THIRD SERIES, VOLUME 95, NUMBER 11

CONTENTS

D1 JUNE 2017

## RAPID COMMUNICATIONS

- Search for Lorentz and  $CPT$  violation using sidereal time dependence of neutrino flavor transitions over a short baseline (9 pages) ..... 111101(R)  
K. Abe *et al.* (T2K Collaboration)
- Evidence for the singly Cabibbo suppressed decay  $\Lambda_c^+ \rightarrow p\eta$  and search for  $\Lambda_c^+ \rightarrow p\pi^0$  (8 pages) ..... 111102(R)  
M. Ablikim *et al.* (BESIII Collaboration)
- Drell-Yan-like processes and duality (6 pages) ..... 111501(R)  
I. V. Anikin, L. Szymanowski, O. V. Teryaev, and N. Volchanskiy
- Explaining  $B \rightarrow K^{(*)}\ell^+\ell^-$  anomaly by radiatively induced coupling in  $U(1)_{\mu-\tau}$  gauge symmetry (6 pages) ..... 111701(R)  
P. Ko, Takaaki Nomura, and Hiroshi Okada

## ARTICLES

- Cross section and transverse single-spin asymmetry of muons from open heavy-flavor decays in polarized  $p + p$  collisions at  $\sqrt{s} = 200$  GeV (15 pages) ..... 112001  
C. Aidala *et al.* (PHENIX Collaboration)
- Search for sterile neutrino mixing using three years of IceCube DeepCore data (13 pages) ..... 112002  
M. G. Aartsen *et al.* (IceCube Collaboration)
- Observation of an alternative  $\chi_{c0}(2P)$  candidate in  $e^+e^- \rightarrow J/\psi D\bar{D}$  (17 pages) ..... 112003  
K. Chilikin *et al.* (Belle Collaboration)
- Combination of D0 measurements of the top quark mass (11 pages) ..... 112004  
V. M. Abazov *et al.* (D0 Collaboration)
- Measurements of integrated and differential cross sections for isolated photon pair production in  $pp$  collisions at  $\sqrt{s} = 8$  TeV with the ATLAS detector (27 pages) ..... 112005  
M. Aaboud *et al.* (ATLAS Collaboration)
- Decay constants and distribution amplitudes of  $B$  meson in the relativistic potential model (15 pages) ..... 113001  
Hao-Kai Sun and Mao-Zhi Yang
- Hadronic weak decay  $B_b(\frac{1}{2}^+, \frac{3}{2}^+) \rightarrow B(\frac{1}{2}^+, \frac{3}{2}^+) + V$  (7 pages) ..... 113002  
Fayyazuddin and M. Jamil Aslam
- Loops with heavy particles in production amplitudes for multiple Higgs bosons (5 pages) ..... 113003  
M. B. Voloshin
- Matter density versus distance for the neutrino beam from Fermilab to Lead, South Dakota, and comparison of oscillations with variable and constant density (8 pages) ..... 113004  
Byron Roe
- Parameter limits for neutrino oscillation with decoherence in KamLAND (7 pages) ..... 113005  
G. Balieiro Gomes, M. M. Guzzo, P. C. de Holanda, and R. L. N. Oliveira

|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Precision theoretical analysis of neutron radiative beta decay to order $O(\alpha^2/\pi^2)$ (12 pages) .....                                                               | 113006 |
| A. N. Ivanov, R. Höllwieser, N. I. Troitskaya, M. Wellenzohn, and Ya. A. Berdnikov                                                                                         |        |
| Electroweak single-pion production off the nucleon: From threshold to high invariant masses (28 pages) .....                                                               | 113007 |
| R. González-Jiménez, N. Jachowicz, K. Niewczas, J. Nys, V. Pandey, T. Van Cuyck, and N. Van Dessel                                                                         |        |
| Electromagnetic axial anomaly in a generalized linear sigma model (12 pages) .....                                                                                         | 114001 |
| Amir H. Fariborz and Renata Jora                                                                                                                                           |        |
| Modified Tsallis and Weibull distributions for multiplicities in $e^+e^-$ collisions (9 pages) .....                                                                       | 114002 |
| S. Sharma, M. Kaur, and S. Thakur                                                                                                                                          |        |
| Exploring the resonances $X(4140)$ and $X(4274)$ through their decay channels (10 pages) .....                                                                             | 114003 |
| S. S. Agaev, K. Azizi, and H. Sundu                                                                                                                                        |        |
| Decays of the vector glueball (15 pages) .....                                                                                                                             | 114004 |
| Francesco Giacosa, Julia Sammet, and Stanislaus Janowski                                                                                                                   |        |
| Open-flavor charm and bottom $sq\bar{q}\bar{Q}$ and $qq\bar{q}\bar{Q}$ tetraquark states (17 pages) .....                                                                  | 114005 |
| Wei Chen, Hua-Xing Chen, Xiang Liu, T. G. Steele, and Shi-Lin Zhu                                                                                                          |        |
| Signal of right-handed currents using $B \rightarrow K^*\ell^+\ell^-$ observables at the kinematic endpoint (14 pages) .....                                               | 114006 |
| Anirban Karan, Rusa Mandal, Abinash Kumar Nayak, Rahul Sinha, and Thomas E. Browder                                                                                        |        |
| Implementation of NLO high energy factorization in single inclusive forward hadron production (11 pages) .....                                                             | 114007 |
| B. Ducloué, T. Lappi, and Y. Zhu                                                                                                                                           |        |
| Deep inelastic scattering as a probe of entanglement (12 pages) .....                                                                                                      | 114008 |
| Dmitri E. Kharzeev and Eugene M. Levin                                                                                                                                     |        |
| Scale-setting, flavor dependence, and chiral symmetry restoration (10 pages) .....                                                                                         | 114009 |
| Daniele Binosi, Craig D. Roberts, and José Rodríguez-Quintero                                                                                                              |        |
| Re-examining valence quark spin distributions (12 pages) .....                                                                                                             | 114010 |
| A. I. Signal                                                                                                                                                               |        |
| Chiral-scale effective theory including a dilatonic meson (12 pages) .....                                                                                                 | 114011 |
| Yan-Ling Li, Yong-Liang Ma, and Mannque Rho                                                                                                                                |        |
| Very narrow excited $\Omega_c$ baryons (10 pages) .....                                                                                                                    | 114012 |
| Marek Karliner and Jonathan L. Rosner                                                                                                                                      |        |
| Twist-3 fragmentation contribution to polarized hyperon production in unpolarized hadronic collisions (10 pages) .....                                                     | 114013 |
| Yuji Koike, Andreas Metz, Daniel Pitonyak, Kenta Yabe, and Shinsuke Yoshida                                                                                                |        |
| Two-body strong decay status of the $\rho$ and $\rho_3$ mesons (9 pages) .....                                                                                             | 114014 |
| Xiaoyun Chen and Jialun Ping                                                                                                                                               |        |
| Jet clustering dependence of Higgs boson production in vector-boson fusion (6 pages) .....                                                                                 | 114015 |
| Michael Rauch and Dieter Zeppenfeld                                                                                                                                        |        |
| Subtracting infrared renormalons from Wilson coefficients: Uniqueness and power dependences on $\Lambda_{\text{QCD}}$ (30 pages) ....                                      | 114016 |
| Go Mishima, Yukinari Sumino, and Hiromasa Takaura                                                                                                                          |        |
| Decay behaviors of the $P_c$ hadronic molecules (14 pages) .....                                                                                                           | 114017 |
| Yong-Hui Lin, Chao-Wei Shen, Feng-Kun Guo, and Bing-Song Zou                                                                                                               |        |
| Three-Body Decay of $\Lambda_c^*(2595)$ and $\Lambda_c^*(2625)$ with consideration of $\Sigma_c(2455)\pi$ and $\Sigma_c^*(2520)\pi$ in intermediate States (9 pages) ..... | 114018 |
| A. J. Arifi, H. Nagahiro, and A. Hosaka                                                                                                                                    |        |
| Deuteron-like states composed of two doubly charmed baryons (14 pages) .....                                                                                               | 114019 |
| Lu Meng, Ning Li, and Shi-Lin Zhu                                                                                                                                          |        |
| Rapidity regulators in the semi-inclusive deep inelastic scattering and Drell-Yan processes (29 pages) .....                                                               | 114020 |
| Sean Fleming and Ou Z. Labun                                                                                                                                               |        |
| Transport coefficients of two-flavor quark matter from the Kubo formalism (24 pages) .....                                                                                 | 114021 |
| Arus Harutyunyan, Dirk H. Rischke, and Armen Sedrakian                                                                                                                     |        |
| Model prediction for temperature dependence of meson pole masses from lattice QCD results on meson screening masses (15 pages) .....                                       | 114022 |
| Masahiro Ishii, Hiroaki Kouno, and Masanobu Yahiro                                                                                                                         |        |
| Chiral magnetic effect in a lattice model (9 pages) .....                                                                                                                  | 114023 |
| Bo Feng, De-fu Hou, Hui Liu, Hai-cang Ren, Ping-ping Wu, and Yan Wu                                                                                                        |        |
