Erratum: Relativistic second-order energy in infinite fermion matter
[Phys. Rev. D 11, 312 (1975)]
M. Bolsterli

The relativistic calculation of the single-particle spectrum described in Sec. IV was previously discussed for the pseudoscalar case by R. L. Bowers, J. A. Campbell, and R. L. Zimmerman, Phys. Rev. D 7, 2289 (1973). The same authors, Phys. Rev. D 7, 2278 (1973), also give a general discussion of the relativistic infinite-matter problem from a temperature-dependent Green’s-function point of view. These references should have been included in this paper.
