RAPID COMMUNICATIONS

Invalidity of the spatiotemporal white noise assumption for a stochastic diffusion-type equation R1235
Katsuya Honda
Statistical complexity of simple one-dimensional spin systems R1239
James P. Crutchfield and David P. Feldman
Role of divergence of classical trajectories in quantum chaos R1243
I. L. Aleiner and A. I. Larkin
Dynamical crossover in deterministic diffusion R1247
R. Klages and J. R. Dorfman
Characterization of blowout bifurcation by unstable periodic orbits R1251
Yoshihiko Nagai and Ying-Cheng Lai
Oscillatory correlation of delayed random walks R1255
Toru Ohira
Convection in rotating annuli: Ginzburg-Landau equations with tunable coefficients R1259
Martin van Hecke and Wim van Saarloos
Perturbation theory for the δ-correlated model of passive scalar advection near the Batchelor limit R1263
Alain Pumir, Boris I. Shraiman, and Eric D. Siggia
Evolution and formation of dispersive-dissipative patterns R1267
Alexander Oron and Philip Rosenau
Field-induced optical biaxiality in chiral smectic-*A* liquid crystals R1271
F. J. Bartoli, J. R. Lindle, S. R. Flom, J. V. Selinger, B. R. Ratna, and R. Shashidhar
Interactions between particulate inclusions in a smectic-*A* liquid crystal R1275
M. S. Turner and P. Sens
Contribution of the smectic-nematic interface to the surface energy R1279
L. R. Evangelista, S. Fontanini, L. C. Malacarne, and R. S. Mendes
Cellular multiplets in directional solidification R1282
Przemek Kopczyński, Wouter-Jan Rappel, and Alain Karma
Morphology and thermal conductivity of model organic aerogels R1286
Anthony P. Roberts
Kinetics of liquid-liquid phase separation of a binary mixture in cylindrical pores R1290
Lev D. Gelb and K. E. Gubbins
Frequency and water content dependencies of electrorheological properties R1294
Weijia Wen, Hongru Ma, Wing Yim Tam, and Ping Sheng

General methods of statistical physics

Analytical and numerical study of optimal channel networks 1298
F. Colaiori, A. Flammini, A. Maritan, and Jayanth R. Banavar
Domain growth on self-similar structures 1311
Umberto Marini Bettolo Marconi and Alberto Petri
Period control of chaotic systems by optimization 1315
Ali Fouladi and J. A. Valdivia
Fluctuations and defect-defect correlations in the ordering kinetics of the O(2) model 1321
Gene F. Mazenko and Robert A. Wickham
Roughening-induced deconstruction in (100) facets of CsCl-type crystals 1331
Douglas Davidson and Marcel den Nijs

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 2 FEBRUARY 1997

Power law dependence found on the lifetime of a photoconductor chaotic transient numerically induced by a fixed-step algorithm 1342
Alicia Serfaty de Markus
Critical behavior of the square-well fluid with $\lambda = 2$: A finite-size-scaling study 1347
Enrique de Miguel
Dissipative quantum systems with a potential barrier. III. Steady state nonequilibrium flux and reaction rate 1355
Joachim Ankerhold and Hermann Grabert
Solitons in a uniaxial anisotropic Heisenberg spin chain with Gilbert damping in an external magnetic field 1375
Wu-Ming Liu, Xiao-Bing Wang, Fu-Cho Pu, and Nian-Ning Huang
Territory covered by N Lévy flights on d-dimensional lattices 1395
G. Berkolaiko and S. Havlin
Burgers' flows as Markovian diffusion processes 1401
Piotr Garbaczewski, Grzegorz Kondrat, and Robert Olkiewicz
Irregular and fractal resonators with Neumann boundary conditions: Density of states and localization 1413
S. Russ, B. Sapoval, and O. Haeberlé
Unified model for the study of diffusion localization and dissipation 1422
Doron Cohen
Solvable aggregation-annihilation processes with greater than two components 1442
Ligen Zhang and Z. R. Yang
Damage spreading in the q-state Potts model 1448
Marta F. de A. Bibiano, F. G. Brady Moreira, and A. M. Mariz
Quantum instability of the flux lines in the coherent state representation 1451
Gonzalo García de Polavieja and Mark S. Child
Brézin-Zee dynamical correlator: An S-matrix Brownian motion approach 1457
A. M. S. Macêdo
Synchronization, chaos, and the breakdown of collective domain oscillations in reaction-diffusion systems 1463
C. B. Muratov
Theory of stochastic resonance in signal transmission by static nonlinear systems 1478
François Chapeau-Blondeau and Xavier Godivier
Time mapping in power series expansions for the time evolution operator 1496
A. N. Drozdov
Fractal dimension of collision cascades 1508
F. Kun and G. Bardos
Percolation thresholds and universal formulas 1514
S. C. van der Marck
Equivalence of ideal gases in two dimensions and Landen's relations 1518
M. Howard Lee
Brownian dynamics simulation of the prehistory problem 1521
M. Morillo, J. M. Casado, and J. Gómez-Ordóñez
Dynamical exponent of rough surface with quenched noise 1525
Junzhong Yang and Gang Hu

Classical fluids

Propagation and structure of planar streamer fronts 1530
Ute Ebert, Wim van Saarloos, and Christiane Caroli
Binary collision contribution to the longitudinal current correlation function of dense fluids 1550
Rajneesh K. Sharma, K. Tankeshwar, K. N. Pathak, S. Ranganathan, and R. E. Johnson
Microstructure functions for a model of statistically inhomogeneous random media 1558
J. Quintanilla and S. Torquato

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 2** **FEBRUARY 1997**

Molecular spin in a fluid undergoing Poiseuille flow 1566
Karl P. Travis and D. J. Evans
Invariance principle for extension of hydrodynamics: Nonlinear viscosity 1573
Iliya V. Karlin, G. Dukek, and T. F. Nonnenmacher
Properties of ridges in elastic membranes 1577
Alexander E. Lobkovsky and T. A. Witten
Hamiltonian formulation for the diffusion equation 1590
Jacques Lewalle
Experimental evaluation of acceleration correlations for locally isotropic turbulence 1600
Reginald J. Hill and S. T. Thoroddsen
Semiphenomenological effective-medium theory of multicomponent nucleation 1607
V. I. Kalikmanov and M. E. H. van Dongen
Locally self-similar, finite-time collapse in a high-symmetry vortex filament model 1617
R. B. Pelz

Liquid crystals

Orientation and surface anchoring of nematic liquid crystals on linearly polymerized photopolymers 1627
H. G. Galabova, D. W. Allender, and J. Chen
Relaxation time of molecular rotation about its long axis in the smectic-*A* phase of ferroelectric and antiferroelectric liquid crystals as observed by picosecond optical Kerr effect 1632
Kouichi Miyachi, Yoichi Takanishi, Ken Ishikawa, Hideo Takezoe, and Atsuo Fukuda
Pretransitional nematic ordering in liquid crystals with dispersed polymer networks 1637
Y. K. Fung, A. Borštnik, S. Žumer, D.-K. Yang, and J. W. Doane
Morphology and electro-optic properties of polymer-dispersed liquid-crystal films 1646
Karl Amundson, Alfons van Blaaderen, and Pierre Wiltzius
Pattern formation and instability of smectic-*A* filaments grown from an isotropic phase 1655
Hiroyoshi Naito, Masahiro Okuda, and Ou-Yang Zhong-can

Complex fluids, diffusion-limited aggregation, and dendritic growth

Self-consistent-field theory of a brush of randomly branched polymers 1660
Shi-Min Cui and Zheng Yu Chen
Inhomogeneous shear flows of wormlike micelles: A master dynamic phase diagram 1668
Jean-François Berret, Grégoire Porte, and Jean-Paul Decruppe
Phase behavior of colloid plus polydisperse polymer mixtures 1677
Richard P. Sear and Daan Frenkel
Kinetics of phase transitions in weakly segregated block copolymers: Pseudostable and transient states 1682
Shuyan Qi and Zhen-Gang Wang
Invasion percolation on self-affine topographies 1698
G. Wagner, P. Meakin, J. Feder, and T. Jøssang
Diffusion of a polymer chain in porous media 1704
V. Yamakov and A. Milchev
Capillary condensation between disks in two dimensions 1713
Tamir Gil and John H. Ipsen
Two-order-parameter model for an oil-water-surfactant system 1722
Shigeyuki Komura and Hiroya Kodama
Cooperative chiral order in copolymers of chiral and achiral units 1728
J. V. Selinger and R. L. B. Selinger
Thermodynamics of moving Gibbs dividing surfaces 1732
Liqiu Wang

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 2** **FEBRUARY 1997**

Bubble-scale model of foam mechanics: Melting, nonlinear behavior, and avalanches 1739
D. J. Durian
Dynamics of vacancy-mediated phase separation 1752
Sanjay Puri

Biological physics

Supercoiled and braided DNA under tension 1758
John F. Marko
Reflection and transmission of nonlinear blood waves due to arterial branching 1773
Wen-shan Duan, Ben-ren Wang, and Rong-jue Wei
Two-way silicon-neuron interface by electrical induction 1779
Alfred Stett, Bernt Müller, and Peter Fromherz
Gel electrophoresis and diffusion of ring-shaped DNA 1783
Uri Alon and David Mukamel
Hydrodynamics of a DNA molecule in a flow field 1794
R. G. Larson, T. T. Perkins, D. E. Smith, and S. Chu
Stochastic resonance in models of neuronal ensembles 1798
Dante R. Chialvo, André Longtin, and Johannes Müller-Gerking
Large deviations of the average shapes of vesicles from equilibrium: Effects of thermal fluctuations in the presence of constraints 1809
Volkmar Heinrich, France Sevšek, Saša Svetina, and Boštjan Žekš
Approximate analytical solutions to the bidomain equations with unequal anisotropy ratios 1819
Bradley J. Roth

Plasma physics

Detailed comparison of experimental and theoretical heliumlike Ti and Ca satellite line spectra emitted from a laser-produced plasma 1827
A. Demir, P. Zeitoun, G. J. Tallents, E. Fill, G. Jamelot, Y. L. Li, M. Nantel, G. J. Pert, B. Rus, and D. Schlögl
Deexcitation and recombination of excited ions through doubly excited levels in a dense recombining plasma: Lithiumlike recombining plasma laser 1836
Tetsuya Kawachi and Takashi Fujimoto
Frequency downshifting and trapping of an electromagnetic wave by a rapidly created spatially periodic plasma 1843
James Faith, S. P. Kuo, and Joe Huang
Effects of ion temperature on electrostatic solitary structures in nonthermal plasmas 1852
A. A. Mamun
Boundary conditions including sheath effects at a plasma-facing surface 1858
C. A. Ordonez

Physics of beams

Radiation by charged particles in nonuniform acceleration: The inapplicability of Larmor's formula 1872
R. Lieu, W. I. Axford, and J. F. McKenzie
Small signal theory of an $\mathbf{E}\times\mathbf{B}$ drifting electron laser 1876
Spilios Riyopoulos
Gain and saturation in free-electron laser oscillators 1887
Vinit Kumar and Srinivas Krishnagopal

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 2 FEBRUARY 1997

Classical physics, including nonlinear media

Variational approach to solitons in systems with cascaded $\chi^{(2)}$ nonlinearity 1894
V. M. Agranovich, S. A. Darmanyan, A. M. Kamchatnov, T. A. Leskova, and A. D. Boardman
Vector spatial solitons influenced by magneto-optic effects in cascadable nonlinear media 1899
A. D. Boardman and K. Xie
Generalized asymptotic description of the propagated field dynamics in Gaussian pulse propagation in a linear, causally dispersive medium 1910
Constantinos M. Balictsis and Kurt E. Oughstun
Nonlinear rotating modes: Green's-function solution 1922
Shozo Takeno and Michel Peyrard
Autoresonant excitation and evolution of nonlinear waves: The variational approach 1929
L. Friedland
Energy dissipation for quasielastic granular particle collisions 1940
W. A. M. Morgado and I. Oppenheim
Wave field determination using tomography of the ambiguity function 1946
Jinhong Tu and Shinichi Tamura
Eigenfunction expansion of the dyadic Green's function in a gyroelectric chiral medium by cylindrical vector wave functions 1950
Dajun Cheng
Geometrical and transport properties of random packings of spheres and aspherical particles 1959
D. Coelho, J.-F. Thovert, and P. M. Adler

Computational physics

Bead-Fourier path-integral Monte Carlo method applied to systems of identical particles 1979
P. N. Vorontsov-Velyaminov, M. O. Nesvit, and R. I. Gorbunov

BRIEF REPORTS

Mean-field theory of sandpiles 1998
Maxim Vergeles, Amos Maritan, and Jayanth R. Banavar
Anisotropic triangular Ising model in the extended mean-field renormalization-group approach 2001
C. N. Likos
Irregular behaviors of two chemical oscillators with a diffusion coupling 2005
Kenji Miyakawa, Tadao Okabe, and Fumitaka Sakamoto
Analysis of minimal pinning density for controlling spatiotemporal chaos of a coupled map lattice 2009
Y. S. Kwon, S. W. Ham, and K. K. Lee
Attractor for the mean-field equations of the hysteretic dynamics of a quantum spin model: Analytical solution . . 2013
Subir K. Sarkar and Debashish Bose
Noise-enhanced capacity via stochastic resonance in an asymmetric binary channel 2016
François Chapeau-Blondeau
Monte Carlo study of the molecular-weight distribution of living polymers 2020
Yannick Rouault and Andrey Milchev
Three-dimensional traveling-wave solutions in plane Couette flow 2023
M. Nagata
Role of orientation in the structure and dynamics of a supercooled molecular liquid 2026
W. J. Ma and S. K. Lai
Surface-enhanced ordering and layer-thinning transitions in freely suspended smectic-*A* films 2030
Y. Martínez-Ratón, A. M. Somoza, L. Mederos, and D. E. Sullivan
Dynamic correlations in porous media 2034
J. C. Lee
