

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L052101–054317, and Part B pages 054401–059901(E).*

PART A

LETTERS

Statistical Physics

Large deviations of current for the symmetric simple exclusion process on a semi-infinite line
and on an infinite line with a slow bond (8 pages) L052101

Kapil Sharma, Soumyabrata Saha, Sandeep Jangid, and Tridib Sadhu

Operator-Weyl-symbol approach to eigenstate thermalization hypothesis (6 pages) L052102

Xiao Wang (王晓) and Wen-ge Wang (王文阁)

Nonlinear Dynamics and Chaos

Dynamics of reservoir computing for crises prediction (5 pages) L052201

Dishant Sisodia and Sarika Jalan

Resetting without resetting: An alternate strategy to experimentally verify optimal mean first passage
time under stochastic resetting (6 pages) L052202

Abhishek Thakur, Shruti Swain, Aarsh Chotalia, and P. Parmananda

Observing a focused weak shock wave perform a Hilbert transform (6 pages) L052203

Miguel A. Alonso and Pedro A. Quinto-Su

Entanglement production in the Sachdev-Ye-Kitaev model and its variants (7 pages) L052204

Tanay Pathak and Masaki Tezuka

Biological Physics

Compaction and swelling of single stretched DNAs driven by molecular crowding (7 pages) L052401

Paritosh Gupta, John F. Marko, and Vittore F. Scolari

Plasma Physics

Impact of fast ions on turbulent transport in high- β HL-2A tokamak scenarios (7 pages) L053201

Jingchun Li, Zhaoyang Lu, Jianqiang Xu, Wei Chen, Jiaqi Dong, Jingting Luo, and Yong Liu

Neural differential equations for the solar dynamo (6 pages) L053202

E. Illarionov, V. Kisieliuss, R. Stepanov, and K. M. Kuzanyan

(Continued)

2470-0045(202605)113:5:A;1-Y

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 113, NUMBER 5

MAY 2026

Charge transport and mode transition in dual-energy electron beam diodes (<i>6 pages</i>)	L053203
Chubin Lin, Jiandong Chen, Huihui Wang, and Yangyang Fu	

Computational Physics, Machine Learning, and Artificial Intelligence

Signature of glassy dynamics in dynamic mode decompositions (<i>7 pages</i>)	L053301
Zachary G. Nicolaou, Hangjun Cho, Yuanzhao Zhang, J. Nathan Kutz, and Steven L. Brunton	

Soft Matter including Polymers, Liquid Crystals, and Granular Materials

 Shape dictates the motion of topological defects in active nematics (<i>7 pages</i>)	L053401
Giacomo Marco La Montagna, Sumeja Bureković, Ananyo Maitra, and Cesare Nardini	
Tuning the viscosity and jamming point in dense active non-Brownian suspensions (<i>7 pages</i>)	L053402
Bhanu Prasad Bhowmik	
Gravity-induced modulation of negative differential thermal resistance in fluids (<i>6 pages</i>)	L053403
Qiyuan Zhang, Juncheng Guo, Juchang Zou, and Rongxiang Luo	
Shape-induced translational mode transition and self-entrapment of self-propelled metallodielectric rods (<i>7 pages</i>)	L053404
Yasutaka Iwashita and Yasuyuki Kimura	

Mechanics, Interfaces, and Films

Tightening dynamics of wound rolls: The interplay of solid friction and interfacial compressibility (<i>5 pages</i>)	L053501
M. Caelen, S. Moulinet, B. Andreotti, and F. Lechenault	
Geometry of the vapor layer under a Leidenfrost hydrogel sphere (<i>5 pages</i>)	L053502
Vicente L. Diaz-Melian, Isaac C. D. Lenton, Jack Binysh, Anton Souslov, and Scott R. Waitukaitis	

ARTICLES

Statistical Physics

Short-time statistics of extinction and blowup in reaction kinetics (<i>9 pages</i>)	054101
Rotem Degany, Michael Assaf, and Baruch Meerson	
Quantum evolution of mixed states and performance of quantum heat engines (<i>16 pages</i>)	054102
Anatoly A. Svidzinsky and Wenzhuo Zhang	
Classical spin liquids from frustrated Ising models in hyperbolic space (<i>6 pages</i>)	054103
Fabian Köhler, Johanna Erdmenger, Roderich Moessner, and Matthias Vojta	
Stochastic heat engine using a single Brownian ellipsoid (<i>19 pages</i>)	054104
Soham Dutta and Arnab Saha	
Molecular communication in one-dimensional channels with active transport and crowding (<i>9 pages</i>)	054105
Phanindra Dewan and Sumantra Sarkar	
Constraint effective action and critical correlation functions at fixed magnetization (<i>14 pages</i>)	054106
Félix Rose, Adam Rançon, and Ivan Balog

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 113, NUMBER 5

MAY 2026

Variational formulation of stochastic thermodynamics: Finite-dimensional systems (25 pages)	054107
Héctor Vaquero del Pino, François Gay-Balmaz, Hiroaki Yoshimura, and Lock Yue Chew	
Coarsening dynamics for spiral and disordered waves in active Potts models (9 pages)	054108
Hiroshi Noguchi	
Efficient simulation of a pair of dissipative qubits antiferromagnetically coupled (10 pages)	054109
Francesco G. Capone, Giulio De Filippis, Vittorio Cataudella, and Antonio de Candia	
Quantum annealed criticality and enhanced magnetocaloric effect on the frustrated Ising honeycomb lattice bilayer (12 pages)	054110
M. Schmidt, P. F. Dias, M. Roos, C. V. Morais, and F. M. Zimmer	
Tensor-network study of Ising model on infinite hyperbolic dodecahedral lattice (16 pages)	054111
Matej Mosko and Andrej Gendiar	
Enhancing performance and operational regimes of the quantum Otto refrigerator with heat bath algorithmic cooling (16 pages)	054112
Yuhao Wang, Andri Pradana, Jian Wei Cheong, and Lock Yue Chew	
Quasiadiabatic thermal ensemble preparation in the thermodynamic limit (10 pages)	054113
Tatsuhiko Shirai	
Fick's law and phase transitions in the Lorentz circuit (12 pages)	054114
Matteo Colangeli, Lamberto Rondoni, and Martin Kröger	
Langevin and Fokker-Planck analyses for diffusion-mediated passing of circular and discorectangular species in two-dimensional channels (14 pages)	054115
Md Khaledur Rahman, Chi-Jen Wang, Yong Han, and James W. Evans	
 Rhythm as an ordered phase of sound: How musical meter emerges in a statistical mechanical model (13 pages)	054116
Robert St. Clair and Jesse Berezovsky	
Perturbation theory for phase correlations of a light wave propagating in a turbulent medium (15 pages)	054117
I. V. Kolokolov and V. V. Lebedev	
Collective heat engines via different interactions: Minimal models, thermodynamics, and phase transitions (12 pages)	054118
Iago N. Mamede, Vitória T. Henkes, and Carlos E. Fiore	
Controlling vortex rotation with obstacles in nonaligning dry active matter (9 pages)	054119
Felipe P. S. Júnior, Jorge L. C. Domingos, W. P. Ferreira, and F. Q. Potiguar	
Anisotropic scale invariance and the uniaxial Lifshitz point from the nonperturbative renormalization group (11 pages)	054120
Gonzalo De Polsi and Pawel Jakubczyk	
Scaling behavior in the asymmetric quantum Rabi model (10 pages)	054121
Zhongshan Su, Yuqi Qing, Yuan Jiang, Bin-Bin Mao, Liangsheng Li, Wen-Long You, Hong-Gang Luo, and Maixin Liu	
Renewal theory for a run-and-tumble particle with stochastic resetting and a sticky boundary (17 pages)	054122
Paul C. Bressloff and Samantha Linn	

(Continued)

Geometry and dynamics of annealed optimization in the coherent Ising machine with hidden and planted solutions (<i>51 pages</i>)	054123
Federico Ghimenti, Adithya Sriram, Atsushi Yamamura (山村 篤志), Hideo Mabuchi, and Surya Ganguli	
Exact mapping of a spin glass with correlated disorder to the pure Ising model (<i>8 pages</i>)	054124
Hidetoshi Nishimori	
Site and bond percolation in linearly distorted triangular and square lattices (<i>11 pages</i>)	054125
Bishnu Bhowmik, Sayantan Mitra, Robert M. Ziff, and Ankur Sensharma	
Quantum coherence and anomalous work extraction in qubit gate dynamics (<i>20 pages</i>)	054126
F. Perciavalle, N. Lo Gullo, and F. Plastina	
Using precision coefficients of recurrence times and integrated currents to construct a lower bound for the average dissipation rate (<i>8 pages</i>)	054127
Alberto Garilli and Diego Frezzato	
☞ Macroscopic fluctuation theory of interacting Brownian particles (<i>21 pages</i>)	054128
Aurélien Grabsch, Davide Venturelli, and Olivier Bénichou	
Optimization of multisite reactions in complex compartmentalized media (<i>12 pages</i>)	054129
T. V. Mendes and T. Guérin	
Generalized Fokker-Planck equation for the active Ornstein-Uhlenbeck particle (<i>16 pages</i>)	054130
Sanju S. Pillai, M. Muhsin, and M. Sahoo	
Canonical quantization for equilibrium thermodynamics (<i>16 pages</i>)	054131
Luis F. Santos, Victor Hugo M. Ramos, Danilo Cius, Mario C. Baldiotti, and Bárbara Amaral	
Extended self-similarity in multimode optical fiber speckles (<i>10 pages</i>)	054132
Mengxin Wu, Ziyi Chen, Guang Yang, and Mingshu Zhao	
Equations of state and stability condition of mixed p -spin glass model (<i>6 pages</i>)	054133
A. Talebi	
Unified gauge-geometry symmetry for equilibrium statistical mechanics (<i>15 pages</i>)	054134
Hai Pham-Van	
Finite-size scaling and edge effects in the Takayasu model of aggregation-diffusion with input (<i>13 pages</i>)	054135
Rohan Banerjee Ravindran and R. Rajesh	
Nonconserving locally disordered exclusion process under constrained resources (<i>13 pages</i>)	054136
Nisha Sharma, Bipasha Pal, Ankita Gupta, and Arvind Kumar Gupta	
Integrated covariances as excess observables weighted by currents and activities (<i>12 pages</i>)	054137
Timur Aslyamov and Massimiliano Esposito	
Thermalization in the mixed-field Ising model: An occupation-number perspective (<i>13 pages</i>)	054138
Isaías Vallejo-Fabila, Fausto Borgonovi, Felix M. Izrailev, and Lea F. Santos	
Derivation and analysis of the amplitude equation for generalized active model B in the presence of chemical reactions (<i>10 pages</i>)	054139
Sayantan Mondal and Prasenjit Das	

(Continued)

Numerical evidence for the non-Abelian eigenstate thermalization hypothesis (<i>19 pages</i>)	054140
Aleksander Lasek, Jae Dong Noh, Jade LeSchack, and Nicole Yunger Halpern	
Nonlinearity-induced transition in heat conduction through a topological metamaterial of rotors (<i>11 pages</i>)	054141
T. R. Vishnu and Dibyendu Roy	
Order-disorder transition in incompressible polar active fluids with an easy axis (<i>21 pages</i>)	054142
Leiming Chen, Chiu Fan Lee, and John Toner	
Nonlinear Dynamics and Chaos	
Synchronization in three types of 2-simplicial ring networks with identical and nonidentical oscillators (<i>9 pages</i>)	054201
Xuan Wang, Haihong Li, Qionglin Dai, and Junzhong Yang	
Phase-controlled elastic, inelastic, and coalescent collisions of two-dimensional flat-top solitons (<i>10 pages</i>)	054202
M. O. D. Alotaibi, Y. O. A. Abughnheim, L. Al Sakkaf, and U. Al Khawaja	
Superexcitability in chiral oscillators with spatial degrees of freedom (<i>17 pages</i>)	054203
Alessandro Scirè	
Quasicontinuum descriptions of rarefaction and dispersive shock waves in Fermi-Pasta-Ulam lattices with Hertzian potentials (<i>12 pages</i>)	054204
S. Yang	
Symmetry breaking in the nonlinear stage of modulation instability for the Kundu-Eckhaus equation: Nonlinear excitations and interactions with solitons (<i>12 pages</i>)	054205
Bo-Jie Deng, Rui Guo, and Jian-Wen Zhang	
Suppression of expanding vortex rings in systems with negative filament tension by pulsed electric fields (<i>8 pages</i>)	054206
Debei Pan and Hongling Xu	
Topological defects in spiral wave chimera states (<i>7 pages</i>)	054207
Lintao Liu and Nariya Uchida	
Transient evolution and established states of color domains in fiber lasers with a doublet radiation spectrum (<i>6 pages</i>)	054208
Konstantin Komarov, Alexander Dmitriev, Andrey Komarov, Luming Zhao, and François Sanchez	
Coherence properties of collective modes in ensembles of oscillators (<i>8 pages</i>)	054209
Arkady Pikovsky, Franco Bagnoli, and Stefano Iubini	
Full nonlinear evolution of modulation instability in the model of long wave-short wave resonance: spectral recurrence, two types of breathers, and their excitation (<i>15 pages</i>)	054210
Jia-Bin Li, Yunqing Yang, Chong Liu, and Nail Akhmediev	
Second-order density-dependent geometric vector potentials: Modifying chiral soliton and ring-soliton dynamics in Bose-Einstein condensates with nonlocal interactions (<i>12 pages</i>)	054211
Christopher Gaafele, Conrad Bertrand Tabi, and Timoléon Crépin Kofané	
Classical counterparts of shortcuts to adiabaticity in nonlinear dissipative Lagrangian systems (<i>10 pages</i>)	054212
Jincheng Shi, Yicheng Pan, Yue Ban, and Xi Chen	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 113, NUMBER 5	MAY 2026
Chimera states on m -directed hypergraphs (<i>18 pages</i>)		054213
Rommel Tchinda Djeudjo, Timoteo Carletti, Hiroya Nakao, and Riccardo Muolo		
Coexistence of synchronization manifolds in networks of oscillators with rotation symmetry (<i>10 pages</i>)		054214
Pedro A. S. Braga and Luis A. Aguirre		
Effective synchronization amid noise-induced chaos (<i>17 pages</i>)		054215
Benjamin Sorkin and Thomas A. Witten		
Discrete equations and autotraveling kinks of the ϕ^6 model (<i>8 pages</i>)		054216
H. Susanto and N. Karjanto		
Emergence of Turing patterns in complex networks: A partial link activation approach (<i>14 pages</i>)		054217
Wen Wang, Yingchun Zhang, Bin Liu, and Da Wang		
Reconfigurable logic gates and latches in noise-driven bistable systems: A mean first-passage time approach (<i>10 pages</i>)		054218
Zi-yi Chen, Long Jiang, Lu-lu Lu, Qi-ming Pei, and Dong Yu		
Time delay in the one-dimensional swarmalator model (<i>10 pages</i>)		054219
K. P. O’Keeffe, Rommel Tchinda Djeudjo, and Jason Hinde		
Describing a universal critical behavior in a transition from order to chaos (<i>14 pages</i>)		054220
Edson D. Leonel, Mayla A. M. de Almeida, Juan Pedro Tarigo, Arturo C. Marti, and Diego F. M. Oliveira		
Networks and Complex Systems		
Transient dynamics of associative memory models (<i>19 pages</i>)		054301
David G. Clark		
Modularity-dependent storage of dynamic spiking patterns: Bridging micro- and mesoscopic representations (<i>16 pages</i>)		054302
Marianna Angiolelli, Antonio De Candia, Pierpaolo Sorrentino, Simonetta Filippi, Letizia Chiodo, Christian Cherubini, and Silvia Scarpetta		
Polarization in increasingly connected societies (<i>13 pages</i>)		054303
Tuan Minh Pham, Sidney Redner, Lourens Waldorp, Jay Armas, and Han L. J. van der Maas		
Dynamics of discovery and the Heaps-Zipf relationship (<i>9 pages</i>)		054304
Célestin Zimmerlin, Thomas Louail, Manuel Moussallam, and Marc Barthelemy		
Anomaly, class division, and decoupling in income dynamics (<i>8 pages</i>)		054305
Jaeseok Hur, Meesoon Ha, and Hawoong Jeong		
Testing maximum entropy models with e -values (<i>19 pages</i>)		054306
Francesca Giuffrida, Diego Garlaschelli, and Peter Grünwald		
Mean-field theory for Heider balance under heterogeneous social temperatures (<i>10 pages</i>)		054307
Zhen Li and Yuki Izumida		
Cooperative and competitive hyperorder interactions nonlinearly reshape the collective dynamics in complex networks (<i>15 pages</i>)		054308
Yi-peng Hu, Dong Yu, Xue-qin Wang, Tian-yu Li, Xue-ning Li, and Ya Jia

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 113, NUMBER 5

MAY 2026

Multifractality in critical neural field dynamics (7 pages)	054309
Merlin Dumeur, Sheng H. Wang, J. Matias Palva, and Philippe Ciucci	
Role of layer positioning in multilayer traffic networks: A trade-off between path efficiency and load balancing (11 pages)	054310
Jie Chen, Chuning Huangfu, Shengxian Wang, Shaosheng Xu, Maobin Hu, and Fulong Chen	
Optimal transport by a Lagrangian dynamics of population distribution (14 pages)	054311
Babak Benam and Abolfazl Ramezanzpour	
Reentrant spreading in a two-species coalescence-fragmentation model with susceptible-infected-recovered dynamics (25 pages)	054312
Chen Xu, Pak Ming Hui, Chenkai Xia, and Neil F. Johnson	
 Early warning signals for percolation transitions in networks (11 pages)	054313
A. V. Goltsev and S. N. Dorogovtsev	
Spectral fluctuations and crossovers in multilayer network (17 pages)	054314
Himanshu Shekhar, Ashutosh Dheer, Santosh Kumar, and N. Sukumar	
Logistic dynamics of small populations with demographic stochasticity (12 pages)	054315
Lucas M. Brugevin and Damián H. Zanette	
Laplacian spectrum constrains collective performance enhancement (8 pages)	054316
Siyang Jiang, Jin Zhou, Yong Liu, Jun-an Lu, Xingyue Wen, and Guanrong Chen	
 Optimal ambition in business, politics, and life (12 pages)	054317
Ekaterina Landgren, Ryan E. Langendorf, and Matthew G. Burgess	

PART B

Biological Physics

Exact results for stochastic transcription with promoter-proximal pausing and initiation-state-dependent lifetimes (20 pages)	054401
Ling Yin, Zhenquan Zhang, Zihao Wang, Xiyan Yang, Changhong Shi, Yong Wang, Yong-Xin Guo, and Jiajun Zhang	
Bacteria harness torque-induced buckling instability for flagellar wrapping (12 pages)	054402
Takuro Kataoka, Taiju Yoneda, Daisuke Nakane, and Hirofumi Wada	
Adaptation to extreme stress under the growth-survival fitness trade-off (12 pages)	054403
Nandita Chaturvedi, Charuhansini Tvishamayi, and Shashi Thutupalli	
Optimization of sequential therapies to maximize extinction of resistant bacteria through collateral sensitivity (15 pages)	054404
Javier Molina-Hernández, José A. Cuesta, Beatriz Pascual-Escudero, Saúl Ares, and Pablo Catalán	
DNA melting: Intra-base-pair dynamics and a vector generalization of the Peyrard-Bishop-Dauxois model (8 pages)	054405
Nikos Theodorakopoulos	

(Continued)

Inhibitory cell type heterogeneity in a spatially structured mean-field model of V1 (<i>14 pages</i>)	054406
Soon Ho Kim and Hannah Choi	
Nuclear pore complex distribution on the nuclear envelope: Insights into curvature, chromatin, and actin contributions (<i>18 pages</i>)	054407
Hugo Lachuer, Orestis Faklaris, Sylvie Hénon, Fabien Montel, and David Pereira	
Active spin model for cell assemblies on 1D substrates (<i>16 pages</i>)	054408
Harshal Potdar, Ignacio Pagonabarraga, and Sudipto Muhuri	
☞ Modeling spatial synchronization of predator-prey oscillations via the <i>XY</i> model under demographic stochasticity and migration (<i>10 pages</i>)	054409
Solmaz Golmohammadi, Mina Zarei, and Jacopo Grilli	
Bistability in filamentous actin through monomer-sequestration of an effector species (<i>13 pages</i>)	054410
Panayiotis Foteinopoulos and Bela M. Mulder	
☞ Decoding species coexistence: A reinforcement learning perspective (<i>13 pages</i>)	054411
Kaiwen Jiang, Chenyang Zhao, Shengfeng Deng, Weiran Cai, Jiqiang Zhang, and Li Chen	
Multiscale pattern complexity in dry-land vegetation: A simplified modeling approach incorporating root augmentation and stratified soil water dynamics (<i>11 pages</i>)	054412
Sounov Marick and Nandadulal Bairagi	
Landscape description of the dynamics of Turing patterns (<i>12 pages</i>)	054413
Shubham Shinde and Archishman Raju	
☞ Group size shapes interactions in confined minimal active biological collectives (<i>18 pages</i>)	054414
Denis Horvath, Alena Strejčková, Zoltán Tomori, Richard Galajda, and Gregor Bánó	
☞ Effects of cell-cell communication on bacterial chemotaxis (<i>10 pages</i>)	054415
Soutick Saha, Sean Fancher, and Andrew Mugler	
Emergent domain segregation in self-interacting polymers explains chromosome 3D conformations in single human cells (<i>14 pages</i>)	054416
Mattia Conte, Simona Bianco, Sougata Guha, Andrea M. Chiariello, Andrea Esposito, Alex Abraham, Sumanta Kundu, Francesca Vercellone, Andrea Fontana, Florinda Di Pierno, Ciro Di Carluccio, Matteo Olimpo, and Mario Nicodemi	
Assessment of scoring functions for computational models of protein-protein interfaces (<i>22 pages</i>)	054417
Jacob Sumner, Naomi Brandt, Grace Meng, Devon Finlay, Alex T. Grigas, Andrés Córdoba, Mark D. Shattuck, and Corey S. O'Hern	
Fluid Dynamics	
Data-driven modeling of multiscale phenomena with applications to fluid turbulence (<i>8 pages</i>)	055101
Brandon Choi, Matteo Ugliotti, Mateo Reynoso, Daniel R. Gurevich, and Roman O. Grigoriev	
Mesoscale simulation model for odd fluids (<i>19 pages</i>)	055102
Yuxing Jiao and Mingcheng Yang	
Spatial dynamics of flexible nanoswimmers under a rotating magnetic field (<i>17 pages</i>)	055103
Chapnik Zvi and Or Yizhar	

(Continued)

Interaction of walkers with a standing Faraday wave (<i>8 pages</i>)	055104
Loïc Tadrast and Tristan Gilet	
Electrolyte flows under magnetic fields: Manning-like counterion condensation in one dimension (<i>8 pages</i>)	055105
Yoav Tsori and Hannes Uecker	
Capillarity in stationary random granular media: Distribution-aware screening and quantitative supercell sizing (<i>15 pages</i>)	055106
Christian Tantardini and Fernando Alonso-Marroquín	
Droplet shrinkage in phase-field approaches: A comparison of the Allen-Cahn and the Cahn-Hilliard models (<i>10 pages</i>)	055107
Reza Haghani, Carl Fredrik Berg, and Eirik Grude Flekkøy	
Plasma Physics	
High-coherence narrowband terahertz emission from a radially oscillating plasma oscillator (<i>8 pages</i>)	055201
Manoj Kumar, Jaeho Lee, Dohyun Park, Inhyuk Nam, and Min Sup Hur	
Experimental evidence of ambient turbulence preceding the thermal quench of disruptive plasmas (<i>8 pages</i>)	055202
Y. C. Li, Y. Xu, M. Jiang, J. Cheng, G. Z. Hao, X. Q. Wang, Z. B. Shi, Y. Liu, J. Q. Xu, Y. P. Zhang, D. N. Wu, J. Huang, W. Li, H. Zhou, J. R. Shao, and C. Fu	
Experimental evidence of radiative collapse in hybrid X pinches from time-resolved x-ray spectroscopy of Ti plasma (<i>8 pages</i>)	055203
T. A. Shelkovenko, S. A. Pikuz, I. N. Tilikin, A. Elshafiey, and D. A. Hammer	
Plasma discharge undulator: Concept, theory, and numerical study (<i>10 pages</i>)	055204
A. Frazzitta	
Weakly collisional shocks of multicomponent plasmas in hohlraums of indirect-drive inertial confinement fusion (<i>14 pages</i>)	055206
Tianyi Liang, Dong Wu, Lifeng Wang, Lianqiang Shan, Zongqiang Yuan, Hongbo Cai, Yuqiu Gu, Zhengmao Sheng, and Xiantu He	
Escape dynamics in a Hamiltonian map for double-null diverted tokamaks (<i>9 pages</i>)	055207
L. N. A. Amaral, J. D. Szezech, and I. L. Caldas	
Transformation of solar wind energy and helicity spectra in the frame of magnetohydrodynamics shell modeling (<i>11 pages</i>)	055208
I. Dukanov, E. Yushkov, P. Frick, and D. Sokoloff	
High-resolution spectroscopy of laser-produced L-shell molybdenum plasma (<i>7 pages</i>)	055209
Eran Daniel, Gilad Hurvitz, Yuri Ralchenko, Ariel Shaham, Moshe Fraenkel, Yosi Ehrlich, Izhak Levi, Yair Ferber, Galit Strum, Yacov Carmiel, and Ehud Behar	
Measuring the principle Hugoniot of low-density silica aerogel foam at pressures up to 160 GPa (<i>11 pages</i>)	055210
Jordan Lee, Peter Norreys, Robert Paddock, Matthew Oliver, Pawala Ariyathilaka, Christopher Spindloe, Donna Wyatt, Samuel Irving, Ben Fisher, Nigel Woolsey, Stravos Backandreas, Bruno Albertazzi, Michel Koenig, Piotr Rączka, Takayoshi Sano, Alexis Amouretti, Naoki Yamagata, Kai Taketoshi, Kosuke Nishitani, and Norimasa Ozaki	

(Continued)

Laser field reconstruction for the modeling of laser-plasma interaction in cylindrical geometry (25 pages)	055211
F. Massimo, I. Moulanier, A. Guerente, O. Khomyshyn, M. Masckala, T. L. Steyn, U. Schramm, A. Irman, and B. Cros	
Fluid simulation of Jeans instability in nonthermal dusty plasmas (11 pages)	055212
Dipankar Ray, Pralay Kumar Karmakar, Bharati Kakad, and Amar Kakad	
Comprehensive analytical model of the dynamic Z pinch (21 pages)	055213
Alejandro Mesa Dame, Eric S. Lavine, and David A. Hammer	
Wave breaking and electron heating of perpendicularly propagating x-mode waves in magnetized plasmas (14 pages)	055214
Jin-Ze Liu, Heng Zhang, Dong-Ning Gao, and Wen-Shan Duan	
Kinetic decoupling in electron-beam-driven dusty plasma: Microscopic randomization coexisting with collective flow stability (7 pages)	055215
Adrian Scurtu, Dorina Ticoş, Nicoleta Udrea, Maria L. Mitu, Beatrice Paraschiv, and Cătălin M. Ticoş	
Computational Physics, Machine Learning, and Artificial Intelligence	
Physics-informed neural networks for solving derivative-constrained partial differential equations (16 pages) . . .	055301
Kentaro Hoshisashi, Carolyn E. Phelan, and Paolo Barucca	
Dreaming up scale invariance via inverse renormalization group (13 pages)	055302
Adam Rañon, Ulysse Rañon, Tomislav Ivek, and Ivan Balog	
Survival prediction from neural parametrization of diffusive processes (14 pages)	055303
Alessio Cristofaletto, Cesare Rollo, Giovanni Birolo, and Piero Fariselli	
Memory uncertainty relation and harmonic memory in random recurrent networks (13 pages)	055304
Taichi Haruna and Kohei Nakajima	
Comparing frameworks for similarity-aware generalized entropy (sentropy) (16 pages)	055305
Phuc Nguyen, Josiah Couch, Rahul Bansal, Alexandra Morgan, Chris Tam, Miao Li, Rima Arnaout, and Ramy Arnaout	
Uncertainty in AI-driven Monte Carlo simulations (13 pages)	055306
Dimitrios Tzivrailis, Alberto Rosso, and Eiji Kawasaki	
Bayesian reasoning for physics-informed neural networks (19 pages)	055307
Krzysztof M. Graczyk and Kornel Witkowski	
Consistent projection of Langevin dynamics: Preserving thermodynamics and kinetics in coarse-grained models (17 pages)	055308
Vahid Nateghi, Lara Neureither, Selma Moqvist, Carsten Hartmann, Simon Olsson, and Feliks Nüske	
Soft Matter including Polymers, Liquid Crystals, and Granular Materials	
 Anomalous translational dynamics of molecular probes near the polymer glass transition (10 pages)	055401
Jaladhar Mahato, Siyang Wang, and Laura J. Kaufman	
Hydrodynamic interactions in a binary-mixture colloidal monolayer (9 pages)	055402
M. Chamorro-Burgos and Alvaro Domínguez

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 113, NUMBER 5

MAY 2026

Chiral active gyrotor: Memory-induced direction reversal of rotational motion (<i>14 pages</i>)	055403
S. Deion, F. Adersh, and M. Sahoo	
Orientalional ordering and correlations in a quasi-one-dimensional hard-dumbbell fluid (<i>16 pages</i>)	055404
Ana M. Montero, Péter Gurin, Szabolcs Varga, and Andrés Santos	
Autonomous behavior of active particles with visual perception in high-shear flow fields (<i>10 pages</i>)	055405
Yingling Peng and Weirong Zhong	
Geometric framework for curvature-dependent collective behavior of polar active agents on curved surfaces (<i>10 pages</i>)	055406
Tatsuo Shibata	
Superheating and melting phenomena of a vibrated granular layer of cubic particles (<i>13 pages</i>)	055407
Francisco López-González, Gustavo M. Rodríguez-Liñán, Fernando Donado, Felipe Pacheco-Vázquez, and Luis Fernando Elizondo-Aguilera	
Morphology-resolved stress contributions in sheared wet granular materials (<i>12 pages</i>)	055408
Ahmad Awdi, Camille Chateau, Coumba Niang, Patrick Aïmedieu, Jean-Noël Roux, and Abdoulaye Fall	
Field-induced alignment dynamics in suspensions of polarizable rods (<i>12 pages</i>)	055409
I. M. Zerón, A. Iturbe-Jabaloyes, A. Escañuela-Copado, A. Moncho-Jordá, and A. Patti	
Heterogeneous network topology induces the Widom line (<i>7 pages</i>)	055410
Cook Hyun Kim and B. Kahng	
Subphase with four-layer superlattice structure confirmed by resonant soft x-ray scattering in thresholdless antiferroelectric liquid crystal mixtures (<i>14 pages</i>)	055411
Yoichi Takanishi, Neelam Yadav, Vitaly P. Panov, Hiroshi Iwayama, Fumito Araoka, Atsuo Fukuda, and Jagdish K. Vij	
Defect binding-unbinding transition in active nematic membranes (<i>9 pages</i>)	055412
Yuki Hirota and Nariya Uchida	
Fluidization Induced by Magnetic Interactions in Confined Active Matter (<i>7 pages</i>)	055413
Marco Musacchio, Markus Felber, Matteo Paoluzzi, Andrea Gnoli, Andrea Puglisi, and Luca Angelani	
Self-diffusiophoretic propulsion in wedge confinement: The role of phoretic interactions (<i>21 pages</i>)	055414
Abdallah Daddi-Moussa-Ider and Ramin Golestanian	
☞ Origin of geometric cohesion in nonconvex granular materials: Interplay between interdigitation and rotational constraints enhancing frictional stability (<i>13 pages</i>)	055415
Jonathan Barés, Arnaud Regazzi, David Aponte, Sylvain Buonomo, Mathieu Renouf, Nicolas Estrada, and Emilien Azéma	
Spinodal decomposition in filled polymer blends exhibiting upper critical solution temperature behavior (<i>10 pages</i>)	055416
A. I. Chervanyov	
Metastability of lipid vesicle shapes in uniaxial extensional flow (<i>14 pages</i>)	055417
M. A. Shishkin and E. S. Pikina	
☞ Thermalized buckling of extensible, semiflexible polymers (<i>18 pages</i>)	055418
Richard Huang, David R. Nelson, and Suraj Shankar

CONTENTS - *Continued*

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 113, NUMBER 5** **MAY 2026**

Effect of liquid structure on kinetic stability and glassy motifs (<i>16 pages</i>) Kengo Nishio	055419
Disentangling the effects of many-body forces on depletion interactions (<i>16 pages</i>) Gabriel Pérez-Ángel, Marco A. Ramírez-Guizar, Néstor M. De Los Santos-López, José M. Méndez-Alcaraz, and Ramón Castañeda-Priego	055420
Magnetically assisted trapping of passive colloids by active dipolar chain (<i>8 pages</i>) A. Compagnie, N. Vandewalle, and E. Opsomer	055421
Undulatory forcing of an intruder through granular media: effects of frequency and packing fraction (<i>13 pages</i>) Douglas D. Carvalho and Erick M. Franklin	055422
Collective dynamics of macroscopic photoactive matter under alternating excitation patterns (<i>10 pages</i>) Sára Lévy, Axel Katona, Raúl Cruz Hidalgo, and Iker Zuriguel	055423
Mechanics, Interfaces, and Films	
Dimensional crossover in surface growth on rectangular substrates (<i>9 pages</i>) Ismael S. S. Carrasco and Tiago J. Oliveira	055501
Fluidity and morphological stability of an amorphous thin film with radiation-induced defect kinetics (<i>15 pages</i>) Tyler P. Evans and Eden Heyen	055502
On-axis and off-axis levitation by a rotating permanent magnet (<i>11 pages</i>) Hugo Schreckenberg, Zayneb El Omari El Alaoui, and Guilhem Gallot	055503
Active alignment-driven coarsening in confined near-critical fluids (<i>9 pages</i>) Parameshwaran A. and Bhaskar Sen Gupta	055504

ERRATA

Erratum: Low-dimensional model for adaptive networks of spiking neurons [Phys. Rev. E 111 , 014422 (2025)] (<i>1 page</i>) Bastian Pietras, Pau Clusella, and Ernest Montbrío	059901(E)
