THIRD SERIES, VOLUME 114, NUMBER 4
PARTS A AND B

CONTENTS

OCTOBER 2026

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 041001–044221, and Part B pages 044301–049901(E).

PART A

Perspectives

Three-dimensional microprinting anisotropic and deformable active matter *(11 pages)* 041001
Mengshi Wei and Daniela J. Kraft

Measuring physical entropy out of equilibrium *(6 pages)* 041002
Haim Diamant and Gil Ariel

Fluid-structure interactions driven by thermal convection *(6 pages)* 041003
Jinzi Mac Huang, Jin-Qiang Zhong, and Jun Zhang

Perspective on physical systems with a purpose: Using tunable degrees of freedom to enable function *(7 pages)* 041004
M. Lisa Manning

Microfluidic oscillatory rheology of transported soft particles *(8 pages)* 041005
Matteo Milani, Joshua D. McGraw, Anke Lindner, and Stefano Aime

Tipping points of the ocean oxygen: A dynamical systems perspective *(14 pages)* 041006
Amer Alsulami and Sergei Petrovskii

LETTERS

Statistical Physics

Thermodynamic signatures of spectral compression in weakly non-Hermitian Dirac fermions *(7 pages)* L042101
Juan Pablo Esparza, Francisco J. Peña, Patricio Vargas, and Vladimir Juričić

Collective dynamics of trail-interacting particles *(6 pages)* L042102
Paul Pineau, Samuel Bell, Raphaël Voituriez, and Ram M. Adar

Exact criteria for ground-state overlap dominance and dynamical quantum phase transitions *(6 pages)* L042103
Taisanul Haque

Localization of active particles on random arrays of parallel filaments *(7 pages)* L042104
Owen Santoso and Elena F. Koslover

(Continued)

2470-0045(202610)114:4:A;1-#

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Analytical solution for mean-field theories for homo- and heterogeneous populations of parabolic bursting systems *(7 pages)* L042105
Maria V. Ageeva and Denis S. Goldobin

Optimal active engines obey the thermodynamic Lorentz force law *(8 pages)* L042106
Adrianne Zhong, Adam G. Frim, and Michael R. DeWeese

Mean-field convective phase separation under thermal gradients *(6 pages)* L042107
Meander Van den Brande, François Huveneers, and Kyosuke Adachi

Exact generalized Langevin dynamics of pair coordinates in elastic networks *(6 pages)* L042108
Shunsuke Ando, Tomoya Urashita, Soya Shinkai, and Tomoshige Miyaguchi

Geometric formulation of state-dependent Langevin dynamics using scalar free energy *(6 pages)* L042109
Kento Yasuda, Zhongqiang Xiong, Zhanglin Hou, Kenta Ishimoto, Xinpeng Xu, and Shigeyuki Komura

Finite-size corrections to the crosscap overlap in the two-dimensional Ising model *(7 pages)* L042110
Yiteng Zhang, Li-Ping Yang, Hong-Hao Tu, and Yueshui Zhang

Boundary-driven anisotropic coarsening in conserved phase separation *(6 pages)* L042111
Emilio N. M. Cirillo, Nicklas Jävergård, Adrian Muntean, and Stela Andrea Muntean

Nonlinear Dynamics and Chaos

Cubic discriminant as an organizing principle for Duffing dynamics *(7 pages)* L042201
Patrycja Jaros and Przemyslaw Perlikowski

Networks and Complex Systems

Directed extended-range percolation *(6 pages)* L042301
Wenbo Liu, Yiwen Zeng, Xueming Liu, and Ginestra Bianconi

Soft Matter including Polymers, Liquid Crystals, and Granular Materials

Extensible links in a broad class of single polymer chain models *(5 pages)* L043401
Michael R. Buche, Matthew J. Grasinger, and Jason P. Mulderrig

Geometry-induced shifts in dielectric-loss peaks of amorphous ices *(5 pages)* L043402
Kaito Sasaki and Yoshiharu Suzuki

Mechanics, Interfaces, and Films

Falling chains *(6 pages)* L043501
Jean-Christophe Géminard and Nicolas Taberlet

ARTICLES

Statistical Physics

Interfacial thermal transport in extended atomic heterojunctions: Ballistic thermal conductance and correlated disorder *(12 pages)* 044101
I. F. Herrera-González

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Graphon spin systems as exactly solvable models *(11 pages)* 044102
Artem Alexandrov and Georgi S. Medvedev

Role of system-bath interaction in non-Markovian quantum Brownian Otto cycles *(15 pages)* 044103
Haena Shim and Joonhyun Yeo

Network analysis for steady-state current fluctuations under finite affinity: Application to Brownian computation *(12 pages)* 044104
Yasuhiro Utsumi

Diffusion with stochastic resetting in the presence of a delta killing trap: Drift-controlled survival regimes *(16 pages)* 044105
A. Mazzolo

Flowing to normality and the fate of the single ring theorem *(21 pages)* 044106
Joshua Feinberg, Roman Riser, Richard Scalettar, and A. Zee

Lee-Yang property of the Blume-Capel model *(7 pages)* 044107
Yuri Kozitsky and Yurij Holovatch

Excitation spectrum and mean energy of thermal fluctuations of a simple fluid in the Maxwell generalized hydrodynamics model *(8 pages)* 044108
E. V. Usov

Clustering in atom probe tomography data: Coordination number metric, percolation-based parameter scaling, and size effects *(16 pages)* 044109
Mykola Lazarev and John Banhart

Scrambling without chaos in random free-fermionic systems *(9 pages)* 044110
Ali Mollabashi and Mohammad-Javad Vasli

Glass and jamming transitions in a random organization model *(13 pages)* 044111
Leonardo Galliano and Ludovic Berthier

Confined kinetics and heterogeneous diffusion driven by fractional Gaussian noise: A path-integral approach *(8 pages)* 044112
D. S. Quevedo, F. S. Abril-Bermudez, and C. Morais Smith

Analytical phase kurtosis of the constant gradient spin echo *(17 pages)* 044113
Teddy X. Cai, Nathan H. Williamson, and Peter J. Basser

Interaction-range effects on criticality and supercritical thermodynamics in a hard-sphere fluid with Wolf attraction *(13 pages)* 044114
José Torres-Arenas and José Pablo Cuevas Cázares

Mesoscopic theory of flocking with alignment and antialignment copying *(9 pages)* 044115
Chunming Zheng

Phase transitions in a *p*-spin glass model: A numerical study *(19 pages)* 044116
Prerak Gupta, Auditya Sharma, Bharadwaj Vedula, J. Yeo, and M. A. Moore

Complexity drives the symmetry breaking of temperature fluctuations *(8 pages)* 044117
D. Rosales Herrera, M. Y. Gallegos Ruiz, A. Fernández Téllez, J. R. Alvarado García, and J. E. Ramírez

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Continuous-time random walk with immobilization mechanism: Approach of non-normalized jump-length distribution *(16 pages)* 044118
Yuxue Huang and Xudong Wang

Dynamical equivalence for the caging-release colloidal problem *(11 pages)* 044119
Ivany del Carmen Romero-Sánchez, Leonardo Dagdug, and Erick Sarmiento-Gómez

First-passage times for variable-order time-fractional diffusion *(8 pages)* 044120
Wancheng Li and Daniel S. Han

Thermoelectric information engine driven by an autonomous Maxwell demon across quantum-to-classical transitions *(16 pages)* 044121
M. Bernal-Santibañez, José Mondaca, and Felipe Barra

Non-Markovian entropy production fluctuation theorem driven by a time-dependent electric field *(13 pages)* 044122
K. S. Rodríguez-Vigil, M. A. Bastarrachea-Magnani, and J. I. Jiménez-Aquino

Percolation in the three-dimensional Ising model *(10 pages)* 044123
Jinhong Zhu, Tao Chen, Zhiyi Li, Sheng Fang, and Youjin Deng

Full eigenstate thermalization in integrable spin systems *(12 pages)* 044124
Tanay Pathak

Variational formulation of stochastic thermodynamics: Spatially extended systems *(26 pages)* 044125
Héctor Vaquero del Pino, François Gay-Balmaz, Hiroaki Yoshimura, and Lock Yue Chew

Two-dimensional anomalous diffusion of coupled active-passive particles in viscoelastic media *(21 pages)* 044126
Pankaj Jangid and Srabanti Chaudhury

Reentrance and temperature chaos in the p-spin Ising spin glass *(40 pages)* 044127
Hidetoshi Nishimori

Critical temperature of the one-dimensional Ising model with inverse-square interactions *(16 pages)* 044128
Owen Tower, Abdulai Gassama, Jonah Eick, Han Zhang, Lijie Ding, Jan Tobochnik, Robert A. Pelcovits, J. Michael Kosterlitz, and Xinsheng Sean Ling

Information-energy tradeoffs in an escape-rate population model *(6 pages)* 044129
Nalin Dhiman and Siddharth Panwar

Chladni states in Ising spin lattices *(8 pages)* 044130
Giulio Iannelli and Pablo Villegas

Purification of a monitored qubit: Exact path-integral solution *(9 pages)* 044131
Matheus M. R. Poltronieri Martins and Henrique Santos Lima

Mean maximum of fractional Brownian motion *(6 pages)* 044132
Safari Mukeru and Mmboniseni P. Mulaudzi

Quantifying translational and bond-orientational order metrics in hyperuniform and nonhyperuniform many-particle systems *(15 pages)* 044133
Anirban Mukherjee and Salvatore Torquato

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Collective enhancement of low-order eigenmicrostates underlying heat-current reversal in periodically driven Frenkel-Kontorova lattices *(10 pages)* 044134
Yingying Zhang, Kezhao Xiong, Zhuohan Wang, Tengteng He, Wei Liu, and Li Ma

Empirical study of bidirectional pedestrian flow in angled corridors: Effects of flow ratio and geometry *(17 pages)* 044135
Weiying Chen, Rui Wang, Junheng Yang, Xiaodong Zang, and Qiang Luo

Maximization of nuclear fusion reactivity via optimal energy distributions *(13 pages)* 044136
Roberto Onofrio, Kamel Ourabah, and Carlo Presilla

Experimental investigation of Lévy flights for step-length distributions with a length-dependent local power exponent *(11 pages)* 044137
Isaac C. Nunes, Jesús P. López, and Thierry Passerat de Silans

Persistence properties of a phase-ordering system with competing dynamics *(12 pages)* 044138
Shubham Thwal and Suman Majumder

Nonlinear Brownian motions in gases: Kinetic equations and relaxation processes *(12 pages)* 044139
Leonardo Ferrari

High resolution study of the two-dimensional axial next-nearest-neighbor Ising model using a two-replica cluster algorithm and population annealing *(12 pages)* 044140
Shane Keiser and Jonathan Machta

Pointwise mutual information bounded by stochastic Fisher information *(13 pages)* 044141
Pedro B. Melo

Critical and tricritical transitions in diffusion with stochastic resetting on a ring *(16 pages)* 044142
Pedro Julián-Salgado, Pavel Castro-Villarreal, Leonardo Dagdug, and Denis Boyer

Nonlinear Dynamics and Chaos

Weakly nonlinear dynamics of follower-force-induced oscillations in Cosserat rods *(14 pages)* 044201
Mohamed Warda

Phyllotactic order from radial growth of spatial symmetry-breaking instabilities in supercritical conditions *(13 pages)* 044202
Marcello A. Budroni, Giulio Facchini, Fabian Brau, and Anne De Wit

Competition between nonlinearity and inhomogeneities in discrete-time quantum walks *(8 pages)* 044203
N. Amaral, A. R. C. Buarque, and W. S. Dias

Mechanisms for extreme events in position-dependent mass systems *(16 pages)* 044204
M. Wasif Ahamed, V. Chithiika Ruby, M. Sathish Aravindh, A. Venkatesan, and M. Lakshmanan

Critical-like growth in noncritical transitions: Linearized dynamics and epidemic applications *(19 pages)* 044205
Joshua Looker, Kat S. Rock, and Louise Dyson

Mixed eigenstates in spin-boson systems with one-photon and two-photon interactions *(19 pages)* 044206
David Villaseñor and Marko Robnik

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Geometric and dynamical signatures of chaos in an effective beyond-Newtonian circular restricted three-body problem with rotating compact primaries *(27 pages)* 044207
Yeasin Ali, Suparna Roychowdhury, Betti Hartmann, and Roopkatha Banerjee

Dynamic joint-moment closure for age-structured adaptive escape-rate neuron populations *(7 pages)* 044208
Nalin Dhiman and Siddharth Panwar

Nonlinear wave propagation in one-dimensional polycatenated ring chains *(10 pages)* 044209
Xiaoxiao Xiong, Reo Yanagi, Tingtao Zhou, and Chiara Daraio

Time-domain transient growth in non-Hermitian cascaded *LC* circuits *(5 pages)* 044210
Liangliang Ye, Mingyong Ye, Xiang Chen, Gongwei Lin, and Xiumin Lin

Asymmetric cyclic interactions lead to stable mean-field equilibria while demographic noise induces sustained oscillations *(18 pages)* 044211
A. L. L. Middleton, J. H. P. Dawes, A. A. Jarai, and K. M. Briggs

Mixed-mode oscillations in a three-timescale model via folded-saddle canards and delayed Hopf bifurcations *(14 pages)* 044212
Xinyi Lin, Jian Song, Na Zhao, and Shenquan Liu

Stochastic predator-prey oscillations with deterministic prey response *(8 pages)* 044213
Lucas M. Brugevin and Damián H. Zanette

Disorder-to-order transitions and hysteresis in directed ring networks of nonisochronous complex Ginzburg-Landau oscillators *(12 pages)* 044214
Kumar Sourav, Naveen Kumar Mendola, Jung-Wan Ryu, Awadhesh Prasad, and Thounaojam Umeshkanta Singh

Predictability of solitary decoherence events in a symmetrically equidistant chain of coupled Kuramoto oscillators *(21 pages)* 044215
M. Elaeva, E. Blanter, M. Shnirman, and A. Shapoval

Cluster-based feedback control of a noisy limit-cycle oscillator *(12 pages)* 044216
Hiromi Kimishima, Bo Yin, Vikrant Gupta, and Larry K. B. Li

Kinetics and stability of transition waves in viscoelastic bistable lattices *(16 pages)* 044217
P. Q. Li, C. Wu, K. F. Wang, and B. L. Wang

Control of phase transition patterning in the wake of $A + B \rightarrow C$ reaction fronts *(12 pages)* 044218
N. Maton, G. Facchini, and A. De Wit

Emergence and coexistence of periodic and unstructured motion in future-avoiding random walks *(7 pages)* 044219
A. Schmaus, K. Stiller, and N. Molkenthin

Using echo-state networks to reproduce rare events in chaotic systems *(15 pages)* 044220
Anton Erofeev, Balasubramanya T. Nadiga, and Ilya Timofeyev

Delay-controlled heterogeneous nucleation in adaptive dynamical networks *(12 pages)* 044221
R. Anand, Jan Fialkowski, V. K. Chandrasekar, and R. Suresh

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).
The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

PART B

Networks and Complex Systems

Scaling laws for the spread of defection in evolutionary games on networks *(16 pages)* 044301
M. Giles and P. K. Newton

Coevolution of strategies and interactions in donation games on a square lattice *(6 pages)* 044302
Balázs Király and György Szabó

Higher-order orientational effects on geometric percolation in two-dimensional stick networks *(10 pages)* 044303
Davide Grazioli, Angelo Simone, Aidan Durant, Avik P. Chatterjee, and Claudio Grimaldi

Susceptible-infectious-susceptible epidemics on temporal contact graphs with clique structure *(24 pages)* 044304
Robin Persoons and Piet Van Mieghem

Graphicality of power-law and double-power-law degree sequences *(14 pages)* 044305
Pietro Valigi, M. Ángeles Serrano, Claudio Castellano, and Lorenzo Cirigliano

Encounter times of random walkers with simultaneous resetting on networks *(18 pages)* 044306
Cristian D. Suarez-Jimenez, Alejandro P. Riascos, and Denis Boyer

Random walks across dimensions: Exploring simplicial complexes *(8 pages)* 044307
Diego Febbe, Duccio Fanelli, and Timoteo Carletti

Planned behavior, perceptual biases, and the dynamics of collective action *(18 pages)* 044308
Rishi Dadlani, John S. McAlister, Alice C. Schwarze, Mari Kawakatsu, Sarah Iams, Tahra L. Eissa, and Nina H. Fefferman

Reviving networked multidimensional dynamical systems *(10 pages)* 044309
Nan Dong, An Zeng, and Honggang Li

Timescale-induced synchronization of contrarians in adaptive dynamical networks *(10 pages)* 044310
Akash Yadav, V. K. Chandrasekar, and D. V. Senthilkumar

Equivalence between nonlinear graph-based dynamics and linear dynamics on higher-order networks *(6 pages)* 044311
Lucas Lacasa

Local network evolution rules driving shortest path multiplicity *(11 pages)* 044312
Alexei Vazquez

Modularity, asymmetry, and polarization shape consensus speed in the voter model *(15 pages)* 044313
Madi Yerlanov, Zachary P. Kilpatrick, and Nancy Rodriguez

Heuristic and exact modularity optimization with size-constrained communities *(11 pages)* 044314
Filipi N. Silva, Samin Aref, Vincent Traag, and Santo Fortunato

Resilience of hypernetworks under the impact of tolerance thresholds *(16 pages)* 044315
Ruijin Du, Yibo Ding, Yiwei Ren, Duxin Chen, Fan Wang, Renaud Lambiotte, and Gaogao Dong

Gate control improves routing efficiency for periodic traffic *(9 pages)* 044316
Hyunwook Song, Hoyun Choi, and B. Kahng

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Convergence criteria for self-consistent measures in bipartite networks *(11 pages)* 044317
János Török, Takashi Shimada, Fumiko Ogushi, Kata Tunyogi, János Kertész, and Kimmo Kaski

Analytical ansatz for the first wave of COVID-19 *(7 pages)* 044318
Michal Strelniker, Yakov M. Strelniker, and Shlomo Havlin

Learning and encoding temporally structured sensory inputs via superburst dynamics *(14 pages)* 044319
Inhoi Jeong, Kyoung J. Lee, and Jongmu Kim

Comparing different physics fields using statistical linguistics *(14 pages)* 044320
María Fernanda Sánchez-Puig, Carlos Gershenson, and Carlos Pineda

Minimal network of brain dynamics: Hierarchy of approximations to quasicritical neural network dynamics *(25 pages)* 044321
Jeremy B. Goetz, Naruepon Weerawongphrom, Rashid V. Williams-García, John M. Beggs, and Gerardo Ortiz

Absorbing phase transition in a queueing model of coupled adaptive agents *(16 pages)* 044322
Alexei Vazquez

Noise-controlled phase transitions and memory-state switching in connectome-informed modular spiking networks *(16 pages)* 044323
Siyu Huo

Sandpile models on complex networks *(28 pages)* 044324
Komlan Fiagbe, Jean-François de Kemmeter, and Timoteo Carletti

Complex dynamics in the Sherrington-Kirkpatrick game *(19 pages)* 044325
Desmond Chan and Tobias Galla

Minimal representations of topology-preserving quantumlike states *(13 pages)* 044326
William Horvat, Debadrita Saha, Nicolás Gigena, Prineha Narang, and Gregory D. Scholes

Constrained surrogates for arbitrary families of continuous probability distributions *(15 pages)* 044327
Jack Murdoch Moore and Eduardo G. Altmann

Phase lags induce chaos in oscillator communities with higher-order interactions *(11 pages)* 044328
Sabina Adhikari, Juan G. Restrepo, and Per Sebastian Skardal

Biological Physics

Restoring information in aged gene regulatory networks by single knock-ins *(8 pages)* 044401
Ryan LeFebre, Tyler Schutt, Fabrisia Ambrosio, and Andrew Mugler

Visualization of the chromatin structure in intact nuclei of cancer cells using small-angle x-ray scattering *(9 pages)* 044402
E. G. Iashina, S. V. Grigoriev, E. Y. Varfolomeeva, R. A. Pantina, N. D. Fedorova, R. A. Kovalev, A. A. Piryazev, and D. A. Ivanov

Spontaneous formation of spiral wave reentry in inhomogeneous excitable media: Insights into arrhythmogenesis in long QT syndrome *(10 pages)* 044403
Binxuan He, Xuemei Liu, Zhilin Qu, and Xiaodong Huang

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Temporal spectroscopy of plant development reveals subcircadian response bands *(7 pages)* 044404
Giovanni Santoro, Enrico Rolli, Ada Ricci, and Ludovico Cademartiri

Multistage volume exclusion models for cell proliferation *(27 pages)* 044405
John Carlo Dimaculangan, Cameron A. Smith, and Christian A. Yates

Traveling chimeras and collective coordination in β-cell networks *(12 pages)* 044406
Carine Simo, Venceslas Nguefoue Meli, Patrick Louodop, Samuel Bowong, and Thierry Njougouo

Low-frequency oscillations as internal state integrators of a biosystem model with voltage-gated ion channels *(9 pages)* 044407
Sergio Portillo, Javier Cervera, Patricio Ramirez, and Salvador Mafe

Evolutionary hysteresis: Cycling about in a rugged landscape *(13 pages)* 044408
Luke Piszkin and Dervis Can Vural

Fluid Dynamics

Numerical investigation of confined active collective motion in a viscoelastic fluid *(15 pages)* 045101
Yateng Qiao, Dongxiao Zhao, Zijie Qu, and Gaojin Li

Common explanation for coherent patterns in transitional and turbulent wall-bounded flows *(18 pages)* 045102
Yuxin Jiao

Eddy-viscosity-improved resolvent analysis of compressible turbulent channel flow *(23 pages)* 045103
Deli Li, Guangrui Sun, Qiang Yang, Xu Zhang, and Jianqiang Chen

Enhanced turbulent clustering of time-varying particles in random flow fields *(9 pages)* 045104
Boaz Ofarim and Yuval Dagan

Periodic modulation of the space-filling nature of the turbulent flame leads to periodic spiky heat release oscillations *(20 pages)* 045105
Sivakumar Sudarsanan, Manikandan Raghunathan, Shwetha Viswesh, and R. I. Sujith

Space-time correlations of passive scalars in colored-noise flows *(9 pages)* 045106
Long Wang and Guowei He

Symmetries and equivalence transformations in linear stability theory and their implications for the dispersion relation *(19 pages)* 045107
Kilian Vinzenz Wilhelm, Johannes Conrad, Martin Oberlack, and Yongqi Wang

Plasma Physics

Improved nonlocal electron heat transport model for magnetized plasmas *(14 pages)* 045201
Z. H. Chen, Z. Q. Zhao, X. H. Yang, L. R. Li, B. Zeng, Z. Li, B. H. Xu, G. B. Zhang, H. H. Ma, M. Tang, Y. Y. Ma, H. Xu, F. Q. Shao, and J. Zhang

Statistical analysis of speckle fields *(13 pages)* 045202
Ian D. Min-Roberts, Wojciech Rozmus, and Pierre A. Michel

Spatial evolution characteristics and mechanism analysis of induced magnetic fields in an applied field magnetoplasmadynamic discharge device *(20 pages)* 045203
Lehui Cao, Haibin Tang, Junxue Ren, Zhiyuan Chen, Guangchuan Zhang, Yibai Wang, Yuzhe Sun, and Jinbin Cao

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Control of filament distribution and enhancement of plasma properties in a dielectric barrier discharge using a metal lattice sheet *(9 pages)* 045204
Lifang Dong, Cheng Li, Xiaoxiu Qi, Yunan He, Yaohua Li, and Yuyang Pan

Experimental realization of a dusty plasma rocking ratchet with current reversal *(8 pages)* 045205
Shun-xin Zhang, Shuo Wang, Ting-yu Yao, Yong-liang Zhang, Bao-quan Ai, and Ya-feng He

Path-integrated electrostatic energization in laser-driven collisionless cylindrical convergence *(12 pages)* 045206
D. Pan, M. Murakami, S. Fujioka, and H. Nagatomo

Experimental study of the impact of ion wakes on the charges and dynamics of dust particles in a binary complex plasma *(7 pages)* 045207
Roman A. Syrovatka, Vadim N. Naumkin, Andrey M. Lipaev, Alexandr D. Usachev, Mikhail M. Vasiliev, Oleg F. Petrov, and Andrey V. Zobnin

Ionization-induced chirping and compression of a high-power microwave pulse. I. Experiments with a subnanosecond, 600-MW, 9.6-GHz microwave pulse propagating in a gas-filled waveguide *(7 pages)* 045208
A. Haim, V. Maksimov, J. G. Leopold, Y. P. Bliokh, and Ya. E. Krasik

Ionization-induced chirping and compression of a high-power microwave pulse. II. Theoretical analysis and numerical simulations *(9 pages)* 045209
Adi Haim, Vlad Maksimov, John G. Leopold, Yuriy P. Bliokh, and Yakov E. Krasik

Plasma density manipulation in staged discharge capillaries for plasma-based accelerators *(10 pages)* 045210
Angelo Biagioni, Lucio Crincoli, Romain Demitra, Mario Galletti, Valerio Lollo, Donato Pellegrini, Riccardo Pompili, Massimo Ferrario, and Arie Zigler

Experimental observation of drift acoustic cnoidal waves in a magnetized plasma *(12 pages)* 045211
Tanmay Karmakar, Rosh Roy, Lavkesh Lachhvani, Raju Daniel, Bhoomi Khodiyar, Prabal K. Chattopadhyay, Abhijit Sen, and Sayak Bose

Generalized multidimensional conservation laws for stimulated Raman and Brillouin scattering in a density gradient *(12 pages)* 045212
Vijay Patel, Sarah Chase, Frank S. Tsung, John P. Palastro, Denise E. Hinkel, and Warren B. Mori

Generalized Schamel nonlinear Schrödinger dynamics of ion-acoustic wave packets in electronegative plasmas with trapped negative ions *(10 pages)* 045213
Chérif Souleman Panguetna, Conrad Bertrand Tabi, Stéphanie Ganyou, and Timoléon Crépin Kofané

Computational Physics, Machine Learning, and Artificial Intelligence

Towards critical branching mechanism in recurrent neural networks *(15 pages)* 045301
Feixiang Ren and Ling Feng

Dimensional formulation for the pseudopotential lattice Boltzmann method *(15 pages)* 045302
Luiz Eduardo Czelusniak, Ivan Talão Martins, and Luben Cabezas Gómez

History state formalism for time series with application to finance *(16 pages)* 045303
F. Lomoc, N. Canosa, A. P. Boette, and R. Rossignoli

Numerical approximation of the Koopman-von Neumann equation: Operator learning and quantum computing *(18 pages)* 045304
Stefan Klus, Feliks Nüske, and Patrick Gelß

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 114, NUMBER 4 OCTOBER 2026

Beyond gradient descent: Adam for analog Ising machines *(17 pages)* 045305
Stijn Van Vooren, Guy Van der Sande, and Guy Verschaffelt

Expressivity of quantum graph neural networks with variable-dimension edge qudits *(14 pages)* 045306
Piero Araujo R.

Soft Matter including Polymers, Liquid Crystals, and Granular Materials

Hyperelastic theory for nonlinear hydrogel diffusiophoresis *(20 pages)* 045401
Chinmay Katke and C. Nadir Kaplan

Nonmonotonic response of polyelectrolyte brushes to monomer effective charge and trivalent cation size *(13 pages)* 045402
Ming-Lu Chao, Qing-Hai Hao, Hong-Yan Zhang, and Hong-Ge Tan

Noise-induced bistability of information-driven active agents in turbulence *(9 pages)* 045403
Chenfeng Ma and Yan Cui

Stochastic model of elongation-shortening-switching kinetics of a polymeric filament: Critical slowing down of first-passage and finite-size regularization *(5 pages)* 045404
Manvendra Singh, Ashok Garai, and Debashish Chowdhury

Dynamic magnetic response of magnetic multicore particles: Competing anisotropies *(15 pages)* 045405
Vladimir Zverev, Ekaterina Novak, Andrey A. Kuznetsov, and Sofia Kantorovich

Dynamical mean-field theory of active, self-interacting heteropolymers *(16 pages)* 045406
Andriy Goychuk

Flexoelectricity-driven softening of bend elasticity leads to spontaneous chiral symmetry breaking in a polar fluid *(10 pages)* 045407
Aitor Erkoreka, Josu Martinez-Perdiguero, Luka Cmok, Ema Hanžel, Jordan Hobbs, Calum J. Gibb, Richard J. Mandle, Nerea Sebastián, and Alenka Mertelj

Connectivity, rigidity, and gelation in linker-mediated colloidal networks *(10 pages)* 045408
Taejin Kwon, Murari Singh, Javier Alejandro Sanchez-Gallegos, Román Perdomo-Pérez, Ramón Castañeda-Priego, and Thomas M. Truskett

It takes two to tribo: Stochastic charge evolution in repeated binary collisions of acoustically levitated particles *(12 pages)* 045409
Tom F. O'Hara, Adrian C. Barnes, James W. E. Drewitt, Nathan Croll Dawes, and Karen L. Aplin

Polymer diffusion in nonstatic media with inverse α-stable subordinator *(16 pages)* 045410
Xiao Zhang and Weihua Deng

From localized discharge to distributed granular filtration on an inclined mesh *(8 pages)* 045411
Javier Pillado, Valérie Vidal, Nicolás Taberlet, and Germán Varas

Density-selected topological pathways in the melting of single-particle-thick stripes *(14 pages)* 045412
José Rafael Bordin

Impedance of an electric double layer capacitor with a multi-component electrolyte *(8 pages)* 045413
David Fertig

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 114, NUMBER 4** **OCTOBER 2026**

Link length and energy fluctuations in extensible freely jointed chains *(8 pages)* 045414
Michael R. Buche

Hidden square order through orientational-domain reorganization during nonequilibrium expansion of colloidal systems *(14 pages)* 045415
S. W. S. Apolinario

Local noise shielding guides the separation of binary chiral mixtures *(12 pages)* 045416
Qi Zhou, Yuan-Rui Wang, Peng Wang, Jie Huo, and Xu-Ming Wang

Topological defects in buckled colloidal monolayers *(10 pages)* 045417
Aaron L. Galper, Henrik N. Barck, Conor M. Floyd, Elliot A. Snyder, Charlie J. Schofield, Sorin A. P. Jayaweera, Ian G. McGuire, and Sharon J. Gerbode

Heterogeneous ice nucleation with TIP4P/Ice: The role of lattice mismatch *(11 pages)* 045418
M. Camarillo, J. Oller-Iscar, M. M. Conde, J. Ramírez, S. Blazquez, and E. Sanz

Mechanics, Interfaces, and Films

Softness dependence of excess interfacial stress at soft-sphere solid-liquid interfaces *(16 pages)* 045501
Ya-Shen Wang and Yang Yang

Derjaguin-corrected Kelvin equation for finite open slits *(15 pages)* 045502
Alexandr Malijevský

Getting rid of the ghosts: a toy-model of membrane melting *(6 pages)* 045503
O. Coquand

Size effects in fluctuation-based damage mechanics in the semigrand canonical ensemble *(9 pages)* 045504
Ariel Attias, Zdeněk P. Bažant, and Franz-Josef Ulm

Unambiguous characterization of in-plane dielectric response in nanoconfined liquids: Water as a case study *(10 pages)* 045505
Jon Zubeltzu

Unique nonconcentric semicircular arrays of nanoparticles via controlled gravitational force *(12 pages)* 045506
Sanjoy Khawas, Suman Bhattacharjee, and Sunita Srivastava

COMMENTS

Comment on "Instabilities of rotating inclined buoyancy layers" *(5 pages)* 047101
Cheng-Nian Xiao, Inanc Senocak, Alan Shapiro, and Ivana Stiperski

Reply to "Comment on 'Instabilities of rotating inclined buoyancy layers' " *(3 pages)* 047102
Y. Xiao and J. J. Tao

ERRATA

Erratum: Statistical mechanics of indistinguishable energy states and the glass transition [Phys. Rev. E **114**, 014119 (2026)] *(1 page)* . . . . . 049901(E)
Shimul Akhanjee
