THIRD SERIES, VOLUME 109, NUMBER 2
PARTS A AND B

CONTENTS

FEBRUARY 2024

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L022101–024227, and Part B pages 024301–029901(E).

PART A

LETTERS

Statistical Physics

Positive dependence for colored percolation *(6 pages)* L022101
Nikita Gladkov and Igor Pak

Stretched-exponential relaxation in weakly confined Brownian systems through large deviation theory *(6 pages)* L022102
Lucianno Defaveri, Eli Barkai, and David A. Kessler

Optimizing the random search of a finite-lived target by a Lévy flight *(6 pages)* L022103
Denis Boyer, Gabriel Mercado-Vásquez, Satya N. Majumdar, and Grégory Schehr

Nonlinear Dynamics and Chaos

Phase chimera states on nonlocal hyperrings *(6 pages)* L022201
Riccardo Muolo, Thierry Njougouo, Lucia Valentina Gambuzza, Timoteo Carletti, and Mattia Frasca

Determining bifurcations to explosive synchronization for networks of coupled oscillators with higher-order interactions *(6 pages)* L022202
Lauren D. Smith and Penghao Liu

Networks and Complex Systems

Learning interpretable collective variables for spreading processes on networks *(6 pages)* L022301
Marvin Lücke, Stefanie Winkelmann, Jobst Heitzig, Nora Molkenthin, and Péter Koltai

Biological Physics

How do cicadas emerge together? Thermophysical aspects of their collective decision-making *(5 pages)* L022401
Raymond E. Goldstein, Robert L. Jack, and Adriana I. Pesci

Colloids, Complex Fluids, and Active Matter

Active crystallization from power functional theory *(7 pages)* L022601
Sophie Hermann and Matthias Schmidt

(Continued)

2470-0045(202402)109:2:A;1-2

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 109, NUMBER 2 FEBRUARY 2024

Granular Materials

Convection of monodisperse particles in a highly filled rotating cylinder *(5 pages)* L022901
Shoichi Yoneta, Hiroyuki Ebata, and Shio Inagaki

Solid Mechanics

Buckling kinetics of graphene membranes under uniaxial compression *(6 pages)* L023001
Aristotelis P. Sgouros, Evangelos Dougkas, Spyros V. Kallivokas, and Doros N. Theodorou

Surface stress can initiate environment-assisted fracture in metals *(6 pages)* L023002
Anirudh Udupa, Debapriya Pinaki Mohanty, Tatsuya Sugihara, James B. Mann, Ronald M. Latanision, and Srinivasan Chandrasekar

Plasma Physics

Quantifying ionization in hot dense plasmas *(5 pages)* L023201
Thomas Gawne, Sam M. Vinko, and Justin S. Wark

Luminal mirror *(4 pages)* L023202
T. Z. Esirkepov and S. V. Bulanov

Computational Physics

Interpretable conservation laws as sparse invariants *(5 pages)* L023301
Ziming Liu, Patrick Obin Sturm, Saketh Bharadwaj, Sam J. Silva, and Max Tegmark

ARTICLES

Statistical Physics

Dynamics at the edge for independent diffusing particles *(31 pages)* 024101
Pierre Le Doussal

Single-quasiparticle eigenstate thermalization *(17 pages)* 024102
Piotr Tokarczyk, Lev Vidmar, and Patrycja Łydżba

Truncated stochastically switching processes *(13 pages)* 024103
Paul C. Bressloff

Concurrence distribution in excited states of the one-dimensional spin-1/2 transverse-field XY model: Two different regions *(7 pages)* 024104
S. Mahdavifar, Z. Balador, and M. R. Soltani

Quantifying spatiotemporal patterns in classical and quantum systems out of equilibrium *(10 pages)* 024105
E. A. Maletskii, I. A. Iakovlev, and V. V. Mazurenko

Persistence of weak ferromagnetism in antiferromagnetic systems on the body-centered octahedral lattice *(15 pages)* 024106
E. Jurčišinová and M. Jurčišin

Cooperation transitions in social games induced by aspiration-driven players *(12 pages)* 024107
M. Aguilar-Janita, N. Khalil, I. Leyva, and I. Sendiña-Nadal

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Thermodynamics of hybrid quantum rotor devices *(10 pages)* 024108
Heather Leitch, Kenza Hammam, and Gabriele De Chiara

Totally asymmetric simple exclusion process with local resetting in a resource-constrained environment *(13 pages)* 024109
Nikhil Bhatia and Arvind Kumar Gupta

Barkhausen noise in disordered striplike ferromagnets: Experiment versus simulations *(18 pages)* 024110
Djordje Spasojević, Miloš Marinković, Dragutin Jovković, Sanja Janićević, Lasse Laurson, and Antonije Djordjević

Non-Gaussian anomalous diffusion of optical vortices *(10 pages)* 024111
Jiaxing Gong, Qi Li, Shaoqun Zeng, and Jing Wang

Evolution of temporal fluctuation scaling exponent in nonstationary time series using supersymmetric theory of stochastic dynamics *(17 pages)* 024112
F. S. Abril and C. J. Quimbay

Diffusive persistence on disordered lattices and random networks *(8 pages)* 024113
Omar Malik, Melinda Varga, Alaa Moussawi, David Hunt, Boleslaw K. Szymanski, Zoltan Toroczkai, and Gyorgy Korniss

Effectiveness of the recursive-lattice technique in the investigation of magnetic systems with the pyrochlore structure *(17 pages)* 024114
E. Jurčišinová and M. Jurčišin

Anomalous phase diagram of the elastic interface with nonlocal hydrodynamic interactions in the presence of quenched disorder *(8 pages)* 024115
Mohsen Ghasemi Nezhadhaghighi

Intermittent Kac's flights and the generalized telegrapher's equation *(15 pages)* 024116
Marco Nizama and Manuel O. Cáceres

Eigenstate entanglement entropy in the integrable spin-$\frac{1}{2}$ XYZ model *(9 pages)* 024117
R. Świętek, M. Kliczkowski, L. Vidmar, and M. Rigol

Complex phase diagram and supercritical matter *(14 pages)* 024118
Xiao-Yu Ouyang, Qi-Jun Ye, and Xin-Zheng Li

Exact results for gene-expression models with general waiting-time distributions *(11 pages)* 024119
Jinqiang Zhang, Aimin Chen, Huahai Qiu, Jiajun Zhang, Tianhai Tian, and Tianshou Zhou

When an active bath behaves as an equilibrium one *(8 pages)* 024120
Shubhendu Shekhar Khali, Fernando Peruani, and Debasish Chaudhuri

Finding critical points and correlation length exponents using finite size scaling of Gini index *(6 pages)* 024121
Soumyaditya Das, Soumyajyoti Biswas, Anirban Chakraborti, and Bikas K. Chakrabarti

Probing the large deviations for the beta random walk in random medium *(13 pages)* 024122
Alexander K. Hartmann, Alexandre Krajenbrink, and Pierre Le Doussal

Competition between lanes and transient jammed clusters in driven binary mixtures *(13 pages)* 024123
Honghao Yu and Robert L. Jack

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Time-dependent properties of run-and-tumble particles: Density relaxation *(17 pages)* 024124
Tanmoy Chakraborty and Punyabrata Pradhan

Glasslike caging with random planes *(13 pages)* 024125
Gilles Bonnet, Patrick Charbonneau, and Giampaolo Folena

Performance enhancement of quantum Brayton engine via Bose-Einstein condensation *(15 pages)* 024126
Huilin Ruan, Jiehong Yuan, Yang Xu, Jizhou He, Yongli Ma, and Jianhui Wang

Current fluctuations in a partially asymmetric simple exclusion process with a defect particle *(15 pages)* 024127
Ivan Lobaskin, Martin R. Evans, and Kirone Mallick

Disorder-induced spiky phonon transmission of harmonic lattices *(6 pages)* 024129
Lu Lin, Yuhang Wei, and Dahai He

Maximum power and the corresponding efficiency for a Carnot-like thermoelectric cycle based on fluctuation theorem *(10 pages)* 024130
Yuchao Hua and Zeng-Yuan Guo

Topological learning in multiclass data sets *(15 pages)* 024131
Christopher Griffin, Trevor Karn, and Benjamin Apple

Spinodal decomposition and domain coarsening in a multilayer Cahn-Hilliard model for lithium intercalation in graphite *(13 pages)* 024132
Antoine Cordoba, Marion Chandesris, and Mathis Plapp

Application of the integral operator method for multispin correlation function calculations in the one-dimensional Ising model *(15 pages)* 024133
T. Balcerzak

Diffusion with two resetting points *(7 pages)* 024134
Pedro Julián-Salgado, Leonardo Dagdug, and Denis Boyer

Magnetic ordering in strong anisotropic ferromagnetic bilayers with dipolar and antiferromagnetic interlayer exchange interactions: Monte Carlo approach *(13 pages)* 024135
J. J. Melo Quintero, G. P. Saracco, and M. A. Bab

Enhanced many-body localization in a kinetically constrained model *(9 pages)* 024136
Karl Royen, Suman Mondal, Frank Pollmann, and Fabian Heidrich-Meisner

Phase-space path-integral representation of the quantum density of states: Monte Carlo simulation of strongly correlated soft-sphere fermions *(9 pages)* 024137
V. S. Filinov, P. R. Levashov, and A. S. Larkin

Generalized Landauer bound from absolute irreversibility *(6 pages)* 024138
Lorenzo Buffoni, Francesco Coghi, and Stefano Gherardini

First-passage distributions of an asymmetric noisy voter model *(13 pages)* 024139
Santosh Kudtarkar

Critical dynamics of cluster algorithms in the random-bond Ising model *(8 pages)* 024140
Ulvi Kanbur and Zeynep Demir Vatansever

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Atom-doped photon engine: Extracting mechanical work from a quantum system via radiation pressure *(13 pages)* 024141
Álvaro Tejero, Daniel Manzano, and Pablo I. Hurtado

Nonlinear Dynamics and Chaos

Energy-based stochastic resetting can avoid noise-enhanced stability *(8 pages)* 024201
Julia Cantisán, Alexandre R. Nieto, Jesús M. Seoane, and Miguel A. F. Sanjuán

Lagrangian descriptors: The shearless curve and the shearless attractor *(10 pages)* 024202
R. Simile Baroni and R. Egydio de Carvalho

Multiplex-free physical reservoir computing with an adaptive oscillator *(6 pages)* 024203
Md Raf E Ul Shougat, XiaoFu Li, and Edmon Perkins

Triad resonance for internal waves in a uniformly stratified fluid: Rogue waves and breathers *(16 pages)* 024204
H. M. Yin, Q. Pan, and K. W. Chow

Effective description of the impact of inhomogeneities on the movement of the kink front in $2+1$ dimensions *(20 pages)* 024205
Jacek Gatlik, Tomasz Dobrowolski, and Panayotis G. Kevrekidis

Neutral delay differential equation model of an optically injected Kerr cavity *(10 pages)* 024206
Andrei G. Vladimirov and Daria A. Dolinina

Nonlinear charge and energy transport in anharmonic quasi-two-dimensional systems *(10 pages)* 024207
Luis A. Cisneros-Ake, Larissa Brizhik, Julián T. Becerra-Sagredo, and Manuel G. Velarde

Brownian motion of droplets induced by thermal noise *(14 pages)* 024208
Haodong Zhang, Fei Wang, Lorenz Ratke, and Britta Nestler

Rogue waves and instability arising from long-wave–short-wave resonance beyond the integrable regime *(8 pages)* 024209
Wen-Rong Sun, Boris A. Malomed, and Jin-Hua Li

Reconstructing bifurcation diagrams of chaotic circuits with reservoir computing *(9 pages)* 024210
Haibo Luo, Yao Du, Huawei Fan, Xuan Wang, Jianzhong Guo, and Xingang Wang

Synchronization modes of triple flickering buoyant diffusion flames: Experimental identification and model interpretation *(14 pages)* 024211
Yicheng Chi, Zeying Hu, Tao Yang, and Peng Zhang

Prolonged hysteresis in the Kuramoto model with inertia and higher-order interactions *(11 pages)* 024212
Narayan G. Sabhahit, Akanksha S. Khurd, and Sarika Jalan

Entropy-driven nonequilibrium phonon-stimulated electron-phonon coupling in tin dioxide nanorods *(9 pages)* 024213
G. Mallik, A. Kabiraj, D. K. Swain, P. P. Dash, P. Kumari, and S. Rath

Spatiotemporal patterns induced by Turing-Hopf interaction and symmetry on a disk *(11 pages)* 024214
Yaqi Chen, Xianyi Zeng, and Ben Niu

Path integration method for stochastic responses of differential equations under Lévy white noise *(7 pages)* 024215
Jiahui Peng, Liang Wang, Bochen Wang, and Wei Xu

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Self-trapping of vortex crystals via competing nonlinearities *(6 pages)* 024216
Angel Paredes and Humberto Michinel

Reconstruction of phase dynamics from macroscopic observations based on linear and nonlinear response theories *(10 pages)* 024217
Yoshiyuki Y. Yamaguchi and Yu Terada

Collective synchronization through noise cancellation *(9 pages)* 024218
Jeremy Worsfold and Tim Rogers

Self-driven configurational dynamics in frustrated spring-mass systems *(7 pages)* 024219
Ori Saporta-Katz and Avraham Moriel

Coalescence of limit cycles in the presence of noise *(9 pages)* 024220
Sergei Shmakov and Peter B. Littlewood

Effect of adaptation functions and multilayer topology on synchronization *(11 pages)* 024221
Dhrubajyoti Biswas and Sayan Gupta

Transient traveling breather response of strongly anharmonic array of self-sustained oscillators: Analytical study *(15 pages)* 024222
Y. Starosvetsky and R. Arbel

Optimal phase-based control of strongly perturbed limit cycle oscillators using phase reduction techniques *(12 pages)* 024223
Adharaa Neelim Dewanjee and Dan Wilson

Catastrophic and noncatastrophic population crashes in a bitrophic system with dynamic additional food provision to cooperative predators *(14 pages)* 024224
Saswati Biswas, Arindam Mandal, and Samares Pal

Mixed eigenstates in the Dicke model: Statistics and power-law decay of the relative proportion in the semiclassical limit *(11 pages)* 024225
Qian Wang and Marko Robnik

Estimating stable fixed points and Langevin potentials for financial dynamics *(9 pages)* 024226
Tobias Wand, Timo Wiedemann, Jan Harren, and Oliver Kamps

Constructing polynomial libraries for reservoir computing in nonlinear dynamical system forecasting *(13 pages)* 024227
Hu-Hu Ren, Yu-Long Bai, Man-Hong Fan, Lin Ding, Xiao-Xin Yue, and Qing-He Yu

PART B

Networks and Complex Systems

Hidden multiscale organization and robustness of real multiplex networks *(5 pages)* 024301
Gangmin Son, Meesoon Ha, and Hawoong Jeong

Applications of information geometry to spiking neural network activity *(34 pages)* 024302
Jacob T. Crosser and Braden A. W. Brinkman

Effectiveness of contact tracing on networks with cliques *(16 pages)* 024303
Abbas K. Rizi, Leah A. Keating, James P. Gleeson, David J. P. O'Sullivan, and Mikko Kivelä

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Approximate master equations for the spatial public goods game *(9 pages)* 024304
Yu Takiguchi and Koji Nemoto

Bayesian estimation of the Kullback-Leibler divergence for categorical systems using mixtures of Dirichlet priors *(13 pages)* 024305
Francesco Camaglia, Ilya Nemenman, Thierry Mora, and Aleksandra M. Walczak

Strongly clustered random graphs via triadic closure: An exactly solvable model *(13 pages)* 024306
Lorenzo Cirigliano, Claudio Castellano, Gareth J. Baxter, and Gábor Timár

Evolution of cooperation in deme-structured populations on graphs *(15 pages)* 024307
Alix Moawad, Alia Abbara, and Anne-Florence Bitbol

Nonrandom behavior in the projection of random bipartite networks *(6 pages)* 024308
Izat B. Baybusinov, Enrico Maria Fenoaltea, Jungying Cui, and Yi-Cheng Zhang

Diversity and ecotones in a model ecosystems of sessile species *(7 pages)* 024309
Markus Hofer and Kim Sneppen

Variable-order porous media equations: Application on modeling the S&P500 and Bitcoin price return *(13 pages)* 024310
Yaoyue Tang, Fatemeh Gharari, Karina Arias-Calluari, Fernando Alonso-Marroquin, and M. N. Najafi

Physical effects of learning *(20 pages)* 024311
Menachem Stern, Andrea J. Liu, and Vijay Balasubramanian

Discord in the voter model for complex networks *(7 pages)* 024312
Antoine Vendeville, Shi Zhou, and Benjamin Guedj

Reconstruction of multiplex networks via graph embeddings *(11 pages)* 024313
Daniel Kaiser, Siddharth Patwardhan, Minsuk Kim, and Filippo Radicchi

Complex networks with complex weights *(16 pages)* 024314
Lucas Böttcher and Mason A. Porter

Biological Physics

Influence of donor or acceptor presence on excitation states in molecular chains: Nonadiabatic polaron approach *(10 pages)* 024401
V. Matic, Z. Ivic, Z. Przulj, and D. Chevizovich

Virtual indentation of the empty capsid of the minute virus of mice using a minimal coarse-grained model *(9 pages)* 024402
Manuel Martín-Bravo, Jose M. Gomez Llorente, and Javier Hernández-Rojas

Curvature sensing of curvature-inducing proteins with internal structure *(10 pages)* 024403
Hiroshi Noguchi

Free-energy measuring nanopore device *(17 pages)* 024404
Momčilo Gavrilov, Jinghang Zhang, Olivia Yang, and Taekjip Ha

Collective self-optimization of binary mixed heterogeneous populations *(11 pages)* 024405
Zhao-sha Tang, Jia-jian Li, Wei-jing Zhu, and Bao-quan Ai

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Mean-field method for generic conductance-based integrate-and-fire neurons with finite timescales *(11 pages)* . . . 024406
Marcelo P. Becker and Marco A. P. Idiart

Linear and nonlinear integrate-and-fire neurons driven by synaptic shot noise with reversal potentials *(12 pages)* . . . 024407
Magnus J. E. Richardson

Chromatin structure from high resolution microscopy: Scaling laws and microphase separation *(10 pages)* . . . 024408
Loucif Remini, Midas Segers, John Palmeri, Jean-Charles Walter, Andrea Parmeggiani, and Enrico Carlon

Sheetlike structure in the proximity of compact DNA *(5 pages)* . . . 024409
Garima Mishra and Somendra M. Bhattacharjee

Intracellular ion accumulation in the genesis of complex action potential dynamics under cardiac diseases *(21 pages)* . . . 024410
Xinyu Wang, Julian Landaw, and Zhilin Qu

Dissipation and recovery in collagen fibrils under cyclic loading: A molecular dynamics study *(12 pages)* . . . 024411
Amir Suhail, Anuradha Banerjee, and R. Rajesh

Polymer translocation: Effects of confinement *(8 pages)* . . . 024412
Manish Dwivedi, Sumitra Rudra, and Sanjay Kumar

Probabilistic measures for biological adaptation and resilience *(12 pages)* . . . 024413
Jorge M. Ramirez, Juan Restrepo, Valerio Lucarini, and David Weston

Polymers

Transient physics in the compression and mixing dynamics of two nanochannel-confined polymer chains *(13 pages)* . . . 024501
Lili Zeng, Xavier Capaldi, Zezhou Liu, and Walter W. Reisner

Colloids, Complex Fluids, and Active Matter

Purcell's swimmers in pairs *(14 pages)* . . . 024601
Rossella Attanasi, Marta Zoppello, and Gaetano Napoli

Anti-aligning interaction between active particles induces a finite wavelength instability: The dancing hexagons *(11 pages)* . . . 024602
Daniel Escaff

Defect turbulence in a dense suspension of polar, active swimmers *(9 pages)* . . . 024603
Navdeep Rana, Rayan Chatterjee, Sunghan Ro, Dov Levine, Sriram Ramaswamy, and Prasad Perlekar

Morphologies of electric-field-driven cracks in dried dispersions of ellipsoids *(9 pages)* . . . 024604
Megha Emerse, Hisay Lama, Madivala G. Basavaraj, Rajesh Singh, and Dillip K. Satapathy

Heterogeneous attenuation of sound waves in three-dimensional amorphous solids *(9 pages)* . . . 024605
Shivam Mahajan and Massimo Pica Ciamarra

Noise-induced collective actuation in active solids *(13 pages)* . . . 024606
Paul Baconnier, Vincent Démery, and Olivier Dauchot

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 109, NUMBER 2 FEBRUARY 2024

Motility-induced phase separation and frustration in active matter swarmalators *(9 pages)* 024607
B. Adorjáni, A. Libál, C. Reichhardt, and C. J. O. Reichhardt

Odd elasticity and topological waves in active surfaces *(16 pages)* 024608
Michele Fossati, Colin Scheibner, Michel Fruchart, and Vincenzo Vitelli

Liquid Crystals

Synchronous behaviors of three coupled liquid crystal elastomer-based spring oscillators under linear temperature fields *(15 pages)* 024701
Haiyang Wu, Biao Zhang, and Kai Li

Mixing twist-bend and ferroelectric nematic liquid crystals *(8 pages)* 024702
Abinash Barthakur, Bidisha Bag, Santhegudda Jayaramappa Shivaraja, Jakub Karcz, Przemyslaw Kula, and Surajit Dhara

Glassy relaxation in a de Vries smectic liquid crystal consisting of bent-core molecules *(13 pages)* 024703
Vishnu Deo Mishra, G. Pratap, and Arun Roy

Films and Interfaces

Binding potential and wetting behavior of binary liquid mixtures on surfaces *(21 pages)* 024801
Mounirah Areshi, Dmitri Tseluiko, Uwe Thiele, Benjamin D. Goddard, and Andrew J. Archer

Critical-point wedge filling and critical-point wetting *(11 pages)* 024802
Alexandr Malijevský and Andrew O. Parry

Granular Materials

Properties of packings and dispersions of superellipse sector particles *(7 pages)* 024901
John Colt, Lucas Nelson, Sykes Cargile, Ted Brzinski, and Scott V. Franklin

Acoustic monitoring of compaction in cohesive granular materials *(14 pages)* 024902
Vincent Canel, Xiaoping Jia, Michel Campillo, and Ioan Ionescu

Diffusion in multicomponent granular mixtures *(7 pages)* 024903
Anna S. Bodrova

Interparticle normal force in highly porous granular matter during compression *(8 pages)* 024904
Sota Arakawa, Misako Tatsuuma, Hidekazu Tanaka, Mikito Furuichi, and Daisuke Nishiura

Solid Mechanics

Band gap of shear horizontal waves for one-dimensional phononic crystals with chiral materials *(15 pages)* 025001
Pengshuai Dai, Yanfeng Wang, Qinghua Qin, and Jianshan Wang

Pinning of crack fronts by hard and soft inclusions: A phase field study *(7 pages)* 025002
Hervé Henry

Energetics of twisted elastic filament pairs *(8 pages)* 025003
Julien Chopin, Animesh Biswas, and Arshad Kudrolli

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Fluid Dynamics

Data-based approach for time-correlated closures of turbulence models *(12 pages)* 025101
J. Domingues Lemos and A. A. Mailybaev

Near-critical behavior of the Zhong-Zhang model *(17 pages)* 025102
J. H. Lowenstein

Experimental and numerical investigation of three-dimensional shock train topology with differently oriented background waves *(14 pages)* 025103
Dayi Wang, Ziao Wang, Juntao Chang, Lianjie Yue, Gang Wang, and Hao Chen

Validation of symmetry-induced high moment velocity and temperature scaling laws in a turbulent channel flow *(12 pages)* 025104
Francisco Alcántara-Ávila, Luis Miguel García-Raffi, Sergio Hoyas, and Martin Oberlack

Nanoscale electrohydrodynamic ion transport: Influences of channel geometry and polarization-induced surface charges *(13 pages)* 025105
Arghyadeep Paul and N. R. Aluru

Impact of hydraulic tortuosity on microporous and nanoporous media flow *(9 pages)* 025106
Shiwani Singh

Plasma Physics

Transverse emittance growth of proton sources from laser-irradiated sub-μm-thin planar targets *(6 pages)* 025201
Thomas F. Rösch, Masoud Afshari, Felix Balling, Leonard Doyle, Sonja Gerlach, Jens Hartmann, Alexander Prasselsperger, Stuart Morris, and Jörg Schreiber

Virial coefficients of the uniform electron gas from path-integral Monte Carlo simulations *(11 pages)* 025202
G. Röpke, T. Dornheim, J. Vorberger, D. Blaschke, and B. Mahato

Observations and properties of the first laboratory fusion experiment to exceed a target gain of unity *(13 pages)* 025203
A. Pak *et al.*

Design of the first fusion experiment to achieve target energy gain $G > 1$ *(14 pages)* 025204
A. L. Kritcher *et al.*

Experimental study on the full cycle evolution of high-intensity atmospheric dc arc discharge from breakdown to extinguishment *(11 pages)* 025205
Ya-Hao Hu, Su-Rong Sun, Xian Meng, He-Ji Huang, and Hai-Xing Wang

Multi-GeV wakefield acceleration in a plasma-modulated plasma accelerator *(11 pages)* 025206
J. J. van de Wetering, S. M. Hooker, and R. Walczak

Enhancement of fusion reactivities using non-Maxwellian energy distributions *(11 pages)* 025207
Ben I. Squarer, Carlo Presilla, and Roberto Onofrio

Stationary striations in plasma, created by a short microwave pulse in a waveguide filled with a neutral gas *(7 pages)* 025208
Y. Bliokh, Y. Cao, V. Maksimov, A. Haim, J. G. Leopold, A. Kostinsky, and Ya. E. Krasik

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 109, NUMBER 2** **FEBRUARY 2024**

Staircase resiliency in a fluctuating cellular array *(20 pages)* 025209
F. R. Ramirez and P. H. Diamond

Dephasingless plasma wakefield photon acceleration *(14 pages)* 025210
R. Sandberg and A. G. R. Thomas

Helical coil design with controlled dispersion for bunching enhancement of protons generated by the target normal sheath acceleration *(15 pages)* 025211
A. Hirsch-Passicos, C. L. C. Lacoste, F. André, Y. Elskens, E. D'Humières, V. Tikhonchuk, and M. Bardon

Spectral modulation of high-order harmonics in relativistic laser-solid interaction *(7 pages)* 025212
B. Y. Li, F. Liu, M. Chen, X. H. Yuan, Z. M. Sheng, and J. Zhang

Dynamic stabilization of ablative Rayleigh-Taylor instability in the presence of a temporally modulated laser pulse *(13 pages)* 025213
K. G. Zhao, Z. Y. Li, L. F. Wang, Z. H. Di, C. Xue, H. Zhang, J. F. Wu, W. H. Ye, C. T. Zhou, Y. K. Ding, W. Y. Zhang, and X. T. He

Computational Physics

Macroscopic finite-difference scheme based on the mesoscopic regularized lattice-Boltzmann method *(11 pages)* 025301
Xi Liu, Ying Chen, Zhenhua Chai, and Baochang Shi

Phase-field lattice Boltzmann model with singular mobility for quasi-incompressible two-phase flows *(16 pages)* 025302
Jin Bao and Zhaoli Guo

Wave amplitude gain within wedge waveguides through scattering by simple obstacles *(20 pages)* 025303
