THIRD SERIES, VOLUME 101, NUMBER 1
PARTS A AND B

CONTENTS

JANUARY 2020

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 010101(R)–012313, and Part B pages 012401–019903(E).

PART A

RAPID COMMUNICATIONS

Statistical Physics

Two-state diffusive mobility of slow and fast transport of water in narrow nanochannels *(6 pages)* . . . . . 010101(R)
Wen Fan and Jige Chen

Nonlinear Dynamics and Chaos

Detrended fluctuation analysis using orthogonal polynomials *(5 pages)* . . . . . 010201(R)
R. B. Govindan

Positive quantum Lyapunov exponents in experimental systems with a regular classical limit *(7 pages)* . . . . . 010202(R)
Saúl Pilatowsky-Cameo, Jorge Chávez-Carlos, Miguel A. Bastarrachea-Magnani, Pavel Stránský, Sergio Lerma-Hernández, Lea F. Santos, and Jorge G. Hirsch

Using noisy or incomplete data to discover models of spatiotemporal dynamics *(6 pages)* . . . . . 010203(R)
Patrick A. K. Reinbold, Daniel R. Gurevich, and Roman O. Grigoriev

Colloids, Complex Fluids, and Active Matter

Charge oscillations in ionic liquids: A microscopic cluster model *(6 pages)* . . . . . 010601(R)
Yael Avni, Ram M. Adar, and David Andelman

Attractive versus truncated repulsive supercooled liquids: The dynamics is encoded in the pair correlation function *(5 pages)* . . . . . 010602(R)
François P. Landes, Giulio Biroli, Olivier Dauchot, Andrea J. Liu, and David R. Reichman

New paradigm of dielectric relaxation of sizable and rigid molecular glass formers *(4 pages)* . . . . . 010603(R)
A. Jedrzejowska, M. Matussek, K. L. Ngai, K. Grzybowska, K. Jurkiewicz, and M. Paluch

Fluid Dynamics

Subharmonic spherical bubble oscillations induced by parametric surface modes *(5 pages)* . . . . . 011101(R)
Matthieu Guédra, Sarah Cleve, Cyril Mauger, and Claude Inserra

Copyright 2020 by American Physical Society

2470-0045(202001)101:1:A;1-G

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 101, NUMBER 1 JANUARY 2020

Plasma Physics

Guided propagation of extremely intense lasers in plasma via ion motion *(6 pages)* . . . . . 011201(R)
Wei-Min Wang, Zheng-Ming Sheng, Thomas Wilson, Yu-Tong Li, and Jie Zhang

ARTICLES

Statistical Physics

Role of voting intention in public opinion polarization *(13 pages)* 012101
Federico Vazquez, Nicolas Saintier, and Juan Pablo Pinasco

Self-diffusion in a quasi-two-dimensional gas of hard spheres *(9 pages)* 012102
J. Javier Brey, M. I. García de Soria, and P. Maynar

Enhanced magnetoelectric effect near a field-driven zero-temperature quantum phase transition of the spin-1/2 Heisenberg-Ising ladder *(5 pages)* 012103
Jozef Strečka, Lucia Gálisová, and Taras Verkholyak

Fractal dimension of critical curves in the $O(n)$-symmetric ϕ^4 model and crossover exponent at 6-loop order: Loop-erased random walks, self-avoiding walks, Ising, XY, and Heisenberg models *(17 pages)* 012104
Mikhail Kompaniets and Kay Jörg Wiese

Dynamical stability of the weakly nonharmonic propeller-shaped planar Brownian rotator *(13 pages)* 012105
Igor Petrović, Jasmina Jeknić-Dugić, Momir Arsenijević, and Miroljub Dugić

Maximum entropy approach to reliability *(16 pages)* 012106
Yi-Mu Du, Yu-Han Ma, Yuan-Fa Wei, Xuefei Guan, and C. P. Sun

Transverse-size critical exponent of directed percolation from Yang-Lee zeros of survival probability *(9 pages)* 012107
Milan Knežević and Miloš Knežević

Dynamical cluster size heterogeneity *(7 pages)* 012108
Amanda de Azevedo-Lopes, André R. de la Rocha, Paulo Murilo C. de Oliveira, and Jeferson J. Arenzon

Three-qubit refrigerator with two-body interactions *(10 pages)* 012109
Adam Hewgill, J. Onam González, José P. Palao, Daniel Alonso, Alessandro Ferraro, and Gabriele De Chiara

Bosons outperform fermions: The thermodynamic advantage of symmetry *(11 pages)* 012110
Nathan M. Myers and Sebastian Deffner

Equilibrium and nonequilibrium in the three-dimensional Q2R cellular automata *(7 pages)* 012111
Felipe Urbina

Annihilation of single-species charged particles based on Dyson gas dynamics *(10 pages)* 012112
C. E. Gonzalez-Ortiz and G. Téllez

First passage time in multistep stochastic processes with applications to dust charging *(8 pages)* 012113
B. Shotorban

Kinetics of contact processes under segregation *(11 pages)* 012114
Tomás Aquino and Marco Dentz

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Universal fluctuations around typicality for quantum ergodic systems *(8 pages)* 012115
Michel Bauer, Denis Bernard, and Tony Jin

Quasistatic and quantum-adiabatic Otto engine for a two-dimensional material: The case of a graphene quantum dot *(12 pages)* 012116
Francisco J. Peña, D. Zambrano, O. Negrete, Gabriele De Chiara, P. A. Orellana, and P. Vargas

Structural properties of additive binary hard-sphere mixtures *(10 pages)* 012117
S. Pieprzyk, A. C. Brańka, S. B. Yuste, A. Santos, and M. López de Haro

Three-state Potts model on the centered triangular lattice *(6 pages)* 012118
Zhe Fu, Wenan Guo, and Henk W. J. Blöte

Random sequential adsorption of lattice animals on a three-dimensional cubic lattice *(15 pages)* 012119
I. Lončarević, Lj. Budinski-Petković, J. R. Šćepanović, Z. M. Jakšić, and S. B. Vrhovac

Nondiffusive fluxes in a Brownian system with Lorentz force *(7 pages)* 012120
I. Abdoli, H. D. Vuijk, J. U. Sommer, J. M. Brader, and A. Sharma

Electrostatic contribution to colloidal solvation in terms of the self-energy-modified Boltzmann distribution *(8 pages)* 012121
Hiroshi Frusawa

Kinetic Ising models with self-interaction: Sequential and parallel updating *(12 pages)* 012122
Vahini Reddy Nareddy and Jonathan Machta

Phase transitions in Ehrenfest urn model with interactions: Coexistence of uniform and nonuniform states *(11 pages)* 012123
Chi-Ho Cheng, Beverly Gemao, and Pik-Yin Lai

Logarithmic finite-size scaling correction to the leading Fisher zeros in the p-state clock model: A higher-order tensor renormalization group study *(12 pages)* 012124
Seongpyo Hong and Dong-Hee Kim

Thermal rectification in the thermodynamic limit *(5 pages)* 012125
Shunjiang You, Daxing Xiong, and Jiao Wang

Anomalous energy diffusion in two-dimensional nonlinear lattices *(9 pages)* 012126
Jian Wang, Tian-xing Liu, Xiao-zhi Luo, Xiu-Lian Xu, and Nianbei Li

Energy storage in steady states under cyclic local energy input *(9 pages)* 012127
Y. Zhang, R. Hołyst, and A. Maciołek

Pulsed field gradient signal attenuation of restricted anomalous diffusions in plate, sphere, and cylinder with wall relaxation *(14 pages)* 012128
Xinli Liao, Shaokuan Zheng, and Guoxing Lin

Spatial configurations and temperature profiles in nonequilibrium steady state of two-species trapped ion systems *(13 pages)* 012129
A. Ruiz-García and D. Alonso

Analysis of earlier times and flux of entropy on the majority voter model with diffusion *(7 pages)* 012130
Roberto da Silva, Mario J. de Oliveira, Tânia Tomé, and J. R. Drugowich de Felício

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Entropy production and entropy extraction rates for a Brownian particle that walks in underdamped medium *(12 pages)* 012131
Mesfin Asfaw Taye

Entropy production and heat transport in harmonic chains under time-dependent periodic drivings *(10 pages)* 012132
Bruno A. N. Akasaki, Mário J. de Oliveira, and C. E. Fiore

Phase transitions in atypical systems induced by a condensation transition on graphs *(12 pages)* 012133
Edgar Guzmán-González, Isaac Pérez Castillo, and Fernando L. Metz

Probing large deviations of the Kardar-Parisi-Zhang equation at short times with an importance sampling of directed polymers in random media *(11 pages)* 012134
Alexander K. Hartmann, Alexandre Krajenbrink, and Pierre Le Doussal

Extinction risk of a metapopulation under bistable local dynamics *(12 pages)* 012135
Ohad Vilk and Michael Assaf

Quantum fluctuations inhibit symmetry breaking in the Hamiltonian mean-field model *(13 pages)* 012136
Ryan Plestid and James Lambert

Two-dimensional telegraphic processes and their fractional generalizations *(9 pages)* 012137
Jaume Masoliver and Katja Lindenberg

Nonlinear Dynamics and Chaos

Dynamics of beating cardiac tissue under slow periodic drives *(8 pages)* 012201
Po-Yu Chou, Wei-Yin Chiang, C. K. Chan, and Pik-Yin Lai

Spherical-harmonics mode decomposition of neural field equations *(11 pages)* 012202
Daniele Daini, Giacomo Ceccarelli, Enrico Cataldo, and Viktor Jirsa

Unraveling the hidden complexity of quasideterministic ratchets: Random walks, graphs, and circle maps *(9 pages)* 012203
Carles Blanch-Mercader, Javier G. Orlandi, and Jaume Casademunt

Identifying invariant ergodic subsets and barriers to mixing by cutting and shuffling: Study in a birotated hemisphere *(20 pages)* 012204
Thomas F. Lynn, Julio M. Ottino, Paul B. Umbanhowar, and Richard M. Lueptow

Magnon-induced chaos in an optical $\mathcal{PT}$-symmetric resonator *(8 pages)* 012205
Wen-Ling Xu, Xiao-Fei Liu, Yang Sun, Yong-Pan Gao, Tie-Jun Wang, and Chuan Wang

Noise-enabled species recovery in the aftermath of a tipping point *(14 pages)* 012206
Yu Meng, Junjie Jiang, Celso Grebogi, and Ying-Cheng Lai

Externally controlled Lotka-Volterra dynamics in a linearly polarized polariton fluid *(10 pages)* 012207
Matthias Pukrop and Stefan Schumacher

Open Bose-Hubbard chain: Pseudoclassical approach *(7 pages)* 012208
A. A. Bychek, P. S. Muraev, D. N. Maksimov, and A. R. Kolovsky

Effect of local Peregrine soliton emergence on statistics of random waves in the one-dimensional focusing nonlinear Schrödinger equation *(7 pages)* 012209
Alexey Tikan

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Semiclassical optimization of entrainment stability and phase coherence in weakly forced quantum limit-cycle oscillators *(9 pages)* 012210
Yuzuru Kato and Hiroya Nakao

Singular solitons *(10 pages)* 012211
Hidetsugu Sakaguchi and Boris A. Malomed

Bifurcation structure of a swept-source laser *(5 pages)* 012212
A. V. Kovalev, P. S. Dmitriev, A. G. Vladimirov, A. Pimenov, G. Huyet, and E. A. Viktorov

Basis for finding exact coherent states *(12 pages)* 012213
M. Arslan Ahmed and Ati S. Sharma

Mean local autocovariance provides robust and versatile choice of delay for reconstruction using frequently sampled flowlike data *(15 pages)* 012214
Jack Murdoch Moore, David M. Walker, and Gang Yan

Laminar chaos in nonlinear electronic circuits with delay clock modulation *(7 pages)* 012215
Thomas Jüngling, Thomas Stemler, and Michael Small

Distribution of the ratio of two consecutive level spacings in orthogonal to unitary crossover ensembles *(13 pages)* 012216
Ayana Sarkar, Manuja Kothiyal, and Santosh Kumar

Networks and Complex Systems

Traffic-driven epidemic spreading in multiplex networks *(6 pages)* 012301
Jie Chen, Mao-Bin Hu, and Ming Li

Absorbing random walks interpolating between centrality measures on complex networks *(21 pages)* 012302
Aleks J. Gurfinkel and Per Arne Rikvold

Effect of volume growth on the percolation threshold in random directed acyclic graphs with a given degree distribution *(10 pages)* 012303
Verena Schamboeck, Ivan Kryven, and Piet D. Iedema

Analytical modeling of orientation effects in random nanowire networks *(8 pages)* 012304
Milind Jagota and Isaac Scheinfeld

Analytical treatment for cyclic three-state dynamics on static networks *(15 pages)* 012305
Chao-Ran Cai and Zhi-Xi Wu

Scaling of percolation transitions on Erdös-Rényi networks under centrality-based attacks *(9 pages)* 012306
Nahuel Almeira, Orlando Vito Billoni, and Juan Ignacio Perotti

Quasiperiodic dynamics and a Neimark-Sacker bifurcation in nonlinear random walks on complex networks *(8 pages)* 012307
Per Sebastian Skardal

Invariance and stability conditions of interlayer synchronization manifold *(15 pages)* 012308
Sarbendu Rakshit, Bidesh K. Bera, and Dibakar Ghosh

Inference of compressed Potts graphical models *(22 pages)* 012309
Francesca Rizzato, Alice Coucke, Eleonora de Leonardis, John P. Barton, Jérôme Tubiana, Rémi Monasson, and Simona Cocco

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 101, NUMBER 1 JANUARY 2020

Continuous-time quantum walk on an extended star graph: Disorder-enhanced trapping process *(10 pages)* 012310
Saad Yalouz and Vincent Pouthier

Roundabout model with on-ramp queues: Exact results and scaling approximations *(13 pages)* 012311
P. J. Storm, S. Bhulai, W. Kager, and M. Mandjes

Origin of the log-normal popularity distribution of trending memes in social networks *(6 pages)* 012312
Soon-Hyung Yook and Yup Kim

Analysis of the dynamics and topology dependencies of small perturbations in electric transmission grids *(12 pages)* 012313
Luiscarlos A. Torres-Sánchez, Giuseppe T. Freitas de Abreu, and Stefan Kettemann

PART B

Biological Physics

From single-cell variability to population growth *(8 pages)* 012401
Jie Lin and Ariel Amir

Low-dimensional projection of stochastic cell-signalling dynamics via a variational approach *(17 pages)* 012402
Zhenzhen Huang and Yueheng Lan

Dynamical control of denaturation bubble nucleation in supercoiled DNA minicircles *(10 pages)* 012403
François Sicard, Nicolas Destainville, Philippe Rousseau, Catherine Tardin, and Manoel Manghi

Electrostatic interaction effects on the size distribution of self-assembled giant unilamellar vesicles *(11 pages)* 012404
Mohammad Abu Sayem Karal, Marzuk Ahmed, Victor Levadny, Marina Belaya, Md. Kabir Ahamed, Mostafizur Rahman, and Md. Mostofa Shakil

Explicit effect of stochastic reaction delay on gene expression *(11 pages)* 012405
Huahai Qiu, Bengong Zhang, and Tianshou Zhou

Structure and the role of filling rate on model dsDNA packed in a phage capsid *(7 pages)* 012406
Cecilia Bores and B. Montgomery Pettitt

Active modulation of surfactant-driven flow instabilities by swarming bacteria *(10 pages)* 012407
Harshitha S. Kotian, Amith Z. Abdulla, K. N. Hithysini, Shalini Harkar, Shubham Joge, Ayushi Mishra, Varsha Singh, and Manoj M. Varma

Equilibrium fluctuations of a semiflexible filament cross linked into a network *(10 pages)* 012408
Jonathan Kernes and Alex J. Levine

Trade-offs between effectiveness and cost in bifunctional enzyme circuit with concentration robustness *(12 pages)* 012409
Shaohua Guan, Liufang Xu, Qing Zhang, and Hualin Shi

High chemical affinity increases the robustness of biochemical oscillations *(9 pages)* 012410
Clara del Junco and Suriyanarayanan Vaikuntanathan

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Lifetime of a structure evolving by cluster aggregation and particle loss, and application to postsynaptic scaffold domains *(17 pages)* 012411
Vincent Hakim and Jonas Ranft

Wing kinematic and aerodynamic compensations for unilateral wing damage in a small phorid fly *(13 pages)* 012412
Yu Zhu Lyu, Hao Jie Zhu, and Mao Sun

Universal formula for extreme first passage statistics of diffusion *(10 pages)* 012413
Sean D. Lawley

Coupled membrane transporters reduce noise *(6 pages)* 012414
Luca Cardelli, Luca Laurenti, and Attila Csikasz-Nagy

Statistical data assimilation for estimating electrophysiology simultaneously with connectivity within a biological neuronal network *(20 pages)* 012415
Eve Armstrong

Uncoupling between the lipid membrane dynamics of differing hierarchical levels *(9 pages)* 012416
Cheng-Zhi Xie, Shih-Min Chang, Eugene Mamontov, Laura R. Stingaciu, and Yi-Fan Chen

Modeling the tunability of the dual-feedback genetic oscillator *(11 pages)* 012417
Yash J. Joshi, Yash K. Jawale, and Chaitanya A. Athale

Anti-cross-correlation between the adjacent open and closed durations of Markovian channels *(6 pages)* 012418
Yandong Huang, Jing Qu, Xiang Li, Fang Wei, Jinjin Zhong, Yuning Wu, Meichun Cai, Xuejuan Gao, John E. Pearson, and Jianwei Shuai

Using contact statistics to characterize structure transformation of biopolymer ensembles *(10 pages)* 012419
Priyojit Das, Rosela Golloshi, Rachel Patton McCord, and Tongye Shen

Nonequilibrium biochemical structures in two space dimensions with local activation and regulation *(15 pages)* 012420
B. Fourcade

Polymers

Limitations of the equivalent neutral polymer assumption for theories describing nanochannel-confined DNA *(7 pages)* 012501
Aditya Bikram Bhandari and Kevin D. Dorfman

Cold denaturation of RNA secondary structures with loop entropy and quenched disorder *(14 pages)* 012502
Flavio Iannelli, Yevgeni Mamasakhlisov, and Roland R. Netz

Colloids, Complex Fluids, and Active Matter

Quorum-sensing active particles with discontinuous motility *(13 pages)* 012601
Andreas Fischer, Friederike Schmid, and Thomas Speck

Unsteady flow, clusters, and bands in a model shear-thickening fluid *(8 pages)* 012602
Shibu Saw, Matthias Grob, Annette Zippelius, and Claus Heussinger

Annealing and rejuvenation in a two-dimensional model amorphous solid under oscillatory shear *(7 pages)* 012603
Eden Schinasi-Lemberg and Ido Regev

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Microscopic origins of the swim pressure and the anomalous surface tension of active matter *(7 pages)* 012604
Ahmad K. Omar, Zhen-Gang Wang, and John F. Brady

Active uniaxially ordered suspensions on disordered substrates *(7 pages)* 012605
Ananyo Maitra

Pressure and diffusion of active matter with inertia *(8 pages)* 012606
Mario Sandoval

Nonquenched rotators ease flocking and memorize it *(9 pages)* 012607
Rakesh Das, Manoranjan Kumar, and Shradha Mishra

Crystal structures in binary hard-sphere colloid-droplet mixtures with patchy cross interactions *(12 pages)* 012608
Hai Pham Van, Andrea Fortini, and Matthias Schmidt

Freezing of a soft-core fluid in a one-dimensional potential: Predictions based on a pressure-balance equation *(15 pages)* 012609
Alexander Kraft and Sabine H. L. Klapp

Shear viscosity of two-state enzyme solutions *(11 pages)* 012610
Yuto Hosaka, Shigeyuki Komura, and David Andelman

Clusterization of self-propelled particles in a two-component system *(9 pages)* 012611
Shibashis Paul, Debankur Bhattacharyya, and Deb Shankar Ray

Critical force in active microrheology *(18 pages)* 012612
M. Gruber, A. M. Puertas, and M. Fuchs

Exploring the connection between the density-scaling exponent and the intermolecular potential for liquids on the basis of computer simulations of quasireal model systems *(11 pages)* 012613
K. Koperwas, A. Grzybowski, and M. Paluch

Effects of multiple scattering on angle-independent structural color in disordered colloidal materials *(11 pages)* 012614
Victoria Hwang, Anna B. Stephenson, Sofia Magkiriadou, Jin-Gyu Park, and Vinothan N. Manoharan

Liquid Crystals

Pseudopolar smectic-*C* phases of azo-substituted achiral bent-core hockey-stick-shaped molecules *(9 pages)* 012701
Deepshika Malkar, M. Monika, Veena Prasad, and Arun Roy

Coarse-grained model of the nematic twist-bend phase from a stable state elastic energy *(7 pages)* 012702
M. P. Rosseto, L. R. Evangelista, P. S. Simonário, and R. S. Zola

Liquid crystal distortions revealed by an octupolar tensor *(15 pages)* 012703
Andrea Pedrini and Epifanio G. Virga

Generation and manipulation of isotropic droplets in nematic medium using switchable dielectrophoresis *(10 pages)* 012704
Bomi Lee, Jun-Seo Lee, Hyun-Jin Yoon, Seung-Ho Hong, and Jang-Kun Song

Films and Interfaces

Adsorption anomalies in a two-dimensional model of cluster-forming systems *(8 pages)* 012801
E. Bildanau, J. Pękalski, V. Vikhrenko, and A. Ciach

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 101, NUMBER 1 JANUARY 2020

Molecular interactions at vapor-liquid interfaces: Binary mixtures of simple fluids *(20 pages)* 012802
Simon Stephan and Hans Hasse

Granular Materials

Slow dynamic nonlinearity in unconsolidated glass bead packs *(12 pages)* 012901
John Y. Yoritomo and Richard L. Weaver

Slow dynamics in a single glass bead *(14 pages)* 012902
John Y. Yoritomo and Richard L. Weaver

Stabilization of a straight longitudinal dune under bimodal wind with large directional variation *(12 pages)* 012903
Sachi Nakao-Kusune, Takahiro Sakaue, Hiraku Nishimori, and Hiizu Nakanishi

Enskog kinetic theory for multicomponent granular suspensions *(23 pages)* 012904
Rubén Gómez González, Nagi Khalil, and Vicente Garzó

Shape evolution of numerically obtained subaqueous barchan dunes *(11 pages)* 012905
Carlos A. Alvarez and Erick M. Franklin

Universality of internal structure characteristics in granular media under shear *(13 pages)* 012906
Shiwei Zhao, Jidong Zhao, and Ning Guo

Fluid-induced fracture into weakly consolidated sand: Impact of confining stress on initialization pressure *(6 pages)* 012907
Paula A. Gago, Kuba Wieladek, and Peter King

Mapping diffusivity of narrow channels into one dimension *(7 pages)* 012908
Mahdi Zarif and Richard K. Bowles

Intruder in a two-dimensional granular system: Effects of dynamic and static basal friction on stick-slip and clogging dynamics *(9 pages)* 012909
C. Manuel Carlevaro, Ryan Kozlowski, Luis A. Pugnaloni, Hu Zheng, Joshua E. S. Socolar, and Lou Kondic

Solid Mechanics

Mechanics-based model for the cooking-induced deformation of spaghetti *(7 pages)* 013001
Nathaniel N. Goldberg and Oliver M. O'Reilly

Periodic folding of a falling viscoelastic sheet *(10 pages)* 013002
Kui Pan, A. Srikantha Phani, and Sheldon Green

Fluid Dynamics

Application of the Schwarz-Christoffel map to the Laplacian growth of needles and fingers *(13 pages)* 013101
N. R. McDonald

Input-output system identification of a thermoacoustic oscillator near a Hopf bifurcation using only fixed-point data *(9 pages)* 013102
Minwoo Lee, Yu Guan, Vikrant Gupta, and Larry K. B. Li

Drag forces on nanoparticles in the free-molecule regime: Effect of the particle temperature *(8 pages)* 013103
Jun Wang, Junjie Su, and Guodong Xia

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 101, NUMBER 1** **JANUARY 2020**

Study of the Hopf functional equation for turbulence: Duhamel principle and dynamical scaling *(15 pages)* 013104
Koji Ohkitani

Influence of the viscosity and charge mobility on the shape deformation of critically charged droplets *(11 pages)* 013105
E. Giglio, J. Rangama, S. Guillous, and T. Le Cornu

Mode-locked rotating detonation waves: Experiments and a model equation *(11 pages)* 013106
James Koch, Mitsuru Kurosaka, Carl Knowlen, and J. Nathan Kutz

Multifidelity kinematic parameter optimization of a flapping airfoil *(16 pages)* 013107
Hongyu Zheng, Fangfang Xie, Tingwei Ji, Zaoxu Zhu, and Yao Zheng

Acoustic streaming outside and inside a fluid particle undergoing monopole and dipole oscillations *(16 pages)* 013108
Thierry Baasch, Alexander A. Doinikov, and Jürg Dual

Stability criterion for the magnetic separation of rare-earth ions *(9 pages)* 013109
Zhe Lei, Barbara Fritzsche, and Kerstin Eckert

Effects of electrical image forces on salt dissolved in water *(4 pages)* 013110
J. B. Sokoloff

Acoustic microstreaming produced by nonspherical oscillations of a gas bubble. III. Case of self-interacting modes *n-n (12 pages)* 013111
Claude Inserra, Gabriel Regnault, Sarah Cleve, Cyril Mauger, and Alexander A. Doinikov

Plasma Physics

Analysis of azimuthal magnetorotational instability of rotating magnetohydrodynamic flows and Tayler instability via an extended Hain-Lüst equation *(22 pages)* 013201
R. Zou, J. Labarbe, O. N. Kirillov, and Y. Fukumoto

Discrete eigenmodes of filamentation instability in the presence of a q-nonextensive distribution *(9 pages)* 013202
M. Hashemzadeh

Universal relationship of compression shocks in two-dimensional Yukawa systems *(6 pages)* 013203
Wei Lin, M. S. Murillo, and Yan Feng

High-current stream of energetic α particles from laser-driven proton-boron fusion *(13 pages)* 013204
Lorenzo Giuffrida, Fabio Belloni, Daniele Margarone, Giada Petringa, Giuliana Milluzzo, Valentina Scuderi, Andriy Velyhan, Marcin Rosinski, Antonino Picciotto, Milan Kucharik, Jan Dostal, Roman Dudzak, Josef Krasa, Valeria Istokskaia, Roberto Catalano, Salvatore Tudisco, Claudio Verona, Karel Jungwirth, Pierluigi Bellutti, Georg Korn, and G. A. P. Cirrone

Calculation of electron-ion temperature equilibration rates and friction coefficients in plasmas and liquid metals using quantum molecular dynamics *(19 pages)* 013205
Jacopo Simoni and Jérôme Daligault

Thermonuclear fusion triggered by collapsing standing whistler waves in magnetized overdense plasmas *(15 pages)* 013206
Takayoshi Sano, Shinsuke Fujioka, Yoshitaka Mori, Kunioki Mima, and Yasuhiko Sentoku

Sandpile modeling of pellet pacing in fusion plasmas *(8 pages)* 013207
C. A. Bowie and M. J. Hole

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 101, NUMBER 1 JANUARY 2020

Correlations between conduction electrons in dense plasmas *(10 pages)* 013208
Nathaniel R. Shaffer and Charles E. Starrett

Computational Physics

Stochastic approximation Monte Carlo with a dynamic update factor *(9 pages)* 013301
Jordan K. Pommerenck, Tanner T. Simpson, Michael A. Perlin, and David Roundy

Shear-viscosity-independent bulk-viscosity term in smoothed particle hydrodynamics *(12 pages)* 013302
Josep Bonet Avalos, Matteo Antuono, Andrea Colagrossi, and Antonio Souto-Iglesias

Absorbing boundary conditions for the time-dependent Schrödinger-type equations in $\mathbb{R}^3$ *(15 pages)* 013304
Xiaojie Wu and Xiantao Li

Multiphase flows of *N* immiscible incompressible fluids: Conservative Allen-Cahn equation and lattice Boltzmann equation method *(12 pages)* 013305
Lin Zheng, Song Zheng, and Qinglan Zhai

Faster calculation of the percolation correlation length on spatial networks *(5 pages)* 013306
Michael M. Danziger, Bnaya Gross, and Sergey V. Buldyrev

Coarse-grained modeling of thermochemical nonequilibrium using the multigroup maximum entropy quadratic formulation *(12 pages)* 013307
Maitreyee P. Sharma, Yen Liu, and Marco Panesi

Developing a time-domain method for simulating statistical behavior of many-emitter systems in the presence of electromagnetic field *(11 pages)* 013308
A. R. Hashemi and M. Hosseini-Farzad

Lattice Boltzmann model for weakly compressible flows *(21 pages)* 013309
Praveen Kumar Kolluru, Mohammad Atif, Manjusha Namburi, and Santosh Ansumali

Symbiotic versus nonsymbiotic optimization for spatial and temporal degrees of freedom in pair creation *(11 pages)* 013310
S. Dong, J. Unger, J. Bryan, Q. Su, and R. Grobe

Grid-based diffusion Monte Carlo for fermions without the fixed-node approximation *(8 pages)* 013311
Alexander A. Kunitsa and So Hirata

Exponential integrators for stochastic Schrödinger equations *(10 pages)* 013312
Jingze Li and Xiantao Li

Interface tracking characteristics of color-gradient lattice Boltzmann model for immiscible fluids *(12 pages)* 013313
A. Subhedar, A. Reiter, M. Selzer, F. Varnik, and B. Nestler

COMMENTS

Comment on "Dynamically induced heat rectification in quantum systems" *(3 pages)* 016101
Michel Peyrard

Comment on "Osmotic pressure of compressed lattice knots" *(2 pages)* 016501
Alexander Y. Grosberg

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).
