### RAPID COMMUNICATIONS

|                                                                                                                                                |       |
|------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Search for the decays $B_d^0 \rightarrow \mu^+ \mu^-$ and $B_s^0 \rightarrow \mu^+ \mu^-$ in $p\bar{p}$ collisions at $\sqrt{s}=1.8$ TeV ..... | R3811 |
| F. Abe <i>et al.</i> (CDF Collaboration)                                                                                                       |       |
| $Z\gamma$ production in $p\bar{p}$ collisions at $\sqrt{s}=1.8$ TeV and limits on anomalous $ZZ\gamma$ and $Z\gamma\gamma$ couplings .....     | R3817 |
| B. Abbott <i>et al.</i> (D0 Collaboration)                                                                                                     |       |
| Multigrid implementation of the Fourier acceleration method for Landau gauge fixing .....                                                      | R3822 |
| Attilio Cucchieri and Tereza Mendes                                                                                                            |       |
| Remarks on muon $g-2$ experiments and possible $CP$ violation in $\pi \rightarrow \mu \rightarrow e$ decay .....                               | R3827 |
| Daniel M. Kaplan                                                                                                                               |       |
| Heavy hybrid states from NRQCD .....                                                                                                           | R3829 |
| T. Manke, I. T. Drummond, R. R. Horgan, and H. P. Shanahan (UKQCD Collaboration)                                                               |       |
| Relaxing atomic parity violation constraints on new physics .....                                                                              | R3833 |
| V. Barger, Kingman Cheung, D. P. Roy, and D. Zeppenfeld                                                                                        |       |
| New constraints on $R$ -parity violation from $K$ and $B$ systems .....                                                                        | R3837 |
| Gautam Bhattacharyya and Amitava Raychaudhuri                                                                                                  |       |
| Energy and zenith angle distribution of upward going muons and neutrino oscillations .....                                                     | R3842 |
| Paolo Lipari and Maurizio Lusignoli                                                                                                            |       |

### ARTICLES

|                                                                                                                                                           |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Search for the decay $B \rightarrow D_{s1}^+(2536)X$ .....                                                                                                | 3847 |
| M. Bishai <i>et al.</i> (CLEO Collaboration)                                                                                                              |      |
| Search for $\psi(2S)$ production in $e^+e^-$ annihilations at 4.03 GeV .....                                                                              | 3854 |
| J. Z. Bai <i>et al.</i> (BES Collaboration)                                                                                                               |      |
| $p\bar{p}$ annihilation at rest into $K_L K^\pm \pi^\mp$ .....                                                                                            | 3860 |
| A. Abele <i>et al.</i>                                                                                                                                    |      |
| Unified approach to the classical statistical analysis of small signals .....                                                                             | 3873 |
| Gary J. Feldman and Robert D. Cousins                                                                                                                     |      |
| Quenched approximation artifacts: A study in two-dimensional QED .....                                                                                    | 3890 |
| W. Bardeen, A. Duncan, E. Eichten, and H. Thacker                                                                                                         |      |
| Monopole percolation in the compact Abelian Higgs model .....                                                                                             | 3902 |
| M. Baig and J. Clua                                                                                                                                       |      |
| Scaling study of the two-flavor chiral phase transition with the Kogut-Susskind quark action in lattice QCD .....                                         | 3910 |
| S. Aoki, M. Fukugita, S. Hashimoto, N. Ishizuka, Y. Iwasaki, K. Kanaya, Y. Kuramashi, H. Mino,<br>M. Okawa, A. Ukawa, and T. Yoshié (JLQCD Collaboration) |      |
| Block spin effective action for 4D SU(2) finite temperature lattice gauge theory .....                                                                    | 3923 |
| Klaus Pinn and Stefano Vinti                                                                                                                              |      |
| $CPT$ and Lorentz tests in Penning traps .....                                                                                                            | 3932 |
| Robert Bluhm, V. Alan Kostelecký, and Neil Russell                                                                                                        |      |
| Non-Abelian flavor symmetry and $R$ parity .....                                                                                                          | 3944 |
| Gautam Bhattacharyya                                                                                                                                      |      |
| Instantons and the chiral phase transition at nonzero baryon density .....                                                                                | 3950 |
| T. Schäfer                                                                                                                                                |      |
