

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L052201–054221, and Part B pages 054301–056402.*

PART A

LETTERS

Nonlinear Dynamics and Chaos

Low-dimensional dynamics of globally coupled complex Riccati equations: Exact firing-rate equations
for spiking neurons with clustered substructure (5 pages) L052201
Diego Pazó and Rok Cestnik

Streamlined Krylov construction and classification of ergodic Floquet systems (9 pages) L052202
Nikita Kolganov and Dmitrii A. Trunin

Complex bifurcation structures in a Hodgkin-Huxley model of thermally sensitive neurons under periodic
perturbation (6 pages) L052203
Bruno R. R. Boaretto, Paulo R. Protachevich, Matheus Hansen, Rene O. Medrano-T.,
Elbert E. N. Macau, and Celso Grebogi

Dissipative chaos and steady state of an open Tavis-Cummings dimer (7 pages) L052204
Debabrata Mondal, Andrey Kolovsky, and S. Sinha

Networks and Complex Systems

Competition between group interactions and nonlinearity in voter dynamics on hypergraphs (6 pages) L052301
Jihye Kim, Deok-Sun Lee, Byungjoon Min, Mason A. Porter, Maxi San Miguel, and K.-I. Goh

Biological Physics

Hydrodynamic interaction leads to the accumulation of *Chlamydomonas reinhardtii* near a solid-liquid
interface (6 pages) L052401
Chunhe Li, Hongyi Bian, Yateng Qiao, Jin Zhu, and Zijie Qu

Bacterial chemotaxis considering memory effects (6 pages) L052402
Manuel Mayo and Rodrigo Soto

Fluid Dynamics

Elasticity of fibers prefers the chaos of turbulence (6 pages) L053101
Rahul K. Singh

2470-0045(202505)111:5:A;1-0

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 111, NUMBER 5

MAY 2025

Plasma Physics

Paradigm for global gyrokinetic turbulence (*5 pages*) L053201
J. Candy, A. Dudkovskaia, and E. A. Belli

Nonequilibrium effects in high-gain inertial confinement fusion (*7 pages*) L053202
S. X. Hu, N. R. Shaffer, B. Arnold, K. A. Nichols, V. V. Karasiev, S. Zhang, and V. N. Goncharov

Soft Matter including Polymers, Liquid Crystals, and Granular Materials

Diffusive oscillators capture the pulsating states of deformable particles (*6 pages*) L053401
Alessandro Manacorda and Étienne Fodor

Flexoelectricity versus electrostatics in polar nematic liquid crystals (*7 pages*) L053402
Lincoln Paik and Jonathan V. Selinger

 Pinned adcolloids disfavor nucleation in colloidal vapor deposition (*7 pages*) L053403
Noman Hanif Barbhuiya, Pritam K. Mohanty, Saikat Mondal, Aminul Hussain,
Adhip Agarwala, and Chandan K. Mishra

Mechanics, Interfaces, and Films

Nucleation-percolation transition in desiccation cracking of clay (*6 pages*) L053501
Yuhan Yang, Chao Zhang, Hyungsoo Kim, and Renpeng Chen

Inequalities of energy release rates in compression of nanoporous materials predict its imminent
breakdown (*6 pages*) L053502
Diksha, Jordi Baró, and Soumyajyoti Biswas

ARTICLES

Statistical Physics

Effects of interactions and boundary conditions on the performance of many-body quantum batteries (*7 pages*) 054101
Yi-Dan Zheng, Wan-Lu Song, and Bin Zhou

Observation of ballistic thermal transport in a nonintegrable classical many-body system (*10 pages*) 054102
Jianjin Wang and Daxing Xiong

Biased degenerate ground-state sampling of small Ising models with converged quantum approximate
optimization algorithm (*10 pages*) 054103
Elijah Pelofske

Event-chain Monte Carlo and the true self-avoiding walk (*9 pages*) 054104
A. C. Maggs

Added mass effect in coupled Brownian particles (*14 pages*) 054105
Long Him Cheung and Christopher Jarzynski

Analyzing diffusion-limited processes in a cylinder using pair-correlation functions (*21 pages*) 054106
Benjamin James Binder

 This paper was highlighted in the APS publication *Physics* (physics.aps.org).

 The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

 Out-of-equilibrium critical dynamics of the three-dimensional $\mathbb{Z}_2$ gauge model along critical relaxational flows (10 pages)	054107
Claudio Bonati, Haralambos Panagopoulos, and Ettore Vicari	
Searching for quantum nonthermodynamic phenomena (16 pages)	054108
Yu Qiao	
Geometric foundation of nonequilibrium transport: A Minkowski embedding of Markov dynamics (7 pages)	054109
David Andrieux	
Localization transitions in quadratic systems without quantum chaos (12 pages)	054110
Mateusz Lisiecki, Lev Vidmar, and Patrycja Łydźba	
Active liquid-liquid phase separation in a confining environment (9 pages)	054111
Chen Lin and Robijn Bruinsma	
Broken-parity-induced crossover of thermal conduction in the Fermi-Pasta-Ulam-Tsingou lattice (6 pages)	054112
Jianjin Wang, Yangjie Wang, and Jige Chen	
First-passage-time statistics of active Brownian particles: A perturbative approach (12 pages)	054113
Yanis Baouche, Magali Le Goff, Christina Kurzthaler, and Thomas Franosch	
Intrinsic attractive and repulsive interactions: From classical to quantum statistics in the generalized Maxwell-Boltzmann distribution (14 pages)	054114
Maryam Seifi, Zahra Ebadi, Hamzeh Agahi, Hossein Mehri-Dehnavi, and Hosein Mohammadzadeh	
Forest fire as a temperature-pattern-driven depinning problem (7 pages)	054115
J. Cheraghalizadeh, Hans J. Herrmann, and M. N. Najafi	
Langevin picture of the g -diffusion process and its ergodic property (11 pages)	054116
Xudong Wang, Yao Chen, and Hongli An	
Analytic and Monte Carlo approximations to the distribution of the first-passage time of drifted diffusion with stochastic resetting and mixed boundary conditions (19 pages)	054117
Juan Magalang, Riccardo Turin, Javier Aguilar, Laetitia Colombani, Daniel Sanchez-Taltavull, and Riccardo Gatto	
Typicality from concentration of measure in models with binary state variables (10 pages)	054118
Nicolás Nessi	
Directional locking and hysteresis in stripe- and bubble-forming systems on one-dimensional periodic substrates with a rotating drive (12 pages)	054119
C. Reichhardt and C. J. O. Reichhardt	
Interacting systems with zero thermodynamic curvature (14 pages)	054120
Juan Rodrigo and Ian Vega	
Salpeter equation with complex Hamiltonian (17 pages)	054121
Fernando Alonso-Marroquin, Yaoyue Tang, Fatemeh Gharari, and M. N. Najafi	
Token-driven totally asymmetric simple exclusion processes (20 pages)	054122
Bor Kavčič and Gašper Tkačik

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 111, NUMBER 5

MAY 2025

Griffiths phase in a three-dimensional Ising model with aperiodic interactions (7 pages)	054123
Daniel Salvador and M. H. R. Tragtenberg	
Stochastic heat differences between many-particle and density-field descriptions (29 pages)	054124
Takuya Saito and Yutaka Sumino	
Phase transitions in the q -state clock model (15 pages)	054125
Arpita Goswami, Ravi Kumar, Monikana Gope, and Shaon Sahoo	
Conformal invariance constraints in the $O(N)$ models: A study within the nonperturbative renormalization group (18 pages)	054126
Santiago Cabrera, Gonzalo De Polsi, and Nicolás Wschebor	
Random search with stochastic resetting: When finding the target is not enough (18 pages)	054127
Paul C. Bressloff	
Geometric properties of the additional third-order transitions in the two-dimensional Potts model (11 pages)	054128
Wei Liu, Xin Zhang, Lei Shi, Kai Qi, Xiang Li, Fangfang Wang, and Zengru Di	
✂ Critical exponents for isotropically directed percolation on hierarchical lattices (9 pages)	054129
Samuel dos S. Costa, Aurelio W. T. de Noronha, André P. Vieira, José S. Andrade, Jr., and André A. Moreira	
Phase-space contraction rate for classical mixed states (14 pages)	054130
Mohamed Sahbani, Swetamber Das, and Jason R. Green	
Two-dimensional Potts model with invisible states on a square lattice (7 pages)	054131
Jae Hwan Lee, Wanki Park, and Jin Min Kim	
Temporal coarse graining and elimination of slow and periodic dynamics with the generalized Langevin equation for convolution-time-filtered observables (15 pages)	054132
Roland R. Netz	
Out-of-equilibrium quantum thermochemical engine with one-dimensional Bose gas (19 pages)	054133
Vijit V. Nautiyal	
Universality of the complete-graph Potts model with $0 < q \leq 2$ (10 pages)	054134
Zirui Peng, Sheng Fang, Hao Hu, and Youjin Deng	
Generalized unscented transformation for forecasting non-Gaussian processes (15 pages)	054135
Donald Ebeigbe, Tyrus Berry, Andrew J. Whalen, Michael M. Norton, Dan Simon, Timothy D. Sauer, and Steven J. Schiff	
Mpemba effect on nonequilibrium active Markov chains (12 pages)	054136
Apurba Biswas and Arnab Pal	
Boosted and diminished thermal-machine performances in the presence of quantum measurements (10 pages)	054137
Naghi Behzadi	
Restoring-torque-induced current reversal and transport enhancement in confined active matter systems (8 pages)	054138
Jia-jian Li, Rui-xue Guo, and Bao-quan Ai	
Lower bound of entropy production in an underdamped Langevin system with normal distributions (9 pages)	054139
Futa Watabe and Koji Okuda	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 111, NUMBER 5	MAY 2025
Three-dimensional real-space renormalization group with well-controlled approximations (<i>11 pages</i>)		054140
Xinliang Lyu and Naoki Kawashima		
Nonlinear Dynamics and Chaos		
Two minimal-variable symplectic integrators for stochastic spin systems (<i>8 pages</i>)		054201
Sagy Ephrati and Erik Jansson		
Ensemble-averaged mean-field many-body level density: An indicator of integrable versus chaotic single-particle dynamics (<i>14 pages</i>)		054202
Georg Maier, Carolyn Echter, Juan Diego Urbina, Caio Lewenkopf, and Klaus Richter		
Suppression and enhancement of vibrational resonance by time-periodic phase modulation in a driven gyroscope (<i>12 pages</i>)		054203
P. O. Adesina, U. E. Vincent, T. O. Roy-Layinde, O. T. Kolebaje, O. O. Popoola, and P. V. E. McClintock		
Exact mean and variance of the squared Hellinger distance for random density matrices (<i>10 pages</i>)		054204
Vinay Kumar, Kaushik Vasan, and Santosh Kumar		
Thermalization of one-dimensional ϕ^4 lattices: Chirikov overlap criterion and discrete breathers (<i>6 pages</i>)		054205
Yuqi Han, Yue Liu, and Dahai He		
Modulational instability and discrete quantum droplets in a deep quasi-one-dimensional optical lattice (<i>13 pages</i>)		054206
Sherzod R. Otajonov, Bakhram A. Umarov, and Fatkhulla Kh. Abdullaev		
Mutual information for a particle pair and its application to diagnose chaos in curved spacetime (<i>9 pages</i>)		054207
Wenfu Cao, Yang Huang, and Hongsheng Zhang		
Weight dynamics of learning networks (<i>14 pages</i>)		054208
Nahal Sharafi, Christoph Martin, and Sarah Hallerberg		
Dark-bright solitons with positive mass in Manakov cases with repulsive interactions (<i>9 pages</i>)		054209
Xing Gao, Ling-Zheng Meng, and Li-Chen Zhao		
Semiclassical reproducibility of sawtooth structure observed for a periodically perturbed rounded-rectangular potential (<i>16 pages</i>)		054210
Kin'ya Takahashi and Kensuke S. Ikeda		
Quantum-classical correspondence between quantum chaos and finite-time classical dynamics (<i>10 pages</i>)		054211
Qian Wang and Marko Robnik		
Dynamically stable two- and four-droplet solitons in a very strongly dipolar NaCs condensate (<i>8 pages</i>)		054212
S. K. Adhikari		
Spacing ratios in mixed-type systems (<i>13 pages</i>)		054213
Hua Yan		
Exploring attractor reconstruction derived from encoder-decoder time series prediction (<i>20 pages</i>)		054214
Yifei Chen, Jing Wang, and Youfang Lin		
Transition from bounded to unbounded energy in a time-dependent billiard (<i>9 pages</i>)		054215
Anne Kétri P. da Fonseca, Felipe Augusto O. Silveira, Célia M. Kuwana, Diego F. M. Oliveira, and Edson D. Leonel

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 111, NUMBER 5

MAY 2025

Multiphase autoresonant excitations in the Korteweg–de Vries system (<i>5 pages</i>)	054216
L. Friedland and A. G. Shagalov	
Traveling bubbles and vortex pairs within symmetric two-dimensional quantum droplets (<i>11 pages</i>)	054217
Angel Paredes, Jose Guerra-Carmenate, Jose R. Salgueiro, Daniele Tommasini, and Humberto Michinel	
Collective dynamics and phase transitions of Stuart-Landau oscillators on a ring network: Interplay of asymmetric and symmetric couplings (<i>11 pages</i>)	054218
Naveen Kumar Mendola and Umeshkanta Singh Thounaojam	
Power-law scaling of the depth of potential wells in multistable switches from feedback-regulated networks (<i>8 pages</i>)	054219
Debashis Barik, Pratyush Bhattacharjya, and Soutrick Das	
Traveling chimera states by weak temporal couplings (<i>9 pages</i>)	054220
Wenbin Mao, Guoshen Liang, and Zonghua Liu	
Optimal coupling heterogeneity revitalizes rhythmicity from death (<i>5 pages</i>)	054221
Frank Thomas Ndjomatchoua, Wei Zou, Carlos Lawrence Gninzanlong, Byliole S. Djouda, and Clément Tchawoua	

PART B

Networks and Complex Systems

Role of debt valuation factors in systemic risk assessment (<i>14 pages</i>)	054301
K. Fortuna and J. Szwabiński	
Global decomposition of networks into multiple cores formed by local hubs (<i>12 pages</i>)	054302
Wonhee Jeong (정원희), Unjong Yu (유운중), and Sang Hoon Lee (이상훈)	
Popularity-driven random walks on a class of scale-free graphs (<i>7 pages</i>)	054303
Simone Santini	
Percolation in random hypergraphs with anchor nodes (<i>15 pages</i>)	054304
Yilun Shang	
Evolutionary dynamics of multiplayer ultimatum games on hypergraphs (<i>11 pages</i>)	054305
Meng Gao, Zhi Li, Te Wu, and Long Wang	
Replicators in Game-of-Life-like automata (<i>8 pages</i>)	054306
F. D. Brown and K. Sneppen	
Bayesian inference of minimally complex models with interactions of arbitrary order (<i>20 pages</i>)	054307
Clélia de Mulatier and Matteo Marsili	
Phase transitions and symmetry breaking of cooperation on lattices (<i>12 pages</i>)	054308
Christoph Hauert and György Szabó	
Biased random walks on networks with stochastic resetting (<i>15 pages</i>)	054309
Anlin Li and Xiaohan Sun	
Time-dependent influence metric for cascade dynamics on networks (<i>11 pages</i>)	054310
James P. Gleeson, Ailbhe Cassidy, Daniel Giles, and Ali Faqueh

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 111, NUMBER 5

MAY 2025

Unveiling optimal diffusion for infection control in Brownian particle systems (12 pages)	054311
Kaito Takahashi, Makiko Sasada, and Takuma Akimoto	
Neighbor-induced damage percolation (9 pages)	054312
Lorenzo Cirigliano and Claudio Castellano	
Network-driven dispersion in transport phenomena (11 pages)	054313
Margherita Vendruscolo, Luca Salerno, Carlo Camporeale, and Luca Ridolfi	
Compressing regularized dynamics improves link prediction with the map equation in sparse networks (42 pages)	054314
Maja Lindström, Christopher Blöcker, Tommy Löfstedt, and Martin Rosvall	
Assessing the robustness and reducibility of multiplex networks with embedding-aided interlayer similarities (11 pages)	054315
Haoran Nan, Senquan Wang, Chun Ouyang, Yanchen Zhou, and Weiwei Gu	
Beyond the median voter: A model of how the ideological dimension shapes party polarization (8 pages)	054316
Roberto Venegeroles	
Maximum likelihood estimation of burst-merging kernels for bursty time series (8 pages)	054317
Tibebe Birhanu and Hang-Hyun Jo	
Heterogeneous nucleation in a multiplex adaptive network (14 pages)	054318
Akash Yadav, Qazi Saaheelur Rahaman, V. K. Chandrasekar, and D. V. Senthilkumar	
Biological Physics	
Power capacity, effective age, and life limit of the living cell (13 pages)	054401
Andreas Paglietti	
Dynamic kissing model for enhancer-promoter communication on the surface of transcriptional condensates (19 pages)	054402
Qing Zhang, Hualin Shi, and Zhihua Zhang	
Sequence-dependent biomolecular phase separation driven by short-range interaction: From material properties to coarsening dynamics (13 pages)	054403
Jun-Qi Li, Zeng-Shuai Yan, Yu-Qiang Ma, and Hong-Ming Ding	
Viscoelastic approach to cell migration in epiboly (8 pages)	054404
N. O. Rojas and P. C. Encina	
Microscopic machinery for ion-triggered drug release from gold nanoparticles-drug conjugates: Optical spectroscopy and molecular dynamics studies (13 pages)	054405
Krishnananda C. P., P. S. Burada, Swagata Dasgupta, and Anushree Roy	
Resonances in the voltage statistics and upcrossing rate of a minimal dendritic neuron model with a passive membrane (11 pages)	054406
Robert P. Gowers and Magnus J. E. Richardson	
Oscillatory transients in DNA hairpin unwinding: Effect of thermal and mechanical jumps (12 pages)	054407
Keerti Chauhan, Amit Raj Singh, Sanjay Kumar, and Rony Granek	
Topological charge-weighted method of identifying the phase singularity at low spatial resolution (18 pages)	054408
Yin-Jie He, Qi-Hao Li, Jun-Ting Pan, and Hong Zhang

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 111, NUMBER 5

MAY 2025

Bacterial chemotaxis considering memory effects: Derivation of the reaction-diffusion equations (21 pages)	054409
Manuel Mayo and Rodrigo Soto	
Decoding cancer dynamics: Hypergraph analysis of stem cell marker interactions through O-information and community detection (17 pages)	054410
David H. Margarit, Marcela V. Reale, Gustavo Paccosi, and Lilia M. Romanelli	
Exact minimax entropy models of large-scale neuronal activity (14 pages)	054411
Christopher W. Lynn, Qiwei Yu, Rich Pang, Stephanie E. Palmer, and William Bialek	
Genetic designs for stochastic and probabilistic biocomputing (12 pages)	054412
Lewis Grozinger, Jesús Miró-Bueno, and Ángel Goñi-Moreno	
Nonequilibrium replication process generates the initial template for chromatin folding (12 pages)	054413
Kiran Kumari	
Coexistence versus collapse in transposon populations (8 pages)	054414
Aria Yom and Nathan E. Lewis	
Anticipating critical transitions in a stochastic macrophage polarization model (14 pages)	054415
Shankha Narayan Chattopadhyay and Arvind Kumar Gupta	
Growing length and time scales in activity-mediated glassy dynamics in confluent cell monolayers (9 pages)	054416
Souvik Sadhukhan, Chandan Dasgupta, and Saroj Kumar Nandi	
Fluid Dynamics	
Controlled jetting of impacting drops (10 pages)	055101
N. S. Satpathi, G. S. G. Reddy, and A. K. Sen	
Viscosity caused by self-gravity in the field of a massive body (8 pages)	055102
Iliya Yu. Kalashnikov and Valery M. Chechetkin	
Molecular dynamics simulation of channel-size dependence of the force around a liquid-vapor-solid contact line region (10 pages)	055103
Akinori Fukushima, Shinya Oyagi, and Takashi Tokumasu	
Rigorous model of sessile droplet evaporation considering the kinetic factor (11 pages)	055104
V. A. Vlasov	
Nonmonotonic emergence of order from chaos in turbulent thermoacoustic fluid systems (11 pages)	055105
Aswin Balaji, Shruti Tandon, Norbert Marwan, Jürgen Kurths, and R. I. Sujith	
Evolution of the mass density profile of dense molecular clouds (8 pages)	055106
S. Donkov, I. Zh. Stefanov, T. V. Veltchev, and R. S. Klessen	
Layered patterns of active scalar fields in a two-dimensional magnetohydrodynamic system (21 pages)	055107
F. R. Ramirez and P. H. Diamond	
Breakdown of continuum in lid-rotating rarefied cavity flow (15 pages)	055108
Shesh N. Dhurandhar, Vishnu Mohan, Manjul Sharma, and A. Sameen	

(Continued)

Plasma Physics

- Electron-electron collisions in calculations of the electrical conductivity for warm dense matter based on density functional theory (*12 pages*) 055201
 G. Röpke, R. Redmer, Max Schörner, Heidi Reinholz, Uwe Kleinschmidt, and M. Bethkenhagen
- Formation mechanism of the complex dynamics in subnormal glow discharge systems: Mixed-mode oscillations and period-adding bifurcation (*11 pages*) 055202
 Zijia Chu, Jingfeng Yao, Chengxun Yuan, Ying Wang, Zhongxiang Zhou, and Lin Geng
- Comparative analysis of dust-acoustic shock waves in nonextensive dusty plasma under gravity and microgravity conditions with adiabatic and nonadiabatic charge variations (*12 pages*) 055203
 Rima Mebrek, Rachid Fermous, Moufida Benzekka, and Rabia Amour
- Dynamic stabilization and parametric excitation of instabilities in an ablation front by a temporally modulated laser pulse (*15 pages*) 055204
 K. G. Zhao, J. W. Li, L. F. Wang, Z. Y. Li, Z. H. Di, C. Xue, J. Q. Dong, H. Zhang, J. F. Wu, H. B. Zhuo, W. H. Ye, C. T. Zhou, Y. K. Ding, W. Y. Zhang, and X. T. He
- Applicability of semiclassical theories in the strong-field plasma regime (*9 pages*) 055205
 Haidar Al-Naseri and Gert Brodin
- Ion-beam plasma interaction in ion fast ignition nuclear fusion scheme: A systematic study of the hot-spot properties and gains (*23 pages*) 055206
 P. Rodríguez-Beltrán, J. M. Gil, R. Rodríguez, and G. Espinosa-Vivas

Computational Physics, Machine Learning, and Artificial Intelligence

- Viscous liquid dynamics modeled as random walks within overlapping hyperspheres (*13 pages*) 055301
 Mark F. B. Raiton, Eva Uhre, Jeppe C. Dyre, and Thomas B. Schröder
- Solving physics-based initial value problems with unsupervised machine learning (*19 pages*) 055302
 Jack Griffiths, Steven A. Wrathmall, and Simon A. Gardiner
- Deep-learning interatomic potentials of the ε – ZrX_2 series ($X = \text{H, D, and T}$) (*12 pages*) 055303
 Kunyang Cheng, Xiujuan Cheng, Mingyang Shi, Xuying Zhou, Jiahao Deng, Gang Jiang, and Jiguang Du
- Alternative multiple-relaxation-time lattice Boltzmann method for simulating conjugate heat transfer (*19 pages*) 055304
 Yong Zhao, Xinyue Liu, Zhenyu Chen, and Lei Wang
- Neural density functional theory in higher dimensions with convolutional layers (*9 pages*) 055305
 Felix Glitsch, Jens Weimar, and Martin Oettel
- Optimizing temperature distributions for training neural quantum states using parallel tempering (*12 pages*) 055306
 Conor Smith, Quinn T. Campbell, and Tameem Albash
- Glassy dynamics near the interpolation transition in deep recurrent networks (*12 pages*) 055307
 John Hertz and Joanna Tyrcha
- Solving the Lindblad equation with methods from computational fluid dynamics (*27 pages*) 055308
 Jan Rais, Adrian Koenigstein, Niklas Zorbach, and Carsten Greiner

(Continued)

Numerical investigation of a recent radiation reaction model and comparison to the Landau-Lifschitz model (<i>14 pages</i>)	055309
C. Bild, H. Ruhl, and D.-A. Deckert	
Soft Matter including Polymers, Liquid Crystals, and Granular Materials	
Exploring the gravity-driven failure of a cohesive granular column (<i>13 pages</i>)	055401
Fanshuo Ma, Pierre-Yves Lagrée, and Lydie Staron	
Time-delayed Newton's law of cooling with a finite-rate thermal quench: Impact on the Mpemba and Kovacs effects (<i>9 pages</i>)	055402
Andrés Santos	
Collective motion of self-trapping chiral active particles induced by a noisy geometric environment (<i>11 pages</i>)	055403
Jun Huang and Zhi-Gang Shao	
Diffuse-charge dynamics across a capacitive interface in a dc electric field (<i>12 pages</i>)	055404
Shuozhen Zhao, Bhavya Balu, Zongxin Yu, Michael J. Miksis, and Petia M. Vlahovska	
Role of concentration-polarization electroosmosis in the dielectrophoresis of highly charged colloids: A theoretical study (<i>11 pages</i>)	055405
Jose Eladio Flores-Mena, Raúl Fernández-Mateo, Pablo García-Sánchez, and Antonio Ramos	
Active microrheology and dynamic phases for pattern-forming systems with competing interactions (<i>13 pages</i>)	055406
C. Reichhardt and C. J. O. Reichhardt	
Analytical study on diffusiophoresis of soft particles: Role of surface-charge-mobility-dependent hydrophobic core (<i>14 pages</i>)	055407
Partha Sarathi Majee and Hiroyuki Ohshima	
Statistical mechanics of a two-dimensional quasistatic granular pile: Thermodynamics and constitutive relations (<i>14 pages</i>)	055408
R. Krechetnikov and A. Zelnikov	
Thermophysics of colloidal systems confined to spherical surfaces (<i>12 pages</i>)	055409
S. L. Juárez-Osorio and P. González-Mozuelos	
Rectification and collective dynamics of active particles driven by misaligned perception-dependent motility (<i>10 pages</i>)	055410
Rui-xue Guo, Jia-jian Li, Feng-guo Li, and Bao-quan Ai	
Analytic solution for the nonlinear response of magnetic nanoparticles to large-amplitude oscillatory fields (<i>10 pages</i>)	055411
Patrick Ilg	
Yielding in colloidal gels: From local structure to mesoscale strand breakage and macroscopic failure (<i>13 pages</i>)	055412
Himangsu Bhaumik, Tanniemola B. Liverpool, C. Patrick Royall, and Robert L. Jack	
Activity-enhanced shear thinning of flexible linear polar polymers (<i>11 pages</i>)	055413
Arindam Panda, Roland G. Winkler, and Sunil P. Singh
