THIRD SERIES, VOLUME 80, NUMBER 1

D1 JULY 2009

|                                                                                                                                                             |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Non-Boltzmann behavior in models of interacting neutrinos (9 pages) . . . . .                                                                               | 013011 |
| Bruce H.J. McKellar, Ivona Okuniewicz, and James Quach                                                                                                      |        |
| Measuring the Higgs boson self-coupling at high energy $e^+e^-$ colliders (20 pages) . . . . .                                                              | 013012 |
| U. Baur                                                                                                                                                     |        |
| Radiative inverse seesaw mechanism for nonzero neutrino mass (4 pages) . . . . .                                                                            | 013013 |
| Ernest Ma                                                                                                                                                   |        |
| Predictions of light hadronic decays of heavy quarkonium $^1D_2$ states in nonrelativistic QCD (15 pages) . . . . .                                         | 014001 |
| Ying Fan, Zhi-Guo He, Yan-Qing Ma, and Kuang-Ta Chao                                                                                                        |        |
| Time dependence of nucleon correlation functions in chiral perturbation theory (8 pages) . . . . .                                                          | 014002 |
| Brian C. Tiburzi                                                                                                                                            |        |
| Isospin breaking effects in the $X(3872)$ resonance (12 pages) . . . . .                                                                                    | 014003 |
| D. Gamermann and E. Oset                                                                                                                                    |        |
| Exclusive nonleptonic $B \rightarrow VV$ decays (10 pages) . . . . .                                                                                        | 014004 |
| N. Barik, Sk. Naimuddin, P.C. Dash, and Susmita Kar                                                                                                         |        |
| Exclusive $B_s$ decays to the charmed mesons $D_s^+(1968, 2317)$ in the standard model (12 pages) . . . . .                                                 | 014005 |
| Run-Hui Li, Cai-Dian Lü, and Yu-Ming Wang                                                                                                                   |        |
| $F_L$ proton structure function from the unified DGLAP/BFKL approach (11 pages) . . . . .                                                                   | 014006 |
| K. Golec-Biernat and A. M. Staśto                                                                                                                           |        |
| Heavy quark potential as a function of shear viscosity at strong coupling (8 pages) . . . . .                                                               | 014007 |
| Jorge Noronha and Adrian Dumitru                                                                                                                            |        |
| Role of unphysical solution in nucleon QCD sum rules (8 pages) . . . . .                                                                                    | 014008 |
| E.G. Drukarev, M.G. Ryskin, and V.A. Sadovnikova                                                                                                            |        |
| Scattering of $D$ and $D^*$ mesons off the $X(3872)$ (7 pages) . . . . .                                                                                    | 014009 |
| David L. Canham, H.-W. Hammer, and Roxanne P. Springer                                                                                                      |        |
| Backreaction and particle production in $(3+1)$ -dimensional QED (19 pages) . . . . .                                                                       | 014010 |
| Bogdan Mihaila, Fred Cooper, and John F. Dawson                                                                                                             |        |
| Fermion particle production in semiclassical Boltzmann-Vlasov transport theory (11 pages) . . . . .                                                         | 014011 |
| John F. Dawson, Bogdan Mihaila, and Fred Cooper                                                                                                             |        |
| Coupled-channel and screening effects in charmonium spectrum (7 pages) . . . . .                                                                            | 014012 |
| Bai-Qing Li, Ce Meng, and Kuang-Ta Chao                                                                                                                     |        |
| Relativistic corrections to heavy quark fragmentation to $S$ -wave heavy mesons (9 pages) . . . . .                                                         | 014013 |
| Wen-long Sang, Lan-fei Yang, and Yu-qi Chen                                                                                                                 |        |
| $\eta(1405)$ in a chiral approach based on mixing of the pseudoscalar glueball with the first radial excitations of $\eta$ and $\eta'$ (12 pages) . . . . . | 014014 |
| Thomas Gutsche, Valery E. Lyubovitskij, and Malte C. Tichy                                                                                                  |        |
| Vector interaction, charge neutrality, and multiple chiral critical-point structures (14 pages) . . . . .                                                   | 014015 |
| Zhao Zhang and Teiji Kunihiro                                                                                                                               |        |
| Hybrid meson masses and the correlated Gaussian basis (11 pages) . . . . .                                                                                  | 014016 |
| Vincent Mathieu                                                                                                                                             |        |
| Parton content of the nucleon from distribution amplitudes and transition distribution amplitudes (18 pages) . . . . .                                      | 014017 |
| B. Pasquini, M. Pincetti, and S. Boffi                                                                                                                      |        |
| Chiral logarithms in $\Delta S = 1$ kaon decay amplitudes in general effective flavor theories (14 pages) . . . . .                                         | 014018 |

PHYSICAL REVIEW D

THIRD SERIES, VOLUME 80, NUMBER 1

D1 JULY 2009

|                                                                                                                                                                                           |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Quark excitations through the prism of direct photon plus jet at the LHC (21 pages) .....                                                                                                 | 015014 |
| Satyaki Bhattacharya, Sushil Singh Chauhan, Brajesh Chandra Choudhary, and Debajyoti Choudhury                                                                                            |        |
| Supersymmetric and Kaluza-Klein particles multiple scattering in the Earth (5 pages) .....                                                                                                | 015015 |
| Ivone F. Albuquerque and Spencer R. Klein                                                                                                                                                 |        |
| $CP$ violation, single lepton polarization asymmetry, and polarized $CP$ asymmetry in $B \rightarrow K^* \ell^+ \ell^-$ decay in the four-generation standard model (8 pages) .....       | 015016 |
| V. Bashiry, N. Shirkhanghah, and K. Zeynali                                                                                                                                               |        |
| Models of Yukawa interaction in the two Higgs doublet model, and their collider phenomenology (17 pages) .....                                                                            | 015017 |
| Mayumi Aoki, Shinya Kanemura, Koji Tsumura, and Kei Yagyu                                                                                                                                 |        |
| Top quark flavor-changing neutral-current decays and productions at LHC in the littlest Higgs model with $T$ parity (9 pages) .....                                                       | 015018 |
| Xiao-Fang Han, Lei Wang, and Jin Min Yang                                                                                                                                                 |        |
| Testing the littlest Higgs model with $T$ parity in bottom quark pair production at high energy photon colliders (8 pages) .....                                                          | 015019 |
| Jinshu Huang, Gongru Lu, and Xuelei Wang                                                                                                                                                  |        |
| Electrodynamics with Lorentz-violating operators of arbitrary dimension (59 pages) .....                                                                                                  | 015020 |
| V. Alan Kostelecký and Matthew Mewes                                                                                                                                                      |        |
| Constraints on the excitations in the strongly coupled standard model (13 pages) .....                                                                                                    | 015021 |
| Francesco D'Eramo                                                                                                                                                                         |        |
| Interpretation of the “ $f_{D_s}$ puzzle” in the standard model and beyond (9 pages) .....                                                                                                | 015022 |
| Zheng-Tao Wei, Hong-Wei Ke, and Xiao-Feng Yang                                                                                                                                            |        |
| Sensitivity to the Higgs sector of supersymmetric-seesaw models in the lepton flavor violating $\tau \rightarrow \mu f_0(980)$ decay (12 pages) .....                                     | 015023 |
| M.J. Herrero, J. Portolés, and A.M. Rodríguez-Sánchez                                                                                                                                     |        |
| Probing particle and nuclear physics models of neutrinoless double beta decay with different nuclei (8 pages) .....                                                                       | 015024 |
| G.L. Fogli, E. Lisi, and A.M. Rotunno                                                                                                                                                     |        |
| Polarized deep inelastic and elastic scattering from gauge/string duality (11 pages) .....                                                                                                | 015025 |
| Jian-Hua Gao and Bo-Wen Xiao                                                                                                                                                              |        |
| Gauge mediation with a small $\mu$ term and light squarks (16 pages) .....                                                                                                                | 015026 |
| John D. Mason                                                                                                                                                                             |        |
| A flavor protection for warped Higgsless models (15 pages) .....                                                                                                                          | 015027 |
| Csaba Csáki and David Curtin                                                                                                                                                              |        |
| Simple flavor protection for the Randall-Sundrum model (9 pages) .....                                                                                                                    | 016001 |
| Csaba Csáki, Adam Falkowski, and Andreas Weiler                                                                                                                                           |        |
|  Atom interferometry tests of local Lorentz invariance in gravity and electrodynamics (12 pages) ..... | 016002 |
| Keng-Yeow Chung, Sheng-wei Chiow, Sven Herrmann, Steven Chu, and Holger Müller                                                                                                            |        |
| Infrared renormalons and single meson production in proton-proton collisions (17 pages) .....                                                                                             | 016003 |
| A.I. Ahmadov, Coskun Aydin, Sh.M. Nagiyev, Yilmaz A. Hakan, and E.A. Dadashov                                                                                                             |        |
| Transverse symmetry transformations and the quark-gluon vertex function in QCD (11 pages) .....                                                                                           | 016004 |
| Han-xin He                                                                                                                                                                                |        |
| Longitudinal rescaling and high-energy effective actions (11 pages) .....                                                                                                                 | 016005 |
| Peter Orland and Jing Xiao                                                                                                                                                                |        |
| Low-lying exotic mesons in the coupled-channel formalism (7 pages) .....                                                                                                                  | 016006 |
| S.M. Gerasyuta and V.I. Kochkin                                                                                                                                                           |        |
| Purely flavored leptogenesis (12 pages) .....                                                                                                                                             | 016007 |
| D. Aristizabal Sierra, Enrico Nardi, and Luis Alfredo Muñoz                                                                                                                               |        |
| Signature of large extra dimensions from $Z$ boson pair production at the CERN Large Hadron Collider (6 pages) .....                                                                      | 016008 |
| Jun Gao, Chong Sheng Li, Xiangdong Gao, and Jia Jun Zhang                                                                                                                                 |        |
| Analysis of the rare semileptonic decays of $B_s$ to $f_0(980)$ and $K_0^*(1430)$ scalar mesons in QCD sum rules (12 pages) .....                                                         | 016009 |
| N. Ghahramany and R. Khosravi                                                                                                                                                             |        |
| Vector meson-baryon strong coupling constants in light cone QCD sum rules (16 pages) .....                                                                                                | 016010 |
| T.M. Aliev, A. Özpineci, M. Savcı, and V.S. Zamiralov                                                                                                                                     |        |

D1 JULY 2009

## BRIEF REPORTS

|                                                                                                                                                 |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Probing the $ZZ\gamma$ and $Z\gamma\gamma$ couplings through the process $e^+e^- \rightarrow \nu\bar{\nu}\gamma$ (4 pages) .....                | 017301 |
| A. Gutiérrez-Rodríguez, M. A. Hernández-Ruíz, and M. A. Pérez                                                                                   |        |
| Measuring the lower bound of the neutrino mass at the LHC in the Higgs triplet model (3 pages) .....                                            | 017302 |
| Hiroyuki Nishiura and Takeshi Fukuyama                                                                                                          |        |
| QCD phase structure at finite temperature in three-flavor random matrix theory (4 pages) .....                                                  | 017501 |
| Ryoichi Arai and Naotaka Yoshinaga                                                                                                              |        |
| $Y(4143)$ is probably a molecular partner of $Y(3930)$ (4 pages) .....                                                                          | 017502 |
| Xiang Liu and Shi-Lin Zhu                                                                                                                       |        |
| Evidence for a new $\Sigma^*$ resonance with $J^P = 1/2^-$ in the old data of the $K^-p \rightarrow \Lambda\pi^+\pi^-$ reaction (4 pages) ..... | 017503 |
| Jia-Jun Wu, S. Dulat, and B.S. Zou                                                                                                              |        |
| Conformal chiral dynamics (4 pages) .....                                                                                                       | 017901 |
| Francesco Sannino                                                                                                                               |        |

## ERRATA

|                                                                                                                                                                                       |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Erratum: Charged lepton distributions as a probe of contact $e^+e^-HZ$ interactions at a linear collider with polarized beams [Phys. Rev. D <b>77</b> , 015009 (2008)] (1 page) ..... | 019901(E) |
| Kumar Rao and Saurabh D. Rindani                                                                                                                                                      |           |
| Publisher's Note: Exclusive initial-state-radiation production of the $D\bar{D}$ , $D^*\bar{D}$ , and $D^*\bar{D}^*$ systems [Phys. Rev. D <b>79</b> , 092001 (2009)] (2 pages) ..... | 019902(E) |
| B. Aubert <i>et al.</i> (BABAR Collaboration)                                                                                                                                         |           |
