PHYSICAL REVIEW E **THIRD SERIES, VOLUME 54, NUMBER 2** **AUGUST 1996**

ARTICLES

General methods of statistical physics

Ultrametricity and memory in a solvable model of self-organized criticality 1082
Stefan Boettcher and Maya Paczuski
Polymerization in a ferromagnetic spin model with threshold 1096
Emilio N. M. Cirillo and Sebastiano Stramaglia
Kinetics of catalysis with surface disorder 1101
D. A. Head and G. J. Rodgers
Interface fluctuations on a hierarchical lattice 1106
Ferenc Iglói and Ferenc Szalma
Multifractality of the Lorenz system 1111
Kjell Ottar Wiklund and John N. Elgin
Spatial Doppler anomaly in an excitable medium 1120
M. Wellner, A. M. Pertsov, and J. Jalife
Multifractality and the shattering transition in fragmentation processes 1126
M. K. Hassan
Polymers interacting with spherical and rodlike particles 1134
E. Eisenriegler, A. Hanke, and S. Dietrich
Domain growth in a one-dimensional driven diffusive system 1153
Stephen J. Cornell and Alan J. Bray
Bidirectional shot noise in a singly occupied channel 1161
E. Barkai, R. S. Eisenberg, and Z. Schuss
Renormalized coupling constants and related amplitude ratios for Ising systems 1176
Shun-yong Zinn, Sheng-Nan Lai, and Michael E. Fisher
Corrosion front roughening in two-dimensional pitting of aluminum thin layers 1183
László Balázs
Controlling on-off intermittent dynamics 1190
Yoshihiko Nagai, Xuan-Dong Hua, and Ying-Cheng Lai
Controlling chaos using nonlinear feedback with delay 1200
M. de Sousa Vieira and A. J. Lichtenberg
Long-range correlations in nonequilibrium systems: Lattice gas automaton approach 1208
Alberto Suárez, Jean Pierre Boon, and Patrick Grosfils
Oscillatory dynamics in a heterogeneous surface reaction: Breakdown of the mean-field approximation 1225
R. Dennis Vigil and Frank T. Willmore
Periodic orbits in a simple ray-splitting system 1232
Debabrata Biswas
Period doublings in coupled parametrically forced damped pendulums 1237
Sang-Yoon Kim and Kijin Lee
Spiking in a semiconductor device: Experiments and comparison with a model 1253
F.-J. Niedernostheide, H.-J. Schulze, S. Bose, A. Wacker, and E. Schöll
Theoretical approach to the correlations of a classical crystal 1261
C. Rascón, L. Mederos, and G. Navascués
Self-excited soliton motion 1265
J. A. González, L. E. Guerrero, and A. Bellorín
War: The dynamics of vicious civilizations 1274
I. Ispolatov, P. L. Krapivsky, and S. Redner
Kinetics of fragmentation-annihilation processes 1290
J. A. N. Filipe and G. J. Rodgers
Stochastic resonance: A chaotic dynamics approach 1298
Marek Franaszek and Emil Simiu
