PHYSICAL REVIEW D

THIRD SERIES, VOLUME 61, NUMBER 2

15 JANUARY 2000

Quantum kinetic equations and dark matter abundances reconsidered (4 pages)	023509
Anupam Singh and Mark Srednicki	
Nonequilibrium relativistic thermodynamics in bulk viscous cosmology (10 pages)	023510
Patrick Ilg and Hans Christian Öttinger	
Cosmological challenges in theories with extra dimensions and remarks on the horizon problem (13 pages)	023511
Daniel J. H. Chung and Katherine Freese	
Extending the DAMA annual-modulation region by inclusion of the uncertainties in astrophysical velocities (9 pages)	023512
P. Belli, R. Bernabei, A. Bottino, F. Donato, N. Fornengo, D. Prosperi, and S. Scopel	
Inflation from extra dimensions (5 pages)	023513
James M. Cline	
Detection of neutralino annihilation photons from external galaxies (10 pages)	023514
E. A. Baltz, C. Briot, P. Salati, R. Taillet, and J. Silk	
Gravitational clustering in a D -dimensional universe (4 pages)	023515
T. Padmanabhan and Nissim Kanekar	
Detailed study of BBN implications of neutrino oscillation generated neutrino asymmetries in some four neutrino models (14 pages)	023516
R. Foot	
Double inflation in supergravity and the large scale structure (9 pages)	023517
Toshiyuki Kanazawa, M. Kawasaki, Naoshi Sugiyama, and T. Yanagida	
Scalar-tensor gravity and quintessence (6 pages)	023518
Nicola Bartolo and Massimo Pietroni	
On metric preheating (5 pages)	023519
K. Jedamzik and G. Sigl	
Evolution of linear gravitational and electromagnetic perturbations inside a Kerr black hole (20 pages)	024001
Amos Ori	
Classical sequential growth dynamics for causal sets (16 pages)	024002
D. P. Rideout and R. D. Sorkin	
Analytic approximation and an improved method for computing the stress-energy of quantized scalar fields in Robertson-Walker spacetimes (5 pages)	024003
Paul R. Anderson and Wayne Eaker	
Electromagnetic contribution to gravitational mass of a current-conducting channel (6 pages)	024004
Boris E. Meierovich	
Signature of chaos in gravitational waves from a spinning particle (9 pages)	024005
Shingo Suzuki and Kei-ichi Maeda	
Vortices and black holes in dilatonic gravity (12 pages)	024006
Caroline Santos and Ruth Gregory	
Statistical mechanics on axially symmetric space-times with the Killing horizon and entropy of rotating black holes in induced gravity (10 pages)	024007
V. P. Frolov and D. V. Fursaev	
Brane junctions in the Randall-Sundrum scenario (8 pages)	024008
Csaba Csáki and Yuri Shirman	
Bounds on neutron-star moments of inertia and the evidence for general relativistic frame dragging (8 pages)	024009
Vassiliki Kalogera and Dimitrios Psaltis	
Energy-momentum tensor of particles created in an expanding universe (22 pages)	024010
Salman Habib, Carmen Molina-París, and Emil Mottola	
Integrable models and degenerate horizons in two-dimensional gravity (9 pages)	024011
J. Cruz, A. Fabbri, D. J. Navarro, and J. Navarro-Salas	

(Continued)
