THIRD SERIES, VOLUME 106, NUMBER 1
PARTS A AND B

CONTENTS

JULY 2022

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L012101–014309, and Part B pages 014401–019901(E).

PART A

LETTERS

Statistical Physics

Generalization of stochastic-resonance-based threshold networks with Tikhonov regularization *(5 pages)* L012101
Saiya Bai, Fabing Duan, François Chapeau-Blondeau, and Derek Abbott

Nonlinear Dynamics and Chaos

Dancing vortices in a driven nematic liquid crystal cell: Theory and experiment *(6 pages)* L012201
M. G. Clerc, M. Ferré, R. Gajardo-Pizarro, and V. Zambra

Suppression of quasiperiodicity in circle maps with quenched disorder *(6 pages)* L012202
David Müller-Bender, Johann Luca Kastner, and Günter Radons

Networks and Complex Systems

Tropical approximation to finish time of activity networks *(5 pages)* L012301
Alexei Vazquez

Colloids, Complex Fluids, and Active Matter

Interplay between jamming and motility-induced phase separation in persistent self-propelling particles *(6 pages)* L012601
Jing Yang, Ran Ni, and Massimo Pica Ciamarra

Helical flow states in active nematics *(6 pages)* L012602
Ryan R. Keogh, Santhan Chandragiri, Benjamin Loewe, Tapio Ala-Nissila, Sumesh P. Thampi, and Tyler N. Shendruk

Anisotropic active Brownian particle with a fluctuating propulsion force *(6 pages)* L012603
Jean-Luc Thiffeault and Jiajia Guo

Janssen effect in columns of fire ants *(5 pages)* L012604
Caleb J. Anderson, Pryor A. Gibson, and Alberto Fernandez-Nieves

Copyright 2022 by American Physical Society

2470-0045(202207)106:1:B;1-2

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 106, NUMBER 1 JULY 2022

Ratchetlike motion of helical bilayers induced by boundary constraints *(5 pages)* L012605
Michio Tanaka, Xinyu Wang, Chandan K. Mishra, Jianguo Cai, Jian Feng, Randall D. Kamien, and A. G. Yodh

Fluid Dynamics

Conserving elastic turbulence numerically using artificial diffusivity *(5 pages)* L013101
V. Dzanic, C. S. From, and E. Sauret

Plasma Physics

Bound on hot-spot mix in high-velocity, high-adiabat direct-drive cryogenic implosions based on comparison of absolute x-ray and neutron yields *(6 pages)* L013201
R. C. Shah, D. Cao, L. Aghaian, B. Bachmann, R. Betti, E. M. Campbell, R. Epstein, C. J. Forrest, A. Forsman, V. Yu. Glebov, V. N. Goncharov, V. Gopalaswamy, D. R. Harding, S. X. Hu, I. V. Igumenshchev, R. T. Janezic, L. Keaty, J. P. Knauer, D. Kobs, A. Lees, O. M. Mannion, Z. L. Mohamed, D. Patel, M. J. Rosenberg, W. T. Shmayda, C. Stoeckl, W. Theobald, C. A. Thomas, P. Volegov, K. M. Woo, and S. P. Regan

Gyrokinetic electrostatic turbulence close to marginality in the Wendelstein 7-X stellarator *(6 pages)* L013202
Alessandro Zocco, Linda Podavini, José Manuel Garcìa-Regaña, Michael Barnes, Felix I. Parra, A. Mishchenko, and Per Helander

Dust mobilization in the presence of magnetic fields *(5 pages)* L013203
Li Hsia Yeo, Noah Hood, Xu Wang, and Mihály Horányi

ARTICLES

Statistical Physics

Equation of state of hard lenses: A combined virial series and simulation approach *(7 pages)* 014101
Philipp Marienhagen and Joachim Wagner

Statistical properties of large data sets with linear latent features *(18 pages)* 014102
Philipp Fleig and Ilya Nemenman

Statistical physics of inhomogeneous transport: Unification of diffusion laws and inference from first-passage statistics *(15 pages)* 014103
Roman Belousov, Ali Hassanali, and Édgar Roldán

Tensor network renormalization study on the crossover in classical Heisenberg and RP^2 models in two dimensions *(12 pages)* 014104
Atsushi Ueda and Masaki Oshikawa

Frustration-induced complexity in order-disorder transitions of the J_1-J_2-J_3 Ising model on the square lattice *(17 pages)* 014105
Rodolfo Subert and Bela M. Mulder

Universal minimal cost of coherent biochemical oscillations *(5 pages)* 014106
Lukas Oberreiter, Udo Seifert, and Andre C. Barato

Towards lattice-gas description of low-temperature properties above the Haldane and cluster-based Haldane ground states of a mixed spin-(1,1/2) Heisenberg octahedral chain *(12 pages)* 014107
Katarína Karl'ová, Jozef Strečka, and Johannes Richter

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Adiabatic lapse rate of real gases *(7 pages)* 014108
Bogar Díaz, Miguel Ángel García-Ariza, and J. E. Ramírez

Emergence of quantum spin frustration in spin-1/2 Ising-Heisenberg model on a decorated honeycomb lattice *(11 pages)* 014109
Onofre Rojas

Projective-truncation-approximation study of the one-dimensional ϕ^4 lattice model *(13 pages)* 014110
Kou-Han Ma, Yan-Jiang Guo, Lei Wang, and Ning-Hua Tong

Nonmonotonic heat dissipation phenomenon in close-packed hotspot systems *(9 pages)* 014111
Chuang Zhang and Lei Wu

When stochasticity leads to cooperation *(7 pages)* 014112
Ian Braga and Lucas Wardil

Stationary states in two-lane traffic: Insights from kinetic theory *(11 pages)* 014113
A. Sai Venkata Ramana and Saif Eddin Jabari

Non-Markovian thermal operations boosting the performance of quantum heat engines *(11 pages)* 014114
Krzysztof Ptaszyński

Force density functional theory in- and out-of-equilibrium *(17 pages)* 014115
Salomée M. Tschopp, Florian Sammüller, Sophie Hermann, Matthias Schmidt, and Joseph M. Brader

Learning through atypical phase transitions in overparameterized neural networks *(11 pages)* 014116
Carlo Baldassi, Clarissa Lauditi, Enrico M. Malatesta, Rosalba Pacelli, Gabriele Perugini, and Riccardo Zecchina

Temporal Theil scaling in diffusive trajectory time series *(16 pages)* 014117
F. S. Abril and C. J. Quimbay

Information-driven transitions in projections of underdamped dynamics *(11 pages)* 014118
Giorgio Nicoletti, Amos Maritan, and Daniel Maria Busiello

Preparation of quantum correlations assisted by a steering Maxwell demon *(7 pages)* 014119
Gang-Gang He and Fu-Lin Zhang

Role of extended coupling in bidirectional transport system *(13 pages)* 014120
Tamizhazhagan S and Atul Kumar Verma

Curvature-driven growth and interfacial noise in the voter model with self-induced zealots *(8 pages)* 014121
Luís Carlos F. Latoski, W. G. Dantas, and Jeferson J. Arenzon

Post-thermalization via information spreading in open quantum systems *(10 pages)* 014122
Krzysztof Ptaszyński and Massimiliano Esposito

Polarization-dependent reflection of I-WP minimal-surface-based photonic crystal *(10 pages)* 014123
Ryosuke Ohnuki, Yuka Kobayashi, and Shinya Yoshioka

Reconstructing the dynamical quantum phase transitions via dimensional expansion in a generalized Su-Schrieffer-Heeger model *(10 pages)* 014124
Xin Li, YuXuan Ma, DuoJia Wang, Yu Wang, and ShunCai Zhao

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Switching from a continuous to a discontinuous phase transition under quenched disorder *(6 pages)* 014125
Bartłomiej Nowak and Katarzyna Sznajd-Weron

Critical dynamics of the superfluid phase transition: Multiloop calculation of the microscopic model *(13 pages)* 014126
J. Honkonen, M. Komarova, Yu. Molotkov, M. Nalimov, and A. Trenogin

Memory in quantum dot blinking *(18 pages)* 014127
Roberto N. Muñoz, Laszlo Frazer, Gangcheng Yuan, Paul Mulvaney, Felix A. Pollock, and Kavan Modi

Slow dynamics and large deviations in classical stochastic Fredkin chains *(13 pages)* 014128
Luke Causer, Juan P. Garrahan, and Austen Lamacraft

Hysteresis and return point memory in the random-field Blume-Capel model *(10 pages)* 014129
B. E. Aldrin, Abdul Khaleque, and Sumedha

Brownian motion theory of the two-dimensional quantum vortex gas *(10 pages)* 014130
Hiroshi Kuratsuji

Counterdiabatic driving in the classical β-Fermi-Pasta-Ulam-Tsingou chain *(12 pages)* 014131
Nik O. Gjonbalaj, David K. Campbell, and Anatoli Polkovnikov

Statistical properties of the off-diagonal matrix elements of observables in eigenstates of integrable systems *(15 pages)* 014132
Yicheng Zhang, Lev Vidmar, and Marcos Rigol

Microseismic event detection in noisy environments with instantaneous spectral Shannon entropy *(8 pages)* 014133
Sérgio Luiz E. F. da Silva and Gilberto Corso

Evidence for additional third-order transitions in the two-dimensional Ising model *(7 pages)* 014134
Kedkanok Sitarachu and Michael Bachmann

Dynamic crossover towards energy equipartition in the Fermi-Pasta-Ulam-Tsingou β model with long-range interactions *(8 pages)* 014135
Jian Wang and Ai-chen Li

Fock-space approach to stochastic susceptible-infected-recovered models *(12 pages)* 014136
Danillo B. de Souza, Hugo A. Araújo, Gerson C. Duarte-Filho, Eamonn A. Gaffney, Fernando A. N. Santos, and Ernesto P. Raposo

Spectral fingerprints of nonequilibrium dynamics: The case of a Brownian gyrator *(20 pages)* 014137
Sara Cerasoli, Sergio Ciliberto, Enzo Marinari, Gleb Oshanin, Luca Peliti, and Lamberto Rondoni

Optimal charging of open spin-chain quantum batteries via homodyne-based feedback control *(12 pages)* 014138
Y. Yao and X. Q. Shao

Diffusion on a lattice: Transition rates, interactions, and memory effects *(6 pages)* 014139
M. A. Di Muro and M. Hoyuelos

Estimation of drift and diffusion functions from unevenly sampled time-series data *(8 pages)* 014140
William Davis and Bruce Buffett

Derivation of a statistical model for classical systems obeying the fractional exclusion principle *(8 pages)* 014141
Projesh Kumar Roy

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Random-walk shielding-potential viscosity model for warm dense metals *(10 pages)* 014142
Yuqing Cheng, Haifeng Liu, Yong Hou, Xujun Meng, Qiong Li, Yu Liu, Xingyu Gao, Jianmin Yuan, Haifeng Song, and Jianguo Wang

Collective effects on the performance and stability of quantum heat engines *(20 pages)* 014143
Leonardo da Silva Souza, Gonzalo Manzano, Rosario Fazio, and Fernando Iemini

Molecular hints of two-step transition to convective flow via streamline percolation *(14 pages)* 014144
P. L. Garrido and P. I. Hurtado

Perturbative expansion of irreversible work in symmetric and asymmetric processes *(18 pages)* 014145
T. Koide

Spacing distribution in the two-dimensional Coulomb gas: Surmise and symmetry classes of non-Hermitian random matrices at noninteger β *(11 pages)* 014146
Gernot Akemann, Adam Mielke, and Patricia Päßler

Stochastic representation of processes with resetting *(10 pages)* 014147
Marcin Magdziarz and Kacper Taźbierski

Finite-size scaling of critical avalanches *(5 pages)* 014148
Avinash Chand Yadav, Abdul Quadir, and Haider Hasan Jafri

Frustration in a generalized kagomé Ising antiferromagnet: Exact results *(14 pages)* 014149
K. A. Muttalib and J. H. Barry

Steady states and coarsening in one-dimensional driven Allen-Cahn system *(13 pages)* 014150
Rajiv G. Pereira

Lower critical dimension of the random-field XY model and the zero-temperature critical line *(5 pages)* 014151
Kutay Akın and A. Nihat Berker

Numerically probing the universal operator growth hypothesis *(8 pages)* 014152
Robin Heveling, Jiaozi Wang, and Jochen Gemmer

Mutual information in changing environments: Nonlinear interactions, out-of-equilibrium systems, and continuously varying diffusivities *(13 pages)* 014153
Giorgio Nicoletti and Daniel Maria Busiello

Full counting statistics and fluctuation theorem for the currents in the discrete model of Feynman's ratchet *(9 pages)* 014154
Yu-Xin Wu, Jiayin Gu, and H. T. Quan

Nonlinear Dynamics and Chaos

Stability limits for modes held in alternating trapping-expulsive potentials *(14 pages)* 014201
Zhihuan Luo, Yan Liu, Yongyao Li, Josep Batle, and Boris A. Malomed

Regulating dynamics through intermittent interactions *(8 pages)* 014203
Shiva Dixit, Manaoj Aravind, and P. Parmananda

Estimating asymptotic phase and amplitude functions of limit-cycle oscillators from time series data *(12 pages)* 014204
Norihisa Namura, Shohei Takata, Katsunori Yamaguchi, Ryota Kobayashi, and Hiroya Nakao

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Testing wave turbulence theory for the Gross-Pitaevskii system *(18 pages)* 014205
Ying Zhu, Boris Semisalov, Giorgio Krstulovic, and Sergey Nazarenko

Sublinear diffusion in the generalized triangle map *(10 pages)* 014206
Kensuke Yoshida, Giulio Casati, Shingo Watanabe, and Akira Shudo

Dynamical buckling of a table-tennis ball impinging normally on a rigid target: Experimental and numerical studies *(9 pages)* 014207
Théophile Rémond, Vincent Dolique, Franck Vittoz, Sheedev Antony, Renaud G. Rinaldi, Lionel Manin, and Jean-Christophe Géminard

Super rogue waves: Collision of rogue waves in Bose-Einstein condensate *(7 pages)* 014208
Yanchang Tan, Xiao-Dong Bai, and Tiantian Li

Bistability and chaos-assisted tunneling in dissipative quantum systems *(6 pages)* 014209
Andrey R. Kolovsky

Boundary chaos *(17 pages)* 014210
Felix Fritzsch and Tomaž Prosen

Fluctuation properties of the eigenfrequencies and scattering matrix of closed and open unidirectional graphs with chaotic wave dynamics *(14 pages)* 014211
Jiongning Che, Xiaodong Zhang, Weihua Zhang, Barbara Dietz, and Guozhi Chai

Forced symmetry breaking as a mechanism for rogue bursts in a dissipative nonlinear dynamical lattice *(12 pages)* 014212
P. Subramanian, E. Knobloch, and P. G. Kevrekidis

Chaos and thermalization in a classical chain of dipoles *(9 pages)* 014213
Manuel Iñarrea, Rosario González-Férez, J. Pablo Salas, and Peter Schmelcher

Modulation instability of an electromagnetic wave interacting with a counterpropagating electron beam under condition of cyclotron resonance absorption *(14 pages)* 014214
A. A. Rostuntsova, N. M. Ryskin, I. V. Zotova, and N. S. Ginzburg

Networks and Complex Systems

Adversarial attacks on voter model dynamics in complex networks *(6 pages)* 014301
Katsumi Chiyomaru and Kazuhiro Takemoto

Reconstructing distant interactions of multiple paths between perceptible nodes in dark networks *(18 pages)* 014302
Xinyu Wang, Yuanyuan Mi, Zhaoyang Zhang, Yang Chen, Gang Hu, and Haihong Li

Absorbing phase transition in a unidirectionally coupled layered network *(7 pages)* 014303
Manoj C. Warambhe, Ankosh D. Deshmukh, and Prashant M. Gade

N-strain epidemic model using bond percolation *(20 pages)* 014304
Peter Mann, V. Anne Smith, John B. O. Mitchell, and Simon Dobson

Solving a directed-percolation inverse problem *(9 pages)* 014305
Sean Deyo

Inferring spatial source of disease outbreaks using maximum entropy *(14 pages)* 014306
Mehrad Ansari, David Soriano-Paños, Gourab Ghoshal, and Andrew D. White

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 106, NUMBER 1 JULY 2022

Effect of initial infection size on a network susceptible-infected-recovered model *(11 pages)* 014307
G. Machado and G. J. Baxter

Moment closure approximations of susceptible-infected-susceptible epidemics on adaptive networks *(21 pages)* 014308
Massimo A. Achterberg and Piet Van Mieghem

Effects of time-varying habitat connectivity on metacommunity persistence *(12 pages)* 014309
Subhendu Bhandary, Debabrata Biswas, Tanmoy Banerjee, and Partha Sharathi Dutta

PART B

Biological Physics

Information content of brain states is explained by structural constraints on state energetics *(14 pages)* 014401
Leon Weninger, Pragya Srivastava, Dale Zhou, Jason Z. Kim, Eli J. Cornblath, Maxwell A. Bertolero, Ute Habel, Dorit Merhof, and Dani S. Bassett

Self-sustaining oscillation of two axonemal microtubules based on a stochastic bonding model between microtubules and dynein *(11 pages)* 014402
T. Omori, S. Munakata, and T. Ishikawa

Gene-influx-driven evolution *(5 pages)* 014403
David B. Saakian and Eugene V. Koonin

Free-energy landscapes and insertion pathways for peptides in membrane environment *(18 pages)* 014404
Ganga P. Sharma, Aaron C. Meyer, Suhail Habeeb, Michael Karbach, and Gerhard Müller

Intrinsic equilibrium of stably autorotating samaras *(5 pages)* 014405
Peixing Niu, Michael D. Atkins, Yanyan Liu, Moxiao Li, Tian Jian Lu, and Tongbeum Kim

Contact map dependence of a T-cell receptor binding repertoire *(11 pages)* 014406
Kevin Ng Chau, Jason T. George, José N. Onuchic, Xingcheng Lin, and Herbert Levine

Estimating near-wall diffusion coefficients of arbitrarily shaped rigid macromolecules *(14 pages)* 014407
Maciej Długosz, Bogdan Cichocki, and Piotr Szymczak

Polymers

Computational indentation in highly cross-linked polymer networks *(11 pages)* 014501
Manoj Kumar Maurya, Céline Ruscher, Debashish Mukherji, and Manjesh Kumar Singh

Decoding polymer self-dynamics using a two-step approach *(18 pages)* 014502
Zhiqiang Shen, Jan-Michael Y. Carrillo, Bobby G. Sumpter, and Yangyang Wang

Deep learning and inverse discovery of polymer self-consistent field theory inspired by physics-informed neural networks *(14 pages)* 014503
Danny Lin and Hsiu-Yu Yu

Migration of active rings in porous media *(8 pages)* 014504
Ligesh Theeyancheri, Subhasish Chaki, Tapomoy Bhattacharjee, and Rajarshi Chakrabarti

Tensile strength of rubber described via the formation and rupture of load-bearing polymer chains *(10 pages)* 014505
Reinhard Hentschke

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Molecular signatures of the glass transition in polymers *(8 pages)* 014506
Tianyi Jin (金天逸), Connor W. Coley, and Alfredo Alexander-Katz

Colloids, Complex Fluids, and Active Matter

Stokes traction on an active particle *(12 pages)* 014601
Günther Turk, Rajesh Singh, and Ronojoy Adhikari

Enhancement in the diffusivity of Brownian spheroids in the presence of spheres *(11 pages)* 014602
Vikki Anand Varma, Isha Malhotra, and Sujin B. Babu

Group formation and collective motion of colloidal rods with an activity triggered by visual perception *(15 pages)* 014603
Philipp Stengele, Anton Lüders, and Peter Nielaba

Structural relaxation dynamics of colloidal nanotrimers *(8 pages)* 014604
Justinas Šlepavičius, Carlos Avendaño, Breanndán Ó. Conchúir, and Alessandro Patti

Inertial active Ornstein-Uhlenbeck particle in the presence of a magnetic field *(9 pages)* 014605
M. Muhsin and M. Sahoo

Collective dynamics of liquid sulfur scrutinized over three decades in frequency *(11 pages)* 014606
F. Demmel and M. Jimenez-Ruiz

Anisotropic correlations of plasticity on the yielding of metallic glasses *(8 pages)* 014607
Shiheng Cui, Huashan Liu, and Hailong Peng

Explicit solvent effects on macromolecular interactions from a solvent-augmented contact value theorem *(11 pages)* 014608
Sahin Buyukdagli

Information conduction and convection in noiseless Vicsek flocks *(9 pages)* 014609
Daniel Geiß, Klaus Kroy, and Viktor Holubec

Short-range and long-range correlations in driven dense colloidal mixtures in narrow pores *(12 pages)* 014610
František Slanina, Miroslav Kotrla, and Karel Netočný

Transition in collective motion decision making *(6 pages)* 014611
Biao Wang, Yue Wu, Guangwei Wang, Lan Liu, Guanrong Chen, and Hai-Tao Zhang

Internal-stress-induced solid-solid transition involving orientational domains of anisotropic particles *(7 pages)* . . . 014612
Tao Huang, Chunhua Zeng, Hua Wang, Yong Chen, and Yilong Han

Active responsive colloids coupled to different thermostats *(13 pages)* 014613
Polina Gaindrik, Upayan Baul, and Joachim Dzubiella

Structural properties of liquids in extreme confinement *(14 pages)* 014614
Gerhard Jung and Thomas Franosch

Bistability in orbital trajectories of a chiral self-propelled particle interacting with an external field *(6 pages)* 014615
G. A. Patterson

Shear viscosity and Stokes-Einstein violation in supercooled light and heavy water *(19 pages)* 014616
Pierre Ragueneau, Frédéric Caupin, and Bruno Issenmann

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 106, NUMBER 1 JULY 2022

Active colloidal molecules in activity gradients *(9 pages)* 014617
Hidde D. Vuijk, Sophie Klempahn, Holger Merlitz, Jens-Uwe Sommer, and Abhinav Sharma

Liquid Crystals

Determining the Kerr constant in optically isotropic liquid crystals *(9 pages)* 014701
Tetiana Yevchenko, Dorota Dardas, Wojciech Kuczyński, and Arkadiusz C. Brańka

Nonequilibrium phase transitions of a nematic liquid crystal under ac field-driven electroconvection *(9 pages)* . . . 014702
Jong-Hoon Huh

Peculiarities of focal conic structure formed near the cholesteric-isotropic phase transition *(8 pages)* 014703
P. V. Dolganov, K. D. Baklanova, and V. K. Dolganov

Structure and optical properties of twist-bend nematic liquid crystals doped with chiral dopants *(13 pages)* 014704
Xinfang Zhang, Ziyuan Zhou, Yunho Shin, Suman Halder, Lang Hu, and Deng-Ke Yang

Nematic order condensation and topological defects in inertial active nematics *(9 pages)* 014705
Roozbeh Saghatchi, Mehmet Yildiz, and Amin Doostmohammadi

Anisotropic viscous effects of local flow by a rotating microparticle in nematic liquid crystal *(9 pages)* 014706
Jun-Yong Lee, Jae Hoon Lee, Bohdan Lev, and Jong-Hyun Kim

Films and Interfaces

Morphological transformation from fibers to sheets in embiopteran silk *(9 pages)* 014801
Aleimah C. Andrews, Sean Duffy, Janice S. Edgerly, and Richard P. Barber, Jr.

Interface collisions with diffusive mass transport *(17 pages)* 014802
Bastien Marguet, F. D. A. Aarão Reis, and Olivier Pierre-Louis

Perturbing the catenoid: Stability and mechanical properties of nonaxisymmetric minimal surfaces *(17 pages)* . . . 014803
Friedrich Walzel, Alice Requier, Kevin Boschi, Jean Farago, Philippe Fuchs, Fabrice Thalmann, Wiebke Drenckhan, Pierre Muller, and Thierry Charitat

Granular Materials

Drag on a circular intruder traversing a shape-heterogeneous granular mixture *(12 pages)* 014901
Bitang Kwrung Tripura, Sonu Kumar, Vamsi Krishna Reddy Anyam, and K. Anki Reddy

Unified penetration depth of low-velocity intruders into granular packings *(8 pages)* 014902
Thanh-Trung Vo and Trung-Kien Nguyen

Volume-shear coupling in a mesoscopic model of amorphous materials *(10 pages)* 014903
E. A. Jagla

Continuous to intermittent flows in growing granular heaps *(8 pages)* 014904
L. Alonso-Llanes, E. Martínez, A. J Batista-Leyva, R. Toussaint, and E. Altshuler

Decompaction wave propagation in a vibrated fine-powder bed *(11 pages)* 014905
Prasad Sonar and Hiroaki Katsuragi

Successive reintrusions in a granular medium *(6 pages)* 014906
B. Darbois Texier and A. Seguin

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Solid Mechanics

Anomalous elasticity in classical glass formers *(8 pages)* 015001
Avanish Kumar, Michael Moshe, Itamar Procaccia, and Murari Singh

Deriving the slip-front propagation velocity with slip-dependent and slip-velocity-dependent friction laws via the use of the linear marginal stability hypothesis *(13 pages)* 015002
Takehito Suzuki

Stress-free morphing by means of compatible distortions *(14 pages)* 015003
Ivan Colorado-Cervantes, Valerio Varano, and Luciano Teresi

Effect of architecture disorder on the elastic response of two-dimensional lattice materials *(14 pages)* 015004
Antoine Montiel, Thuy Nguyen, Cindy L. Rountree, Valérie Geertsen, Patrick Guenoun, and Daniel Bonamy

Geometric thermodynamics of strain-induced crystallization in polymers *(15 pages)* 015005
Sanhita Das, Asif Raza, and Debasish Roy

Fluid Dynamics

Extreme events and instantons in Lagrangian passive scalar turbulence models *(12 pages)* 015101
Mnerh Alqahtani, Leonardo Grigorio, and Tobias Grafke

Discrete Boltzmann modeling of Rayleigh-Taylor instability: Effects of interfacial tension, viscosity, and heat conductivity *(16 pages)* 015102
Jie Chen, Aiguo Xu, Dawei Chen, Yudong Zhang, and Zhihua Chen

Nanoparticle transport within non-Newtonian fluid flow in porous media *(15 pages)* 015103
Takshak Shende, Deepak Mangal, Jacinta C. Conrad, Vahid Niasar, and Masoud Babaei

Numerical simulation of superparamagnetic nanoparticle motion in blood vessels for magnetic drug delivery *(19 pages)* 015104
Matthew Lee, Aditya Shelke, Saloni Singh, Jenny Fan, Philip Zaleski, and Shahriar Afkhami

Influence of particle shape and material on the acoustic radiation force and microstreaming in a standing wave *(16 pages)* 015105
Alen Pavlic, Pushkin Nagpure, Lorenzo Ermanni, and Jürg Dual

Numerical study on the Leidenfrost behavior of a droplet stream impinging on a heated wall *(10 pages)* 015106
Kshitiz Kumar Subedi and Song-Charng Kong

Residence time distributions for in-line chaotic mixers *(13 pages)* 015107
Nelson Poumaëre, Benoît Pier, and Florence Raynal

Diffusion tensor imaging of anisotropic inhomogeneous turbulent flow *(9 pages)* 015108
Amy-Rae P. Gauthier, Noah Stocek, and Benedict Newling

Cylindrical convergence effects on the Rayleigh-Taylor instability in elastic and viscous media *(10 pages)* 015109
A. R. Piriz, S. A. Piriz, and N. A. Tahir

Transient electrohydrodynamics of a liquid drop: The interplay of fluid flow evolution and dynamic response, and the density ratio effects *(18 pages)* 015110
Asghar Esmaeeli

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 106, NUMBER 1 JULY 2022

Phase-field numerical study on the dynamic process of thermocapillary patterning *(16 pages)* 015111
Qingzhen Yang, Yankui Liu, Xinmiao Jia, Tingting Zhang, Hongmiao Tian, Jing Fan, Quange Xu, and Fenhong Song

Plasma Physics

Vacuum breakdown in magnetic dipole wave by 10-PW class lasers *(13 pages)* 015201
E. S. Efimenko, A. V. Bashinov, A. A. Muraviev, V. D. Volokitin, I. B. Meyerov, G. Leuchs, A. M. Sergeev, and A. V. Kim

Directional locking in a two-dimensional Yukawa solid modulated by a two-dimensional periodic substrate *(9 pages)* 015202
Wenqi Zhu, C. Reichhardt, C. J. O. Reichhardt, and Yan Feng

Fast particles overtaking shock front in two-dimensional Yukawa solids *(7 pages)* 015203
Pengwei Qiu and Yan Feng

One-component plasma of a million particles via angular-averaged Ewald potential: A Monte Carlo study *(15 pages)* 015204
G. S. Demyanov and P. R. Levashov

Ionization states for the multipetawatt laser-QED regime *(10 pages)* 015205
I. Ouatu, B. T. Spiers, R. Aboushelbaya, Q. Feng, M. W. von der Leyen, R. W. Paddock, R. Timmis, C. Ticos, K. M. Krushelnick, and P. A. Norreys

Plasma environmental effects in the atomic structure for simulating x-ray free-electron-laser-heated solid-density matter *(11 pages)* 015206
Rui Jin, Zoltan Jurek, Robin Santra, and Sang-Kil Son

Computational Physics

Particles on demand for flows with strong discontinuities *(18 pages)* 015301
N. G. Kallikounis, B. Dorschner, and I. V. Karlin

Resolution exchange with tunneling for enhanced sampling of protein landscapes *(9 pages)* 015302
Fatih Yasar, Alan J. Ray, and Ulrich H. E. Hansmann

Asymptotic method for entropic multiple relaxation time model in lattice Boltzmann method *(20 pages)* 015303
Xiangshuo Tang, Yue Yu, and Alparslan Oztekin

Multiscale analysis of the particles on demand kinetic model *(12 pages)* 015304
Ehsan Reyhanian

Modeling fluid polyamorphism through a maximum-valence approach *(8 pages)* 015305
Nikolay A. Shumovskyi, Thomas J. Longo, Sergey V. Buldyrev, and Mikhail A. Anisimov

Diffuse-interface lattice Boltzmann modeling of charged particle transport in Poiseuille flow *(12 pages)* 015306
Jiao Liu, Zhenhua Chai, and Baochang Shi

Multiphase curved boundary condition in lattice Boltzmann method *(12 pages)* 015307
Yichen Yao, Yangsha Liu, Xingguo Zhong, and Binghai Wen

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 106, NUMBER 1** **JULY 2022**

Accuracy and performance of the lattice Boltzmann method with 64-bit, 32-bit, and customized 16-bit number formats *(28 pages)* 015308
Moritz Lehmann, Mathias J. Krause, Giorgio Amati, Marcello Sega, Jens Harting, and Stephan Gekle

ERRATA

Erratum: Whittle maximum likelihood estimate of spectral properties of Rayleigh-Taylor interfacial mixing using hot-wire anemometry experimental data [Phys. Rev. E **102**, 053107 (2020)] *(1 page)* . . . . . 019901(E)
David Pfefferlé and Snezhana I. Abarzhi
