PHYSICAL REVIEW D **THIRD SERIES, VOLUME 63, NUMBER 2** **15 JANUARY 2001**

Adiabatic and entropy perturbations from inflation *(11 pages)* 023506
Christopher Gordon, David Wands, Bruce A. Bassett, and Roy Maartens
Cosmological thermodynamics and deflationary gas universe *(11 pages)* 023507
Winfried Zimdahl and Alexander B. Balakin
Recovery of the Schwarzschild metric in theories with localized gravity beyond linear order *(9 pages)* 024001
Ioannis Giannakis and Hai-cang Ren
Gravitational wave damping of neutron star wobble *(9 pages)* 024002
Curt Cutler and David Ian Jones
Statistical entropy of a stationary dilaton black hole from the Cardy formula *(6 pages)* 024003
Jiliang Jing and Mu-Lin Yan
Moduli fields and brane tensions: Generalizing the junction conditions *(11 pages)* 024004
Carlos Barceló and Matt Visser
Gauge fixing and the Hamiltonian for cylindrical spacetimes *(12 pages)* 024005
Guillermo A. Mena Marugán
Uniformly accelerating black holes in a de Sitter universe *(6 pages)* 024006
J. Podolský and J. B. Griffiths
Structure of nonspacelike geodesics in dust collapse *(8 pages)* 024007
S. S. Deshingkar and P. S. Joshi
Quantum states and the statistical entropy of the charged black hole *(11 pages)* 024008
Cenalo Vaz and Louis Witten
Behavior of Kasner cosmologies with induced matter *(6 pages)* 024009
Paul Halpern
Spontaneous loss of charge of the Reissner-Nordström black hole *(4 pages)* 024010
Cl. Gabriel
Dynamic cosmic strings. I *(14 pages)* 024011
K. R. P. Sjödin, U. Sperhake, and J. A. Vickers
Dynamic cosmic strings. II. Numerical evolution of excited cosmic strings *(15 pages)* 024012
U. Sperhake, K. R. P. Sjödin, and J. A. Vickers
Vibration modes of giant gravitons *(10 pages)* 024013
Sumit R. Das, Antal Jevicki, and Samir D. Mathur
Particle definition in the presence of black holes *(20 pages)* 024014
Ralf Schützhold
Self-force on charges in the spacetime of spherical shells *(18 pages)* 024015
Lior M. Burko, Yuk Tung Liu, and Yoav Soen
Perturbations of self-gravitating, ellipsoidal superfluid-normal fluid mixtures *(21 pages)* 024016
A. Sedrakian and I. Wasserman
Unsharp degrees of freedom and the generating of symmetries *(8 pages)* 024017
Achim Kempf
Constraints on brane-localized gravity *(8 pages)* 024018
Philip D. Mannheim
Rotational modes of relativistic stars: Analytic results *(26 pages)* 024019
Keith H. Lockitch, Nils Andersson, and John L. Friedman
Black holes in nonflat backgrounds: The Schwarzschild black hole in the Einstein universe *(5 pages)* 024020
K. Rajesh Nayak, M. A. H. MacCallum, and C. V. Vishveshwara
Second law of black hole mechanics for all 2-dimensional dilaton theories *(11 pages)* 024021
Norbert Düchting and Thomas Strobl
Gluing 4-simplices: A derivation of the Barrett-Crane spin foam model for Euclidean quantum gravity *(13 pages)* 024022
Daniele Oriti and Ruth M. Williams
