PHYSICAL REVIEW E

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Synchronization of a chaotic laser pulsation with its prerecorded history	4476
Takayuki Tsukamoto, Maki Tachikawa, Takuya Hirano, Takahiro Kuga, and Tadao Shimizu	

COMMENTS

Comment on “Modeling of metal electrodeposits: Analytical solutions”	4480
J.-N. Chazalviel and V. Fleury	

ERRATA

Erratum: Transition operators in electromagnetic-wave diffraction theory. II. Applications to optics [Phys. Rev. E 47, 1337 (1993)]	4482
G. E. Hahne	
Erratum: Zipf’s law in percolation [Phys. Rev. E 53, 4187 (1996)]	4483
Makoto S. Watanabe	
Erratum: Spatial Doppler anomaly in an excitable medium [Phys. Rev. E 54, 1120 (1996)]	4483
M. Wellner, A. M. Pertsov, and J. Jalife	

Cumulative Author Index	4484
--------------------------------------	------

CONTENTS - Continued

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Stability and interactions of solitons in two-component active systems	4371
Javid Atai and Boris A. Malomed	
Biaxial nonlinear surface waves	4375
Paul B. Lundquist, David R. Andersen, and Pascal Morel	

Computational physics

Lattice Boltzmann algorithm for three-dimensional simulations of plasma turbulence	4384
G. Fogaccia, R. Benzi, and F. Romanelli	
Adaptation and linear-response theory	4394
Toyonori Munakata and Satoshi Oyama	
Collective degrees of freedom and multiscale dynamics in spin glasses	4399
N. Persky and S. Solomon	
Integral equation theory of polydisperse colloidal suspensions using orthogonal polynomial expansions	4411
F. Lado	

BRIEF REPORTS

Particle correlations in the generalized Thomas-Fermi approach	4420
A. A. Shanenko	
Symmetries of the Fokker-Planck equation and the Fisher-Frieden arrow of time	4423
A. R. Plastino and A. Plastino	
Survival probability in the presence of a dynamic trap	4427
Miguel A. Ré, Carlos E. Budde, and Manuel O. Cáceres	
Two-dimensional acoustic turbulence	4431
Gregory Falkovich and Michael Meyer	
Anomalous scaling of a triple correlation function of a randomly advected passive scalar	4435
D. Gutman and E. Balkovsky	
Dielectrophoresis of a deformable fluid particle in a nonuniform electric field	4438
James Q. Feng	
Quadrupolar interaction in nematic liquid crystals	4442
G. Barbero, L. R. Evangelista, and S. Ponti	
$L_{\beta'} \rightarrow L_{c'}$ phase transition in phosphatidylcholine lipid bilayers: A disorder-order transition in two dimensions ..	4446
V. A. Raghunathan and John Katsaras	
Non-Landau critical behavior of heat capacity at the smectic-A-smectic- C_a^* transition of the antiferroelectric liquid crystal methylheptyloxycarbonylphenyl octyloxycarbonylbiphenyl carboxylate	4450
Kenji Ema, Haruhiko Yao, Atsuo Fukuda, Yoichi Takanishi, and Hideo Takezoe	
Local reactivity limited aggregation	4454
Anwar Hasmy, Eric Anglaret, and Rémi Jullien	
Origin of normal stress differences in rapid granular flows	4458
I. Goldhirsch and N. Sela	
Stochastic gating in diffusion-influenced ligand binding to proteins: Gated protein versus gated ligands	4462
Alexander M. Berezhkovskii, Dah-Yen Yang, Sheh-Yi Sheu, and Sheng Hsien Lin	
Low-frequency hydromagnetic modes of a uniformly magnetized liquid star	4465
S. I. Bastrukov and D. V. Podgainy	
Theory of magnetic field generation	4469
H. Saleem	
Measurements of laser-speckle-induced perturbations in laser-driven foils	4473
S. G. Glendinning, S. N. Dixit, B. A. Hammel, D. H. Kalantar, M. H. Key, J. D. Kilkenny, J. P. Knauer, D. M. Pennington, B. A. Remington, R. J. Wallace, and S. V. Weber

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Physics of beams

Single-mode selection and axial mode control in a free-electron maser oscillator using a prebunched electron beam	4178
M. Cohen, A. Eichenbaum, H. Kleinman, D. Chairman, and A. Gover	
Longitudinal current losses in rf linear accelerators	4188
Nathan Brown and Martin Reiser	
Role of parametric resonances in global chaos	4192
D. Jeon, M. Bai, C. M. Chu, X. Kang, S. Y. Lee, A. Riabko, and X. Zhao	
Chaotic dynamics induced by space-charge waves in cyclotron resonance accelerators	4202
R. Pakter, I. L. Caldas, F. Couto, T. Caetano, and F. B. Rizzato	
Self-guiding and stability of intense optical beams in gases undergoing ionization	4211
P. Sprangle, E. Esarey, and J. Krall	
Heavy-ion partial beam lifetimes due to Coulomb induced processes	4233
A. J. Baltz, M. J. Rhoades-Brown, and J. Weneser	
Tracking algorithm for the stable spin polarization field in storage rings using stroboscopic averaging	4240
K. Heinemann and G. H. Hoffstätter	

Classical physics, including nonlinear media

Light diffusion with gain and random lasers	4256
Diederik S. Wiersma and Ad Lagendijk	
Second-harmonic generation in diatomic lattices	4266
V. V. Konotop	
Parametric amplification of short pulses in optical fiber Bragg gratings	4271
M. J. Steel and C. Martijn de Sterke	
Computing the optical near-field distributions around complex subwavelength surface structures: A comparative study of different methods	4285
Dominique Barchiesi, Christian Girard, Olivier J. F. Martin, Daniel Van Labeke, and Daniel Courjon	
Patterns and scaling in surface fragmentation processes	4293
T. Hornig, I. M. Sokolov, and A. Blumen	
Existence of solitary solutions in nonlinear chains	4299
E. W. Laedke, O. Kluth, and K. H. Spatschek	
Traveling-wave solutions of the cubic-quintic nonlinear Schrödinger equation	4312
H. W. Schürmann	
Origin of the persistent oscillations of solitary waves in nonlinear quadratic media	4321
C. Etrich, U. Peschel, F. Lederer, B. A. Malomed, and Y. S. Kivshar	
Kink internal modes in discrete nonlinear chains	4325
Fei Zhang	
Two-dimensional granular flow in a small-angle funnel	4329
C. T. Veje and P. Dimon	
Nonspiral excitation waves beyond the eikonal approximation	4338
Pavel K. Brazhnik and John J. Tyson	
Angular-spectrum representation of nondiffracting X waves	4347
Juha Fagerholm, Ari T. Friberg, Juhani Huttunen, David P. Morgan, and Martti M. Salomaa	
Electromagnetic scattering in two-dimensional dissipative systems without localization	4353
H. Spieker and G. Nimtz	
Energy balance equation for electromagnetic waves in bianisotropic media	4359
E. O. Kamenetskii	
B or H as the basic field in electromagnetism	4368
Pierre Hillion

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Bending of ionic surfactant monolayers	3984
J. Daicic, A. Fogden, I. Carlsson, H. Wennerström, and B. Jönsson	
Penetrant diffusion in frozen polymer matrices: A finite-size scaling study of free volume percolation	3999
H. Weber and W. Paul	
High-pressure and temperature dependence of dielectric relaxation in supercooled di-isobutyl phthalate	4008
M. Paluch, J. Zioło, S. J. Rzoska, and P. Haldas	
Simple model for deep bed filtration	4011
Jysoo Lee and Joel Koplik	
Surface roughness of sputtered ZrO ₂ films studied by atomic force microscopy and spectroscopic light scattering	4021
D. Rönnow, J. Isidorsson, and G. A. Niklasson	
Lineal measures of clustering in overlapping particle systems	4027
J. Quintanilla and S. Torquato	
Biological physics	
Random walks on random partitions in one dimension	4037
Walter Nadler, Tsongjy Huang, and D. L. Stein	
Population genetics approach to the quasispecies model	4048
D. Alves and J. F. Fontanari	
Neuronal populations with reciprocal inhibition and rebound currents: Effects of synaptic and threshold noise . . .	4054
S. Coombes and S. H. Doole	
Inference and chaos by a network of nonmonotonic neurons	4066
David R. C. Dominguez	
Kinetics of a Gaussian random copolymer as a prototype for protein folding	4071
E. G. Timoshenko, Yu. A. Kuznetsov, and K. A. Dawson	
Plasma physics	
Electric field dynamics at a charged point	4087
Mikhail A. Berkovsky, James W. Dufty, Annette Calisti, Roland Stamm, and Bernard Talin	
Second-harmonic generation of Raman scattered light in a plasma channel	4098
C. S. Liu and V. K. Tripathi	
Energy loss of correlated ions in plasmas: Collective and individual contributions	4101
E. M. Bringa and N. R. Arista	
Parametric decay of Alfvén waves in multicomponent plasmas	4112
G. Gnani, R. M. O. Galvão, F. T. Gratton, and L. Gomberoff	
Ecologically safe regimes of generation and maintenance of artificial ionized regions in the stratosphere by microwave radiation	4121
A. A. Matveyev and V. P. Silakov	
Stopping power in nonideal and strongly coupled plasmas	4134
K. Morawetz and G. Röpke	
Stark broadening of satellite lines in silicon plasmas driven by femtosecond laser pulses	4147
R. C. Mancini, A. S. Shlyaptseva, P. Audebert, J. P. Geindre, S. Bastiani, J. C. Gauthier, G. Grillon, A. Mysyrowicz, and A. Antonetti	
Alignment and instability of dust crystals in plasmas	4155
V. A. Schweigert, I. V. Schweigert, A. Melzer, A. Homann, and A. Piel	
Absorption and hot electron production by high intensity femtosecond uv-laser pulses in solid targets	4167
U. Teubner, I. Uschmann, P. Gibbon, D. Altenbernd, E. Förster, T. Feurer, W. Theobald, R. Sauerbrey, G. Hirst, M. H. Key, J. Lister, and D. Neely

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Irreversible adsorption of particles after diffusing in a gravitational field	3725
Jordi Faraudo and Javier Bafaluy	
Turbulent Rayleigh-Taylor instability experiments with variable acceleration	3740
Guy Dimonte and Marilyn Schneider	
Modulated electrochemical waves	3744
R. D. Otterstedt, P. J. Plath, N. I. Jaeger, and J. L. Hudson	
Liquid crystals	
Surface-tension-gradient-induced flow in freely suspended liquid crystalline films	3752
M. I. Godfrey and D. H. Van Winkle	
Periodic distortions in lyotropic nematic calamitic liquid crystals	3765
M. Simões, A. J. Palangana, and L. R. Evangelista	
Structure of the cholesteric focal conic domains at the free surface	3771
R. Meister, M.-A. Hallé, H. Dumoulin, and P. Pieranski	
Landau-de Gennes theory of the chevron structure in a smectic liquid crystal	3783
N. Vaupotič, S. Kralj, M. Copič, and T. J. Sluckin	
Complex fluids, diffusion-limited aggregation, and dendritic growth	
Wetting description of block copolymer thin films	3793
Scott T. Milner and David C. Morse	
Dynamical behavior of microemulsion and sponge phases in thermal equilibrium	3811
M. Hennes and G. Gompper	
Spreading of a thin wetting film: Microscopic approach	3832
S. F. Burlatsky, G. Oshanin, A. M. Cazabat, M. Moreau, and W. P. Reinhardt	
Dynamic response of a magnetic suspension in a viscoelastic fluid	3846
Yuri L. Raikher and Victor V. Rusakov	
Merging of the α and β relaxations in polybutadiene: A neutron spin echo and dielectric study	3853
A. Arbe, D. Richter, J. Colmenero, and B. Farago	
Scaling properties of a percolation model with long-range correlations	3870
Muhammad Sahimi and Sumit Mukhopadhyay	
Two-dimensional dynamics of a free molecular chain with a secondary structure	3881
A. V. Zolotaryuk, P. L. Christiansen, and A. V. Savin	
Phase ordering kinetics in the Swift-Hohenberg equation	3895
Katsuya Ouchi and Hirokazu Fujisaka	
Adsorption of polymers at interfaces and extended defects	3899
Semjon Stepanow, Ulf Bauerschäfer, and Jens-Uwe Sommer	
Thermal fluctuations in supercrystal stripe phases of Langmuir monolayers	3906
A. Deutsch and S. A. Safran	
Density functional theory for the phase diagram of rigid C_{60} molecules	3928
M. Hasegawa and K. Ohno	
Stochastic equations for simple discrete models of epitaxial growth	3933
Milan Předota and Miroslav Kotrla	
Universality of gelation: End-linking versus cross-linking and stiff rods versus flexible chains	3943
Martin Huthmann, Manuel Rehkopf, Annette Zippelius, and Paul M. Goldbart	
Effect of the attractive potential of a drop in vapor phase nucleation	3950
Oleg V. Vasil'ev and Howard Reiss	
Dynamics of semiflexible and rigid particles. I. The velocity distribution and the Smoluchowski equation	3955
J. Bonet Avalos	
Dynamics of semiflexible and rigid particles. II. Derivation of the stress tensor and transport equations	3971
J. Bonet Avalos

THIRD SERIES, VOLUME 54, NUMBER 4

OCTOBER 1996

Neural network model to control an experimental chaotic pendulum	3545
Rembrandt Bakker, Jaap C. Schouten, Floris Takens, and Cor M. van den Bleek	
Transitional aggregation kinetics in dry and damp environments	3553
P. L. Krapivsky and S. Redner	
Nucleation and growth in one dimension	3562
E. Ben-Naim and P. L. Krapivsky	
Deconvolution of Rutherford backscattering spectra: An inverse problem	3569
Heinz Ellmer and Dieter Semrad	
Noisy Kuramoto-Sivashinsky equation for an erosion model	3577
Kent Bækgaard Lauritsen, Rodolfo Cuerno, and Hernán A. Makse	
Observation of the concurrent creation and annihilation of periodic orbits in a nonlinear <i>RLC</i> circuit	3581
T. C. Newell, V. Kovanis, A. Gavrielides, and P. Bennett	
Semiclassical level curvatures and quantum transport phenomena	3591
Mitsusada M. Sano	
Critical dimensions for random walks on random-walk chains	3606
Savely Rabinovich, H. Eduardo Roman, Shlomo Havlin, and Armin Bunde	
Classical fluids	
Bénard-Marangoni convection in square containers	3609
D. Krmpotić, G. B. Mindlin, and C. Pérez-García	
Diffusion in a multicomponent lattice Boltzmann equation model	3614
Xiaowen Shan and Gary Doolen	
Well-posed Boussinesq paradigm with purely spatial higher-order derivatives	3621
C. I. Christov, G. A. Maugin, and M. G. Velarde	
Green's functions for a system with a thin membrane	3639
Tadeusz Kosztołowicz	
Experimental study of self-sustained oscillations in a confined jet	3643
A. Maurel, P. Ern, B. J. A. Zielinska, and J. E. Wesfreid	
Time correlation functions of classical fluids: A self-consistent approach	3652
Rajneesh K. Sharma, R. K. Moudgil, and K. Tankeshwar	
Transition between viscous and inertial-range scaling of turbulence structure functions	3657
Charles Meneveau	
Homogeneous cooling state of a low-density granular flow	3664
J. Javier Brey, M. J. Ruiz-Montero, and D. Cubero	
Magnetic fluid under vorticity: Free precession decay of magnetization and optical anisotropy	3672
F. Gazeau, B. M. Heegaard, J.-C. Bacri, A. Cebers, and R. Perzynski	
Rayleigh-Taylor instability in finite-thickness fluids with viscosity and surface tension	3676
Karnig O. Mikaelian	
Vortex-sink dynamics	3681
A. E. Novikov and E. A. Novikov	
Statistical mechanics of deformable molecular liquids: Thermal expansion and isomerization of diatomic molecules	3687
Toyonori Munakata, Shuhei Yoshida, and Fumio Hirata	
Orientational relaxation in a random dipolar lattice: Wave-number and frequency dependence	3693
S. Ravichandran and Biman Bagchi	
Continuous limit of the Nagel-Schreckenberg model	3707
S. Krauss, P. Wagner, and C. Gawron	
Propagation of curved stationary flames in tubes	3713
V. V. Bychkov, S. M. Golberg, M. A. Liberman, and L. E. Eriksson
