THIRD SERIES, VOLUME 55, NUMBER 1
PARTS A AND B

CONTENTS

JANUARY 1997

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 1–538, and Part B pages 539–1234.

PART A

Guidelines for PRE Section Selection iii
Editorial Policies and Procedures of Physical Review E iv
General Information for Contributors viii
Guidelines for Estimating Length xii
Note to Reader xiii

RAPID COMMUNICATIONS

Fluctuating phase rigidity for a quantum chaotic system with partially broken time-reversal symmetry R1
S. A. van Langen, P. W. Brouwer, and C. W. J. Beenakker
Multidimensional inverse lattice problem and a uniformly sampled arithmetic Fourier transform R5
Chen Nan-xian, Chen Zhao-dou, and Wei Yu-chuan
Mixing, Lyapunov instability, and the approach to equilibrium in a hard-sphere gas R9
Ch. Dellago and H. A. Posch
Distribution of occupation numbers in finite Fermi systems and role of interaction in chaos and thermalization ... R13
V. V. Flambaum and F. M. Izrailev
Critical behavior of the three-dimensional Ising model with nearest-neighbor, next-nearest-neighbor, and plaquette interactions R17
Emilio N. M. Cirillo, G. Gonnella, and A. Pelizzola
Physical symmetry and lattice symmetry in the lattice Boltzmann method R21
Nianzheng Cao, Shiyi Chen, Shi Jin, and Daniel Martínez
Empirical traffic data and their implications for traffic modeling R25
Dirk Helbing
Slow dynamics of nonequilibrium density fluctuations in hard-sphere suspensions R29
Michio Tokuyama, Yoshihisa Enomoto, and Irwin Oppenheim
Simple optical feedback loop: Excitation waves and their mirror image R33
Alberto P. Muñuzuri and Mario Markus

ARTICLES

General methods of statistical physics

Resonant trapping: A failure mechanism in switch transitions 36
F. Apostolico, L. Gammaitoni, F. Marchesoni, and S. Santucci
Critical relaxation in two-dimensional random-bond Potts models 40
S. Chen and D. P. Landau
Dendritic growth in a mean-field lattice gas model 45
Mathis Plapp and Jean-François Gouyet
Missing motor of on-off intermittency 58
J. von Hardenberg, F. Paparella, N. Platt, A. Provenzale, E. A. Spiegel, and C. Tresser
Boundary integral method for quantum billiards in a constant magnetic field 65
M. L. Tiago, T. O. de Carvalho, and M. A. M. de Aguiar

1063-651X(199701)55:1:B;1-X

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 1** **JANUARY 1997**

Random walk on a linear chain with a quenched distribution of jump lengths 71
Ryszard Kutner and Philipp Maass
Spatiotemporal periodic and chaotic patterns in a two-dimensional coupled map lattice system 79
Fagen Xie and Gang Hu
Reconstructing noisy dynamical systems by triangulations 87
Stuart Allie, Alistair Mees, Kevin Judd, and David Watson
Construction and properties of fractal trees with tunable dimension: The interplay of geometry and physics 94
N. Vandewalle and M. Ausloos
Fractional diffusion and Lévy stable processes 99
Bruce J. West, Paolo Grigolini, Ralf Metzler, and Theo F. Nonnenmacher
Series-expansion studies of random sequential adsorption with diffusional relaxation 107
Chee Kwan Gan and Jian-Sheng Wang
Approach to the chaotic synchronized state of some driving methods 124
J. Güémez, C. Martín, and M. A. Matías
Renormalization theory of stochastic growth 135
Matthew B. Hastings
Exact time evolution and master equations for the damped harmonic oscillator 153
Robert Karrlein and Hermann Grabert
Directed lines in sparse potentials 165
T. J. Newman and A. J. McKane
Phenomenological framework for fluctuations around steady state 176
Marco Paniconi and Y. Oono
Geometric and healing laws in simple stochastic models of fracture in a sputtering process 189
R. D'hulst, N. Vandewalle, and M. Ausloos
Critical phase of a magnetic hard hexagon model on a triangular lattice 194
Yasushi Honda and Tsuyoshi Horiguchi
Directing nonlinear dynamic systems to any desired orbit 199
Liu Zonghua and Chen Shigang
Universal cubic eigenvalue repulsion for random normal matrices 205
Gary Oas
Accelerator mode in a gravitational bouncer as an attracting mode in a globally chaotic Hamiltonian system 212
S. T. Dembiński and P. Pepłowski
Stochastic lattice models with several absorbing states 219
Haye Hinrichsen
Thermodynamics of coupled identical oscillators within the path-integral formalism 227
F. Brosens, J. T. Devreese, and L. F. Lemmens
Folding of the triangular lattice with quenched random bending rigidity 237
P. Di Francesco, E. Guitter, and S. Mori
Deterministic soluble model of coarsening 252
L. Frachebourg and P. L. Krapivsky
Phase transitions in random networks: Simple analytic determination of critical points 257
Bartolo Luque and Ricard V. Solé
Statistics of largest loops in a random walk 261
Deniz Ertaş and Yacov Kantor
Universal limit mapping in grazing bifurcations 266
Arne B. Nordmark
Phase space geometry of chaotic reactive scattering: Gateways, windings, and halos 271
H. Wadi and L. Wiesenfeld
Correlation dimension of attractors through interspike intervals 287
Rolando Castro and Tim Sauer

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 1** **JANUARY 1997**

Anyonic behavior of quantum group gases 291
Marcelo R. Ubriaco
Synchronizing hyperchaos with a single variable 297
A. Tamaševičius and A. Čenys
Floquet-Markovian description of the parametrically driven, dissipative harmonic quantum oscillator 300
Sigmund Kohler, Thomas Dittrich, and Peter Hänggi
Quantum transport theory based on the equilibrium density projection technique 314
Joung Young Sug and Sang Don Choi
Dynamics of melting argon clusters 322
Gayle M. Tanner, Aniket Bhattacharya, Saroj K. Nayak, and S. D. Mahanti

Classical fluids

Passive scalar advected by a rapidly changing random velocity field: Probability density of scalar differences 329
Victor Yakhot
Inertial range and the finite Reynolds number effect of turbulence 337
J. Qian
Local nonequilibrium effect on undercooling in rapid solidification of alloys 343
Peter Galenko and Sergei Sobolev
Sensitivity of convective structures to mean flow boundary conditions: A correlation between symmetry and dynamics 353
A. Pocheau and F. Daviaud
Nonlinear instability of a fluid layer flowing down a vertical wall under imposed time-periodic perturbations 374
L. A. Dávalos-Orozco, S. H. Davis, and S. G. Bankoff
Stability of Kolmogorov scaling in anisotropically forced turbulence 381
J. Buša, M. Hnatich, J. Honkonen, and D. Horvath
Self-consistent model of an annihilation-diffusion reaction with long-range interactions 395
Valeriy V. Ginzburg, Leo Radzihovsky, and Noel A. Clark
Dynamic equations and bulk viscosity near the gas-liquid critical point 403
Akira Onuki
Single-particle survival in parallel gated trapping 421
John L. Spouge
Orthogonal polynomial approach to fluids with internal degrees of freedom: The case of nonpolar, polarizable molecules 426
F. Lado
Phase diagram of Heisenberg fluids: Computer simulation and density functional theory 436
J. J. Weis, M. J. P. Nijmeijer, J. M. Tavares, and M. M. Telo da Gama

Liquid crystals

Liquid crystal phases of dipolar discotic particles 447
G. Ayton, D. Q. Wei, and G. N. Patey
Role of interfacial entropy in the command-surface effect 455
Michael Büchel, Birgit Weichart, Carsten Minx, Henning Menzel, and Diethelm Johannsmann
Influence of permanent molecular dipoles on surface anchoring of nematic liquid crystals 464
M. A. Osipov, T. J. Sluckin, and S. J. Cox
Molecular dynamics simulations of surface-induced ordering in a nematic liquid crystal 477
J. Stelzer, P. Galatola, G. Barbero, and L. Longa
Structure of the nematic mesophase with cybotactic groups in liquid-crystalline poly(urethane-ester)s 481
O. Francescangeli, M. Laus, and G. Galli

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 1 JANUARY 1997

Calorimetric study of phase transitions for butyloxybenzylidene octylaniline in silica aerogels: Static and dynamic behavior 488
Zdravko Kutnjak and Carl W. Garland
Tritium nuclear magnetic resonance study of T_2, HT, and DT dissolved in nematic solvents 496
E. E. Burnell, C. A. de Lange, A. L. Segre, D. Capitani, G. Angelini, G. Lilla, and J. B. S. Barnhoorn
Evidence of dynamic long-range correlations in a nematic-liquid-crystal–aerogel system 504
Alenka Mertelj and Martin Čopič
Gaussian tricritical behavior of heat capacity at the smectic-*A*–smectic-*C* liquid crystal transition in a racemic mixture of 4-(1-methylheptyloxycarbonyl)phenyl 4′-octyloxybiphenyl-4-carboxylate 508
Kenji Ema, Atsushi Takagi, and Haruhiko Yao
Multiple light scattering in anisotropic random media 514
Holger Stark and Tom C. Lubensky
Piezoelectric effects in cholesteric elastomer gels 534
C.-C. Chang, L.-C. Chien, and R. B. Meyer

PART B

Note to Reader i

Complex fluids, diffusion-limited aggregation, and dendritic growth

Phase behavior of near-critical fluids confined in periodic gels 539
James P. Donley and Andrea J. Liu
Monte Carlo simulation of dielectrophoretic particle chain formation 544
M. Sancho, V. Giner, and G. Martínez
Growth model for ramified electrochemical deposition in the presence of diffusion, migration, and electroconvection 549
Guillermo Marshall and Pablo Mocskos
Propagation of collective modes in liquid cesium 564
Rajneesh K. Sharma and K. Tankeshwar
Measurement of the second virial coefficient for the interaction of dilute colloidal particles in a mixed solvent . . . 572
M. L. Kurnaz and J. V. Maher
Solution behavior of polyethylene oxide in water as a function of temperature and pressure 577
Stefan Bekiranov, Robijn Bruinsma, and Philip Pincus
Statistical mechanical properties of dense emulsions and microemulsions 586
Dimiter N. Petsev and Per Linse
Damping of longitudinal waves in colloidal crystals of finite size 592
E. A. Allahyarov, L. I. Podloubny, P. P. J. M. Schram, and S. A. Trigger
Dynamics of foams with and without wall rupture 598
J. J. Chae and M. Tabor
Bifurcations in a sidebranch surface of a free-growing dendrite 611
P. K. Galenko, M. D. Krivilyov, and S. V. Buzilov
Numerical analysis of ellipsometric critical adsorption data 620
Dan S. P. Smith, Bruce M. Law, Martin Smock, and David P. Landau
Phase transitions in a confined quasi-two-dimensional colloid suspension 637
Andrew H. Marcus and Stuart A. Rice
Quantitative test of the mode-coupling theory of the ideal glass transition for a binary Lennard-Jones system 657
Markus Nauroth and Walter Kob
Short-time scaling behavior of growing interfaces 668
Michael Krech
Diffusion in a fluctuating random geometry 680
Bertil Halle and Stefan Gustafsson

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 1** **JANUARY 1997**

Roughness-induced wetting 687
Roland R. Netz and David Andelman
Planar isothermal solidification from an undercooled melt: Unsteady solute segregation studied with the phase-field model 701
M. Conti
Lattice-gas simulations of domain growth, saturation, and self-assembly in immiscible fluids and microemulsions 708
Andrew N. Emerton, Peter V. Coveney, and Bruce M. Boghosian
Model for water-in-oil microemulsions: Surfactant effects 721
J.-M. Jin, K. Parbhakar, and L. H. Dao
Line of compressibility maxima in the phase diagram of supercooled water 727
Francesco Sciortino, Peter H. Poole, Ulrich Essmann, and H. E. Stanley
Spectrum of self-avoiding walk exponents 738
Jack Douglas, Charles M. Guttman, Alex Mah, and Takao Ishinabe
Melting of systems of hard disks by Monte Carlo simulations 750
Julio F. Fernández, Juan J. Alonso, and Jolanta Stankiewicz
Solidification of binary alloys: Thermal effects studied with the phase-field model 765
M. Conti
Diffusion and reaction in percolating pore networks 772
J. S. Andrade, D. A. Street, Y. Shibusa, S. Havlin, and H. E. Stanley
Theory of surface freezing of alkanes 778
Alexei V. Tkachenko and Yitzhak Rabin

Biological physics

Ecological model of extinctions 785
Guillermo Abramson
Formation of hairpins and band broadening in gel electrophoresis of DNA 789
A. N. Semenov and J.-F. Joanny
Correlations in DNA sequences: The role of protein coding segments 800
Hanspeter Herzel and Ivo Große
Statistical mechanics of ensemble learning 811
Anders Krogh and Peter Sollich
Learning feature constraints in a chaotic neural memory 826
Shigetoshi Nara and Peter Davis
Compositional-mechanical instability of interacting mixed lipid membranes 831
William M. Gelbart and Robijn Bruinsma
Optimal learning in multilayer neural networks 836
O. Winther, B. Lautrup, and J.-B. Zhang
Deviations from uniform power law scaling in nonstationary time series 845
Gandhimohan M. Viswanathan, C.-K. Peng, H. Eugene Stanley, and Ary L. Goldberger
Microtubules and vesicles under controlled tension 850
D. Kuchnir Fygenson, M. Elbaum, B. Shraiman, and A. Libchaber
Identification of amino acid sequences with good folding properties in an off-lattice model 860
Anders Irbäck, Carsten Peterson, and Frank Potthast
Autonomous stochastic resonance in bursting neurons 868
André Longtin
Frequency dependent signal transfer in neuron transistors 877
Rolf Weis and Peter Fromherz

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 1 JANUARY 1997

Plasma physics

Self-contained solution to the spatially inhomogeneous electron Boltzmann equation in a cylindrical plasma positive column 890
L. L. Alves, G. Gousset, and C. M. Ferreira
Shifts and asymmetry parameters of hydrogen Balmer lines in dense plasmas 907
Sibylle Günter and Axel Könies
Bremsstrahlung in hot plasmas with partially ionized atoms 912
M. Lamoureux and N. Avdonina
Electron temperature and density measurements in laser-produced large-scale-length gas-bag plasmas by x-ray spectroscopy 927
S. H. Glenzer, C. A. Back, K. G. Estabrook, B. J. MacGowan, D. S. Montgomery, R. K. Kirkwood, J. D. Moody, D. H. Munro, and G. F. Stone
Investigation of a short-wavelength laser plasma of a gas-liner pinch discharge 939
S. H. Glenzer, Th. Wrubel, H.-J. Kunze, and L. Godbert-Mouret
Iterative filtering procedure for the Vlasov equation 947
K. Chriaa, V. Škarka, and D. Carati
Recovery of a weakly magnetized negative-ion plasma after photodetachment 956
A. A. Ivanov, A. B. Sionov, F. El Balghiti-Sube, and M. Bacal
Dynamics of solitary waves in the Zakharov model equations 962
B. Malomed, D. Anderson, M. Lisak, M. L. Quiroga-Teixeiro, and L. Stenflo
Ion charge state distributions of vacuum arc plasmas: The origin of species 969
André Anders
Finite Larmor radius effects and velocity correlations in two-dimensional electrostatic plasma turbulence 982
B. Krane, H. L. Pécseli, and J. Trulsen
Fokker-Planck description of particle charging in ionized gases 991
Themis Matsoukas and Marc Russell
Theory of magnetic field generation by relativistically strong laser radiation 995
V. I. Berezhiani, S. M. Mahajan, and N. L. Shatashvili
Charged magnetosonic solitons propagating in gentle density gradients and wave breaking 1002
Tzihong Chiueh and Feng-Ruey Juang
Nonlinear electron heating in ultrahigh-intensity-laser–plasma interaction 1011
Erik Lefebvre and Guy Bonnaud

Physics of beams

Ponderomotive forces and stimulated Compton scattering of free electrons in a laser field 1015
M. V. Fedorov, S. P. Goreslavsky, and V. S. Letokhov
Transition crossing in proton synchrotrons using a flattened rf wave 1028
C. M. Bhat, J. Griffin, J. MacLachlan, M. Martens, K. Meisner, and K. Y. Ng

Classical physics, including nonlinear media

Light diffraction at mixed phase and absorption gratings in anisotropic media for arbitrary geometries 1035
G. Montemezzani and M. Zgonik
Discoid solitons and solitary wave trains in an expanding collisionless local universe 1048
Tzihong Chiueh and Tak-Pong Woo
Perturbation of parametrically excited solitary waves 1060
S. Longhi
Propagation of electromagnetic energy and momentum through an absorbing dielectric 1071
R. Loudon, L. Allen, and D. F. Nelson

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 1 JANUARY 1997

Dissipative three-wave structures in stimulated backscattering. I. A subluminous solitary attractor 1086
Carlos Montes, Alexander Mikhailov, Antonio Picozzi, and Frédéric Ginovart
Dissipative three-wave structures in stimulated backscattering. II. Superluminous and subluminous solitons 1092
Carlos Montes, Antonio Picozzi, and Derradji Bahloul

Computational physics

Monte Carlo simulation of the shapes of domains in phospholipid monolayers 1106
M. A. Mayer and T. K. Vanderlick
Universality and critical phenomena in string defect statistics 1120
Karl Strobl and Mark Hindmarsh
Dynamics of phase separation of a simple fluid mixture: Comparison between molecular dynamics and numerical integration of the phenomenological equation 1150
H. Furukawa
Pivot method for global optimization 1162
Pablo Serra, Aaron F. Stanton, and Sabre Kais

BRIEF REPORTS

Langmuir waves in a dusty plasma with variable grain charge 1166
Jitesh R. Bhatt
Monte Carlo fixed scale transformation for nonlocal fractal growth models 1170
Marina Piccioni, Raffaele Cafiero, and Alessandro Vespignani
Mutually penetrating motion of self-organized two-dimensional patterns of solitonlike structures 1174
K. Indireshkumar and A. L. Frenkel
Surface growth with spatially correlated noise 1178
Mai Suan Li
Wave fronts in bistable reactions with anomalous Lévy-flight diffusion 1181
Damián H. Zanette
Coupling of sound and internal waves in shear flows 1185
Andria D. Rogava and Swadesh M. Mahajan
Heat flux and shear rate in turbulent convection 1189
Emily S. C. Ching
Common mechanism links spiral wave meandering and wave-front–obstacle separation 1193
J. M. Starobin and C. F. Starmer
Structure function of polymer nematic liquid crystals: A Monte Carlo simulation 1197
Randall D. Kamien and Gary S. Grest
Percolation in a lattice model of a microemulsion 1201
C. M. McCallum and J. R. Gunn
Randomness and determinism in soap froth dynamics 1205
Boris Levitan
Discreteness effects on kinklike excitations in microtubules 1209
P. Woafo, G. H. Guénoue, and A. S. Bokosah
Effect of two-temperature electron distribution on the Bohm sheath criterion 1213
S. B. Song, C. S. Chang, and Duk-In Choi
Covariant formulation of wave-particle interaction in a transverse magnetic field 1217
J. T. Mendonça and L. Oliveira e Silva
Dark solitons in weakly saturable nonlinear media 1221
Yijiang Chen

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 1** **JANUARY 1997**

Experimental observations of structural relaxation in granular matter 1225
M. Massalska-Arodź, J. Mayer, J. Brańkowski, A. Ostrowicz, and E. Lisiecki

COMMENTS

Comment on ''Universal formulas for percolation thresholds'' 1228
S. C. van der Marck
Reply to ''Comment on 'Universal formulas for percolation thresholds' '' 1230
Serge Galam and Alain Mauger

ERRATA

Erratum: Origin of depolarized light scattering in supercooled liquids: Orientational fluctuation versus induced scattering mechanisms [Phys. Rev. E **53**, 896 (1996)] 1232
H. Z. Cummins, Gen Li, Weimin Du, Robert M. Pick, and Catherine Dreyfus

Cumulative Author Index 1233
