PHYSICAL REVIEW E

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Saturation of the asymmetric current filamentation instability under conditions relevant to relativistic shock precursors (<i>15 pages</i>)	035202
Virginia Bresci, Laurent Gremillet, and Martin Lemoine	
Shear softening and hardening of a two-dimensional Yukawa solid (<i>7 pages</i>)	035203
Shaoyu Lu, Dong Huang, and Yan Feng	
Slowdown of interpenetration of two counterpropagating plasma slabs due to collective effects (<i>7 pages</i>)	035204
N. Shukla, K. Schoeffler, J. Vieira, R. Fonseca, E. Boella, and L. O. Silva	
Computational Physics	
Rigorous expressions for thermodynamic properties in the NpH ensemble (<i>13 pages</i>)	035301
Philipp Ströker and Karsten Meier	
Quantum simulation of operator spreading in the chaotic Ising model (<i>7 pages</i>)	035302
Michael R. Geller, Andrew Arrasmith, Zoë Holmes, Bin Yan, Patrick J. Coles, and Andrew Sornborger	
Integer lattice gas with a sampling collision operator for the fluctuating diffusion equation (<i>9 pages</i>)	035303
Noah Seekins and Alexander J. Wagner	
Supervised and unsupervised machine learning of structural phases of polymers adsorbed to nanowires (<i>9 pages</i>)	035304
Quinn Parker, Dilina Perera, Ying Wai Li, and Thomas Vogel	
Comparison between a quantum annealer and a classical approximation algorithm for computing the ground state of an Ising spin glass (<i>10 pages</i>)	035305
Ran Yaacoby, Nathan Schaar, Leon Kellerhals, Oren Raz, Danny Hermelin, and Rami Pugatch	
Particle distribution function discontinuity-based kinetic immersed boundary method for Boltzmann equation and its applications to incompressible viscous flows (<i>17 pages</i>)	035306
Ding Xu, Yisu Huang, and Jinglei Xu	
Continuous Kubo-Greenwood formula: Theory and numerical implementation (<i>16 pages</i>)	035307
G. S. Demyanov, D. V. Knyazev, and P. R. Levashov	

Granular Materials

 Nonadditive drag of tandem rods drafting in granular sediments (<i>11 pages</i>)	034901
Brian Chang and Arshad Kudrolli	
Relaxation times, rheology, and finite size effects for non-Brownian disks in two dimensions (<i>14 pages</i>)	034902
Peter Olsson	
Contacts, motion, and chain breaking in a two-dimensional granular system displaced by an intruder (<i>13 pages</i>)	034903
Douglas D. Carvalho, Nicolao C. Lima, and Erick M. Franklin	

Solid Mechanics

Finite curved creases in infinite isometric sheets (<i>14 pages</i>)	035001
Aaron J. Mowitz	
Packing a flexible fiber into a cavity (<i>7 pages</i>)	035002
J. D. Sherwood and S. Ghosal	

Fluid Dynamics

Transport of condensing droplets in Taylor-Green vortex flow in the presence of thermal noise (<i>14 pages</i>)	035101
Anu V. S. Nath, Anubhab Roy, Rama Govindarajan, and S. Ravichandran	
Reynolds and dispersive shear stress in free-surface turbulent channel flow over square bars (<i>10 pages</i>)	035102
Razieh Jalalabadi and Thorsten Stoesser	
Acoustic particle trapping driven by axial primary radiation force in shaped traps (<i>15 pages</i>)	035103
L. Malik, A. Nath, S. Nandy, T. Laurell, and A. K. Sen	
Thin liquid films down a vertical microfiber: Effect of curvature elasticity (<i>16 pages</i>)	035104
Weiyang Jiang and Zijiang Ding	
Linking mixing and flow topology in porous media: An experimental proof (<i>9 pages</i>)	035105
Mónica Basilio Hazas, Francesca Ziliotto, Massimo Rolle, and Gabriele Chiogna	
Weak curvature asymptotics for Debye layers as electrohydrodynamic discontinuities (<i>11 pages</i>)	035106
Philipp G. Marthaler and Andreas G. Class	
Destabilizing resonances of precessing inertia-gravity waves (<i>19 pages</i>)	035107
N. Benkacem, A. Salhi, A. Khlifi, S. Nasraoui, and C. Cambon	
Enstrophy change of the Reynolds-Orr solution in channel flow (<i>9 pages</i>)	035108
Péter Tamás Nagy	
Balanced nonstationary turbulence (<i>9 pages</i>)	035109
Konstantinos Steiros	

Plasma Physics

Optimized laser-assisted electron injection into a quasilinear plasma wakefield (<i>6 pages</i>)	035201
V. Khudiakov and A. Pukhov	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Limitations on concentration measurements and gradient discerning times in cellular systems (<i>9 pages</i>)	034410
Vaibhav Wasnik	
Promoter methylation in a mixed feedback loop circadian clock model (<i>13 pages</i>)	034411
Turner Silverthorne, Edward Saehong Oh, and Adam R. Stinchcombe	
Polymers	
Binding mechanisms in dendrimer-surfactant complexes (<i>7 pages</i>)	034501
J. S. Kłos and J. Paturej	
Conformational properties of hybrid star-shaped polymers comprised of linear and ring arms (<i>9 pages</i>)	034502
Khristine Haydukivska, Viktoria Blavatska, Jarosław S. Kłos, and Jarosław Paturej	
Effective forces between active polymers (<i>6 pages</i>)	034503
M. C. Gandikota and A. Cacciuto	
Heterogeneous nucleation of creases in swelling polymer gels (<i>12 pages</i>)	034504
Jianzhu Ju, Ken Sekimoto, Luca Cipelletti, Costantino Creton, and Tetsuharu Narita	
Colloids, Complex Fluids, and Active Matter	
Formation and dissolution of midge swarms (<i>6 pages</i>)	034601
Manisha L. Patel and Nicholas T. Ouellette	
Nonlinear dynamics in micellar surfactant solutions. I. Kinetics (<i>22 pages</i>)	034602
Joshua A. Mysona, Alon V. McCormick, and David C. Morse	
Nonlinear dynamics in micellar surfactant solutions. II. Diffusion (<i>13 pages</i>)	034603
Joshua A. Mysona, Alon V. McCormick, and David C. Morse	
Structural characteristics of low-density environments in liquid water (<i>9 pages</i>)	034604
Aswin V. Muthachikavil, Georgios M. Kontogeorgis, Xiaodong Liang, Qun Lei, and Baoliang Peng	
Liquid Crystals	
Topological structures in chiral media: Effects of confined geometry (<i>11 pages</i>)	034701
I. M. Tambovtsev, A. O. Leonov, I. S. Lobanov, Alexei D. Kiselev, and V. M. Uzdin	
Wrinkling pattern formation with periodic nematic orientation: From egg cartons to corrugated surfaces (<i>13 pages</i>)	034702
Ziheng Wang, Phillip Servio, and Alejandro Rey	
Films and Interfaces	
Combinatorial topology and geometry of fracture networks (<i>15 pages</i>)	034801
A. Roy, R. A. I. Haque, A. J. Mitra, S. Tarafdar, and T. Dutta	
Emergence of local geometric laws of step flow in homoepitaxial growth (<i>21 pages</i>)	034802
Ian Johnson and Dionisios Margetis	
Thermal transport mechanism at a solid-liquid interface based on the heat flux detected at a subatomic spatial resolution (<i>27 pages</i>)	034803
Kunio Fujiwara and Masahiko Shibahara	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Role of limiting dispersal on metacommunity stability and persistence (<i>14 pages</i>)	034309
Snehasish Roy Chowdhury, Ramesh Arumugam, Wei Zou, V. K. Chandrasekar, and D. V. Senthilkumar	
Statistical physics of exchangeable sparse simple networks, multiplex networks, and simplicial complexes (<i>25 pages</i>)	034310
Ginestra Bianconi	
Effects of measures on phase transitions in two cooperative susceptible-infectious-recovered dynamics (<i>17 pages</i>)	034311
Adib Khazaei and Fakhteh Ghanbarnejad	
Exotic states induced by coevolving connection weights and phases in complex networks (<i>11 pages</i>)	034312
S. Thamizharasan, V. K. Chandrasekar, M. Senthilvelan, Rico Berner, Eckehard Schöll, and D. V. Senthilkumar	
Large deviations of a susceptible-infected-recovered model around the epidemic threshold (<i>17 pages</i>)	034313
Yannick Feld and Alexander K. Hartmann	
Self-organized quantization and oscillations on continuous fixed-energy sandpiles (<i>13 pages</i>)	034314
Jakob Niehues, Gorm Gruner Jensen, and Jan O. Haerter	
Biological Physics	
 Ballooning in spiders using multiple silk threads (<i>11 pages</i>)	034401
Charbel Habchi and Mohammad K. Jawed	
Impact of contact inhibition on collective cell migration and proliferation (<i>9 pages</i>)	034402
H. P. Jain, D. Wenzel, and A. Voigt	
Assessing transfer entropy from biochemical data (<i>13 pages</i>)	034403
Takuya Imaizumi, Nobuhisa Umeki, Ryo Yoshizawa, Tomoyuki Obuchi, Yasushi Sako, and Yoshiyuki Kabashima	
Local accumulation time for diffusion in cells with gap junction coupling (<i>14 pages</i>)	034404
Paul C. Bressloff	
Parallel path mechanisms lead to nonmonotonic force-velocity curves and an optimum load for molecular motor function (<i>11 pages</i>)	034405
Upasana L. Mallimadugula and Eric A. Galburt	
Pathway-resolved decomposition demonstrates correlation and noise dependencies of redundant information processing in recurrent feed-forward topologies (<i>10 pages</i>)	034406
Ayan Biswas	
Extraction of kinetics from equilibrium distributions of states using the Metropolis Monte Carlo method (<i>8 pages</i>)	034407
Sergei F. Chekmarev	
White-noise-induced double coherence resonances in reduced Hodgkin-Huxley neuron model near subcritical Hopf bifurcation (<i>13 pages</i>)	034408
Li Li and Zhiguo Zhao	
Modeling the effects of environmental and perceptual uncertainty using deterministic reinforcement learning dynamics with partial observability (<i>15 pages</i>)	034409
Wolfram Barfuss and Richard P. Mann

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Oscillatory periodic pattern dynamics in hyperbolic reaction-advection-diffusion models (<i>17 pages</i>)	034206
Giancarlo Consolo, Carmela Curró, Gabriele Grifó, and Giovanna Valenti	
Control of a qubit state by a soliton propagating through a Heisenberg spin chain (<i>9 pages</i>)	034207
S. Varbev, I. Boradjiev, R. Kamburova, and H. Chamati	
Nonequilibrium thermodynamic characterization of chimeras in a continuum chemical oscillator system (<i>8 pages</i>)	034208
Premashis Kumar and Gautam Gangopadhyay	
Generative formalism of causality quantifiers for processes (<i>29 pages</i>)	034209
Dmitry A. Smirnov	
Measurement and memory in the periodically driven complex Ginzburg-Landau equation (<i>8 pages</i>)	034210
T. Mithun, P. G. Kevrekidis, A. Saxena, and A. R. Bishop	
Emerging chimera states under nonidentical counter-rotating oscillators (<i>13 pages</i>)	034211
K. Sathiyadevi, V. K. Chandrasekar, and M. Lakshmanan	
Phase irregularity: A conceptually simple and efficient approach to characterize electroencephalographic recordings from epilepsy patients (<i>15 pages</i>)	034212
Anaïs Espinosa and Ralph G. Andrzejak	
Trapping wave fields in an expulsive potential by means of linear coupling (<i>13 pages</i>)	034213
Nir Hacker and Boris A. Malomed	

PART B

Networks and Complex Systems

Non-Markovian temporal networks with auto- and cross-correlated link dynamics (<i>30 pages</i>)	034301
Oliver E. Williams, Piero Mazzarisi, Fabrizio Lillo, and Vito Latora	
Disaster propagation in interdependent networks with different link patterns (<i>6 pages</i>)	034302
Jing Li, Zequan Li, Hui Qi, and Qiuhan Zhang	
Stochastic evolutionary stability in matrix games with random payoffs (<i>10 pages</i>)	034303
Tian-Jiao Feng, Jie Mei, Cong Li, Xiu-Deng Zheng, Sabin Lessard, and Yi Tao	
Nonuniform random graphs on the plane: A scaling study (<i>13 pages</i>)	034304
C. T. Martínez-Martínez, J. A. Méndez-Bermúdez, Francisco A. Rodrigues, and Ernesto Estrada	
Fast computation of matrix function-based centrality measures for layer-coupled multiplex networks (<i>16 pages</i>)	034305
Kai Bergermann and Martin Stoll	
 Multitype branching process method for modeling complex contagion on clustered networks (<i>12 pages</i>)	034306
Leah A. Keating, James P. Gleeson, and David J. P. O'Sullivan	
Influence of asymmetric parameters in higher-order coupling with bimodal frequency distribution (<i>10 pages</i>)	034307
M. Manoranjani, R. Gopal, D. V. Senthilkumar, V. K. Chandrasekar, and M. Lakshmanan	
Emergence of synergistic and competitive pathogens in a coevolutionary spreading model (<i>8 pages</i>)	034308
Fakhteh Ghanbarnejad, Kai Seegers, Alessio Cardillo, and Philipp Hövel	

(Continued)

Thermodynamic geometry of spin-one lattice models. II. Criticality and coexistence in the mean-field approximation (<i>14 pages</i>)	034135
Riekshika Sanwari and Anurag Sahay	
Cleaning large-dimensional covariance matrices for correlated samples (<i>14 pages</i>)	034136
Zdzislaw Burda and Andrzej Jarosz	
Finite-size scaling at fixed renormalization-group invariant (<i>11 pages</i>)	034137
Francesco Parisen Toldin	
 Free-energy barriers in the Sherrington-Kirkpatrick model (<i>14 pages</i>)	034138
T. Aspelmeier and M. A. Moore	
Critical crossover phenomena driven by symmetry-breaking defects at quantum transitions (<i>12 pages</i>)	034139
Alessio Franchi, Davide Rossini, and Ettore Vicari	
Self-similar inhomogeneous stationary states under constrained dynamics (<i>9 pages</i>)	034140
Soumen Das, Shankar Ghosh, and Shamik Gupta	
Narrow capture problem: An encounter-based approach to partially reactive targets (<i>14 pages</i>)	034141
Paul C. Bressloff	
Analytic form of a two-dimensional critical distribution (<i>5 pages</i>)	034142
Steven T. Bramwell	
Complexity and efficiency of minimum entropy production probability paths from quantum dynamical evolutions (<i>16 pages</i>)	034143
Carlo Cafaro, Shannon Ray, and Paul M. Alsing	
Understanding temperature-modulated calorimetry through studies of a model system (<i>17 pages</i>)	034144
Jean-Luc Garden and Michel Peyrard	
Self-gravitating clusters of Bose-Einstein gas with planar, cylindrical, or spherical symmetry: Gaseous density profiles and onset of condensation (<i>20 pages</i>)	034145
Michael Kirejczyk, Gerhard Müller, and Pierre-Henri Chavanis	
Nonlinear Dynamics and Chaos	
Transition from order to chaos in reduced quantum dynamics (<i>9 pages</i>)	034201
Waldemar Kłobus, Paweł Kurzyński, Marek Kuś, Wiesław Laskowski, Robert Przybycień, and Karol Życzkowski	
Rogue and solitary waves in coupled phononic crystals (<i>11 pages</i>)	034202
Y. Miyazawa, C. Chong, P. G. Kevrekidis, and J. Yang	
Spontaneous symmetry breaking and the dynamics of three interacting nonlinear optical resonators with gain and loss (<i>9 pages</i>)	034203
D. Dolinina and A. Yulin	
Interacting bosons in a triple well: Preface of many-body quantum chaos (<i>15 pages</i>)	034204
Karin Wittmann W., E. R. Castro, Angela Foerster, and Lea F. Santos	
Eigenvalues of autocovariance matrix: A practical method to identify the Koopman eigenfrequencies (<i>12 pages</i>)	034205
Yicun Zhen, Bertrand Chapron, Etienne Mémin, and Lin Peng

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Percolation thresholds of randomly rotating patchy particles on Archimedean lattices (<i>13 pages</i>)	034118
Quancheng Wang, Zhenfang He, Junfeng Wang, and Hao Hu	
Anomalous aggregation regimes of temperature-dependent Smoluchowski equations (<i>13 pages</i>)	034119
A. I. Osinsky and N. V. Brilliantov	
Classical density functional theory in the canonical ensemble (<i>12 pages</i>)	034120
James F. Lutsko	
Equilibrium states of Burgers and Korteweg–de Vries equations (<i>7 pages</i>)	034121
Mahendra K. Verma, Soumyadeep Chatterjee, Aryan Sharma, and Ananya Mohapatra	
Thermoelectric generator in endoreversible approximation: The effect of heat-transfer law under finite physical dimensions constraint (<i>7 pages</i>)	034122
Jasleen Kaur, Ramandeep S. Johal, and Michel Feidt	
Spectrum of the tight-binding model on Cayley trees and comparison with Bethe lattices (<i>11 pages</i>)	034123
M. Ostilli, Claudionor G. Bezerra, and G. M. Viswanathan	
Exact solution of the “Rule 150” reversible cellular automaton (<i>32 pages</i>)	034124
Joseph W. P. Wilkinson, Tomaž Prosen, and Juan P. Garrahan	
Switchable selective interactions in a Dicke model with a driven biased term (<i>10 pages</i>)	034125
Ning Yu, Shiran Wang, Chunfang Sun, and Gangcheng Wang	
State-specific boundary conditions for nonequilibrium gas flows in slip regime (<i>16 pages</i>)	034126
L. Shakurova and E. Kustova	
Universal bounds on cooling power and cooling efficiency for autonomous absorption refrigerators (<i>9 pages</i>)	034127
Sandipan Mohanta, Sushant Saryal, and Bijay Kumar Agarwalla	
Long-range order and quantum criticality in antiferromagnetic chains with long-range staggered interactions (<i>9 pages</i>)	034128
Jie Ren, Zhao Wang, Weixia Chen, and Wen-Long You	
XY model with competing higher-order interactions (<i>10 pages</i>)	034129
Milan Žukovič and Georgii Kalagov	
Solution to the Fokker-Planck equation for slowly driven Brownian motion: Emergent geometry and a formula for the corresponding thermodynamic metric (<i>12 pages</i>)	034130
Neha S. Wadia, Ryan V. Zarcone, and Michael R. DeWeese	
Asymptotic states of Ising ferromagnets with long-range interactions (<i>9 pages</i>)	034131
Ramgopal Agrawal, Federico Corberi, Ferdinando Insalata, and Sanjay Puri	
☞ Stiffness of random walks with reflecting boundary conditions (<i>6 pages</i>)	034132
Sascha Kaldasch and Andreas Engel	
Brownian motion in a growing population of ballistic particles (<i>5 pages</i>)	034133
Nathaniel V. Mon Père, Pierre de Buyl, and Sophie de Buyl	
Thermodynamic geometry of spin-one lattice models. I. Spin and quadrupolar orders and critical scaling functions in one dimension (<i>17 pages</i>)	034134
Riekhshika Sanwari and Anurag Sahay

THIRD SERIES, VOLUME 105, NUMBER 3

MARCH 2022

Achieving Carnot efficiency in a finite-power Brownian Carnot cycle with arbitrary temperature difference (<i>15 pages</i>)	034102
Kosuke Miura, Yuki Izumida, and Koji Okuda	
Phase transition from nematic to high-density disordered phase in a system of hard rods on a lattice (<i>13 pages</i>) . . .	034103
Aagam Shah, Deepak Dhar, and R. Rajesh	
Disorders can induce continuously varying universal scaling in driven systems (<i>18 pages</i>)	034104
Astik Haldar and Abhik Basu	
Diffusive majority-vote model (<i>7 pages</i>)	034105
J. R. S. Lima, F. W. S. Lima, T. F. A. Alves, G. A. Alves, and A. Macedo-Filho	
Negative autocorrelations of disorder strongly suppress thermally activated particle motion in short-correlated quenched Gaussian disorder potentials (<i>5 pages</i>)	034106
Baruch Meerson	
Reliability and entropy production in nonequilibrium electronic memories (<i>9 pages</i>)	034107
Nahuel Freitas, Karel Proesmans, and Massimiliano Esposito	
Large deviations of semisupervised learning in the stochastic block model (<i>13 pages</i>)	034108
Hugo Cui, Luca Saglietti, and Lenka Zdeborová	
First passage of a diffusing particle under stochastic resetting in bounded domains with spherical symmetry (<i>7 pages</i>)	034109
Hanshuang Chen and Feng Huang	
Equation of state and Helmholtz energy functional for fused heterosegmented hard chains (<i>11 pages</i>)	034110
Philipp Rehner, Thijs van Westen, and Joachim Gross	
Transition rates of noninteracting quantum particles from the Widom insertion formula (<i>7 pages</i>)	034111
M. Hoyuelos	
Strong system-bath coupling effects in quantum absorption refrigerators (<i>10 pages</i>)	034112
Felix Ivander, Nicholas Anto-Sztrikacs, and Dvira Segal	
Intuitive view of entropy production of ideal run-and-tumble particles (<i>8 pages</i>)	034113
Derek Frydel	
Numerical evidence of Janssen-Oerding's prediction in a three-dimensional spin model far from equilibrium (<i>6 pages</i>)	034114
Roberto da Silva	
Thermodynamic uncertainty relation for quantum work distribution: Exact case study for a perturbed oscillator (<i>7 pages</i>)	034115
Takaaki Monnai	
Joint statistics of space and time exploration of one-dimensional random walks (<i>15 pages</i>)	034116
J. Klinger, A. Barbier-Chebbah, R. Voituriez, and O. Bénichou	
Two-species totally asymmetric simple exclusion process model: From a simple description to intermittency and traveling traffic jams (<i>18 pages</i>)	034117
Pierre Bonnin, Ian Stansfield, M. Carmen Romano, and Norbert Kern

THIRD SERIES, VOLUME 105, NUMBER 3
PARTS A AND B

CONTENTS

MARCH 2022

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L032101–034213, and Part B pages 034301–035307.*

PART A

LETTERS

Statistical Physics

- Hawkes processes with infinite mean intensity (*4 pages*) L032101
Cecilia Aubrun, Michael Benzaquen, and Jean-Philippe Bouchaud

Nonlinear Dynamics and Chaos

- Quenching of oscillations in a liquid metal via attenuated coupling (*5 pages*) L032201
Ishant Tiwari, Richa Phogat, Animesh Biswas, P. Parmananda, and Sudeshna Sinha

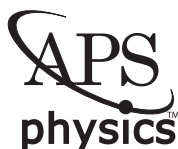

Colloids, Complex Fluids, and Active Matter

- Ordering hard-sphere particle suspensions by medium crystallization: Effect of size and interaction strength (*6 pages*) L032601
Vianney Gimenez-Pinto
- Absorbing phase transitions in systems with mediated interactions (*5 pages*) L032602
Romain Mari, Eric Bertin, and Cesare Nardini
- Phase ordering, topological defects, and turbulence in the three-dimensional incompressible Toner-Tu equation (*6 pages*) L032603
Navdeep Rana and Prasad Perlekar
- Reentrant transitions in a mixture of small and big particles interacting via soft repulsive potential (*6 pages*) L032604
Itay Azizi, Alexander Y. Grosberg, and Yitzhak Rabin

ARTICLES

Statistical Physics

- Extracting work from random collisions: A model of a quantum heat engine (*7 pages*) 034101
Vahid Shaghghi, G. Massimo Palma, and Giuliano Benenti

Copyright 2022 by American Physical Society

2470-0045(202203)105:3:A;1-6
