PHYSICAL REVIEW D

THIRD SERIES, VOLUME 60, NUMBER 10

15 NOVEMBER 1999

Conserved variable in the perturbed hydrodynamic world model (5 pages)	103512
Jai-chan Hwang	
Preheating in generalized Einstein theories (7 pages)	103513
Anupam Mazumdar and Luís E. Mendes	
Statistical physics of cosmological networks of string loops (11 pages)	103514
João Magueijo, Håvard Sandvik, and Danièle A. Steer	
Constructing exact perturbations of the standard cosmological models (12 pages)	103515
Carlos F. Sopuerta	
Cosmic microwave background anisotropy window functions revisited (5 pages)	103516
Lloyd Knox	
Preheating in supersymmetric hybrid inflation (20 pages)	103517
M. Bastero-Gil, S. F. King, and J. Sanderson	
Superheavy dark matter and thermal inflation (6 pages)	103518
T. Asaka, M. Kawasaki, and T. Yanagida	
Gödel-type universes in string-inspired charged gravity (13 pages)	103519
P. Kanti and C. E. Vayonakis	
Reionization by active sources and its effects on the cosmic microwave background (19 pages)	103520
Jochen Weller, Richard A. Battye, and Andreas Albrecht	
Cosmological implications of a relic neutrino asymmetry (7 pages)	103521
Julien Lesgourgues and Sergio Pastor	
Gravitational production of gravitinos (8 pages)	103522
Martin Lemoine	
Surface terms as counterterms in the AdS-CFT correspondence (14 pages)	104001
Roberto Emparan, Clifford V. Johnson, and Robert C. Myers	
Phenomenology of low quantum gravity scale models (7 pages)	104002
Karim Benakli	
Entropy of a scalar field in a (3 + 1)-dimensional constant curvature black hole background (6 pages)	104003
K. Ghosh	
Natural vacua in hyperbolic Friedmann-Robertson-Walker spacetimes (4 pages)	104004
Ian H. Redmount	
Expanding, axisymmetric pure-radiation gravitational fields with a simple twist (3 pages)	104005
B. V. Ivanov	
Peeling properties of lightlike signals in general relativity (7 pages)	104006
G. F. Bressange and P. A. Hogan	
Choptuik scaling in six dimensions (5 pages)	104007
David Garfinkle, Curt Cutler, and G. Comer Duncan	
G_1 spacetimes with gravitational and scalar waves (10 pages)	104008
Ruth Lazkoz	
Comment on entropy bounds and the generalized second law (4 pages)	104009
M. A. Pelath and Robert M. Wald	
Numerical simulations of Gowdy spacetimes on $S^2 \times S^1 \times R$ (6 pages)	104010
David Garfinkle	
Renormalization of the long-wavelength solution of Einstein's equation (7 pages)	104011
Yasusada Nambu and Yoshiyuki Y. Yamaguchi	
AdS-CFT correspondence and the information paradox (7 pages)	104012
David A. Lowe and Lárus Thorlacius	
Fluctuations of the Hawking flux (14 pages)	104013
C.-H. Wu and L. H. Ford	
Robust evolution system for numerical relativity (6 pages)	104014
A. Arbona, C. Bona, J. Massó, and J. Stela	

(Continued)
