PHYSICAL REVIEW E **THIRD SERIES, VOLUME 53, NUMBER 6** **JUNE 1996**

ARTICLES

General methods of statistical physics

$1/f$ noise in percolation and percolationlike systems 5596
A. A. Snarskii, A. E. Morozovsky, A. Kolek, and A. Kusy
Geometry of simulated fractures 5606
V. V. Mourzenko, J.-F. Thovert, and P. M. Adler
Homoclinic dynamics in experimental Shil'nikov attractors 5627
R. Herrero, R. Pons, J. Farjas, F. Pi, and G. Orriols
Quantitative analysis of a fracture surface by atomic force microscopy 5637
Pascal Daguier, Stéphane Henaux, Elisabeth Bouchaud, and François Creuzet
Effects of surface diffusion on the Eden model 5643
C. S. Ryu and In-mook Kim
Diffusion and trapping on a one-dimensional lattice 5647
Achille Giacometti and K. P. N. Murthy
Synchronization of symmetric chaotic systems 5656
J. M. González-Miranda
Rigid-body motion, interacting billiards, and billiards on curved manifolds 5670
Rupak Chatterjee, A. D. Jackson, and N. L. Balazs
External fluctuations in a pattern-forming instability 5680
J. García-Ojalvo and J. M. Sancho
Magnetotransport of the Sinai billiard 5690
M. Fließer, G. J. O. Schmidt, and H. Spohn
Equation of state of the hard-sphere crystal 5698
C. Rascón, L. Mederos, and G. Navascués
Rotated sandpiles: The role of grain reorganization and inertia 5704
G. C. Barker and Anita Mehta
Virial expansions for quantum plasmas: Fermi-Bose statistics 5714
Angel Alastuey and Asher Perez
Correlations within eigenvectors and transition amplitudes in the two-body random interaction model 5729
V. V. Flambaum, G. F. Gribakin, and F. M. Izrailev
m-vector spin glass in the presence of a Gaussian random field 5742
E. Nogueira, Jr., F. D. Nobre, S. Coutinho, and J. R. L. de Almeida
Statistics of approximately self-affine fractals: Random corrugated surface and time series 5749
Rama Kant
Transient properties of a bistable kinetic model with correlations between additive and multiplicative noises: Mean first-passage time 5764
Ya Jia and Jia-rong Li
Analysis by the thermodynamic formalism for an experiment of an electronic circuit 5769
Hiroshi Shibata and Kazuhiro Fukushima
Expected number of distinct sites visited by N Lévy flights on a one-dimensional lattice 5774
G. Berkolaiko, S. Havlin, H. Larralde, and G. H. Weiss
From the quantum random walk to classical mesoscopic diffusion in crystalline solids 5779
Salvador Godoy and L. S. García-Colín
Steady-state analysis of a bistable system with additive and multiplicative noises 5786
Ya Jia and Jia-rong Li
Asymptotic scaling behavior of block entropies for an intermittent process 5793
Jan Freund
Bending-rigidity-driven transition and crumpling-point scaling of lattice vesicles 5800
E. Orlandini, A. L. Stella, T. L. Einstein, M. C. Tesi, I. Beichl, and F. Sullivan
