PHYSICAL REVIEW D

THIRD SERIES, VOLUME 57, NUMBER 2

15 JANUARY 1998

Static axially symmetric Einstein-Yang-Mills-dilaton solutions: Regular solutions	834
Burkhard Kleihaus and Jutta Kunz	
Explicit solution of Riemann-Hilbert problems for the Ernst equation	857
C. Klein and O. Richter	
Pseudospectral apparent horizon finders: An efficient new algorithm	863
Carsten Gundlach	
Spin effects in gravitational radiation back reaction. I. The Lense-Thirring approximation	876
László A. Gergely, Zoltán I. Perjés, and Mátyás Vasúth	
Improved filters for gravitational waves from inspiraling compact binaries	885
Thibault Damour, Bala R. Iyer, and B. S. Sathyaprakash	
Binary-induced gravitational collapse: A trivial example	908
Stuart L. Shapiro	
Lagrangian and Hamiltonian formalism for discontinuous fluid and gravitational field	914
P. Hájíček and J. Kijowski	
Spherically symmetric gravitating shell as a reparametrization-invariant system	936
P. Hájíček	
Stellar model in a fourth order theory of gravity	954
Daniel E. Barraco and Victor H. Hamity	
BRST antifield treatment of metric-affine gravity	961
Frank Gronwald	
Nonperturbative evolution equation for quantum gravity	971
M. Reuter	
Energy and directional signatures for plane quantized gravity waves	986
Donald E. Neville	
Immirzi parameter in quantum general relativity	1009
Carlo Rovelli and Thomas Thiemann	
Dirac-like formulation of quantum supersymmetric cosmology	1015
O. Obregón and C. Ramírez	
Supersymmetric quantum cosmology: The physical states	1027
Alfredo Macías, Eckehard W. Mielke, and José Socorro	
Global view of kinks in 1+1 gravity	1034
Thomas Klösch and Thomas Strobl	
States insensitive to the Unruh effect in multilevel detectors	1045
Karl-Peter Marzlin and Jürgen Audretsch	
Thermal and two-particle stress-energy must be ill defined on the two-dimensional Misner space chronology horizon	1052
Claes R. Cramer and Bernard S. Kay	
Effective gravity and $OSp(N,4)$ -invariant matter	1057
S. Bellucci	
One-loop supergravity corrections to black hole entropy and residual supersymmetry	1063
Renata Kallosh, J. Rahmfeld, and Wing Kai Wong	
Constant curvature black holes	1068
Máximo Bañados	
Improved initial data for black hole collisions	1073
Carlos O. Lousto and Richard H. Price	
Waveform propagation in black hole spacetimes: Evaluating the quality of numerical solutions	1084
L. Rezzolla, A. M. Abrahams, T. W. Baumgarte, G. B. Cook, M. A. Scheel, S. L. Shapiro, and S. A. Teukolsky	
Scattering of four-dimensional black holes	1092
Jeremy Michelson
