PHYSICAL REVIEW D

THIRD SERIES, VOLUME 59, NUMBER 5

1 MARCH 1999

Leading particle effect, inelasticity, and the connection between average multiplicities in e^+e^- and pp processes (8 pages)	054006
M. Batista and R. J. M. Covolan	
Taming the penguin contributions in the $B_d^0(t) \rightarrow \pi^+ \pi^-$ CP asymmetry: Observables and minimal theoretical input (24 pages)	054007
Jérôme Charles	
Calculation of the QED coupling $\hat{\alpha}(M_Z)$ in the modified minimal-subtraction scheme (7 pages)	054008
Jens Erler	
$P_{33}(1232)$ resonance contribution to the amplitudes $M_{1+}^{3/2}, E_{1+}^{3/2}, S_{1+}^{3/2}$ from an analysis of the $p(e, e' p) \pi^0$ data at $Q^2 = 2.8, 3.2$, and 4 (GeV/c)^2 within the dispersion relation approach (9 pages)	054009
I. G. Aznauryan and S. G. Stepanyan	
Determination of small x shadowing corrections at DESY HERA (8 pages)	054010
A. L. Ayala Filho, M. B. Gay Ducati, and Victor P. Gonçalves	
Heavy flavor decays, OPE, and duality in the two-dimensional 't Hooft model (20 pages)	054011
I. Bigi, M. Shifman, N. Uraltsev, and A. Vainshtein	
QCD corrections to associated Higgs-boson-heavy-quark production (9 pages)	054012
S. Dawson and L. Reina	
Chiral perturbation theory with lattice regularization (5 pages)	054013
I. A. Shushpanov and A. V. Smilga	
Possible large direct CP asymmetry in hadronic $B^\pm \rightarrow \pi^\pm \eta'$ decays (4 pages)	054014
Mohammad R. Ahmady and Emi Kou	
DCC pion production from classical sources (9 pages)	054015
A. Dyrek and M. Sadzikowski	
J/ψ production at CERN LEP: Revisited and resummed (7 pages)	054016
C. Glenn Boyd, Adam K. Leibovich, and I. Z. Rothstein	
Charge asymmetry of heavy quarks at hadron colliders (9 pages)	054017
J. H. Kühn and G. Rodrigo	
Oscillations of recoil particles against mixed states (7 pages)	054018
H. Burkhardt, J. Lowe, G. J. Stephenson Jr., and T. Goldman	
Resonances in radiative hyperon decays (7 pages)	054019
Bugra Borasoy and Barry R. Holstein	
Nonfactorization in Cabibbo-favored B decays (9 pages)	054020
F. M. Al-Shamali and A. N. Kamal	
Baryon axial vector currents (16 pages)	054021
B. Borasoy	
Quark-hadron duality in the 't Hooft model for meson weak decays: Different quark diagram topologies (14 pages)	054022
Benjamin Grinstein and Richard F. Lebed	
Effect of m_c on b quark chromomagnetic interaction and on-shell two-loop integrals with two masses (10 pages)	054023
A. I. Davydychev and A. G. Grozin	
Statistical analysis and the equivalent of a Thouless energy in lattice QCD Dirac spectra (14 pages)	054501
T. Guhr, J.-Z. Ma, S. Meyer, and T. Wilke	
Imaginary chemical potential and finite fermion density on the lattice (4 pages)	054502
Mark Alford, Anton Kapustin, and Frank Wilczek	
Gauge-invariant quark-antiquark nonlocal condensates in lattice QCD (6 pages)	054503
M. D'Elia, A. Di Giacomo, and E. Meggiolaro	
Pion-nucleon σ term with dynamical Wilson fermions (10 pages)	054504
S. Güsken, P. Ueberholz, J. Viehoff, N. Eicker, P. Lacock, T. Lippert, K. Schilling, A. Spitz, and T. Struckmann (SESAM Collaboration)
