THIRD SERIES, VOLUME 55, NUMBER 4

CONTENTS

APRIL 1997

RAPID COMMUNICATIONS

- Experimental observation of a chaotic attractor with a reverse horseshoe topological structure R3801
G. Boulant, S. Bielawski, D. Derozier, and M. Lefranc
- Disturbance propagation in chaotic extended systems with long-range coupling R3805
Alessandro Torcini and Stefano Lepri
- Crossover from coherent to incoherent dynamics in damped quantum systems R3809
Reinhold Egger, Hermann Grabert, and Ulrich Weiss
- Hierarchical level-clustering in two-dimensional harmonic oscillators R3813
C. B. Whan
- Quasispecies evolution of finite populations R3817
Yi-Cheng Zhang
- Transition between two oscillation modes R3820
R. López-Ruiz and Y. Pomeau
- Stochastic Lorenz model for periodically driven Rayleigh-Bénard convection R3824
Omar Osenda, Carlos B. Briozzo, and Manuel O. Cáceres
- Absolute momentum transfer in gas-surface scattering R3828
Steven R. Cook and Mark A. Hoffbauer
- Scaling of the transition to parametrically driven surface waves in highly dissipative systems R3832
O. Lioubashevski, J. Fineberg, and L. S. Tuckerman
- Nonperturbative zero modes in the Kraichnan model for turbulent advection R3836
Omri Gat, Victor S. L'vov, Evgenii Podivilov, and Itamar Procaccia
- Temperature dependence of the mutual diffusion coefficient of deuterated polystyrene and poly(methyl methacrylate) R3840
T. E. Shearmur, A. S. Clough, D. W. Drew, M. G. D. van der Grinten, and R. A. L. Jones
- Phase separation in incompressible systems R3844
Weinan E and P. Palfy-Muhoray
- Diffusive boundary layers in the free-surface excitable medium spiral R3847
David A. Kessler and Herbert Levine

General methods of statistical physics

- Entropy: Thermodynamic definition and quantum expression 3851
Elias P. Gyftopoulos and Erol Çubukçu
- Optimal self-avoiding paths in dilute random medium 3859
F. Seno, A. L. Stella, and C. Vanderzande
- Chaos and coherence in coupled lasers 3865
K. S. Thornburg, Jr., M. Möller, Rajarshi Roy, T. W. Carr, R.-D. Li, and T. Erneux
- Coherent-state path-integral simulation of many-particle systems 3870
M. Beccaria, B. Allès, and F. Farchioni
- Exact solution of a one-dimensional continuum percolation model 3878
Alon Drory
- Higher order correlations in quantum chaotic spectra 3886
Pragya Shukla
- Energy flow, partial equilibration, and effective temperatures in systems with slow dynamics 3898
Leticia F. Cugliandolo, Jorge Kurchan, and Luca Peliti

(Continued)

1063-651X(199704)55:4;1-T

Critical finite-size-scaling amplitudes of a fully anisotropic three-dimensional Ising model	3915
M. A. Yurishchev	
Integrability of the square-triangle random tiling model	3926
Jan de Gier and Bernard Nienhuis	
Short-range Ising spin glass: Multifractal properties	3934
E. Nogueira, Jr., S. Coutinho, F. D. Nobre, E. M. F. Curado, and J. R. L. de Almeida	
Analytic structure and chaotic dynamics of the damped driven Toda oscillator	3942
S. Parthasarathy and J. M. Dixon	
Period doubling of a torus: Chaotic breathing of a localized wave	3948
Jung-Im Kim, Hwa-Kyun Park, and Hie-Tae Moon	
Coarsening of surface structures in unstable epitaxial growth	3952
Martin Rost and Joachim Krug	
Microscopic nonuniversality versus macroscopic universality in algorithms for critical dynamics	3958
U. Ritschel and P. Czerner	
Frustration and slow dynamics of granular packings	3962
Mario Nicodemi, Antonio Coniglio, and Hans J. Herrmann	
Algorithmic mapping from criticality to self-organized criticality	3970
F. Bagnoli, P. Palmerini, and R. Rechtman	
Surface morphology, hopping, and current in a conserved growth model with a restricted solid-on-solid condition	3977
Yup Kim and Jin-Min Kim	
Algebraic self-similar renormalization in the theory of critical phenomena	3983
S. Gluzman and V. I. Yukalov	
Renormalization group of the Domany-Kinzel cellular automaton	4000
Tânia Tomé and Mário J. de Oliveira	
Effect of partially reflecting boundary conditions on the decay of metastable rest states in an activator-inhibitor system	4005
G. Izús, R. Deza, H. S. Wio, and C. Borzi	
Universal versus drive-dependent exponents for sandpile models	4012
Hiizu Nakanishi and Kim Sneppen	
Minimum energy state of the one-dimensional Coulomb chain	4017
Daniel H. E. Dubin	
Differentiable generalized synchronization of chaos	4029
Brian R. Hunt, Edward Ott, and James A. Yorke	
Sporadic driving of dynamical systems	4035
Toni Stojanovski, Ljupčo Kocarev, Ulrich Parlitz, and Richard Harris	
Higher-order resonant behavior in asymmetric nonlinear stochastic systems	4049
M. E. Inchiosa, A. R. Bulsara, and L. Gamaitoni	
Thermal ratchets driven by Poissonian white shot noise	4057
T. Czernik, J. Kula, J. Łuczka, and P. Hänggi	
Spectral form factor in a random matrix theory	4067
E. Brézin and S. Hikami	
Nonequilibrium phase transitions induced by multiplicative noise	4084
C. Van den Broeck, J. M. R. Parrondo, R. Toral, and R. Kawai	
Numerical determination of the avalanche exponents of the Bak-Tang-Wiesenfeld model	4095
S. Lübeck and K. D. Usadel	
Non-Hermitian random matrix models: Free random variable approach	4100
Romuald A. Janik, Maciej A. Nowak, Gábor Papp, Jochen Wambach, and Ismail Zahed	
Dynamical behavior of spots in a nonequilibrium distributive active medium	4107
F.-J. Niedernostheide, M. Or-Guil, M. Kleinkes, and H.-G. Purwins	

Bursts in average lifetime of transients for chaotic logistic map with a hole	4112
V. Paar and N. Pavin	
Parametric Ward-Takahashi identity in disordered systems and the integral identity associated with the Calogero-Sutherland model	4116
Nobuhiko Taniguchi	
Critical behavior of $O(n)$ -symmetric systems with reversible mode-coupling terms: Stability against detailed-balance violation	4120
Uwe C. Täuber and Zoltán Rácz	

Classical fluids

Integer lattice gases	4137
Bruce M. Boghosian, Jeffrey Yepez, Francis J. Alexander, and Norman H. Margolus	
Influence of particle inertia and Basset force on tracer dynamics: Analytic results in the small-inertia limit	4148
A. N. Yannacopoulos, G. Rowlands, and G. P. King	
Thermally perturbed barodiffusion in a binary liquid mixture	4158
F. B. Hicks, Thomas C. Van Vechten, and Carl Franck	
Scaling properties of two-dimensional turbulence in wakes behind bluff bodies	4165
B. Protas, S. Goujon-Durand, and J. E. Wesfreid	
Oscillatory temporal behavior in an autocatalytic surface reaction model	4170
J.-P. Hovi, A. P. J. Jansen, and R. M. Nieminen	
Measuring spatial coupling in inhomogeneous dynamical systems	4179
George Broze, Satish Narayanan, and Fazle Hussain	
Kinetic theory of fluidized granular matter	4187
Byung Chan Eu and Hikmat Farhat	
Towards granular hydrodynamics in two dimensions	4200
E. L. Grossman, Tong Zhou, and E. Ben-Naim	
Casimir energy for a spherical cavity in a dielectric: Applications to sonoluminescence	4207
Kimball A. Milton and Y. Jack Ng	
Temperature and density dependence of the self-diffusion coefficient and Mori coefficients of Lennard-Jones fluids by molecular dynamics simulation	4217
María J. Nuevo, Juan J. Morales, and David M. Heyes	
Restricted diffusion and the return to the origin probability at intermediate and long times	4225
Lawrence M. Schwartz, Martin D. Hürlimann, Keh-Jim Dunn, Partha P. Mitra, and David J. Bergman	
Diffusion eigenstates of a porous medium with interface absorption	4235
David J. Bergman	
Fundamental-measure free-energy density functional for hard spheres: Dimensional crossover and freezing	4245
Y. Rosenfeld, M. Schmidt, H. Löwen, and P. Tarazona	
$1/f^\alpha$ density fluctuation at the slugging transition point of granular flows through a pipe	4264
Akio Nakahara and Takeshi Isoda	
Oscillations and spatiotemporal chaos of one-dimensional fluid fronts	4274
D. P. Vallette, G. Jacobs, and J. P. Gollub	
Departure from Navier-Stokes hydrodynamics in confined liquids	4288
Karl P. Travis, B. D. Todd, and Denis J. Evans	
Shape and size of the current head in creeping flows	4296
B. M. Marino, L. P. Thomas, and R. Gratton	

Liquid crystals

Surface phase transitions in nematic liquid crystals with planar anchoring	4302
R. Seidin, R. M. Hornreich, and D. W. Allender	

Thermal relaxation model of surface director gliding in lyotropic liquid crystals	4314
P. Galatola, G. Barbero, and A. K. Zvezdin	
Monte Carlo simulations of solute ordering in nematic liquid crystals: Shape anisotropy and quadrupole-quadrupole interactions as orienting mechanisms	4321
James M. Polson and E. Elliott Burnell	
Spatial dispersion and rotatory power of short-pitch periodic dielectric media	4338
P. Galatola	
Observation and investigation of the ferroelectric subphase with high q_T parameter	4345
Yu. P. Panarin, O. Kalinovskaya, J. K. Vij, and J. W. Goodby	
Magnetic-field alignment of cholesteric liquid-crystalline DNA	4354
D. H. Van Winkle, Arunava Chatterjee, Robert Link, and R. L. Rill	
Metastable structures of cholesteric liquid crystals with negative diamagnetic anisotropy in magnetic fields	4360
Arunava Chatterjee and D. H. Van Winkle	
Generalized Landau-de Gennes theory of uniaxial and biaxial nematic liquid crystals	4367
M. C. J. M. Vissenberg, S. Stallinga, and G. Vertogen	
Normal modes of director fluctuations in a nematic droplet	4378
J. R. Kelly and P. Palfy-Muhoray	
Bilayer smectic order in a mixture of polyphilic liquid crystals	4382
Yushan Shi, Francois G. Tournilhac, and Satyendra Kumar	
Layer thinning transition above the bulk smectic-A-isotropic transition in free-standing liquid-crystal films	4386
P. M. Johnson, P. Mach, E. D. Wedell, F. Lintgen, M. Neubert, and C. C. Huang	

Complex fluids, diffusion-limited aggregation, and dendritic growth

Forced parallel drift of spiral waves in the Belousov-Zhabotinsky reaction	4390
Bernd Schmidt and Stefan C. Müller	
Particulate inclusions in a lamellar phase	4394
P. Sens, M. S. Turner, and P. Pincus	
Local concentration profile of colloidal particles inside a charged cylindrical pore	4406
M. Chávez-Páez, H. Acuña-Campa, L. Yeomans-Reyna, M. Valdez-Covarrubias, and M. Medina-Noyola	
NMR microscopy of pore-space backbones in rock, sponge, and sand in comparison with random percolation model objects	4413
A. Klemm, H.-P. Müller, and R. Kimmich	
Interaction forces in charged colloids: Inversion of static structure factors	4423
Raj Rajagopalan and K. Srinivasa Rao	
Conformation of interacting polymer chains: Effects of temperature, bias, polymer concentration, and porosity ...	4433
Grace M. Foo and R. B. Pandey	
Equilibrium shape of an anisotropic crystal confined between two planar parallel walls	4442
Jean-Christophe Gémard and Patrick Oswald	
Order parameter equations for front transitions: Planar and circular fronts	4450
A. Hagberg, E. Meron, I. Rubinstein, and B. Zaltzman	
Mapping vesicle shapes into the phase diagram: A comparison of experiment and theory	4458
H.-G. Döbereiner, E. Evans, M. Kraus, U. Seifert, and M. Wortis	
Pinned state in a two-dimensional soap froth	4475
O. Herrera, A. Olguín, M. Ortíz, and C. H. Wörner	

Biological physics

Vapnik-Chervonenkis dimension of neural networks with binary weights	4478
Stephan Mertens and Andreas Engel	
Simulation and dynamics of entropy-driven, molecular self-assembly processes	4489
Bernd Mayer, Gottfried Köhler, and Steen Rasmussen	

Criticality and unpredictability in macroevolution	4500
Ricard V. Solé and Susanna C. Manrubia	
Simulation of characteristics and artificial neural network modeling of electroencephalograph time series	4508
D. R. Kulkarni, J. C. Parikh, and R. Pratap	
Lipid domains as obstacles for lateral diffusion in supported bilayers probed at different time and length scales by two-dimensional exchange and field gradient solid state NMR	4512
C. Dolainsky, P. Karakatsanis, and T. M. Bayerl	
Colloidal stability of protein-polymer systems: A possible explanation by hydration forces	4522
J. A. Molina-Bolívar, F. Galisteo-González, and R. Hidalgo-Álvarez	
Self-consistent phonon approaches for the hydrogen bond chain	4531
Yong-li Zhang and Wei-Mou Zheng	
Noise, multistability, and delayed recurrent loops	4536
Jennifer Foss, Frank Moss, and John Milton	
On-line AdaTron learning of unlearnable rules	4544
Jun-ichi Inoue and Hidetoshi Nishimori	
Multifractality and percolation in the coupling space of perceptrons	4552
M. Weigt and A. Engel	
Statics, metastable states, and barriers in protein folding: A replica variational approach	4562
Shoji Takada and Peter G. Wolynes	
Statistical mechanics of neocortical interactions: Canonical momenta indicators of electroencephalography	4578
Lester Ingber	

Plasma physics

M-shell x-ray spectra of laser-produced gold plasmas	4594
K. Honda, K. Mima, and F. Koike	
Elliptically polarized wave induced local growth of instability at an obliquely developed inhomogeneity in a plasma	4602
Rajarshi Bhattacharya, Soumen Mondal, Debjani Dutta, and B. Chakraborty	
Runaway electrons in a tokamak: A free-electron maser	4608
B. Kurzan and K.-H. Steuer	
Generation mechanism of a dipole field by a magnetohydrodynamic dynamo	4617
Akira Kageyama and Tetsuya Sato	
Fluid theory of the boundary of a dusty plasma	4627
J. X. Ma, Jin-yuan Liu, and M. Y. Yu	
Electron-vibration energy exchange models in nitrogen plasma flows	4634
A. Bourdon and P. Vervisch	
Theory of cumulative small-angle collisions in plasmas	4642
K. Nanbu	
Nonlinear reflectivity of an inhomogeneous plasma in the strongly damped regime	4653
Philippe Mounaix, Denis Pesme, and Michel Casanova	

Physics of beams

Locally accurate dynamical Euclidean group	4665
Étienne Forest	
Smith-Purcell radiation from electrons moving parallel to a grating at oblique incidence to the rulings	4675
O. Haeberlé, P. Rullhusen, J.-M. Salomé, and N. Maene	
Propagation of the equilibrium electron beam in a free-electron laser with an axial guide magnetic field	4684
Shi-Chang Zhang and John Elgin	

Simulation study of halo formation in breathing round beams	4694
Hiromi Okamoto and Masanori Ikegami	

Classical physics, including nonlinear media

Small-amplitude excitations in a deformable discrete nonlinear Schrödinger equation	4706
V. V. Konotop and M. Salerno	
Solitons in crystalline polyethylene: Isolated chains in the transconformation	4713
L. I. Manevitch and A. V. Savin	
Stress distribution in static two-dimensional granular model media in the absence of friction	4720
S. Luding	
Solitary waves in Bragg gratings with a quadratic nonlinearity	4730
T. Peschel, U. Peschel, F. Lederer, and B. A. Malomed	
Local modes and localization in a multicomponent nonlinear lattice	4740
Kyle Forinash, Thierry Cretegny, and Michel Peyrard	
Dynamic fragmentation of a two-dimensional brittle material with quenched disorder	4757
Jan Åström, Markku Kellomäki, and Jussi Timonen	
Phase transitions and anisotropic responses of planar triangular nets under large deformation	4762
Dennis E. Discher, David H. Boal, and S. K. Boey	
Polarized dark solitons in isotropic Kerr media	4773
Adrian P. Sheppard and Yuri S. Kivshar	
Pulse solutions of the cubic-quintic complex Ginzburg-Landau equation in the case of normal dispersion	4783
J. M. Soto-Crespo, N. N. Akhmediev, V. V. Afanasjev, and S. Wabnitz	

Computational physics

Modeling the optical constants of solids using acceptance-probability-controlled simulated annealing with an adaptive move generation procedure	4797
Aleksandra B. Djurišić, Aleksandar D. Rakić, and Jovan M. Elazar	

BRIEF REPORTS

Synchronization of a chaotic map in the presence of common noise	4804
M. K. Ali	
Aging in models of nonlinear diffusion	4806
Daniel A. Stariolo	
Underdamped diffusion in the egg-carton potential	4810
G. Caratti, R. Ferrando, R. Spadacini, and G. E. Tommei	
Effect of a uniform bias force on the Brownian movement in double-well potentials	4812
W. T. Coffey, D. S. F. Crothers, and Yu. P. Kalmykov	
Influence of external field on layer-thinning transitions in free-standing smectic-A films	4816
L. V. Mirantsev	
Stark broadening observations for a cool, dense plasma	4820
R. Kenneth Hutcherson and Alan W. DeSilva	
Weighted-ensemble simulated annealing: Faster optimization on hierarchical energy surfaces	4822
Gary A. Huber and J. Andrew McCammon	

COMMENTS

Comment on "Chemically frozen phase separation in an adsorbed layer"	4826
V. P. Zhdanov	

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 55, NUMBER 4

APRIL 1997

Reply to “Comment on ‘Chemically frozen phase separation in an adsorbed layer’ ”	4828
J. Verdasca, G. Dewel, and P. Borckmans	

ERRATA

Erratum: Closed-form solution for inverse problems of Fermi systems [Phys. Rev. E 48 , 1558 (1993)]	4830
Nan-xian Chen, Zhang Chen-fu, Zhou Mai, Ren Guang-bao, and Zhao Wen-bin	
Erratum: General formula for stationary or statistically homogeneous probability density functions [Phys. Rev. E 53 , 5899 (1996)]	4830
Emily S. C. Ching	
Erratum: Computer simulations of domain growth and phase separation in two-dimensional binary immiscible fluids using dissipative particle dynamics [Phys. Rev. E 54 , 5134 (1996)]	4831
P. V. Coveney and K. E. Novik	
Cumulative Author Index	4832
