THIRD SERIES, VOLUME 109, NUMBER 1
PARTS A AND B

CONTENTS

JANUARY 2024

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L012101–014230, and Part B pages 014301–019901(E).

PART A

LETTERS

Statistical Physics

Jensen bound for the entropy production rate in stochastic thermodynamics *(7 pages)* L012101
Matthew P. Leighton and David A. Sivak

Lyapunov vectors and excited energy states of the directed polymer in random media *(5 pages)* L012102
Enrique Rodríguez-Fernández and Juan M. López

Quantum relative entropy uncertainty relation *(5 pages)* L012103
Domingos S. P. Salazar

Colloids, Complex Fluids, and Active Matter

Dynamics of packed swarms: Time-displaced correlators of two-dimensional incompressible flocks *(6 pages)* L012601
Leiming Chen, Chiu Fan Lee, Ananyo Maitra, and John Toner

Liquid Crystals

Escape from the second dimension: A topological distinction between edge and screw dislocations *(5 pages)* L012701
Paul G. Severino and Randall D. Kamien

Granular Materials

Self-similarity of pressure profiles during forced granular flows *(4 pages)* L012901
María Victoria Ferreyra, Luis A. Pugnaloni, and Diego Maza

Fluid Dynamics

Universal scaling law for electrified sessile droplets on a lyophilic surface *(4 pages)* L013101
Dipin S. Pillai and Kirti Chandra Sahu

ARTICLES

Statistical Physics

Exact extreme, order, and sum statistics in a class of strongly correlated systems *(18 pages)* 014101
Marco Biroli, Hernán Larralde, Satya N. Majumdar, and Grégory Schehr

(Continued)

2470-0045(202401)109:1:B;1-3

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Controlling work output and coherence in finite-time quantum Otto engines through monitoring *(12 pages)* 014102
Rahul Shastri and B. Prasanna Venkatesh

Searching for a partially absorbing target by a run-and-tumble particle in a confined space *(12 pages)* 014103
Euijin Jeon, Byeong Guk Go, and Yong Woon Kim

Kardar-Parisi-Zhang universality in the coherence time of nonequilibrium one-dimensional quasicondensates *(10 pages)* 014104
Ivan Amelio, Alessio Chiocchetta, and Iacopo Carusotto

Nonequilibrium phase transitions in a Brownian p-state clock model *(9 pages)* 014105
Chul-Ung Woo and Jae Dong Noh

Martingale drift of Langevin dynamics and classical canonical spin statistics *(6 pages)* 014106
Ken Sekimoto

Energy conversion theorems for some linear steady states *(15 pages)* 014107
L. A. Arias-Hernandez, G. Valencia-Ortega, C. R. Martinez-Garcia, and F. Angulo-Brown

Estimation of the ice melting point in molecular dynamics simulations based on the finite-size effects *(11 pages)* 014108
Shuting Ji, Zhenlei Yang, Liang Lei, Sergio Andres Galindo Torres, and Ling Li

Thermokinetic relations *(16 pages)* 014109
Jean-Charles Delvenne and Gianmaria Falasco

Birth-death-suppression Markov process and wildfires *(28 pages)* 014110
George Hulsey, David L. Alderson, and Jean Carlson

Work distribution of a colloid in an elongational flow field and under Ornstein-Uhlenbeck noise *(13 pages)* 014111
Debasish Saha and Rati Sharma

Fluctuation theorems and expected utility hypothesis *(6 pages)* 014112
Gianluca Francica and Luca Dell'Anna

Nonequilibrium statistical mechanics of the turbulent energy cascade: Irreversibility and response functions *(13 pages)* 014113
Niccolò Cocciaglia, Massimo Cencini, and Angelo Vulpiani

Reentrant ferromagnetic ordering of the random-field Heisenberg model in $d > 2$ dimensions: Fourier-Legendre renormalization-group theory *(6 pages)* 014114
Alpar Türkoğlu and A. Nihat Berker

Structure of quantum supercooled liquids *(7 pages)* 014115
Gopika Krishnan and Upendra Harbola

Explicit mutual information for simple networks and neurons with lognormal activities *(11 pages)* 014117
Maurycy Chwiłka and Jan Karbowski

Phase transitions in self-gravitating systems and bacterial populations surrounding a central body *(27 pages)* 014118
Pierre-Henri Chavanis, Julien Sopik, and Clément Sire

Thermodynamic bound on quantum state discrimination *(11 pages)* 014119
José Polo-Gómez

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Properties of stable ensembles of Euclidean random matrices *(11 pages)* 014120
Philipp Baumgärtel, Florian Vogel, and Matthias Fuchs

Cover times of many random walkers on a discrete network *(8 pages)* 014121
Hyunjoong Kim and Sean D. Lawley

Universal quantum Otto heat machine based on the Dicke model *(14 pages)* 014122
He-Guang Xu, Jiasen Jin, G. D. M. Neto, and Norton G. de Almeida

Ising model for the freezing transition *(8 pages)* 014123
Jacobo Troncoso and Claudio A. Cerdeiriña

Gambling demon and stopping-time fluctuation relation of a Brownian particle under a time-dependent trapping potential *(15 pages)* 014124
John A. C. Albay, Yonggun Jun (전용근), and Pik-Yin Lai (黎璧賢)

Reducing finite-size effects with reweighted renormalization group transformations *(7 pages)* 014125
Dimitrios Bachtis

Temporal rich club phenomenon and its formation mechanisms *(11 pages)* 014126
Mu-Yao Li, Yin-Ting Zhang, and Wei-Xing Zhou

Superstatistics from a dynamical perspective: Entropy and relaxation *(15 pages)* 014127
Kamel Ourabah

Lambda transition and Bose-Einstein condensation in liquid ^{4}He *(12 pages)* 014128
Vladimir I. Kruglov

Efficiency of a microscopic heat engine subjected to stochastic resetting *(11 pages)* 014129
Sourabh Lahiri and Shamik Gupta

Multiple diffusive behaviors of the random walk in inhomogeneous environments *(11 pages)* 014130
Xiao Luo, Jing-Dong Bao, and Wen-Yue Fan

Trade-offs between precision and fluctuations in charging finite-dimensional quantum batteries *(17 pages)* 014131
Pharnam Bakhshinezhad, Beniamin R. Jablonski, Felix C. Binder, and Nicolai Friis

Machine learning at the mesoscale: A computation-dissipation bottleneck *(10 pages)* 014132
Alessandro Ingrosso and Emanuele Panizon

Phase transition in the computational complexity of the shortest common superstring and genome assembly *(8 pages)* 014133
L. A. Fernandez, V. Martin-Mayor, and D. Yllanes

Spin-1/2 Ising ladder with randomly coupled rung interaction and transverse magnetic field *(12 pages)* 014134
Maria Eugênia Silva Nunes and J. A. Plascak

Phase-ordering kinetics of the asymmetric Coulomb glass model *(8 pages)* 014135
Preeti Bhandari, Vikas Malik, and Sanjay Puri

Fluctuations in the active Dyson Brownian motion and the overdamped Calogero-Moser model *(25 pages)* 014136
Léo Touzo, Pierre Le Doussal, and Grégory Schehr

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Quantum heat valve and diode of strongly coupled defects in amorphous material *(9 pages)* 014137
Yu-qiang Liu, Yi-jia Yang, Ting-ting Ma, Zheng Liu, and Chang-shui Yu

Persistence time bound for subdiffusion based on multidimensional thermodynamic uncertainty relation: Application to an analytically solvable model *(8 pages)* 014138
Tasuku Iyori and Yuki Izumida

Anomalous diffusion, non-Gaussianity, nonergodicity, and confinement in stochastic-scaled Brownian motion with diffusing diffusivity dynamics *(14 pages)* 014139
Yongge Li, Kheder Suleiman, and Yong Xu

Structure of the active Fokker-Planck equation *(12 pages)* 014140
Pedro Herrera and Mario Sandoval

Magnetically controlled quantum thermal devices via three nearest-neighbor coupled spin-1/2 systems *(17 pages)* 014142
Yi-jia Yang, Yu-qiang Liu, Zheng Liu, and Chang-shui Yu

α-divergence improves the entropy production estimation via machine learning *(10 pages)* 014143
Euijoon Kwon and Yongjoo Baek

Effects of third-neighbor interactions on the frustrated quantum Ising model *(9 pages)* 014144
M. Roos, I. F. Muhl, M. Schmidt, C. V. Morais, and F. M. Zimmer

Analytical results and universal behavior in fast thermal equilibration protocols *(13 pages)* 014145
Diego Rengifo and Gabriel Téllez

First-passage area distribution and optimal fluctuations of fractional Brownian motion *(9 pages)* 014146
Alexander K. Hartmann and Baruch Meerson

Nonlinear Dynamics and Chaos

Autoresonant generation of solitons in Bose-Einstein condensates by modulation of the interaction strength *(10 pages)* 014201
A. G. Shagalov and L. Friedland

Universal spectral correlations in interacting chaotic few-body quantum systems *(22 pages)* 014202
Felix Fritzsch and Maximilian F. I. Kieler

Hamming distance as a measure of spatial chaos in evolutionary games *(8 pages)* 014203
Gaspar Alfaro and Miguel A. F. Sanjuán

Integrable turbulence and statistical characteristics of chaotic wave field in the Kundu-Eckhaus equation *(9 pages)* 014204
Min Li, Xiao-Zhang Zhu, and Tao Xu

Swarmalators with delayed interactions *(20 pages)* 014205
Nicholas Blum, Andre Li, Kevin O'Keeffe, and Oleg Kogan

Analysis of chaos and regularity in the open Dicke model *(14 pages)* 014206
David Villaseñor and Pablo Barberis-Blostein

Two-qubit entangling operators as chaos control in a discrete dynamic Cournot duopoly game *(7 pages)* 014207
A. V. S. Kameshwari and S. Balakrishnan

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Probing dynamical sensitivity of a non-Kolmogorov-Arnold-Moser system through out-of-time-order correlators *(16 pages)* 014209
Naga Dileep Varikuti, Abinash Sahu, Arul Lakshminarayan, and Vaibhav Madhok

Perturbative computation of nonlinear harvesting through a path integral approach *(10 pages)* 014210
Martín E. Giuliano, Bruno Combi, Matías G. dell'Erba, and Alejandro D. Sánchez

Improvement of signal propagation in the optoelectronic artificial spiking neuron by vibrational resonance *(6 pages)* 014211
V. N. Chizhevsky and M. V. Lakhmitski

Exploring the potential of learning methods and recurrent dynamic model with vaccination: A comparative case study of COVID-19 in Austria, Brazil, and China *(16 pages)* 014212
Seyed Ali Rakhshan, Marzie Zaj, Fatemeh Helen Ghane, and Mahdi Soltani Nejad

Numerical study of anisotropic diffusion in Turing patterns based on Finsler geometry modeling *(18 pages)* 014213
Gildas Diguet, Madoka Nakayama, Sohei Tasaki, Fumitake Kato, Hiroshi Koibuchi, and Tetsuya Uchimoto

Predicting nonsmooth chaotic dynamics by reservoir computing *(11 pages)* 014214
Lufa Shi, Hengtong Wang, Shengjun Wang, Ruhai Du, and Shi-Xian Qu

Delocalized nonlinear vibrational modes and discrete breathers in β-FPUT simple cubic lattice *(11 pages)* 014215
S. A. Shcherbinin, A. M. Kazakov, Yu. V. Bebikhov, A. A. Kudreyko, and S. V. Dmitriev

Wake dynamics in buoyancy-driven flows: Steady-state–Hopf-mode interaction with O(2) symmetry revisited *(32 pages)* 014216
Javier Sierra-Ausin, David Fabre, and Edgar Knobloch

Patterns governed by chemotaxis and time delay *(10 pages)* 014217
Mengxin Chen and Ranchao Wu

Exploring universality of the β-Gaussian ensemble in complex networks via intermediate eigenvalue statistics *(7 pages)* 014218
Ankit Mishra and Kang Hao Cheong

Exact solutions for signal propagation along an excitable transmission line *(7 pages)* 014219
Arnaud Tonnelier

Delay-induced amplitude death in multiplex oscillator network with frequency-mismatched layers *(9 pages)* 014220
Keiji Konishi, Koki Yoshida, Yoshiki Sugitani, and Naoyuki Hara

Hebbian and anti-Hebbian adaptation-induced dynamical states in adaptive networks *(14 pages)* 014221
S. Thamizharasan, V. K. Chandrasekar, M. Senthilvelan, and D. V. Senthilkumar

Spin-orbit-coupled fractional oscillators and trapped Bose-Einstein condensates *(9 pages)* 014222
V. A. Stephanovich, E. V. Kirichenko, G. Engel, and A. Sinner

Dynamics of a time-delayed relay system *(12 pages)* 014223
Lucas Illing, Pierce Ryan, and Andreas Amann

Mixing property of symmetrical polygonal billiards *(8 pages)* 014224
R. B. do Carmo and T. Araújo Lima

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Self-organized bistability on globally coupled higher-order networks *(10 pages)* 014225
Md Sayeed Anwar, Nikita Frolov, Alexander E. Hramov, and Dibakar Ghosh

Particle-hole thermalization in a composite superconducting and normal-conducting nanowire *(15 pages)* 014226
L. E. Reichl and F. Estrella

Dynamical characteristics of honeycomb two-dimensional gyroscopic metamaterials *(12 pages)* 014227
Ji-Hou Yang, Yi-Bo Wang, and Xiao-Dong Yang

Negative radiation pressure in Bose-Einstein condensates *(17 pages)* 014228
Dominik Ciurla, Péter Forgács, Árpád Lukács, and Tomasz Romańczukiewicz

Exact low-dimensional description for fast neural oscillations with low firing rates *(9 pages)* 014229
Pau Clusella and Ernest Montbrió

Isochronous island bifurcations driven by resonant magnetic perturbations in tokamaks *(13 pages)* 014230
B. B. Leal, I. L. Caldas, M. C. de Sousa, R. L. Viana, and A. M. Ozorio de Almeida

PART B

Networks and Complex Systems

Synaptic dependence of dynamic regimes when coupling neural populations *(9 pages)* 014301
Roberto Barrio, Jorge A. Jover-Galtier, Ana Mayora-Cebollero, Carmen Mayora-Cebollero, and Sergio Serrano

Q-voter model with independence on signed random graphs: Homogeneous approximations *(15 pages)* 014302
A. Krawiecki and T. Gradowski

Optimized excitonic transport mediated by local energy defects: Survival of optimization laws in the presence of dephasing *(14 pages)* 014303
Lucie Pepe, Vincent Pouthier, and Saad Yalouz

Site percolation threshold of composite square lattices and its agroecology applications *(7 pages)* 014304
D. Rosales Herrera, Jorge Velázquez-Castro, A. Fernández Téllez, Jesús F. López-Olguín, and J. E. Ramírez

Theory and data analysis of player and team ball possession time in football *(9 pages)* 014305
Ken Yamamoto, Seiya Uezu, Keiichiro Kagawa, Yoshihiro Yamazaki, and Takuma Narizuka

Theory of percolation on hypergraphs *(11 pages)* 014306
Ginestra Bianconi and Sergey N. Dorogovtsev

Nature of hypergraph *k*-core percolation problems *(16 pages)* 014307
Ginestra Bianconi and Sergey N. Dorogovtsev

Synchronized states in a ring of dissipatively coupled harmonic oscillators *(13 pages)* 014308
Juan N. Moreno, Christopher W. Wächtler, and Alexander Eisfeld

Spontaneous emergence of groups and signaling diversity in dynamic networks *(6 pages)* 014309
Zachary Fulker, Patrick Forber, Rory Smead, and Christoph Riedl

Optimal conditions for environment-assisted quantum transport on the fully connected network *(9 pages)* 014310
Sam Alterman, Justin Berman, and Frederick W. Strauch

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Locating sources of Szegedy's quantum network *(18 pages)* 014311
Hong-Jue Wang, Zhao-Long Hu, Shu-Yu Shao, Fang-Feng Zhang, and Li Tao

Local control for the collective dynamics of self-propelled particles *(8 pages)* 014312
Everton S. Medeiros and Ulrike Feudel

Understanding the role of neutral species by means of high-order interaction in the rock-paper-scissors dynamics *(11 pages)* 014313
Yikang Lu, Xiaoyue Wang, Chunpeng Du, Yanan Wang, Yini Geng, Lei Shi, and Junpyo Park

Structure of road networks and the shape of the macroscopic fundamental diagram *(9 pages)* 014314
Erwan Taillanter, Andreas Schadschneider, and Marc Barthelemy

Biological Physics

Charge transport in a double-stranded DNA: Effects of helical symmetry and long-range hopping *(7 pages)* 014401
Sourav Kundu and Constantinos Simserides

Coarse-graining of perplexity for the spatial distribution of molecules *(5 pages)* 014402
Lili Xu, Chi Zhang, Soho Oyama, Manabu Machida, Tomoaki Kahyo, and Mitsutoshi Setou

Intrinsic statistical separation of subpopulations in heterogeneous collective motion via dimensionality reduction *(9 pages)* 014403
Pei Tan and Christopher E. Miles

Optimization strategies to obtain smooth gait transitions through biologically plausible central pattern generators *(11 pages)* 014404
V. Baruzzi, M. Lodi, and M. Storace

Emergence of compact disordered phase in a polymer Potts model *(10 pages)* 014405
Ryo Nakanishi and Koji Hukushima

Polymers

Nonmonotonic electrophoretic mobility of rodlike polyelectrolytes by multivalent coions in added salt *(6 pages)* 014501
Hossein Vahid, Alberto Scacchi, Maria Sammalkorpi, and Tapio Ala-Nissila

Colloids, Complex Fluids, and Active Matter

Interplay between activity, elasticity, and liquid transport in self-contractile biopolymer gels *(14 pages)* 014601
Anne Bernheim-Groswasser, Gefen Livne, Paola Nardinocchi, Filippo Recrosi, and Luciano Teresi

Predicting yielding in attractive colloidal gels *(6 pages)* 014602
Deepak Mangal, Mohammad Nabizadeh, and Safa Jamali

Modeling ultrasonic metafluids: The significance of discrete oscillators *(9 pages)* 014604
Aljaž Draškovič-Bračun, Tilen Potisk, and Daniel Svenšek

Stochastic fluctuations of diluted pedestrian dynamics along curved paths *(14 pages)* 014605
Geert G. M. van der Vleuten, Federico Toschi, Wil Schilders, and Alessandro Corbetta

Maximally mixing active nematics *(7 pages)* 014606
Kevin A. Mitchell, Md Mainul Hasan Sabbir, Kevin Geumhan, Spencer A. Smith, Brandon Klein, and Daniel A. Beller

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Formation and mechanics of fire ant rafts as an active self-healing membrane *(8 pages)* 014607
Chung-Hao Chen, Ting-Heng Hsieh, Hong-Yue Huang, Yu-Chuan Cheng, and Tzay-Ming Hong

Thermal stability and secondary aggregation of self-limiting, geometrically frustrated assemblies: Chain assembly of incommensurate polybricks *(19 pages)* 014608
Michael Wang and Gregory Grason

Neutron radiography of an anisotropic drainage flow *(8 pages)* 014609
Artem Skrypnik, Katie Cole, Tobias Lappan, Pablo R. Brito-Parada, Stephen J. Neethling, Pavel Trtik, Kerstin Eckert, and Sascha Heitkam

Compression and fracture of ordered and disordered droplet rafts *(14 pages)* 014610
Pablo Eduardo Illing, Jean-Christophe Ono-dit-Biot, Kari Dalnoki-Veress, and Eric R. Weeks

Power laws of natural swarms as fingerprints of an extended critical region *(13 pages)* 014611
R. González-Albaladejo and L. L. Bonilla

Quantitative characterization of run-and-tumble statistics in bulk bacterial suspensions *(10 pages)* 014612
Yongfeng Zhao, Christina Kurzthaler, Nan Zhou, Jana Schwarz-Linek, Clemence Devailly, Jochen Arlt, Jian-Dong Huang, Wilson C. K. Poon, Thomas Franosch, Vincent A. Martinez, and Julien Tailleur

Enhanced phoretic self-propulsion of active colloids through surface charge asymmetry *(9 pages)* 014613
Ahis Shrestha and Monica Olvera de la Cruz

Symmetry-breaking motility of penetrable objects in active fluids *(12 pages)* 014614
Ki-Won Kim, Yunsik Choe, and Yongjoo Baek

Light propagation in two-dimensional and three-dimensional slabs of reflective colloidal particles in solution: The effect of interfaces and interparticle correlations *(18 pages)* 014615
Raffaela Cabriolu, Sarah Dungan, and Pietro Ballone

Stationary particle currents in sedimenting active matter wetting a wall *(11 pages)* 014616
Matthieu Mangeat, Shauri Chakraborty, Adam Wysocki, and Heiko Rieger

Prediction of temperature-dependent nucleation and growth rates from crystallization-related heat release *(10 pages)* 014617
Joseph Kangas and Christopher J. Hogan, Jr.

Clogging transition and anomalous transport in driven suspensions in a disordered medium *(9 pages)* 014618
Sergi G. Leyva and Ignacio Pagonabarraga

Liquid Crystals

Transformation of polar nematic phases in the presence of an electric field *(14 pages)* 014701
A. V. Emelyanenko, V. Yu. Rudyak, S. A. Shvetsov, F. Araoka, H. Nishikawa, and K. Ishikawa

Dynamics of viscous droplet coalescence in the confined geometry of optical cells *(9 pages)* 014702
P. V. Dolganov, N. A. Spiridenko, and A. S. Zverev

Films and Interfaces

Buckling of a monolayer of platelike particles trapped at a fluid-fluid interface *(12 pages)* 014801
Suriya Prakash, Hugo Perrin, and Lorenzo Botto

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

Piezoelectric excitation and acoustic detection of thin film polymer membrane vibrations *(6 pages)* 014802
Nathaniel M. Roberts and James S. Sharp

Granular Materials

Granular solids transmit stress as two-phase composites *(10 pages)* 014901
Raphael Blumenfeld

Intermediate phase between jammed and unjammed amorphous solids *(7 pages)* 014902
Yuliang Jin, Itamar Procaccia, and Tuhin Samanta

Energy dissipation of a sphere rolling up a granular slope: Slip and deformation of the granular surface *(8 pages)* 014903
T. Fukumoto, K. Yamamoto, M. Katsura, and H. Katsuragi

Collapse dynamics and deposition morphology of low-viscocohesive granular columns on a rough horizontal surface *(13 pages)* 014904
Thanh-Trung Vo and Trung-Kien Nguyen

Solid Mechanics

Statistical mechanical model for crack growth *(15 pages)* 015001
Michael R. Buche and Scott J. Grutzik

Multiscale Richtmyer-Meshkov instability experiments to isolate the strain rate dependence of strength *(13 pages)* 015002
Michael B. Prime, Saryu J. Fensin, David R. Jones, Joshua W. Dyer, and Daniel T. Martinez

Fluid Dynamics

Off-lattice Boltzmann simulation of conjugate heat transfer for natural convection in two-dimensional cavities *(32 pages)* 015101
Kuldeep Tolia, Sai Ravi Gupta Polasanapalli, and Kameswararao Anupindi

Undular bore theory for the modified Korteweg–de Vries–Burgers equation *(11 pages)* 015102
L. F. Calazans de Brito and A. M. Kamchatnov

Multiobjective optimization for flapping foil hydrodynamics with a multitask and multifidelity approach *(13 pages)* 015103
Zhangyuan Wang, Dehan Yuan, Chenglong Wu, Xu Chen, Ruipeng Li, Weicheng Cui, and Dixia Fan

Fingering stabilization and adhesion force in the lifting flow with a fluid annulus *(14 pages)* 015104
Írio M. Coutinho, Pedro H. A. Anjos, Rafael M. Oliveira, and José A. Miranda

Reassessing the transport properties of fluids: A symbolic regression approach *(13 pages)* 015105
Dimitrios Angelis, Filippos Sofos, and Theodoros E. Karakasidis

Plasma Physics

Preliminary study of plasma modes and electron-ion collisions in partially magnetized strongly coupled plasmas *(10 pages)* 015201
Chanhyun Pak, Virginia Billings, Matthew Schlitters, Scott D. Bergeson, and Michael S. Murillo

Chaotic escape of impurities and sticky orbits in toroidal plasmas *(10 pages)* 015202
L. C. Souza, M. R. Sales, M. Mugnaine, J. D. Szezech, Jr., I. L. Caldas, and R. L. Viana

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 1** **JANUARY 2024**

High-energy acceleration phenomena in extreme-radiation–plasma interactions *(18 pages)* 015203
J. C. Faure, D. Tordeux, L. Gremillet, and M. Lemoine

Shot-to-shot electron beam pointing instability in a nonlinear plasma bubble *(13 pages)* 015204
Bifeng Lei, Bin Liu, Mingyuan Shi, Andreas Seidel, Daniel Seipt, Matt Zepf, and Bin Qiao

Higher-order nonequilibrium term: Effective power density quantifying evolution towards or away from local thermodynamic equilibrium *(16 pages)* 015205
M. Hasan Barbhuiya, Paul A. Cassak, Subash Adhikari, Tulasi N. Parashar, Haoming Liang, and Matthew R. Argall

Helical dynamo growth and saturation at modest versus extreme magnetic Reynolds numbers *(8 pages)* 015206
Hongzhe Zhou and Eric G. Blackman

Three-dimensional modeling of a plasma in a strong azimuthal magnetic field *(10 pages)* 015207
Luis Leal, Andrei Maximov, Fernando García-Rubio, Riccardo Betti, and Vladimir Ivanov

Steady regime of radiation pressure acceleration with foil thickness adjustable within micrometers under a 10–100 PW laser *(8 pages)* 015208
Meng Liu, Wei-Min Wang, and Yu-Tong Li

Computational Physics

Self-consistent force scheme in the spectral multiple-relaxation-time lattice Boltzmann model *(10 pages)* 015301
Xuhui Li (李旭晖), Zuoxu Li (李作旭), Wenyang Duan (段文洋), and Xiaowen Shan (单肖文)

Physically interpretable approximations of many-body spectral functions *(7 pages)* 015302
Shubhang Goswami, Kipton Barros, and Matthew R. Carbone

Noise-cancellation algorithm for simulations of Brownian particles *(9 pages)* 015303
Regina Rusch, Thomas Franosch, and Gerhard Jung

Particles on demand method: Theoretical analysis, simplification techniques, and model extensions *(27 pages)* . . . 015304
N. G. Kallikounis and I. V. Karlin

Growth regimes in three-dimensional phase separation of liquid-vapor systems *(9 pages)* 015305
G. Negro, G. Gonnella, A. Lamura, S. Busuioc, and V. Sofonea

Energy, temperature, and heat capacity in discrete classical dynamics *(6 pages)* 015306
Søren Toxvaerd

Simulating $\mathbb{Z}_2$ lattice gauge theory on a quantum computer *(19 pages)* 015307
Clement Charles, Erik J. Gustafson, Elizabeth Hardt, Florian Herren, Norman Hogan, Henry Lamm, Sara Starecheski, Ruth S. Van de Water, and Michael L. Wagman

ERRATA

Erratum: Bicritical states in temperature-modulated Rayleigh-Bénard convection [Phys. Rev. E **92**, 013005 (2015)] *(3 pages)* . . . . . 019901(E)
Jitender Singh, Renu Bajaj, and Puneet Kaur

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).
