THIRD SERIES, VOLUME 99, NUMBER 1

CONTENTS

D1 JANUARY 2019

*The Table of Contents is a total listing of Parts A and B.*

*Part A consists of articles 011101–014509, and Part B articles 014510–019904(E)*

## PART A

### RAPID COMMUNICATIONS

|                                                                                                                                                               |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Search for a strangeonium-like structure $Z_s$ decaying into $\phi\pi$ and a measurement of the cross section $e^+e^- \rightarrow \phi\pi\pi$ (8 pages) ..... | 011101(R) |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                               |           |
| Measurement of time-dependent $CP$ violation in $B^0 \rightarrow K_S^0\pi^0\pi^0$ decays (7 pages) .....                                                      | 011102(R) |
| Y. Yusa <i>et al.</i> (Belle Collaboration)                                                                                                                   |           |
| Study of the decay $D^0 \rightarrow \bar{K}^0\pi^-e^+\nu_e$ (9 pages) .....                                                                                   | 011103(R) |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                               |           |
| Search for $CP$ violation with kinematic asymmetries in the $D^0 \rightarrow K^+K^-\pi^+\pi^-$ decay (7 pages) .....                                          | 011104(R) |
| J. B. Kim <i>et al.</i> (The Belle Collaboration)                                                                                                             |           |

### ARTICLES

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Search for long-lived particles in final states with displaced dimuon vertices in $pp$ collisions at $\sqrt{s} = 13$ TeV with the ATLAS detector (32 pages) .....                                                                                                                                                                                                                                                                                                                        | 012001 |
| M. Aaboud <i>et al.</i> (ATLAS Collaboration)                                                                                                                                                                                                                                                                                                                                                                                                                                            |        |
| Demonstration of MeV-scale physics in liquid argon time projection chambers using ArgoNeuT (10 pages) .....                                                                                                                                                                                                                                                                                                                                                                              | 012002 |
| R. Acciarri, C. Adams, J. Asaadi, B. Baller, T. Bolton, C. Bromberg, F. Cavanna, E. Church, D. Edmunds, A. Ereditato, S. Farooq, A. Ferrari, R. S. Fitzpatrick, B. Fleming, A. Hackenburg, G. Horton-Smith, C. James, K. Lang, M. Lantz, I. Lepetic, B. R. Littlejohn, X. Luo, R. Mehdiyev, B. Page, O. Palamara, B. Rebel, P. R. Sala, G. Scanavini, A. Schukraft, G. Smirnov, M. Soderberg, J. Spitz, A. M. Szelc, M. Weber, W. Wu, T. Yang, and G. P. Zeller (ArgoNeuT Collaboration) |        |
| Measurements of $e^+e^- \rightarrow K_S^0K^\pm\pi^\mp\pi^0$ and $K_S^0K^\pm\pi^\mp\eta$ at center-of-mass energies from 3.90 to 4.60 GeV (12 pages) .....                                                                                                                                                                                                                                                                                                                                | 012003 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                                                                                                                                                                                                                                                                                                                                          |        |
| Measurement of quasielastic-like neutrino scattering at $\langle E_\nu \rangle \sim 3.5$ GeV on a hydrocarbon target (30 pages) .....                                                                                                                                                                                                                                                                                                                                                    | 012004 |
| D. Ruterbories <i>et al.</i> (MINERvA Collaboration)                                                                                                                                                                                                                                                                                                                                                                                                                                     |        |
| Search for low-mass resonances decaying into bottom quark-antiquark pairs in proton-proton collisions at $\sqrt{s} = 13$ TeV (25 pages) .....                                                                                                                                                                                                                                                                                                                                            | 012005 |
| A. M. Sirunyan <i>et al.</i> (CMS Collaboration)                                                                                                                                                                                                                                                                                                                                                                                                                                         |        |
| Study of the Dalitz decay $J/\psi \rightarrow e^+e^-\eta$ (13 pages) .....                                                                                                                                                                                                                                                                                                                                                                                                               | 012006 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                                                                                                                                                                                                                                                                                                                                          |        |
| Novel method for measuring charm-mixing parameters using multibody decays (16 pages) .....                                                                                                                                                                                                                                                                                                                                                                                               | 012007 |
| A. Di Canto, J. Garra Ticó, T. Gershon, N. Jurik, M. Martinelli, T. Pilař, S. Stahl, and D. Tonelli                                                                                                                                                                                                                                                                                                                                                                                      |        |

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. D **90**, 010001 (2014).

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. D **90**, 010001 (2014).
