PHYSICAL REVIEW D

THIRD SERIES, VOLUME 63, NUMBER 1

1 JANUARY 2001

|                                                                                                                                                                                                                                   |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Collective modes in neutrino “beam” electron-positron plasma interactions (18 pages) .....                                                                                                                                        | 013008 |
| Hans-Thomas Elze, Takeshi Kodama, and Reuven Opher                                                                                                                                                                                |        |
| Setting confidence belts (9 pages) .....                                                                                                                                                                                          | 013009 |
| Byron P. Roe and Michael B. Woodroffe                                                                                                                                                                                             |        |
| Gluon distributions in nucleons and pions at a low resolution scale (6 pages) .....                                                                                                                                               | 014001 |
| H. R. Christiansen and J. Magnin                                                                                                                                                                                                  |        |
| Matter effects in the $D^0$ - $\bar{D}^0$ system (5 pages) .....                                                                                                                                                                  | 014002 |
| João P. Silva                                                                                                                                                                                                                     |        |
| Final-state interaction and $B \rightarrow KK$ decays in perturbative QCD (12 pages) .....                                                                                                                                        | 014003 |
| Chuan-Hung Chen and Hsiang-nan Li                                                                                                                                                                                                 |        |
| Analytical heavy quark expansion in the 't Hooft model (13 pages) .....                                                                                                                                                           | 014004 |
| Matthias Burkardt and Nikolai Uraltsev                                                                                                                                                                                            |        |
| Hadronic invariant mass spectrum in $B \rightarrow X_u l \nu$ decay with a lepton energy cut (7 pages) .....                                                                                                                      | 014005 |
| K. K. Jeong, C. S. Kim, and Yeong Gyun Kim                                                                                                                                                                                        |        |
| Summing Sudakov logarithms in $B \rightarrow X_s \gamma$ in effective field theory (13 pages) .....                                                                                                                               | 014006 |
| Christian W. Bauer, Sean Fleming, and Michael Luke                                                                                                                                                                                |        |
| Finding $\eta'_c$ and $h_c(^1P_1)$ at DESY HERA-B (6 pages) .....                                                                                                                                                                 | 014007 |
| Cong-Feng Qiao and Changzheng Yuan                                                                                                                                                                                                |        |
| The strong isospin-breaking correction for the gluonic penguin contribution to $\epsilon'/\epsilon$ at next-to-leading order in the chiral expansion (9 pages) .....                                                              | 014008 |
| Carl E. Wolfe and Kim Maltman                                                                                                                                                                                                     |        |
| Examination of direct-photon and pion production in proton-nucleon collisions (7 pages) .....                                                                                                                                     | 014009 |
| L. Apanasevich, M. Begel, C. Bromberg, T. Ferbel, G. Ginther, J. Huston, S. E. Kuhlmann, P. Slattery, M. Zieliński, and V. Zutshi                                                                                                 |        |
| Weak decay of uniformly accelerated protons and related processes (10 pages) .....                                                                                                                                                | 014010 |
| Daniel A. T. Vanzella and George E. A. Matsas                                                                                                                                                                                     |        |
| Ground states and excitation spectra of baryons in a non-Coulombic power-law potential model (12 pages) ..                                                                                                                        | 014011 |
| S. N. Jena, P. Panda, and T. C. Tripathy                                                                                                                                                                                          |        |
| Dynamical growth of the hadron bubbles during the quark-hadron phase transition (8 pages) .....                                                                                                                                   | 014012 |
| P. Shukla, A. K. Mohanty, and S. K. Gupta                                                                                                                                                                                         |        |
| Looking for novel $CP$ -violating effects in $\bar{B} \rightarrow K^* l^+ l^-$ (14 pages) .....                                                                                                                                   | 014013 |
| F. Krüger and E. Lunghi                                                                                                                                                                                                           |        |
| Supersymmetric effects on isospin symmetry breaking and direct $CP$ violation in $B \rightarrow \rho \gamma$ (6 pages) .....                                                                                                      | 014014 |
| A. Ali, L. T. Handoko, and D. London                                                                                                                                                                                              |        |
| Phenomenology of nonstandard $Z$ couplings in exclusive semileptonic $b \rightarrow s$ transitions (16 pages) .....                                                                                                               | 014015 |
| Gerhard Buchalla, Gudrun Hiller, and Gino Isidori                                                                                                                                                                                 |        |
| Contribution of inelastic rescattering to $B \rightarrow \pi \pi, KK$ decays (10 pages) .....                                                                                                                                     | 014016 |
| P. Żenczykowski                                                                                                                                                                                                                   |        |
| Effective Lagrangian induced by the anomalous Wess-Zumino action and the exotic resonance state with $I^G(J^{PC}) = 1^-(1^-+)$ in the $\rho \pi, \eta \pi, \eta' \pi$ , and $K^* \bar{K} + \bar{K}^* K$ channels (10 pages) ..... | 014017 |
| N. N. Achasov and G. N. Shestakov                                                                                                                                                                                                 |        |
| Single top quark production as a window to physics beyond the standard model (15 pages) .....                                                                                                                                     | 014018 |
| Tim M. P. Tait and C.-P. Yuan                                                                                                                                                                                                     |        |
| Intrinsic and dynamically generated scalar meson states (9 pages) .....                                                                                                                                                           | 014019 |
| C. M. Shakin and Huangsheng Wang                                                                                                                                                                                                  |        |
| Coherent production of hard dijets on nuclei in QCD (13 pages) .....                                                                                                                                                              | 014020 |
| N. N. Nikolaev, W. Schäfer, and G. Schwiete                                                                                                                                                                                       |        |
| Higgs boson production: A comparison of parton showers and resummation (12 pages) .....                                                                                                                                           | 014021 |
| C. Balázs, J. Huston, and I. Puljak                                                                                                                                                                                               |        |
