THIRD SERIES, VOLUME 102, NUMBER 1
PARTS A AND B

CONTENTS

JULY 2020

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 010101(R)–012221, and Part B pages 012301–019904(E).

PART A

RAPID COMMUNICATIONS

Statistical Physics

Thermodynamic cycles with active matter *(6 pages)* . . . . . 010101(R)
Timothy Ekeh, Michael E. Cates, and Étienne Fodor

Nonlinear Dynamics and Chaos

Implementing nonuniversal features with a random matrix theory approach: Application to space-to-configuration multiplexing *(6 pages)* . . . . . 010201(R)
Philipp del Hougne, Dmitry V. Savin, Olivier Legrand, and Ulrich Kuhl

Biological Physics

Self-isolation or borders closing: What prevents the spread of the epidemic better? *(6 pages)* . . . . . 010401(R)
O. Valba, V. Avetisov, A. Gorsky, and S. Nechaev

Colloids, Complex Fluids, and Active Matter

Colonies of threaded rings in excitable media *(4 pages)* . . . . . 010601(R)
Fabian Maucher and Paul Sutcliffe

Collective stiffening of soft hair assemblies *(5 pages)* . . . . . 010602(R)
Jean-Baptiste Thomazo, Eric Lauga, Benjamin Le Révérend, E. Wandersman, and A. M. Prevost

Thermodynamic equivalence of cyclic shear and deep cooling in glass formers *(5 pages)* . . . . . 010603(R)
Bhanu Prasad Bhowmik, Valery Ilyin, and Itamar Procaccia

Emergence and persistence of flow inhomogeneities in the yielding and fluidization of dense soft solids *(6 pages)* . . . . . 010604(R)
Vishwas Venkatesh Vasisht, Gabrielle Roberts, and Emanuela Del Gado

Double-mode relaxation of highly deformed anisotropic vesicles *(6 pages)* . . . . . 010605(R)
Dinesh Kumar, Channing M. Richter, and Charles M. Schroeder

2470-0045(202007)102:1:B;1-8

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Dipole-dipole correlations and the Debye process in the dielectric response of nonassociating glass forming liquids *(6 pages)* . . . . . 010606(R)
Florian Pabst, Andreas Helbling, Jan Gabriel, Peter Weigl, and Thomas Blochowicz

Liquid Crystals

Anisotropic disclination cores in nematic liquid crystals modeled by a self-consistent molecular field theory *(6 pages)* . . . . . 010701(R)
Cody D. Schimming and Jorge Viñals

Granular Materials

Zero-gravity thermal convection in granular gases *(6 pages)* . . . . . 010901(R)
A. Rodríguez-Rivas, M. A. López-Castaño, and F. Vega Reyes

Clogging-jamming connection in narrow vertical pipes *(5 pages)* . . . . . 010902(R)
Diego López, Dariel Hernández-Delfin, Raúl C. Hidalgo, Diego Maza, and Iker Zuriguel

Solid Mechanics

Phase transitions, percolation, fracture of materials, and deep learning *(6 pages)* . . . . . 011001(R)
Serveh Kamrava, Pejman Tahmasebi, Muhammad Sahimi, and Sepehr Arbabi

Fluid Dynamics

Drag reduction of three-dimensional bodies by base blowing with various gas densities *(4 pages)* . . . . . 011101(R)
M. Lorite-Díez, J. I. Jiménez-González, L. Pastur, O. Cadot, and C. Martínez-Bazán

Route to chaos on a dragonfly wing cross section in gliding flight *(5 pages)* . . . . . 011102(R)
Michael Bauerheim and Vincent Chapin

Plasma Physics

Spin-polarized proton beam generation from gas-jet targets by intense laser pulses *(6 pages)* . . . . . 011201(R)
Luling Jin, Meng Wen, Xiaomei Zhang, Anna Hützen, Johannes Thomas, Markus Büscher, and Baifei Shen

ARTICLES

Statistical Physics

Statistical properties of eigenvalues of the non-Hermitian Su-Schrieffer-Heeger model with random hopping terms *(9 pages)* 012101
Ken Mochizuki, Naomichi Hatano, Joshua Feinberg, and Hideaki Obuse

Bond percolation on simple cubic lattices with extended neighborhoods *(8 pages)* 012102
Zhipeng Xun and Robert M. Ziff

Effects of transient subordinators on the firing statistics of a neuron model driven by dichotomous noise *(15 pages)* 012103
Romi Mankin and Astrid Rekker

Quantum walks with sequential aperiodic jumps *(15 pages)* 012104
M. A. Pires and S. M. Duarte Queirós

Pinned or moving: States of a single shock in a ring *(16 pages)* 012105
Parna Roy, Anjan Kumar Chandra, and Abhik Basu

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Irreversible multilayer adsorption of semirigid k-mers deposited on one-dimensional lattices *(11 pages)* 012106
N. De La Cruz Félix, P. M. Centres, A. J. Ramirez-Pastor, E. E. Vogel, and J. F. Valdés

Finite transition times for multispecies diffusion in heterogeneous media coupled via first-order reaction networks *(7 pages)* 012107
Elliot J. Carr and Jonah J. Klowss

Scaling of local persistence in the disordered contact process *(9 pages)* 012108
Róbert Juhász and István A. Kovács

Hitchhiker model for Laplace diffusion processes *(13 pages)* 012109
M. Hidalgo-Soria and E. Barkai

Kinetic derivation of diffuse-interface fluid models *(15 pages)* 012110
Vincent Giovangigli

Universal scaling for recovery of Fourier's law in low-dimensional solids under momentum conservation *(14 pages)* 012111
Dye SK Sato

Correspondence between temporal correlations in time series, inverse problems, and the spherical model *(8 pages)* 012112
Riccardo Marcaccioli and Giacomo Livan

Flory-like statistics of fracture in the fiber bundle model as obtained via Kolmogorov dispersion for turbulence: A conjecture *(6 pages)* 012113
Soumyajyoti Biswas and Bikas K. Chakrabarti

Nonequilibrium kinetics of excess defect generation and dynamic scaling in the Ising spin chain under slow cooling *(13 pages)* 012114
Kangeun Jeong, Bongsoo Kim, and Sung Jong Lee

Fluctuation relations for adiabatic pumping *(10 pages)* 012115
Yuki Hino and Hisao Hayakawa

Dynamic critical behavior of the two-dimensional Ising model with nonextensive statistics *(4 pages)* 012116
V. N. Borodikhin

Free-energy functional of instantaneous correlation field in liquids: Field-theoretic derivation of the closures *(8 pages)* 012117
Hiroshi Frusawa

Generalized Fokker-Planck equations derived from nonextensive entropies asymptotically equivalent to Boltzmann-Gibbs *(11 pages)* 012118
Jesús Fuentes, José Luis López, and Octavio Obregón

Models with symmetry-breaking phase transitions triggered by dumbbell-shaped equipotential surfaces *(11 pages)* 012119
Fabrizio Baroni

Free diffusion bounds the precision of currents in underdamped dynamics *(10 pages)* 012120
Lukas P. Fischer, Hyun-Myung Chun, and Udo Seifert

Dimensional crossover of thermal transport in quantum harmonic lattices coupled to self-consistent reservoirs *(7 pages)* 012121
Kiminori Hattori and Masaya Sambonchiku

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

State transition graph of the Preisach model and the role of return-point memory *(14 pages)* 012122
M. Mert Terzi and Muhittin Mungan

Mean first passage time for a particle diffusing on a disk with two absorbing traps at the boundary *(7 pages)* 012123
Alex Skvortsov

Brownian flights over a circle *(6 pages)* 012124
Alexander Vladimirov, Senya Shlosman, and Sergei Nechaev

Full nonuniversality of the symmetric 16-vertex model on the square lattice *(8 pages)* 012125
Eva Pospíšilová, Roman Krčmár, Andrej Gendiar, and Ladislav Šamaj

Transient dynamics in a nonequilibrium superdiffusive reaction-diffusion process: Nonequilibrium random search as a case study *(8 pages)* 012126
F. Rusch, M. E. Wosniack, E. P. Raposo, G. M. Viswanathan, and M. G. E. da Luz

Closeness of the reduced density matrix of an interacting small system to the Gibbs state *(15 pages)* 012127
Wen-ge Wang

Paris car parking problem for partially oriented discorectangles on a line *(9 pages)* 012128
Nikolai I. Lebovka, Mykhailo O. Tatochenko, Nikolai V. Vygornitskii, and Yuri Yu. Tarasevich

Fast-forward approach to stochastic heat engine *(12 pages)* 012129
Katsuhiro Nakamura, Jasur Matrasulov, and Yuki Izumida

Discrete Manhattan and Chebyshev pair correlation functions in k dimensions *(11 pages)* 012130
Alexander Lai De Oliveira and Benjamin J. Binder

Percolation of Fortuin-Kasteleyn clusters for the random-bond Ising model *(8 pages)* 012131
Hauke Fajen, Alexander K. Hartmann, and A. P. Young

Nature of intermediate magnetization plateaus of a spin-$1/2$ Ising-Heisenberg model on a triangulated Husimi lattice resembling a triangulated kagome lattice *(11 pages)* 012132
Jozef Strečka and Cesur Ekiz

Inhomogeneous parametric scaling and variable-order fractional diffusion equations *(10 pages)* 012133
Philipp Roth and Igor M. Sokolov

Minimal statistical-mechanical model for multihyperuniform patterns in avian retina *(11 pages)* 012134
Enrique Lomba, Jean-Jacques Weis, Leandro Guisández, and Salvatore Torquato

Simple relation between frustration and transition points in diluted spin glasses *(7 pages)* 012135
Ryoji Miyazaki, Yuta Kudo, Masayuki Ohzeki, and Kazuyuki Tanaka

Fröhlich-coupled qubits interacting with fermionic baths *(11 pages)* 012136
Erik Aurell and Jan Tuziemski

Confined diffusion in a random Lorentz gas environment *(7 pages)* 012137
Narender Khatri and P. S. Burada

Performance of quantum heat engines under the influence of long-range interactions *(12 pages)* 012138
Qian Wang

Hydrodynamic memory can boost enormously driven nonlinear diffusion and transport *(13 pages)* 012139
Igor Goychuk and Thorsten Pöschel

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

First-principles nonequilibrium deterministic equation of motion of a Brownian particle and microscopic viscous drag *(15 pages)* 012140
P. D. Gujrati

Current inversion in a periodically driven two-dimensional Brownian ratchet *(12 pages)* 012141
Nils E. Strand, Rueih-Sheng Fu, and Todd R. Gingrich

Quasilinear irreversible thermodynamics of a low-temperature-differential kinematic Stirling heat engine *(16 pages)* 012142
Yuki Izumida

Scaling properties of the dynamics at first-order quantum transitions when boundary conditions favor one of the two phases *(10 pages)* 012143
Andrea Pelissetto, Davide Rossini, and Ettore Vicari

Relation between statics and dynamics in the quench of the Ising model to below the critical point *(12 pages)* 012144
Annalisa Fierro, Antonio Coniglio, and Marco Zannetti

Independence of work and entropy for equal-energetic finite quantum systems: Passive-state energy as an entanglement quantifier *(10 pages)* 012145
Mir Alimuddin, Tamal Guha, and Preeti Parashar

Anomalous diffusion and nonergodicity for heterogeneous diffusion processes with fractional Gaussian noise *(16 pages)* 012146
Wei Wang, Andrey G. Cherstvy, Xianbin Liu, and Ralf Metzler

Tunable order of helically confined charges *(9 pages)* 012147
Ansgar Siemens and Peter Schmelcher

Dynamical large deviations of reflected diffusions *(11 pages)* 012148
Johan du Buisson and Hugo Touchette

Entropic vibrational resonance *(9 pages)* 012149
Luchun Du, Ruoshui Han, Jiahao Jiang, and Wei Guo

Correlations and responses for a system of n coupled linear oscillators with asymmetric interactions *(11 pages)* 012150
Ryosuke Ishiwata, Reo Yaguchi, and Yuki Sugiyama

Applicability of the low-dissipation model: Carnot-like heat engines under Newton's law of cooling *(5 pages)* . . . 012151
Yanqi Zhang and Yuewu Huang

Tangent-space gradient optimization of tensor network for machine learning *(7 pages)* 012152
Zheng-Zhi Sun, Shi-Ju Ran, and Gang Su

Irreversible bilayer adsorption of straight semirigid rods on two-dimensional square lattices: Jamming and percolation properties *(13 pages)* 012153
N. De La Cruz Félix, P. M. Centres, and A. J. Ramirez-Pastor

Giant leaps and long excursions: Fluctuation mechanisms in systems with long-range memory *(15 pages)* 012154
Robert L. Jack and Rosemary J. Harris

Steady-state quantum transport through an anharmonic oscillator strongly coupled to two heat reservoirs *(10 pages)* 012155
Tianqi Chen, Vinitha Balachandran, Chu Guo, and Dario Poletti

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Nonlinear Dynamics and Chaos

Spatial control of localized oscillations in arrays of coupled laser dimers *(9 pages)* 012201
Joniald Shena, Yannis Kominis, Anastasios Bountis, and Vassilios Kovanis

Chaotic scattering with localized losses: *S*-matrix zeros and reflection time difference for systems with broken time-reversal invariance *(12 pages)* 012202
Mohammed Osman and Yan V. Fyodorov

Engineering rogue waves with quintic nonlinearity and nonlinear dispersion effects in a modified Nogochi nonlinear electric transmission network *(17 pages)* 012203
Emmanuel Kengne and WuMing Liu

Discrete vortices on spatially nonuniform two-dimensional electric networks *(11 pages)* 012204
Victor P. Ruban

Jump intermittency as a second type of transition to and from generalized synchronization *(9 pages)* 012205
Alexey A. Koronovskii, Olga I. Moskalenko, Anatolii A. Pivovarov, Vladislav A. Khanadeev, Alexander E. Hramov, and Alexander N. Pisarchik

Kuramoto model in the presence of additional interactions that break rotational symmetry *(9 pages)* 012206
V. K. Chandrasekar, M. Manoranjani, and Shamik Gupta

Probabilistic characteristics of nonlinear waves in nondispersive media of the hydrodynamic type *(10 pages)* 012207
Sergey Gurbatov and Efim Pelinovsky

Energy exchange in globally coupled mechanical phase oscillators *(9 pages)* 012208
Raúl I. Sosa and Damián H. Zanette

Bifurcation and patterns induced by flow in a prey-predator system with Beddington-DeAngelis functional response *(9 pages)* 012209
Chuanjun Dai and Min Zhao

Edge switch transformation in microwave networks *(6 pages)* 012210
Vitalii Yunko, Małgorzata Białous, and Leszek Sirko

Lyapunov approach to synchronization of chaotic systems with vanishing nonlinear perturbations: From static to dynamic couplings *(11 pages)* 012211
Paolo Arena, Arturo Buscarino, Luigi Fortuna, and Luca Patanè

Numerical analysis of subcritical Hopf bifurcations in the two-dimensional FitzHugh-Nagumo model *(11 pages)* 012212
S. Sehgal and A. J. Foulkes

Parrondo paradoxical walk using four-sided quantum coins *(5 pages)* 012213
Joel Weijia Lai, Jean Ren Adriel Tan, Huiyi Lu, Zi Rou Yap, and Kang Hao Cheong

Few-cycle solitons in a dispersive medium with a permanent dipole moment *(8 pages)* 012214
A. A. Zabolotskii

Phase space analysis of the dynamics on a potential energy surface with an entrance channel and two potential wells *(15 pages)* 012215
Matthaios Katsanikas, Víctor J. García-Garrido, Makrina Agaoglou, and Stephen Wiggins

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 102, NUMBER 1 JULY 2020

Soliton formation and stability under the interplay between parity-time-symmetric generalized Scarf-II potentials and Kerr nonlinearity *(11 pages)* 012216
Yong Chen, Zhenya Yan, and Dumitru Mihalache

Anomalous climate dynamics induced by multiplicative and additive noises *(10 pages)* 012217
Dmitri V. Alexandrov, Irina A. Bashkirtseva, and Lev B. Ryashko

Detrending-moving-average-based bivariate regression estimator *(9 pages)* 012218
Qingju Fan and Fang Wang

Dynamics of the generalized Kuramoto model with nonlinear coupling: Bifurcation and stability *(14 pages)* 012219
Wei Zou and Jianwei Wang

Mortality makes coexistence vulnerable in evolutionary game of rock-paper-scissors *(8 pages)* 012220
Sirshendu Bhattacharyya, Pritam Sinha, Rina De, and Chittaranjan Hens

Entrainment of a network of interacting neurons with minimum stimulating charge *(10 pages)* 012221
Kestutis Pyragas, Augustinas P. Fedaravičius, Tatjana Pyragienė, and Peter A. Tass

PART B

Networks and Complex Systems

Maximally flexible solutions of a random K-satisfiability formula *(8 pages)* 012301
Han Zhao and Hai-Jun Zhou

Mapping flows on sparse networks with missing links *(12 pages)* 012302
Jelena Smiljanić, Daniel Edler, and Martin Rosvall

Enhanced ability of information gathering may intensify disagreement among groups *(9 pages)* 012303
Hiroki Sayama

Community detectability and structural balance dynamics in signed networks *(18 pages)* 012304
Megan Morrison and Michael Gabbay

Merge-split Markov chain Monte Carlo for community detection *(12 pages)* 012305
Tiago P. Peixoto

Random geometric graphs in high dimension *(7 pages)* 012306
Vittorio Erba, Sebastiano Ariosto, Marco Gherardi, and Pietro Rotondo

Generalized priority-based model for smartphone screen touches *(11 pages)* 012307
Jean-Pascal Pfister and Arko Ghosh

Renormalization group theory of percolation on pseudofractal simplicial and cell complexes *(10 pages)* 012308
Hanlin Sun, Robert M. Ziff, and Ginestra Bianconi

Latent Poisson models for networks with heterogeneous density *(17 pages)* 012309
Tiago P. Peixoto

Quartic balance theory: Global minimum with imbalanced triangles *(8 pages)* 012310
A. Kargaran, M. Ebrahimi, M. Riazi, A. Hosseiny, and G. R. Jafari

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

State estimation of power flows for smart grids via belief propagation *(14 pages)* 012311
Tim Ritmeester and Hildegard Meyer-Ortmanns

Random telegraph signal analysis with a recurrent neural network *(5 pages)* 012312
N. J. Lambert, A. A. Esmail, M. Edwards, A. J. Ferguson, and H. G. L. Schwefel

High prevalence regimes in the pair-quenched mean-field theory for the susceptible-infected-susceptible model on networks *(9 pages)* 012313
Diogo H. Silva, Francisco A. Rodrigues, and Silvio C. Ferreira

Statistical analysis of edges and bredges in configuration model networks *(24 pages)* 012314
Haggai Bonneau, Ofer Biham, Reimer Kühn, and Eytan Katzav

Anomalous epidemic spreading in heterogeneous networks *(10 pages)* 012315
H. Zhang and G. H. Li

Long route to consensus: Two-stage coarsening in a binary choice voting model *(9 pages)* 012316
Sudip Mukherjee, Soumyajyoti Biswas, and Parongama Sen

Intriguing effects of underlying star topology in Schelling's model with blocks *(7 pages)* 012317
Guifeng Su, Qi Xiong, and Yi Zhang

Biological Physics

Tug-of-war between stretching and bending in living cell sheets *(11 pages)* 012401
P. Recho, J. Fouchard, T. Wyatt, N. Khalilgharibi, G. Charras, and A. Kabla

Collective olfactory search in a turbulent environment *(10 pages)* 012402
Mihir Durve, Lorenzo Piro, Massimo Cencini, Luca Biferale, and Antonio Celani

Evidence for nanocoulomb charges on spider ballooning silk *(11 pages)* 012403
E. L. Morley and P. W. Gorham

Inferring domain of interactions among particles from ensemble of trajectories *(9 pages)* 012404
Udoy S. Basak, Sulimon Sattari, Kazuki Horikawa, and Tamiki Komatsuzaki

Mesoscopic dynamic model of epithelial cell division with cell-cell junction effects *(12 pages)* 012405
Zong-Yuan Liu, Bo Li, Zi-Long Zhao, Guang-Kui Xu, Xi-Qiao Feng, and Huajian Gao

Exploring the mechanisms of cell reprogramming and transdifferentiation via intercellular communication *(10 pages)* 012406
Dasong Huang and Ruiqi Wang

Noncooperative thermodynamics and kinetic models of ligand binding to polymers: Connecting McGhee–von Hippel model with the Tonks gas model *(8 pages)* 012407
Juan P. G. Villaluenga, Jules Vidal, and Francisco Javier Cao-García

Signatures of brain criticality unveiled by maximum entropy analysis across cortical states *(9 pages)* 012408
Nastaran Lotfi, Antonio J. Fontenele, Thaís Feliciano, Leandro A. A. Aguiar, Nivaldo A. P. de Vasconcelos, Carina Soares-Cunha, Bárbara Coimbra, Ana João Rodrigues, Nuno Sousa, Mauro Copelli, and Pedro V. Carelli

Riemannian geometry and statistical modeling correct for batch effects and control false discoveries in single-cell surface protein count data *(13 pages)* 012409
Shuyi Zhang, Jacob R. Leistico, Christopher Cook, Yale Liu, Raymond J. Cho, Jeffrey B. Cheng, and Jun S. Song

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 102, NUMBER 1 JULY 2020

Polymers

Statistical mechanical constitutive theory of polymer networks: The inextricable links between distribution, behavior, and ensemble *(14 pages)* 012501
Michael R. Buche and Meredith N. Silberstein

Colloids, Complex Fluids, and Active Matter

Learning to flock through reinforcement *(8 pages)* 012601
Mihir Durve, Fernando Peruani, and Antonio Celani

Activity effects on the nonlinear mechanical properties of fire-ant aggregations *(8 pages)* 012602
Michael Tennenbaum and Alberto Fernandez-Nieves

Computational study of transient shear banding in soft jammed solids *(12 pages)* 012603
Vishwas V. Vasisht and Emanuela Del Gado

Shear thinning and thickening in dispersions of spherical nanoparticles *(9 pages)* 012604
E. Küçüksönmez and J. Servantie

Transport and tumbling of polymers in viscoelastic shear flow *(10 pages)* 012605
Sadhana Singh, R. K. Singh, and Sanjay Kumar

Thermodiffusion-induced traveling and shock waves in a colloidal solution *(7 pages)* 012606
Pushpita Ghosh

Dynamics of active nematic defects on the surface of a sphere *(15 pages)* 012607
Yi-Heng Zhang (张一恒), Markus Deserno, and Zhan-Chun Tu (涂展春)

Scaling law of Brownian rotation in dense hard-rod suspensions *(7 pages)* 012608
Sheng Chen, Wen Yan, and Tong Gao

Effective temperatures in inhomogeneous passive and active bidimensional Brownian particle systems *(23 pages)* 012609
Isabella Petrelli, Leticia F. Cugliandolo, Giuseppe Gonnella, and Antonio Suma

Rod separation by sawtooth channel *(6 pages)* 012610
H. Karimi, M. R. Setare, and A. Moradian

Disappearance of the polyelectrolyte peak in salt-free solutions *(6 pages)* 012611
Alexandros Chremos and Ferenc Horkay

Dynamical properties of densely packed confined hard-sphere fluids *(13 pages)* 012612
Gerhard Jung, Michele Caraglio, Lukas Schrack, and Thomas Franosch

Liquid Crystals

Supersoft elasticity and slow dynamics of isotropic-genesis polydomain liquid crystal elastomers investigated by loading- and strain-rate-controlled tests *(7 pages)* 012701
Asaka Takebe and Kenji Urayama

Annihilation trajectory of defects in smectic-*C* films *(6 pages)* 012702
Xingzhou Tang and Jonathan V. Selinger

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Dielectric study of a subphase stabilized in an exceptionally wide temperature range by a delicate balance of interlayer interactions and thermal fluctuations *(11 pages)* 012703
Zhengyu Feng, Vigneshwaran Swaminathan, Vitaly P. Panov, Atsuo Fukuda, Ken Ishikawa, and Jagdish K. Vij

Films and Interfaces

Understanding interfacial fracture behavior between microinterlocked soft layers using physics-based cohesive zone modeling *(19 pages)* 012801
Navajit S. Baban, Ajymurat Orozaliev, Christopher J. Stubbs, and Yong Ak Song

Influence of the Turing instability on the motion of domain boundaries *(9 pages)* 012802
Isha Gupta, J. R. Barber, M. D. Thouless, and Wei Lu

Surface-directed spinodal decomposition on chemically patterned substrates *(9 pages)* 012803
Prasenjit Das, Prabhat K. Jaiswal, and Sanjay Puri

Filling, depinning, unbinding: Three adsorption regimes for nanocorrugated substrates *(13 pages)* 012804
Alexandr Malijevský

Statistics of adatom diffusion in a model of thin film growth *(10 pages)* 012805
Edwin E. Mozo Luis, Ismael S. S. Carrasco, Thiago A. de Assis, and Fábio D. A. Aarão Reis

Interactions between zwitterionic membranes in complex electrolytes *(15 pages)* 012806
Sahin Buyukdagli and Rudolf Podgornik

Theory of nanoscale ripple topographies produced by ion bombardment near the threshold for pattern formation *(12 pages)* 012807
R. Mark Bradley

Granular Materials

Slow dynamic elastic recovery in unconsolidated metal structures *(9 pages)* 012901
John Y. Yoritomo and Richard L. Weaver

Modeling and experimental investigation of shear-induced particle percolation in diluted binary mixtures *(8 pages)* 012902
S. Volpato, M. Tirapelle, and A. C. Santomaso

Impact in granular matter: Force at the base of a container made with one movable wall *(9 pages)* 012903
L. A. Torres Cisneros, V. Marzulli, C. R. K. Windows-Yule, and T. Pöschel

Particle adhesion to rough surfaces *(9 pages)* 012904
Siddharth Rajupet, Mamadou Sow, and Daniel J. Lacks

Mpemba effect in driven granular Maxwell gases *(14 pages)* 012906
Apurba Biswas, V. V. Prasad, O. Raz, and R. Rajesh

Pedestrian evacuation simulation in the presence of an obstacle using self-propelled spherocylinders *(10 pages)* 012907
I. Echeverría-Huarte, I. Zuriguel, and R. C. Hidalgo

Slow time scales in a dense vibrofluidized granular material *(11 pages)* 012908
Andrea Plati and Andrea Puglisi

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 102, NUMBER 1 JULY 2020

Solid Mechanics

Circumferential wrinkling of polymer nanofibers *(9 pages)* 013001
Mojtaba Ahmadi, Oksana Zholobko, and Xiang-Fa Wu

Fingering instability during fracture of a gel block subjected to shear loading *(9 pages)* 013002
Krishna Kant Kundan and Animangsu Ghatak

Evolving, complex topography from combining centers of Gaussian curvature *(12 pages)* 013003
Fan Feng, John S. Biggins, and Mark Warner

Crack path selection in orientationally ordered composites *(17 pages)* 013004
A. Mesgarnejad, C. Pan, R. M. Erb, S. J. Shefelbine, and A. Karma

Fluid Dynamics

How boundary slip controls emergent Darcy flow of liquids in tortuous and in capillary pores *(14 pages)* 013101
Kuldeep Singh

Numerical study of heat transfer in Rayleigh-Bénard convection under rarefied gas conditions *(15 pages)* 013102
B. Goshayeshi, G. Di Staso, F. Toschi, and H. J. H. Clercx

Theoretical study on the massively augmented electro-osmotic water transport in polyelectrolyte brush functionalized nanoslits *(10 pages)* 013103
Vishal Sankar Sivasankar, Sai Ankit Etha, Harnoor Singh Sachar, and Siddhartha Das

Predictability in a hydrodynamic pilot-wave system: Resolution of walker tunneling *(14 pages)* 013104
Loïc Tadrist, Tristan Gilet, Peter Schlagheck, and John W. M. Bush

Optimal subharmonic emission of stable bubble oscillations in a tube *(9 pages)* 013105
Yuzhe Fan, Haisen Li, and Daniel Fuster

Fourier amplitude distribution and intermittency in mechanically generated surface gravity waves *(8 pages)* 013106
Elmira Fadaeiazar, Justin Leontini, Miguel Onorato, Takuji Waseda, Alberto Alberello, and Alessandro Toffoli

Transitions in overstable rotating magnetoconvection *(11 pages)* 013107
Ankan Banerjee, Manojit Ghosh, and Pinaki Pal

Particle-size-dependent acoustophoretic motion and depletion of micro- and nano-particles at long timescales *(11 pages)* 013108
Wei Qiu, Henrik Bruus, and Per Augustsson

Impact of grain roughness on residual nonwetting phase cluster size distribution in packed columns of uniform spheres *(11 pages)* 013109
Yukie Tanino, Anelechi Ibekwe, and Dubravka Pokrajac

Plume deformation, mixing, and reaction kinetics: An analysis of interacting helical flows in three-dimensional porous media *(12 pages)* 013110
Yu Ye, Gabriele Chiogna, Chunhui Lu, and Massimo Rolle

Plasma Physics

Inconsistency of magnetic-moment conservation with entropy increase in collisionless shocks *(4 pages)* 013201
Michael Gedalin

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Scalable spectral solver in Galilean coordinates for eliminating the numerical Cherenkov instability in particle-in-cell simulations of streaming plasmas *(13 pages)* 013202
Manuel Kirchen, Remi Lehe, Soeren Jalas, Olga Shapoval, Jean-Luc Vay, and Andreas R. Maier

Suppression of the Richtmyer-Meshkov instability due to a density transition layer at the interface *(10 pages)* 013203
Takayoshi Sano, Kazuki Ishigure, and Francisco Cobos-Campos

Time- and space-resolved optical Stark spectroscopy in the afterglow of laser-produced tin-droplet plasma *(9 pages)* 013204
J. Scheers, R. Schupp, R. Meijer, W. Ubachs, R. Hoekstra, and O. O. Versolato

Growth and saturation of stimulated Raman scattering in two overlapping laser beams *(9 pages)* 013205
S. J. Yang, H. B. Zhuo, Y. Yin, Z. J. Liu, C. Y. Zheng, X. T. He, and C. Z. Xiao

Direct laser acceleration of electrons assisted by strong laser-driven azimuthal plasma magnetic fields *(13 pages)* 013206
Z. Gong (弓正), F. Mackenroth, T. Wang (王涛), X. Q. Yan, T. Toncian, and A. V. Arefiev

Proton sheet crossing in thin relativistic plasma irradiated by a femtosecond petawatt laser pulse *(12 pages)* 013207
Zheng Gong, Yinren Shou, Yuhui Tang, Ronghao Hu, Jinqing Yu, Wenjun Ma, Chen Lin, and Xueqing Yan

Possible detection of visible light and γ rays from a swarm of ball lightning *(6 pages)* 013208
M. L. Shmatov

Solitary and periodic waves in collisionless plasmas: The Adlam-Allen model revisited *(14 pages)* 013209
J. E. Allen, D. J. Frantzeskakis, N. I. Karachalios, P. G. Kevrekidis, and V. Koukouloyannis

Quantum corrections to plasma kinetic equations: A deformation approach *(10 pages)* 013210
João P. S. Bizarro, João Cortes, and R. Vilela Mendes

Nonlinear self-focusing in strongly magnetized pair plasma *(5 pages)* 013211
Maxim Lyutikov

Heat pump via charge incompressibility in a collisional magnetized multi-ion plasma *(6 pages)* 013212
M. E. Mlodik, E. J. Kolmes, I. E. Ochs, and N. J. Fisch

Computational Physics

Wettability control on deformation: Coupled multiphase fluid and granular systems *(13 pages)* 013301
Tsimur Davydzenka, Samuel Fagbemi, and Pejman Tahmasebi

Dynamic Monte Carlo simulations of inhomogeneous colloidal suspensions *(12 pages)* 013302
Fabián A. García Daza, Alejandro Cuetos, and Alessandro Patti

Chemical-potential multiphase lattice Boltzmann method with superlarge density ratios *(14 pages)* 013303
Binghai Wen, Liang Zhao, Wen Qiu, Yong Ye, and Xiaowen Shan

Simplified unified wave-particle method with quantified model-competition mechanism for numerical calculation of multiscale flows *(19 pages)* 013304
Sha Liu, Chengwen Zhong, and Ming Fang

Probing information content of hierarchical n-point polytope functions for quantifying and reconstructing disordered systems *(13 pages)* 013305
Pei-En Chen, Wenxiang Xu, Yi Ren, and Yang Jiao

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 102, NUMBER 1** **JULY 2020**

Mesoscopic method to study water flow in nanochannels with different wettability *(17 pages)* 013306
Tao Zhang, Farzam Javadpour, Xiangfang Li, Keliu Wu, Jing Li, and Ying Yin

Short-sighted deep learning *(16 pages)* 013307
Ellen de Mello Koch, Anita de Mello Koch, Nicholas Kastanos, and Ling Cheng

Asymptotic equivalence of forcing terms in the lattice Boltzmann method within second-order accuracy *(11 pages)* 013308
Kosuke Suzuki, Takaji Inamuro, and Masato Yoshino

Chromodynamic multirelaxation-time lattice Boltzmann scheme for fluids with density difference *(15 pages)* 013309
J. Spendlove, X. Xu, O. J. Halliday, T. Schenkel, and I. Halliday

Heterogeneous partition of cellular blood-borne nanoparticles through microvascular bifurcations *(12 pages)* 013310
Zixiang L. Liu, Jonathan R. Clausen, Justin L. Wagner, Kimberly S. Butler, Dan S. Bolintineanu, Jeremy B. Lechman, Rekha R. Rao, and Cyrus K. Aidun

Multipseudopotential interaction models for thermal lattice Boltzmann method simulations *(14 pages)* 013311
Kamil Pasieczynski and Baixin Chen

Definitions of local density in density-dependent potentials for mixtures *(6 pages)* 013312
Peter Vanya and James A. Elliott

COMMENTS

Comment on "Quantum fidelity approach to the ground-state properties of the one-dimensional axial next-nearest-neighbor Ising model in a transverse field" *(3 pages)* 016101
Somayyeh Nemati, Fatemeh Khastehdel Fumani, and Saeed Mahdavifar

Reply to "Comment on 'Quantum fidelity approach to the ground-state properties of the one-dimensional axial next-nearest-neighbor Ising model in a transverse field' " *(2 pages)* 016102
O. F. de Alcantara Bonfim, B. Boechat, and J. Florencio

ERRATA

Publisher's Note: Electronic structure and carrier transfer in B-DNA monomer polymers and dimer polymers: Stationary and time-dependent aspects of a wire model versus an extended ladder model [Phys. Rev. E **94**, 062403 (2016)] *(1 page)* . . . . . 019901(E)
