PHYSICAL REVIEW E

THIRD SERIES, VOLUME 55, NUMBER 3

MARCH 1997

Absence of chiral domains in mixtures of dipalmitoylphosphatidylcholine molecules of opposite chirality	3751
J. Katsaras, R. F. Epand, and R. M. Epand	
Perturbative density functional theory for phase transitions in a two-dimensional antiferromagnetic fluid	3754
P. Nielaba and S. Sengupta	
Stability analysis of polarized domains	3758
José A. Miranda and Michael Widom	
Crystallization of globular proteins	3762
W. C. K. Poon	
Representing structural information of helical charge distributions in cylindrical coordinates	3765
David Hochberg, Glenn Edwards, and Thomas W. Kephart	
Observation of a strange nonchaotic attractor in a neon glow discharge	3769
W. X. Ding, H. Deutsch, A. Dinklage, and C. Wilke	
High-resolution measurement, line identification, and spectral modeling of the $K\beta$ spectrum of heliumlike argon emitted by a laser-produced plasma using a gas-puff target	3773
Igor Yu. Skobelev, Anatoly Ya. Faenov, Vladimir M. Dyakin, Henryk Fiedorowicz, Andrzej Bartnik, Mirosław Szczurek, Peter Beiersdorfer, Joseph Nilsen, and Albert L. Osterheld	
“Two-stage” perturbation theory for bandwidth-limited amplification of optical solitons near the zero-dispersion point	3777
B. A. Malomed, I. M. Uzunov, M. Gölles, and F. Lederer	
Overlap of isochrone resonances: Chaos and refraction	3781
R. Egidio de Carvalho	
Completely integrable nonlinear Schrödinger type equations on moving space curves	3785
K. Porsezian	

COMMENTS

Comment on “Study of phase-separation dynamics by use of cell dynamical systems. I. Modeling”	3789
P. I. C. Teixeira and B. M. Mulder	
Reply to “Comment on ‘Study of phase-separation dynamics by use of cell dynamical systems. I. Modeling’”	3792
Y. Oono	

ERRATA

Erratum: Action at a distance as a full-value solution of Maxwell equations: The basis and application of the separated-potentials method [Phys. Rev. E 53 , 5373 (1996)]	3793
Andrew E. Chubykalo and Roman Smirnov-Rueda	
Erratum: Nonlinear analysis of the coupling between interface deflection and hexagonal patterns in Rayleigh-Bénard-Marangoni convection [Phys. Rev. E 53 , 5982 (1996)]	3793
Layachi Hadji	

Cumulative Author Index	3794
--	------

CONTENTS - Continued

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 55, NUMBER 3

MARCH 1997

Maxwell's equations and the vector nonlinear Schrödinger equation	3652
Yijiang Chen and Javid Atai	

Computational physics

Adaptive step size for the hybrid Monte Carlo algorithm	3658
Philippe de Forcrand and Tetsuya Takaishi	
Excited states by quantum Monte Carlo methods: Imaginary time evolution with projection operators	3664
D. Blume, M. Lewerenz, P. Niyaz, and K. B. Whaley	
Convergence criteria of an infinite continued fraction	3676
Sang Gyu Jo, Kyung Hwa Lee, Soon Chul Kim, and Sang Don Choi	

BRIEF REPORTS

Avalanche distribution in the Feder and Feder model: Effects of quenched disorder	3682
Normand Mousseau	
Critical dynamics of self-organizing Eulerian walkers	3686
R. R. Shcherbakov, Vl. V. Papoyan, and A. M. Povolotsky	
Boundedness of attractors in the complex Lorenz model	3689
Vladislav Yu. Toronov and Vladimir L. Derbov	
Hamiltonian reformulation and pairing of Lyapunov exponents for Nosé-Hoover dynamics	3693
C. P. Dettmann and G. P. Morriss	
Complexity, tunneling, and geometrical symmetry	3697
L. P. Horwitz, J. Levitan, and Y. Ashkenazy	
Counterexample to a conjecture of Goriely for the speed of fronts of the reaction-diffusion equation	3701
J. Cisternas and M. C. Depassier	
How to extract information from simulations of coarsening at finite temperature	3705
B. Derrida	
Monte Carlo renormalization-group approach to the Bak-Sneppen model	3708
Bernhard Mikeska	
Universality in invariant random-matrix models: Existence near the soft edge	3712
E. Kanzieper and V. Freilikher	
Asymmetric motion in a double well under the action of zero-mean Gaussian white noise and periodic forcing	3716
Mangal C. Mahato and A. M. Jayannavar	
Freezing of hard spheres within the modified weighted density approximation	3720
C. F. Tejero	
Critical Ising lines of the $d=2$ Ashkin-Teller model	3724
G. Kamieniarz, P. Kozłowski, and R. Dekeyser	
Statistical mechanics of Fermi-Pasta-Ulam chains with the canonical ensemble	3727
Melik C. Demirel, Mehmet Sayar, and Ali R. Atılgan	
Effects of impurities in random sequential adsorption on a one-dimensional substrate	3731
Jae Woo Lee	
Fundamentals of traffic flow	3735
Dirk Helbing	
Self-scaling properties of velocity circulation in shear flows	3739
R. Benzi, L. Biferale, M. V. Struglia, and R. Tripiccone	
Regular and irregular regimes of binary fluid convection excited by parametric resonance	3743
Igor Keller, Alexander Oron, and Pinhas Z. Bar-Yoseph	
Bjerknes force threshold for stable single bubble sonoluminescence	3747
I. Akhatov, R. Mettin, C. D. Ohl, U. Parlitz, and W. Lauterborn

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 55, NUMBER 3

MARCH 1997

Particle simulation of Lyapunov exponents in one-component strongly coupled plasmas	3439
Y. Ueshima, K. Nishihara, D. M. Barnett, T. Tajima, and H. Furukawa	
Langmuir probe measurements in an inductively coupled plasma source	3450
A. Schwabedissen, E. C. Benck, and J. R. Roberts	
Diagnosing selenium plasmas using Se xxvi and Se xxv line cluster ratios	3460
Arati Dasgupta, K. G. Whitney, Hong Lin Zhang, and D. H. Sampson	
Smoothing of deuterium-tritium ice by electrical heating of the saturated vapor	3473
E. R. Mapoles, J. Sater, J. Pipes, and E. Monsler	

Physics of beams

Numerical simulations of intense charged-particle beam propagation in a dielectric wake-field accelerator	3481
W. Gai, A. D. Kanareykin, A. L. Kustov, and J. Simpson	
Coupling between two resonant waves in a waveguide free-electron laser	3489
Xiaojian Shu	
Stochastic beam dynamics in quasi-isochronous storage rings	3493
M. Bai, D. Jeon, S. Y. Lee, K. Y. Ng, A. Riabko, and X. Zhao	
Dynamic aperture experiment at a synchrotron	3507
W. Fischer, M. Giovannozzi, and F. Schmidt	
Beam-beam interaction effects for separated beams in a proton-antiproton collider	3521
D. Siergiej, D. Finley, and W. Herr	
Beam coupling impedances of obstacles protruding into a beam pipe	3529
Sergey S. Kurennoy	
Impedances of azimuthally symmetric irises and cavities with semielliptical profile in a beam pipe	3533
Robert L. Gluckstern and Sergey S. Kurennoy	
Laser-driven acceleration with Bessel beams	3539
B. Hafizi, E. Esarey, and P. Sprangle	

Classical physics, including nonlinear media

Granular dynamics simulations of two-dimensional heap formation	3546
J. Baxter, U. Tüzün, J. Burnell, and D. M. Heyes	
Self-focusing and solitonlike structures in materials with competing quadratic and cubic nonlinearities	3555
L. Bergé, O. Bang, J. Juul Rasmussen, and V. K. Mezentsev	
Asymptotic behavior of radially symmetric self-focused beams	3571
F. Vidal and T. W. Johnston	
Mechanics with fractional derivatives	3581
Fred Riewe	
Delay time measurements in a diffraction experiment: A case of optical tunneling	3593
D. Mugnai, A. Ranfagni, and L. S. Schulman	
Nonlinear mobility of the generalized Frenkel-Kontorova model	3598
Oleg M. Braun, Thierry Dauxois, Maxim V. Paliy, and Michel Peyrard	
Optical bistability in colloidal crystals	3613
E. Lidorikis, Qiming Li, and C. M. Soukoulis	
Soliton and electromagnetic wave propagation in a ferromagnetic medium	3619
M. Daniel, V. Veerakumar, and R. Amuda	
Asymptotic breathing pulse in optical transmission systems with dispersion compensation	3624
Ildar Gabitov, Elena G. Shapiro, and Sergei K. Turitsyn	
Theory of grating superstructures	3634
N. G. Raphael Broderick and C. Martijn de Sterke	
Approximate analytic solution for the spatiotemporal evolution of wave packets undergoing arbitrary dispersion ..	3647
Borge Nodland

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 55, NUMBER 3

MARCH 1997

Transient oscillations in continuous-time excitatory ring neural networks with delay	3234
K. Pakdaman, C. P. Malta, C. Grotta-Ragazzo, O. Arino, and J.-F. Vibert	
Long-range interactions in sequences of human behavior	3249
Martin P. Paulus	
Learning by a population of perceptrons	3257
Kukjin Kang, Jong-Hoon Oh, and Chulan Kwon	
Cellular automata model for gene networks	3262
J. A. de Sales, M. L. Martins, and D. A. Stariolo	
Deformation and failure in cellular materials	3271
Anthony J. C. Ladd, John H. Kinney, and Thomas M. Breunig	
Correlation functions for lipid membrane dynamics obtained from NMR spectroscopy	3276
Alexander A. Nevzorov, Theodore P. Trouard, and Michael F. Brown	
Vapnik-Chervonenkis entropy of the spherical perceptron	3283
P. Riegler and H. S. Seung	
Possible link between guanosine 5' triphosphate hydrolysis and solitary waves in microtubules	3288
B. Trpišová and J. A. Tuszyński	
Testing the Markov condition in ion channel recordings	3306
J. Timmer and S. Klein	
Speciation and extinction in a simple model of evolution	3312
D. A. Head and G. J. Rodgers	
Diluted neural network with refractory periods	3320
Crisógono R. da Silva, Francisco A. Tamarit, and Evaldo M. F. Curado	
Plasma physics	
Frequency upshift in the interaction of a high power microwave with an inhomogeneous plasma	3328
X. Xu, N. Yugami, and Y. Nishida	
Nonlinear radiation trapping in an atomic vapor excited by a strong laser pulse	3333
N. N. Bezuglov, A. N. Klucharev, A. F. Molisch, M. Allegrini, F. Fuso, and T. Stacewicz	
Resonant interactions of drift vortex solitons in a convective motion of a plasma	3351
Masayoshi Tajiri and Hiroshi Maesono	
α -particle knock-on signature in the neutron emission of DT plasmas	3358
L. Ballabio, G. Gorini, and J. Källne	
Dynamic screening effects on electron-ion Coulomb bremsstrahlung in dense plasmas	3369
Young-Dae Jung	
Multiple-scales analysis of plasma response to intense laser field and plasma excitation	3373
Shi-Bing Liu, Shi-Gang Chen, and Jie Liu	
Self-modulation of a strong electromagnetic wave in a positron-electron plasma induced by relativistic temperatures and phonon damping	3381
F. T. Gratton, G. Gnani, R. M. O. Galvão, and L. Gomberoff	
Space-time structure of the magnetic field of a laser plasma and methods for its enhancement outside the plasma ..	3393
A. V. Kabashin and P. I. Nikitin	
Collective modes and correlations in one-component plasmas	3400
Gabriel Téllez	
Electron kinetics and non-Joule heating in near-collisionless inductively coupled plasmas	3408
V. I. Kolobov, D. P. Lymberopoulos, and D. J. Economou	
Nonintegrable interaction of ion acoustic and electromagnetic waves in a plasma	3423
F. B. Rizzato, S. R. Lopes, and A. C.-L. Chian	
Feedback control of edge turbulence in a tokamak	3431
Zhai Kan, Wen Yi-zhi, Yu Chang-xuan, Liu Wan-dong, Wang Chao, Zhuang Ge, and Xu Zhi-zhan

THIRD SERIES, VOLUME 55, NUMBER 3

MARCH 1997

Structure-induced nonlinear dielectric properties in electrorheological fluids	3015
Weijia Wen, Shouqiang Men, and Kunquan Lu	
Neutron diffraction study of the pore surface layer of Vycor glass	3021
M. Agamalian, J. M. Drake, S. K. Sinha, and J. D. Axe	
Control of the surface charge density of colloidal silica by sodium hydroxide in salt-free and low-salt dispersions	3028
Junpei Yamanaka, Yoshihiro Hayashi, Norio Ise, and Takuji Yamaguchi	
Langevin dynamics of a polymer with internal distance constraints	3037
Michael P. Solf and Thomas A. Vilgis	
Statistical model for the structure and gelation of smectite clay suspensions	3044
Marjolein Dijkstra, Jean-Pierre Hansen, and Paul A. Madden	
Crystallization kinetics of suspensions of hard colloidal spheres	3054
J. L. Harland and W. van Meegen	
Semiphenomenological theory of the Tolman length	3068
V. I. Kalikmanov	
Adsorption of a bidisperse polymer mixture onto a flat wall	3072
Jörg Baschnagel, Albert Johner, and Jean-François Joanny	
Diffusion-controlled growth of a solid cylinder into its undercooled melt: Instabilities and pattern formation studied with the phase-field model	3087
M. Conti, F. Marinozzi, and U. Marini Bettolo Marconi	
Dynamic scattering from solutions of semiflexible polymers	3092
Klaus Kroy and Erwin Frey	
Critical fluctuations in a binary mixture of polyethylene glycol and polypropylene glycol studied by ultrasonic and light scattering experiments	3102
W. Mayer, S. Hoffmann, G. Meier, and I. Alig	
Role of diffusion in irreversible deposition	3111
Pascal O. Luthi, Jeremy J. Ramsden, and Bastien Chopard	
Universal density-force relations for polymers near a repulsive wall	3116
E. Eisenriegler	
Simulating the rheology of dense colloidal suspensions using dissipative particle dynamics	3124
E. S. Boek, P. V. Coveney, H. N. W. Lekkerkerker, and P. van der Schoot	
Light-scattering study of the mercury liquid-vapor interface	3134
V. Kolevzon, G. Gerbeth, and G. Pozdniakov	
Viscosity of colloidal suspensions	3143
R. Verberg, I. M. de Schepper, and E. G. D. Cohen	
Coexistence curve of a polydisperse polymer solution near the critical point	3159
Rio Kita, Toshiaki Dobashi, Takao Yamamoto, Mitsuo Nakata, and Kenji Kamide	
Surface freezing in chain molecules: Normal alkanes	3164
B. M. Ocko, X. Z. Wu, E. B. Sirota, S. K. Sinha, O. Gang, and M. Deutsch	
Evolution of structural relaxation spectra of glycerol within the gigahertz band	3183
T. Franosch, W. Götze, M. R. Mayr, and A. P. Singh	
Two-dimensional coarsening and phase separation in thin polymer solution films	3191
Christopher K. Haas and John M. Torkelson	
Unsteady crystal growth due to step-bunch cascading	3202
Peter G. Vekilov, Hong Lin, and Franz Rosenberger	
Biological physics	
Correspondence between discrete and continuous models of excitable media: Trigger waves	3215
Y. B. Chernyak, A. B. Feldman, and R. J. Cohen
