PHYSICAL REVIEW D **THIRD SERIES, VOLUME 61, NUMBER 8** **15 APRIL 2000**

Relics of the cosmological QCD phase transition *(8 pages)* 083509
Abhijit Bhattacharyya, Jan-e Alam, Sourav Sarkar, Pradip Roy, Bikash Sinha, Sibaji Raha, and Pijushpani Bhattacharjee
Remarks on cosmic string formation during preheating on lattice simulations *(7 pages)* 083510
S. Kasuya and M. Kawasaki
Cosmological particle production, causal thermodynamics, and inflationary expansion *(12 pages)* 083511
Winfried Zimdahl
Leptogenesis in an inflationary universe *(15 pages)* 083512
T. Asaka, K. Hamaguchi, M. Kawasaki, and T. Yanagida
Reheating temperature and inflaton mass bounds from thermalization after inflation *(5 pages)* 083513
John McDonald
Cosmology with the D*p*-brane gas *(4 pages)* 083514
Chanyong Park, Sang-Jin Sin, and Sunggeun Lee
Primordial gravitational wave background in string cosmology *(19 pages)* 083515
M. P. Infante and N. Sánchez
Particle production in the oscillating inflation model *(12 pages)* 083516
Shinji Tsujikawa
Quantum dew: Formation of quantum liquid in a nonequilibrium Bose gas *(5 pages)* 083517
S. Khlebnikov and I. Tkachev
Nonvacuum initial states for cosmological perturbations of quantum-mechanical origin *(15 pages)* 083518
Jérôme Martin, Alain Riazuelo, and Mairi Sakellariadou
Magnetized cosmological perturbations *(15 pages)* 083519
Christos G. Tsagas and Roy Maartens
Relative entropy for compact Riemann surfaces *(10 pages)* 084001
J. Gaite
Dynamic and thermodynamic stability and negative modes in Schwarzschild–anti-de Sitter black holes *(13 pages)* 084002
Tim Prestidge
Regular (2+1)-dimensional black holes within nonlinear electrodynamics *(5 pages)* 084003
Mauricio Cataldo and Alberto García
Evolution of circular, nonequatorial orbits of Kerr black holes due to gravitational-wave emission *(28 pages)* 084004
Scott A. Hughes
Axion model in extra dimensions with TeV scale gravity *(11 pages)* 084005
Sanghyeon Chang, Shiro Tazawa, and Masahiro Yamaguchi
Continuous self-similarity breaking in critical collapse *(14 pages)* 084006
Andrei V. Frolov
Holographic formulation of quantum general relativity *(13 pages)* 084007
Lee Smolin
Effective noise in a stochastic description of inflation *(7 pages)* 084008
S. Winitzki and A. Vilenkin
Nonminimally coupled scalar fields in homogeneous universes *(16 pages)* 084009
G. L. Alberghi, R. Casadio, and A. Gruppuso
Two-dimensional effective action for matter fields coupled to the dilaton *(12 pages)* 084010
Yu. V. Gusev and A. I. Zelnikov
Nonsingular black hole *(6 pages)* 084011
Aleksandar Bogojević and Dejan Stojković
Quantum inequalities and ''quantum interest'' as eigenvalue problems *(14 pages)* 084012
Christopher J. Fewster and Edward Teo
