### RAPID COMMUNICATIONS

|                                                                                                     |        |
|-----------------------------------------------------------------------------------------------------|--------|
| Isocurvature mechanism for structure formation (4 pages) .....                                      | 021301 |
| Wayne Hu                                                                                            |        |
| Domain walls and the decay rate of the excited vacua in large $N$ Yang-Mills theory (3 pages) ..... | 021501 |
| M. Shifman                                                                                          |        |
| Vacuum defects without a vacuum (4 pages) .....                                                     | 021701 |
| Inyong Cho and Alexander Vilenkin                                                                   |        |
| Effective action for membrane dynamics in DLCQ M theory on a two-torus (4 pages) .....              | 021901 |
| Seungjoon Hyun, Youngjai Kiem, and Hyeonjoon Shin                                                   |        |

### ARTICLES

|                                                                                                                                                                                                                    |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| New limits on dark-matter weakly interacting particles from the Heidelberg-Moscow experiment (5 pages) .....                                                                                                       | 022001 |
| L. Baudis, J. Hellmig, G. Heusser, H. V. Klapdor-Kleingrothaus, S. Kolb, B. Majorovits, H. Päs,<br>Y. Ramachers, H. Strecker, V. Alexeev, A. Bakalyarov, A. Balysh, S. T. Belyaev, V. I. Lebedev, and<br>S. Zhukov |        |
| Magnetized local supercluster and the origin of the highest energy cosmic rays (7 pages) .....                                                                                                                     | 023001 |
| Pasquale Blasi and Angela V. Olinto                                                                                                                                                                                |        |
| High energy neutrinos from astrophysical sources: An upper bound (8 pages) .....                                                                                                                                   | 023002 |
| Eli Waxman and John Bahcall                                                                                                                                                                                        |        |
| Neutrino sparking and the neutron→strange stars conversion (3 pages) .....                                                                                                                                         | 023003 |
| J. E. Horvath and H. Vucetich                                                                                                                                                                                      |        |
| Transport coefficients in the early universe (13 pages) .....                                                                                                                                                      | 023004 |
| Jarkko Ahonen                                                                                                                                                                                                      |        |
| No pulsar kicks from deformed neutrinospheres (8 pages) .....                                                                                                                                                      | 023005 |
| H.-Thomas Janka and Georg G. Raffelt                                                                                                                                                                               |        |
| Superheavy dark matter (8 pages) .....                                                                                                                                                                             | 023501 |
| Daniel J. H. Chung, Edward W. Kolb, and Antonio Riotto                                                                                                                                                             |        |
| Inflation, singular instantons, and eleven dimensional cosmology (10 pages) .....                                                                                                                                  | 023502 |
| S. W. Hawking and Harvey S. Reall                                                                                                                                                                                  |        |
| Toy model for open inflation (6 pages) .....                                                                                                                                                                       | 023503 |
| Andrei Linde                                                                                                                                                                                                       |        |
| Near-solar supersymmetric dark matter annihilations (4 pages) .....                                                                                                                                                | 023504 |
| Steven C. Strausz                                                                                                                                                                                                  |        |
