abraham Loeb

CMB mapping experiments: A designer's guide 4514
Max Tegmark

Quantum cosmological multidimensional Einstein-Yang-Mills model in an $R\times S^3\times S^d$ topology 4530
O. Bertolami, P. D. Fonseca, and P. V. Moniz

Numerical approach to the onset of the electroweak phase transition 4544
Masahide Yamaguchi and Jun'ichi Yokoyama

Initial conditions for supersymmetric inflation 4562
G. Lazarides and N. D. Vlachos

Cosmic strings in an open universe: Quantitative evolution and observational consequences 4568
P. P. Avelino, R. R. Caldwell, and C. J. A. P. Martins

Closet non-Gaussianity of anisotropic Gaussian fluctuations 4578
Pedro G. Ferreira and João Magueijo

Cumulants as non-Gaussian qualifiers 4592
Pedro G. Ferreira, João Magueijo, and Joseph Silk

Pre-big-bang inflation requires fine-tuning 4604
Michael S. Turner and Erick J. Weinberg

Stochastic gravitational background from inflationary phase transitions 4610
Carlo Baccigalupi, Luca Amendola, Pierluigi Fortini, and Franco Occhionero

Interpretation of the solutions of the Wheeler-DeWitt equation 4618
R. Parentani

PHYSICAL REVIEW D **THIRD SERIES, VOLUME 56, NUMBER 8** **15 OCTOBER 1997**

Cosmological properties of a class of Λ decaying cosmologies 4625
V. Silveira and I. Waga
Hadamard renormalization, conformal anomaly, and cosmological event horizons 4633
H. Ghafarnejad and H. Salehi
Density perturbations with relativistic thermodynamics 4640
Roy Maartens and Josep Triginer
Quantum decay of domain walls in cosmology. I. Instanton approach 4651
Shawn J. Kolitch and Douglas M. Eardley
Quantum decay of domain walls in cosmology. II. Hamiltonian approach 4663
Shawn J. Kolitch and Douglas M. Eardley
Asymptotic conditions of motion for radiating charged particles 4675
James L. Anderson
Gravitational Lorentz force and the description of the gravitational interaction 4689
V. C. de Andrade and J. G. Pereira
Criticality and bifurcation in the gravitational collapse of a self-coupled scalar field 4696
Eric W. Hirschmann and Douglas M. Eardley
Gauge-invariant Hamiltonian formalism for spherically symmetric gravitating shells 4706
P. Hájíček and J. Bičák
How to produce exotic matter using classical fields 4720
Dan N. Vollick
Maintaining a wormhole with a scalar field 4724
Dan N. Vollick
Dynamics of light cone cuts of null infinity 4729
Simonetta Frittelli, Carlos Kozameh, and Ezra T. Newman
Geometric structure of the generic static traversable wormhole throat 4745
David Hochberg and Matt Visser
Impulsive gravitational waves generated by null particles in de Sitter and anti–de Sitter backgrounds 4756
Jiří Podolský and Jerry B. Griffiths
Spherical collapse of a massless scalar field with semiclassical corrections 4768
Shai Ayal and Tsvi Piran
Well-behaved harmonic time slices of a charged, rotating, boosted black hole 4775
Gregory B. Cook and Mark A. Scheel
Post-Newtonian Lagrangian planetary equations 4782
Mirco Calura, Pierluigi Fortini, and Enrico Montanari
Radiative multipole moments of integer-spin fields in curved spacetime 4789
Stephen W. Leonard and Eric Poisson
Tensor perturbations in high-curvature string backgrounds 4815
M. Gasperini
Gravitational geons revisited 4824
Paul R. Anderson and Dieter R. Brill
Nonthreshold *D*-brane bound states and black holes with nonzero entropy 4834
Miguel S. Costa and Mirjam Cvetič
Exactly soluble sector of quantum gravity 4844
Joy Christian
Null dust in canonical gravity 4878
Jiří Bičák and Karel V. Kuchař
Casimir energies for massive scalar fields in a spherical geometry 4896
M. Bordag, E. Elizalde, K. Kirsten, and S. Leseduarte
Thermal particle creation in cosmological spacetimes: A stochastic approach 4905
Don Koks, B. L. Hu, Andrew Matacz, and Alpan Raval

(Continued)

PHYSICAL REVIEW D **THIRD SERIES, VOLUME 56, NUMBER 8** **15 OCTOBER 1997**

Heisenberg-picture approach to the evolution of the scalar fields in an expanding universe 4916
K. H. Cho, J. Y. Ji, S. P. Kim, C. H. Lee, and J. Y. Ryu
Quantum inequalities in two-dimensional Minkowski spacetime 4922
Éanna É. Flanagan
Scattering off the extreme Reissner-Nordström black hole in $N=2$ supergravity 4927
Takashi Okamura
Supersymmetry enhancement of D-p-branes and M-branes 4934
R. Kallosh and J. Kumar
Formation of topological black holes from gravitational collapse 4942
W. L. Smith and R. B. Mann
Perturbations in the Kerr-Newman dilatonic black hole background: Maxwell waves 4948
R. Casadio, B. Harms, Y. Leblanc, and P. H. Cox
Fermions in black hole space-time: Hawking radiation and back reaction 4962
Arundhati Dasgupta and Parthasarathi Majumdar
Nonminimal coupling and quantum entropy of a black hole 4968
Sergey N. Solodukhin
Universal low-energy dynamics for rotating black holes 4975
Juan Maldacena and Andrew Strominger
Can the effective string see higher partial waves? 4984
Steven S. Gubser
General rotating black holes in string theory: Greybody factors and event horizons 4994
Mirjam Cvetič and Finn Larsen
Operator cutoff regularization and renormalization group in Yang-Mills theory 5008
Sen-Ben Liao
Induced Chern-Simons-type terms in general metric nonlinear σ models 5034
F. M. de Carvalho Filho
$(1+1)$-dimensional Yang-Mills theory coupled to adjoint fermions on the light front 5040
Stephen S. Pinsky
Dynamical generation of extended objects in a $(1+1)$-dimensional chiral field theory: Nonperturbative Dirac operator resolvent analysis 5050
Joshua Feinberg and A. Zee
Vortex solutions in axial or chiral coupled nonrelativistic spinor-Chern-Simons theory 5066
Z. Németh
Solving the Bethe-Salpeter equation for bound states of scalar theories in Minkowski space 5071
Kensuke Kusaka, Ken Simpson, and Anthony G. Williams
Invariant measure in hot gauge theories 5086
O. A. Borisenko and J. Boháčik
Thermal and curvature effects to dynamical symmetry breaking 5097
Tomohiro Inagaki and Ken-ichi Ishikawa
Damping rates of hard momentum particles in a cold ultrarelativistic plasma 5108
Benoît Vanderheyden and Jean-Yves Ollitrault
Finite temperature effects on the neutrino decoupling in the early Universe 5123
N. Fornengo, C. W. Kim, and J. Song
Investigation of anomalous axial QED 5135
Christoph Adam
Fermion determinants in matrix models of QCD at nonzero chemical potential 5140
M. A. Halasz, A. D. Jackson, and J. J. M. Verbaarschot
Solitons in $(1+1)$-dimensional gauged σ models 5153
Pijush K. Ghosh

(Continued)

PHYSICAL REVIEW D **THIRD SERIES, VOLUME 56, NUMBER 8** **15 OCTOBER 1997**

Orientifolding of type II NS-five-branes 5160
Clifford V. Johnson

Closed inhomogeneous string cosmologies 5166
A. Feinstein, Ruth Lazkoz, and M. A. Vázquez-Mozo

New angles on D-branes 5172
J. C. Breckenridge, G. Michaud, and R. C. Myers

D-brane and gauge invariance in closed string field theory 5179
Koji Hashimoto and Hiroyuki Hata

Static solitons with nonzero Hopf number 5194
Jens Gladikowski and Meik Hellmund

SU(3) monopoles and their fields 5200
Patrick Irwin

$N=1$ supersymmetric product group theories in the Coulomb phase 5209
Csaba Csáki, Joshua Erlich, Daniel Freedman, and Witold Skiba

Nonholomorphic terms in $N=2$ supersymmetric Wilsonian actions and the renormalization group equation 5218
D. Bellisai, F. Fucito, M. Matone, and G. Travaglini

Enhancement of photon production from nonequilibrium disoriented chiral condensates 5233
D. Boyanovsky, H. J. de Vega, R. Holman, and S. Prem Kumar

Chiral symmetry breaking in QED in a magnetic field at finite temperature 5251
V. P. Gusynin and I. A. Shovkovy

Electrical conductivity in the early universe 5254
Gordon Baym and Henning Heiselberg

More on chiral-nonchiral dual pairs 5260
Peter Cho

BRIEF REPORTS

Textures and Newtonian gravity 5272
Eduardo Guéron and Patricio S. Letelier

Note on M(atrix) theory in seven dimensions with eight supercharges 5276
Suresh Govindarajan

Errata

Erratum: New method for constructing valid Hamiltonians for class-B spacetimes and the quantization of the general type-V cosmology [Phys. Rev. D **54**, 2691 (1996)] 5279
T. Christodoulakis, E. Korfiatis, and A. Paschos

Erratum: Entropy and uncertainty of squeezed quantum open systems [Phys. Rev. D **55**, 5917 (1997)] 5281
Don Koks, Andrew Matacz, and B. L. Hu

Cumulative Author Index 5282
