PHYSICAL REVIEW D

THIRD SERIES, VOLUME 57, NUMBER 6

15 MARCH 1998

Estimation of parameters of gravitational wave signals from coalescing binaries	3408
R. Balasubramanian and S. V. Dhurandhar	
Spin effects in gravitational radiation back reaction. II. Finite mass effects	3423
L. Gergely, Z. Perjés, and M. Vasúth	
Perturbations in dilaton-axion gravity coupled with electromagnetic fields	3433
R. Cartas-Fuentevilla	
Symplectic current for the field perturbations in dilaton-axion gravity coupled with Abelian fields	3443
R. Cartas-Fuentevilla	
Euclidean dilaton black hole vortex	3449
Rafał Moderski and Marek Rogatko	
Colliding waves in metric-affine gravity	3457
Alberto García, Claus Lämmerzahl, Alfredo Macías, Eckehard W. Mielke, and José Socorro	
Quantum gravity effects in the CGHS model of collapse to a black hole	3463
Madhavan Varadarajan	
Wave propagation in stochastic spacetimes: Localization, amplification, and particle creation	3474
B. L. Hu and K. Shiokawa	
Negative energy density states for the Dirac field in flat spacetime	3484
Dan N. Vollick	
Scalar field quantum inequalities in static spacetimes	3489
Michael J. Pfenning and L. H. Ford	
Upper bound for entropy in asymptotically de Sitter space-time	3503
Kengo Maeda, Tatsuhiko Koike, Makoto Narita, and Akihiro Ishibashi	
Branes at angles and black holes	3509
Vijay Balasubramanian, Finn Larsen, and Robert G. Leigh	
Black hole pairs and supergravity domain walls	3529
A. Chamblin and J. M. A. Ashbourn-Chamblin	
Hamiltonian thermodynamics of black holes in generic 2D dilaton gravity	3537
G. Kunstatter, R. Petryk, and S. Shelemy	
Time dependent variational calculations for the quantum fluctuations of the $\lambda\phi^4$ model	3548
Fábio L. Braghin	
Asymptotic freedom and bound states in Hamiltonian dynamics	3558
Stanisław D. Głazek and Kenneth G. Wilson	
Five-loop vacuum energy β function in ϕ^4 theory with $O(N)$ -symmetric and cubic interactions	3567
Boris Kastening	
Nonrelativistic limit of the scattering of spin- $\frac{1}{2}$ particles interacting with a Chern-Simons field	3579
M. Gomes and A. J. da Silva	
Quantum equivalence of σ models related by non-Abelian duality transformations	3585
L. K. Balázs, J. Balog, P. Forgács, N. Mohammedi, L. Palla, and J. Schnittger	
Model of supersymmetric quantum field theory with broken parity symmetry	3595
Carl M. Bender and Kimball A. Milton	
Infrared singularities in the null-plane bound-state equation when going to 1 + 1 dimensions	3609
A. Bassetto	
Schwinger and Thirring models at finite chemical potential and temperature	3618
Ramón F. Alvarez-Estrada and Angel Gómez Nicola	
Heat bath particle number spectrum	3634
P. Jizba	
Nonequilibrium evolution of a “tsunami,” a high multiplicity initial quantum state: Dynamical symmetry breaking	3653
Daniel Boyanovsky, Hector J. de Vega, Richard Holman, S. Prem Kumar, and Robert D. Pisarski
