

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L022101–024220, and Part B pages 024301–027202.

PART A

LETTERS

Statistical Physics

- Exact pretransition effects in kinetically constrained circuits: Dynamical fluctuations in the Floquet-East model (6 pages) L022101
Katja Klobas, Cecilia De Fazio, and Juan P. Garrahan
- Universal superdiffusion of random walks in media with embedded fractal networks of low diffusivity (7 pages) L022102
Fábio D. A. Aarão Reis and Vaughan R. Voller
- Optimizing leapover lengths of Lévy flights with resetting (5 pages) L022103
Mattia Radice and Giampaolo Cristadoro
- Bending rigidity exponent of a two-dimensional crystalline membrane with arbitrary number of flexural phonon modes (6 pages) L022104
D. A. Ivanov, A. Kudlis, and I. S. Burmistrov
- Work statistics for the adiabatic assumption in nonequilibrium many-body theory (5 pages) L022105
Yi Zuo, Qinghong Yang, Bang-Gui Liu, and Dong E. Liu

Nonlinear Dynamics and Chaos

- Phase reduction explains chimera shape: When multibody interaction matters (5 pages) L022201
Erik T. K. Mau, Oleh E. Omel'chenko, and Michael Rosenblum

Colloids, Complex Fluids, and Active Matter

- Exploring anisotropic pressure and spatial correlations in strongly confined hard-disk fluids: Exact results (6 pages) L022601
Ana M. Montero and Andrés Santos

Liquid Crystals

- Constraining the value of the dielectric constant of the ferroelectric nematic phase (5 pages) L022701
Aitor Erkoreka and Josu Martinez-Perdiguero

(Continued)

2470-0045(202408)110:2:A;1-2

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Fluid Dynamics

- Modified and generalized single-element Maxwell viscoelastic model (*5 pages*) L023101
J. S. Hansen

Plasma Physics

- Injection and confinement of positron bunches in a magnetic dipole trap (*6 pages*) L023201
A. Deller, J. von der Linden, S. Nißl, K. Michishio, N. Oshima, H. Higaki, and E. V. Stenson

Computational Physics

- Reinforcement learning with thermal fluctuations at the nanoscale (*6 pages*) L023301
Francesco Boccardo and Olivier Pierre-Louis

ARTICLES

Statistical Physics

- Fractional heterogeneous telegraph processes: Interplay between heterogeneity, memory, and stochastic resetting (*9 pages*) 024101
Trifce Sandev and Alexander Iomin

- Supervised, semisupervised, and unsupervised learning of the Domany-Kinzel model (*10 pages*) 024102
Kui Tuo, Wei Li, Shengfeng Deng, and Yueying Zhu

- Catalytic coagulation (*9 pages*) 024103
P. L. Krapivsky and S. Redner

- Fragility of Kardar-Parisi-Zhang universality class in the presence of temporally correlated noise (*7 pages*) 024104
Enrique Rodríguez-Fernández, Alejandro Alés, Jorge Martín-Álvarez, and Juan M. López

- Virtual walks and phase transitions in the two-dimensional Biswas-Chatterjee-Sen model with extreme switches (*7 pages*) 024105
Kathakali Biswas and Parongama Sen

- Quantifying nonuniversal corner free-energy contributions in weakly anisotropic two-dimensional critical systems (*5 pages*) 024106
Florian Kischel and Stefan Wessel

-  Large deviations in statistics of the local time and occupation time for a run and tumble particle (*17 pages*) 024107
Soheli Mukherjee, Pierre Le Doussal, and Naftali R. Smith

- Dynamical large deviations for long-range interacting inhomogeneous systems without collective effects (*13 pages*) 024108
Ouassim Feliachi and Jean-Baptiste Fouvry

- Entropy production from maximum entropy principle: A unifying approach (*10 pages*) 024109
Adalberto D. Varizi and Pedro S. Correia

- Intermediate-times dilemma for open quantum system: Filtered approximation to the refined weak-coupling limit (*28 pages*) 024110
Marek Winczewski, Antonio Mandarino, Gerardo Suarez, Robert Alicki, and Michał Horodecki

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Continuum percolation of two-dimensional adaptive dynamics systems (<i>9 pages</i>)	024111
Chang Liu, Jia-Qi Dong, Lian-Chun Yu, and Liang Huang	
Spatial dependence of microscopic percolation conduction (<i>3 pages</i>)	024112
Matthew Golden and Joseph P. Straley	
Statistical mechanics of stochastic quantum control: d -adic Rényi circuits (<i>17 pages</i>)	024113
Andrew A. Allocca, Conner LeMaire, Thomas Iadecola, and Justin H. Wilson	
Mirror symmetry breakdown in the Kardar-Parisi-Zhang universality class (<i>5 pages</i>)	024114
Johannes Schmidt and Andreas Schadschneider	
Work distribution for unzipping processes (<i>14 pages</i>)	024115
Peter Werner, Alexander K. Hartmann, and Satya N. Majumdar	
Critical exponents of correlated percolation of sites not visited by a random walk (<i>8 pages</i>)	024116
Raz Halifa Levi and Yacov Kantor	
Brownian particle diffusion in generalized polynomial shear flows (<i>15 pages</i>)	024117
Nan Wang and Yuval Dagan	
Single-file dynamics with general charge measures (<i>13 pages</i>)	024118
Žiga Krajnik	
Anomalous relaxation and hyperuniform fluctuations in center-of-mass conserving systems with broken time-reversal symmetry (<i>24 pages</i>)	024119
Anirban Mukherjee, Dhiraj Tapader, Animesh Hazra, and Punyabrata Pradhan	
Variational time reversal for free-energy estimation in nonequilibrium steady states (<i>12 pages</i>)	024120
Jorge L. Rosa-Raíces and David T. Limmer	
Heat capacity of periodically driven two-level systems (<i>7 pages</i>)	024121
Elena Rufeil Fiori and Christian Maes	
Uncovering nonequilibrium from unresolved events (<i>14 pages</i>)	024122
Pedro E. Harunari	
Performance at maximum figure of merit for a Brownian Carnot refrigerator (<i>7 pages</i>)	024123
O. Contreras-Vergara, G. Valencia-Ortega, N. Sánchez-Salas, and J. I. Jiménez-Aquino	
Incompatible observables in classical physics: A closer look at measurement in Hamiltonian mechanics (<i>20 pages</i>)	024124
David Theurel	
Fluctuation-dissipation theorem and entanglement dynamics in one-dimensional low-density Jaynes-Cummings Hubbard model after a quench (<i>9 pages</i>)	024125
Qing Li, Jin-Lou Ma, and Lei Tan	
Estimation of equilibration time scales from nested fraction approximations (<i>9 pages</i>)	024126
Christian Bartsch, Anatoly Dymarsky, Mats H. Lamann, Jiaozi Wang, Robin Steinigeweg, and Jochen Gemmer	
Storage properties of a quantum perceptron (<i>13 pages</i>)	024127
Katerina Gratsea, Valentin Kasper, and Maciej Lewenstein	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Exact work distribution and Jarzynski's equality of a relativistic particle in an expanding piston (<i>10 pages</i>)	024128
Xianghang Zhang (张湘杭), Tingzhang Shi (石霆章), and H. T. Quan (全海涛)	
Two mass-imbalanced atoms in a hard-wall trap: Deep learning integrability of many-body systems (<i>13 pages</i>)	024129
Liheng Lang, Qichen Lu, C. M. Dai, Xingbo Wei, Yanxia Liu, and Yunbo Zhang	
Unusual low-temperature behavior in the half-filled band of the one-dimensional extended Hubbard model in atomic limit (<i>12 pages</i>)	024130
Onofre Rojas, S. M. de Souza, J. Torrico, L. M. Veríssimo, M. S. S. Pereira, M. L. Lyra, and Oleg Derzhko	
Efficient generation of barrier crossing trajectories using approximate Brownian bridges (<i>9 pages</i>)	024131
George Curtis, Doraiswami Ramkrishna, and Vivek Narsimhan	
Non-Markovian enhancement of nonequilibrium quantum thermometry (<i>9 pages</i>)	024132
Y. Aiache, C. Seida, K. El Anouz, and A. El Allati	
Entropy-induced phase transitions in a hidden Potts model (<i>13 pages</i>)	024133
Cook Hyun Kim, D.-S. Lee, and B. Kahng	
Critical crack length during fracture (<i>7 pages</i>)	024134
Viswakannan R. K. and Subhadeep Roy	
Random matrix theory approach to quantum Fisher information in quantum ergodic systems (<i>15 pages</i>)	024135
Venelin P. Pavlov, Yoana R. Chorbazhiyska, Charlie Nation, Diego Porras, and Peter A. Ivanov	
Identifying vegetation patterns for a qualitative assessment of land degradation using a cellular automata model and satellite imagery (<i>8 pages</i>)	024136
Hediye Yarahmadi, Yves Desille, John Goold, and Francesca Pietracaprina	
Universal distribution of the number of minima for random walks and Lévy flights (<i>17 pages</i>)	024137
Anupam Kundu, Satya N. Majumdar, and Grégory Schehr	
Thermally activated particle motion in biased correlated Gaussian disorder potentials (<i>9 pages</i>)	024138
Alexander Valov, Netanel Levi, and Baruch Meerson	
First-passage and first-arrival problems in continuous-time random walks: Beyond the diffusion approximation (<i>11 pages</i>)	024139
V. P. Shkilev	
Continuous symmetry breaking of low-dimensional systems driven by inhomogeneous oscillatory driving forces (<i>7 pages</i>)	024140
Harukuni Ikeda and Yuta Kuroda	
Nonlocal-in-time finite-velocity diffusion approach on a ring (<i>15 pages</i>)	024141
Manuel O. Cáceres and Guillermo Hansen	
Multitemperature atomic ensemble: Nonequilibrium evolution after ultrafast electronic excitation (<i>12 pages</i>)	024142
Nikita Medvedev and Alexander E. Volkov	
Coarsening and metastability of the long-range voter model in three dimensions (<i>12 pages</i>)	024143
Federico Corberi, Salvatore dello Russo, and Luca Smaldone	

(Continued)

Nonlinear Dynamics and Chaos

Quantum chaotic features of the spin-orbit coupled excitons in disordered two-dimensional insulators (10 pages)	024201
V. A. Stephanovich, E. V. Kirichenko, K. Książek, Jackie Harjani Sauco, and Belén López Brito	
Transition from weak turbulence to collapse turbulence regimes in the Majda-McLaughlin-Tabak model (8 pages)	024202
Ashleigh Simonis and Yulin Pan	
Involution symmetry quantification using recurrences (8 pages)	024203
Gabriel Marghoti, Thiago de Lima Prado, Sergio Roberto Lopes, and Yoshito Hirata	
Dynamic behavior and driving region of spray combustion instability in a backward-facing step combustor (8 pages)	024204
Kenta Kato, Hiroyuki Hashiba, Jun Nagao, Hiroshi Gotoda, Yusuke Nabae, and Ryoichi Kurose	
Dispersion network-transition entropy: A metric for characterizing the complexity of nonlinear signals (12 pages)	024205
Bo Geng, Haiyan Wang, Xiaohong Shen, Hongwei Zhang, and Yongsheng Yan	
Isochronous bifurcations in a two-parameter twist map (8 pages)	024206
Michele Mugnaine, Bruno B. Leal, Iberê L. Caldas, Alfredo M. Ozorio de Almeida, and Ricardo L. Viana	
Extending echo state property for quantum reservoir computing (15 pages)	024207
Shumpei Kobayashi, Quoc Hoan Tran, and Kohei Nakajima	
Hidden vortices and Feynman rule in Bose-Einstein condensates with density-dependent gauge potential (9 pages)	024208
Ishfaq Ahmad Bhat and Bishwajyoti Dey	
 Bifurcations of inflating balloons and interacting hysterons (9 pages)	024209
Gentian Muhaxheri and Christian D. Santangelo	
Temporal interaction and its role in the evolution of cooperation (12 pages)	024210
Yujie He, Tianyu Ren, Xiao-Jun Zeng, Huawen Liang, Liukai Yu, and Junjun Zheng	
Impact of environmental stochastic fluctuations on the evolutionary stability of imitation dynamics (8 pages)	024211
Si-Yi Wang, Yan-Min Che, Yi Tao, and Xiu-Deng Zheng	
Theoretical velocity of an object frictionally coupled to a two-mode vibrating plate (6 pages)	024212
Xiaolin Zhang, Timothy C. Hui, William D. Ristenpart, and Gregory H. Miller	
Intermediate spectral statistics of rational triangular quantum billiards (12 pages)	024213
Črt Lozej and Eugene Bogomolny	
Long-living periodic solutions of complex cubic-quintic Ginzburg-Landau equation in the presence of intrapulse Raman scattering: A bifurcation and numerical study (13 pages)	024214
Ivan M. Uzunov, Svetoslav G. Nikolov, Todor N. Arabadzhiev, and Zhivko D. Georgiev	
Thermodynamics of chaotic relaxation processes (16 pages)	024215
Domenico Lippolis

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Modulational instability and collapse of internal gravity waves in the atmosphere (<i>9 pages</i>)	024216
Volodymyr M. Lashkin and Oleg K. Cheremnykh	
Kuramoto variables as eigenvalues of unitary matrices (<i>6 pages</i>)	024217
Marcel Novaes and Marcus A. M. de Aguiar	
Unpinning and elimination of spiral waves and turbulence through local optogenetical illumination (<i>10 pages</i>)	024218
Jinming Luo, Jinhao Lu, Hui Yan, Qihao Li, Alexander V. Panfilov, and Teng-Chao Li	
Resonance-induced synchronization in coupled phase oscillators with bimodal frequency distribution and periodic coupling (<i>11 pages</i>)	024219
Sansan Li and Xingang Wang	
Extreme events in frequency-swept semiconductor lasers (<i>9 pages</i>)	024220
A. Stroganov, A. V. Kovalev, and E. A. Viktorov	

PART B

Networks and Complex Systems

Inverse modeling of time-delayed interactions via the dynamic-entropy formalism (<i>17 pages</i>)	024301
Elena Agliari, Francesco Alemanno, Adriano Barra, Michele Castellana, Daniele Lotito, and Matthieu Piel	
Quantifying order in breath figure patterns through Voronoi entropy (<i>8 pages</i>)	024302
David Paulovics, Edward Bormashenko, Christophe Raufaste, and Franck Celestini	
Random telegraph processes with nonlocal memory (<i>11 pages</i>)	024303
S. S. Apostolov, O. V. Usatenko, V. A. Yampol'skii, S. S. Melnyk, P. Grigolini, and A. Krokhin	
Dynamics of a susceptible-infected-recovered model on complex networks with interregional migration (<i>14 pages</i>)	024304
Ruiwu Niu, Yin-Chi Chan, Eric W. M. Wong, Michaël Antonie van Wyk, and Simin Liu	
Fast decisions reflect biases; slow decisions do not (<i>18 pages</i>)	024305
Samantha Linn, Sean D. Lawley, Bhargav R. Karamched, Zachary P. Kilpatrick, and Krešimir Josić	
Spiking mode-based neural networks (<i>14 pages</i>)	024306
Zhanghan Lin and Haiping Huang	
Cooperation dynamics in multi-issue repeated social dilemma games with correlated strategy (<i>14 pages</i>)	024307
Ji Quan, Shengjin Cui, and Xianjia Wang	
Spurious self-feedback of mean-field predictions inflates infection curves (<i>15 pages</i>)	024308
Claudia Merger, Jasper Albers, Carsten Honerkamp, and Moritz Helias	
(ω_1, ω_2) -temporal random hyperbolic graphs (<i>14 pages</i>)	024309
Sofoclis Zambirinis and Fragkiskos Papadopoulos	
Moment neural network and an efficient numerical method for modeling irregular spiking activity (<i>19 pages</i>)	024310
Yang Qi	
 Mass media competition and alternative ordering in social dynamics (<i>8 pages</i>)	024311
O. Alvarez-Llamoza, M. G. Cosenza, J. C. Gonzalez-Avella, M. A. Suarez, K. Tucci, and P. Valverde

 This paper was highlighted in the APS publication *Physics* (physics.aps.org).

 The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

Interplay of network structure and talent configuration on wealth dynamics (<i>11 pages</i>)	024312
Jaeseok Hur, Meesoon Ha, and Hawoong Jeong	
Spontaneous opinion swings in the voter model with latency (<i>9 pages</i>)	024313
Giovanni Palermo, Anna Mancini, Antonio Desiderio, Riccardo Di Clemente, and Giulio Cimini	
Frustrated random walks: A fast method to compute node distances on hypergraphs (<i>14 pages</i>)	024314
Enzhi Li, Scott Nickleach, and Bilal Fadlallah	
Metastable states in the Ising model with Glauber-Kawasaki competing dynamics (<i>12 pages</i>)	024315
R. A. Dumer and M. Godoy	
Biological Physics	
Maximum-entropy-based metrics for quantifying critical dynamics in spiking neuron data (<i>11 pages</i>)	024401
Felipe Serafim, Tawan T. A. Carvalho, Mauro Copelli, and Pedro V. Carelli	
Entangled biphoton generation in the myelin sheath (<i>9 pages</i>)	024402
Zefei Liu, Yong-Cong Chen, and Ping Ao	
Symbolic information approach applied to human intracranial data to characterize and distinguish different cognitive processes (<i>11 pages</i>)	024403
Ícaro Rodolfo Soares Coelho Da Paz, Pedro F. A. Silva, Helena Bordini de Lucas, Sérgio H. A. Lira, Osvaldo A. Rosso, and Fernanda Selingardi Matias	
Field theory of enzyme-substrate systems with restricted long-range interactions (<i>11 pages</i>)	024404
Fabrizio Olmeda and Steffen Rulands	
Architectural underpinnings of stochastic intergenerational homeostasis (<i>20 pages</i>)	024405
Kunaal Joshi, Charles S. Wright, Rudro R. Biswas, and Srividya Iyer-Biswas	
Polymers	
Pressure dependence of intermediate-range order and elastic properties of glassy Baltic amber (<i>8 pages</i>)	024501
Sergey N. Tkachev, Charlie M. Zoller, Curtis Kenney-Benson, Muhtar Ahart, Russell J. Hemley, Vladimir N. Novikov, and Seiji Kojima	
Colloids, Complex Fluids, and Active Matter	
Exact equilibrium properties of square-well and square-shoulder disks in single-file confinement (<i>15 pages</i>)	024601
Ana M. Montero and Andrés Santos	
Self-limiting stacks of curvature-frustrated colloidal plates: Roles of intraparticle versus interparticle deformations (<i>21 pages</i>)	024602
Kyle T. Sullivan, Ryan C. Hayward, and Gregory M. Grason	
Self-organization of anti-aligning active particles: Waving pattern formation and chaos (<i>12 pages</i>)	024603
Daniel Escaff	
Tuning nonequilibrium colloidal structure in external fields by density-dependent state switching (<i>10 pages</i>)	024604
Lennart Heinen, Sébastien Groh, and Joachim Dzubiella	
Controlled stigmergy in quasi-one-dimensional active particle systems (<i>15 pages</i>)	024605
Gregor Bánó, Cyril Slabý, Alena Strejčková, Zoltán Tomori, Andrej Hovan, Pavol Miskovsky, and Denis Horvath

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Mechanical testing of colloidal solids with millipascal stress and single-particle strain resolution (<i>12 pages</i>)	024606
J. Zsolt Terdik, David A. Weitz, and Frans Spaepen	
Phase ordering in binary mixtures of active nematic fluids (<i>10 pages</i>)	024607
Saraswat Bhattacharyya and Julia M. Yeomans	
Spontaneous separation of attractive chiral mixtures (<i>10 pages</i>)	024608
Jia-jian Li, Rui-xue Guo, and Bao-quan Ai	
Aspect-ratio-dependent void formation in active rhomboidal and elliptical particle systems (<i>8 pages</i>)	024609
Motoya Suzaka, Hiroaki Ito, and Hiroyuki Kitahata	
Dynamics of magnetization growth and relaxation in ferrofluids (<i>12 pages</i>)	024610
Igor M. Subbotin, Alexey O. Ivanov, and Philip J. Camp	
Simulating pedestrian avoidance: The human-zombie game (<i>9 pages</i>)	024611
Juan P. Oriana, German A. Patterson, and Daniel R. Parisi	
Motility and pairwise interactions of chemically active droplets in one-dimensional confinement (<i>12 pages</i>)	024612
Pawan Kumar, Prateek Dwivedi, Sobiya Ashraf, Dipin Pillai, and Rahul Mangal	
Statistical mechanics of passive Brownian particles in a fluctuating harmonic trap (<i>11 pages</i>)	024613
Derek Frydel	
Liquid Crystals	
Dynamic flexoelectric instabilities in nematic liquid crystals (<i>20 pages</i>)	024701
E. S. Pikina, A. R. Muratov, E. I. Kats, and V. V. Lebedev	
Steepness-fragility insights from the temperature derivative analysis of dielectric data of a highly nonsymmetric liquid crystal dimer (<i>11 pages</i>)	024702
Josep Salud, Nerea Sebastián, María R. de la Fuente, S. Diez-Berart, and David O. López	
Ordered structures formed by nematic topological defects and their transformation with changing the Euler characteristics (<i>7 pages</i>)	024703
P. V. Dolganov, N. A. Spiridenko, and V. K. Dolganov	
Films and Interfaces	
Contact angle hysteresis on nonwetting microstructured surfaces: Effect of randomly distributed pillars or holes (<i>10 pages</i>)	024801
Pavel Iliev, Nina Pesheva, and Stanimir Iliev	
Simple dynamical model that leads to sputter cone formation (<i>18 pages</i>)	024802
Nicholas L. Lehnerz and R. Mark Bradley	
Elastic ribbons in bubble columns: When elasticity, capillarity, and gravity govern equilibrium configurations (<i>7 pages</i>)	024803
Jean Farago, Manon Jouanlanne, Antoine Egelé, and Aurélie Hourlier-Fargette	
Granular Materials	
Interaction between gas channels in water-saturated sands (<i>9 pages</i>)	024901
Germán Varas, Gabriel Ramos, and Valérie Vidal	

(Continued)

Solid Mechanics

- Vibrational lifetimes and viscoelastic properties of ultrastable glasses (*13 pages*) 025001
Jan Griebner and Lars Pastewka

-  Integrating local energetics into Maxwell-Calladine constraint counting to design mechanical metamaterials (*25 pages*) 025002
Jason W. Rocks and Pankaj Mehta

- Competition between slicing and buckling underlies the erratic nature of paper cuts (*7 pages*) 025003
Sif Fink Arnbjerg-Nielsen, Matthew D. Biviano, and Kaare H. Jensen

- Onset and propagation of slip at adhesive elastic interfaces (*16 pages*) 025004
Vineet Dawara and Koushik Viswanathan

Fluid Dynamics

- Nonlinear, single-mode, two-dimensional Rayleigh-Taylor instability in ideal media (*12 pages*) 025101
A. R. Piriz, J. J. López Cela, S. A. Piriz, and N. A. Tahir

- Single droplet or bubble and its stability: Kinetic theory and dynamical system approaches (*18 pages*) 025102
Takumu Miyauchi and Shigeru Takata

- Lagrangian flow networks for passive dispersal: Tracers versus finite-size particles (*13 pages*) 025103
Deoclécio Valente, Ksenia Guseva, and Ulrike Feudel

- Scaling law for a buckled elastic filament in a shear flow (*12 pages*) 025104
Paweł Sznajder, Piotr Zdybel, Lujia Liu, and Maria L. Ekiel-Jezewska

Plasma Physics

- Complete quasilinear model for the acceleration-driven lower hybrid drift instability and a computational assessment of its validity (*25 pages*) 025201
G. V. Vogman and J. H. Hammer

- Electron-proton relaxation in hot-dense plasmas with a screened quantum statistical potential (*8 pages*) 025202
Zhengfeng Fan, Chengxin Yu, Cong-Zhang Gao, Xuefeng Xu, Cunbo Zhang, Binbing Wu, Jie Liu, Pei Wang, and Shaoping Zhu

- Testing for Markovian character of transfer of fluctuations in solar wind turbulence on kinetic scales (*16 pages*) 025203
Dariusz Wójcik and Wiesław M. Macek

- Transition to superdiffusive transport in turbulent plasmas (*8 pages*) 025204
Matteo Stanzani, Filippo Arlotti, Guido Ciraolo, Xavier Garbet, and Cristel Chandre

- Rotating particle pair produces hot complex plasma crystals (*11 pages*) 025205
Calvin Carmichael, Jorge Martinez Ortiz, Parker Adamson, Lorin Matthews, and Truell Hyde

- Pseudospectral particle-in-cell formulation with arbitrary charge and current-density time dependencies for the modeling of relativistic plasmas (*19 pages*) 025206
Olga Shapoval, Edoardo Zoni, Remi Lehe, Maxence Thévenet, and Jean-Luc Vay

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 110, NUMBER 2

AUGUST 2024

Methodological notes on gauge invariance in the treatment of waves and oscillations in plasmas via the Einstein-Vlasov-Maxwell system: Fundamental equations (23 pages)	025207
Lucas Bourscheidt and Fernando Haas	
Demonstration of metaplectic geometrical optics for reduced modeling of plasma waves (16 pages)	025208
Rune Højlund Marholt, Mads Givskov Senstius, and Stefan Kragh Nielsen	
Computational Physics	
Three-dimensional solidification modeling of various materials using the lattice Boltzmann method with an explicit enthalpy equation (12 pages)	025301
Zheng Dai (代铮), Zhongyi Wang (王忠义), Junhao Zhu (朱俊豪), Xiaohu Chen (陈小虎), Qing Li (李庆), and Zongrui Jin (金宗睿)	
Past rewinding of fluid dynamics from noisy observation via physics-informed neural computing (9 pages)	025302
Jaemin Seo	
Modeling heat conduction with dual-dissipative variables: A mechanism-data fusion method (12 pages)	025303
Leheng Chen, Chuang Zhang, and Jin Zhao	
Lattice Boltzmann approach for acoustic manipulation (15 pages)	025304
E. Castro-Ávila, Paolo Magaretti, Jens Harting, and J. D. Muñoz	
Annealing approach to root finding (13 pages)	025305
Junghyo Jo, Alexandre Wagemakers, and Vipul Periwal	
Boundary-layer structures arising in linear transport theory (23 pages)	025306
E. L. Gaggioli, Laura C. Estrada, and Oscar P. Bruno	

COMMENTS

Comment on “Ultracold plasma expansion in quadrupole magnetic field” (3 pages)	027201
Matthew Schlitters, Matthew Miller, Ben Farley, and Scott D. Bergeson	
Reply to “Comment on ‘Ultracold plasma expansion in quadrupole magnetic field’ ” (3 pages)	027202
S. Ya. Bronin, E. V. Vikhrov, B. B. Zelener, and B. V. Zelener
