THIRD SERIES, VOLUME 55, NUMBER 6
PARTS A AND B

CONTENTS

JUNE 1997

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 6315–7062, and Part B pages 7063–7842.

PART A

Note to Reader i

RAPID COMMUNICATIONS

Aperiodic stochastic resonance with chaotic input signals in excitable systems R6315
C. Eichwald and J. Walleczek

Dynamics of two interacting particles in classical billiards R6319
Lilia Meza-Montes, and Sergio E. Ulloa

Three-dimensional self-avoiding convex polygons R6323
M. Bousquet-Mélou and A. J. Guttmann

Reflection of nonlinear waves from a domain boundary R6327
A. La Porta and C. M. Surko

Impossibility of the antidynamo theorem for generic planar periodic flows R6331
Manuel Núñez

A priori derivation of the lattice Boltzmann equation R6333
Xiaoyi He and Li-Shi Luo

Induced hexatic phase in a free-standing two-layer *N*-(4-*n*-butoxybenzylidene)-4-*n*-octylaniline film R6337
C. F. Chou, A. J. Jin, C. Y. Chao, S. W. Hui, C. C. Huang, and J. T. Ho

Positive feedback driven by concentration fluctuations in asymmetrically photo-cross-linked polymer mixtures ... R6340
Q. Tran-Cong, A. Harada, K. Kataoka, T. Ohta, and O. Urakawa

Dynamics of phase separation in polymer solutions under shear flow R6344
Tao Sun, Anna C. Balazs, and David Jasnow

Aging of porous media following fluid invasion, freezing, and thawing R6348
E. Salmon, M. Ausloos, and N. Vandewalle

Plasma density determination by transmission of laser-generated surface harmonics R6352
P. Gibbon, D. Altenbernd, U. Teubner, E. Förster, P. Audebert, J.-P. Geindre, J.-C. Gauthier, and A. Mysyrowicz

Color temperature measurement in laser-driven shock waves R6356
T. A. Hall, A. Benuzzi, D. Batani, D. Beretta, S. Bossi, B. Faral, M. Koenig, J. Krishnan, Th. Löwer, and M. Mahdieh

Soliton tunneling R6360
G. Kälbermann

General methods of statistical physics

Phonon-assisted Boltzmann kinetics of a Bose gas: Generic solution for $T \leqslant T_c$ 6363
A. L. Ivanov, C. Ell, and H. Haug

Energy-level statistics and time relaxation in quantum systems 6370
J. L. Gruver, J. Aliaga, Hilda A. Cerdeira, Pier A. Mello, and A. N. Proto

Renormalization group of probabilistic cellular automata with one absorbing state 6377
M. J. de Oliveira and J. E. Satulovsky

Numerical study on ergodic properties of triangular billiards 6384
Roberto Artuso, Giulio Casati, and Italo Guarneri

$2n$-point renormalized coupling constants in the three-dimensional Ising model: Estimates by high temperature series to order β^{17} 6391
P. Butera and M. Comi

(Continued)

1063-651X(199706)55:6:B;1-D

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 6** **JUNE 1997**

Simple hierarchical systems: Stability, self-organized criticality, and catastrophic behavior 6397
E. M. Blanter and M. G. Shnirman
Encoding information in chemical chaos by controlling symbolic dynamics 6404
Erik M. Bollt and Milos Dolnik
Andronov bifurcation and excitability in semiconductor lasers with optical feedback 6414
M. Giudici, C. Green, G. Giacomelli, U. Nespolo, and J. R. Tredicce
Summing graphs for random band matrices 6419
P. G. Silvestrov
Spontaneous generation of discrete scale invariance in growth models 6433
Y. Huang, G. Ouillon, H. Saleur, and D. Sornette
Dynamical behavior of Lagrangian systems on Finsler manifolds 6448
Maria Di Bari, Dino Boccaletti, Piero Cipriani, and Giuseppe Pucacco
Roughening of a growing surface on a crystal with correlated disorder: Influence of nonlinearity 6459
Sutapa Mukherji
Optimal reconstruction of attractors from experimental time series by the wavering product 6467
W.-D. Sponheimer and C. Wilke
Dynamics and thermodynamics of delayed population growth 6476
Vicenç Méndez and Juan Camacho
Influence of noise on chaotic laser dynamics 6483
Clif Liu, Rajarshi Roy, Henry D. I. Abarbanel, Zelda Gills, and Ken Nunes
Langevin equations and surface growth 6501
G. Costanza
Classical and quantum decay of one-dimensional finite wells with oscillating walls 6507
A. J. Fendrik and D. A. Wisniacki
Correlations of eigenfunctions in disordered systems 6514
Ya. M. Blanter and A. D. Mirlin
Solvable optimal velocity models and asymptotic trajectory 6519
Ken Nakanishi, Katsumi Itoh, Yuji Igarashi, and Masako Bando
When coherent stochastic resonance appears 6533
Josep M. Porrà
Chaos and order in crossed fields 6540
Jan von Milczewski and T. Uzer
Self-similar bootstrap of divergent series 6552
V. I. Yukalov and S. Gluzman
The Fermi-Pasta-Ulam problem revisited: Stochasticity thresholds in nonlinear Hamiltonian systems 6566
Lapo Casetti, Monica Cerruti-Sola, Marco Pettini, and E. G. D. Cohen
Equilibrium statistical mechanics of one-dimensional Hamiltonian systems with long-range force 6575
Yves Elskens and Mickaël Antoni
Gibbsian versus non-Gibbsian nature of stationary states for Toom probabilistic cellular automata via simulations 6582
Danuta Makowiec
Convex hull violation by superpositions of multifractals 6589
R. Stoop and W.-H. Steeb
Percolation thresholds of the duals of the face-centered-cubic, hexagonal-close-packed, and diamond lattices . . 6593
S. C. van der Marck
Tunnel crisis and the crisis-induced intermittency 6598
H. L. Yang, Z. Q. Huang, and E. J. Ding
Dynamical systems with a Hamiltonian that is a function of momentum moduli: Pseudobilliards 6604
V. M. Eleonsky, V. G. Korolev, and N. E. Kulagin

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 6** **JUNE 1997**

Random matrix theory and classical statistical mechanics: Spin models 6608
H. Meyer and J.-C. Anglès d'Auriac
Synchronization of mutually coupled chaotic systems 6618
D. Y. Tang and N. R. Heckenberg
Critical end point behavior in a binary fluid mixture 6624
Nigel B. Wilding
Persistence in Lévy-flight anomalous diffusion 6632
Damián H. Zanette
Transition between quantum coherence and incoherence 6636
S. P. Strong
Crisis-induced intermittency in truncated mean field dynamos 6641
Eurico Covas and Reza Tavakol
Crossover time of diffusion-limited reactions on a tubular lattice 6646
Ji Li
General method of synchronization 6651
Liu Zonghua and Chen Shigang
Real-space renormalization-group study of the phase transition in a Gaussian model of fractals 6656
Song Li and Z. R. Yang
Solution of the static pair annihilation process 6661
B. Bonnier and R. Brown
Enhancement of the energy resolution in ion-beam experiments with the maximum-entropy method 6667
R. Fischer, M. Mayer, W. von der Linden, and V. Dose
Correlation-hole method for the spectra of superconducting microwave billiards 6674
H. Alt, H.-D. Gräf, T. Guhr, H. L. Harney, R. Hofferbert, H. Rehfeld, A. Richter, and P. Schardt
Aging and its distribution in coarsening processes 6684
L. Frachebourg, P. L. Krapivsky, and S. Redner
Generic spatiotemporal dynamics near codimension-two Turing-Hopf bifurcations 6690
M. Meixner, A. De Wit, S. Bose, and E. Schöll
Traveling Turing patterns in nonlinear neural fields 6698
C. B. Price
Distribution of eigenvalues of certain matrix ensembles 6707
E. Bogomolny, O. Bohigas, and M. P. Pato
Thermodynamic approach to creep and plasticity 6719
Ritva Löfstedt
Brittleness, ductility, and the Griffith crack 6726
Ritva Löfstedt
Stripe Turing structures in a two-dimensional gas discharge system 6731
E. Ammelt, Yu. A. Astrov, and H.-G. Purwins
Group theoretic reduction of Laplacian dynamical problems on fractal lattices 6741
W. A. Schwalm, M. K. Schwalm, and M. Giona
Fokker-Planck description of electron and photon transport in homogeneous media 6753
A. Ziya Akcasu and James Paul Holloway
Classical localization and percolation in random environments on trees 6765
Paul C. Bressloff, Vincent M. Dwyer, and Michael J. Kearney
Modeling leaky faucet dynamics 6776
A. D'Innocenzo and L. Renna
Upper and lower bounds for the ground state entropy of antiferromagnetic Potts models 6791
Robert Shrock and Shan-Ho Tsai
Density and pair correlation function of confined identical particles: The Bose-Einstein case 6795
F. Brosens, J. T. Devreese, and L. F. Lemmens

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 6 JUNE 1997

Time-reversible dissipative attractors in three and four phase-space dimensions 6803
H. A. Posch and Wm. G. Hoover
Velocity and density profiles of granular flow in channels using a lattice gas automaton 6811
Gongwen Peng and Takao Ohta
Continuous time random walks on moving fluids 6821
Albert Compte
Spectral properties of three-dimensional quantum billiards with a pointlike scatterer 6832
T. Shigehara and Taksu Cheon

Classical fluids

Rapid solidification under local nonequilibrium conditions 6845
S. L. Sobolev
Local structure analysis of the hard-disk fluid near melting 6855
A. C. Mitus, H. Weber, and D. Marx
Square cells in gravitational and capillary thermoconvection 6860
V. Regnier, P. C. Dauby, P. Parmentier, and G. Lebon
Geometrical consequences of foam equilibrium 6866
C. Moukarzel
Relaxation of one-dimensional binary mixtures 6881
Pirooz Mohazzabi and Jeffrey R. Schmidt
Pattern selection and the effect of group velocity on interacting oscillatory and stationary instabilities 6887
D. Walgraef
Bubble motion in a horizontal tube and the velocity estimate for curved flames 6898
Vitaliy V. Bychkov
Cellular self-propulsion of two-dimensional dissipative structures and spatial-period tripling Hopf bifurcation 6902
Isabelle Daumont, Klaus Kassner, Chaouqi Misbah, and Alexandre Valance
Velocity-difference probability density functions for Burgers turbulence 6907
S. A. Boldyrev
Frankel equation for turbulent flames in the presence of a hydrodynamic instability 6911
Bruno Denet
Anharmonic potentials in supercooled liquids: The soft-potential model 6917
U. Zürcher and T. Keyes
Convection under rotation for Prandtl numbers near 1: Linear stability, wave-number selection, and pattern dynamics 6928
Yuchou Hu, Robert E. Ecke, and Guenter Ahlers
Rayleigh-Bénard convection in binary-gas mixtures: Thermophysical properties and the onset of convection 6950
Jun Liu and Guenter Ahlers
Successive deceleration in Boltzmann-like traffic equations 6969
C. Wagner
Bifurcations and chaos in an array of forced vortices 6979
R. Braun, F. Feudel, and N. Seehafer
Extended self-similarity in boundary layer turbulence 6985
G. Amati, R. Benzi, and S. Succi
Dynamical scaling in dissipative Burgers turbulence 6989
T. J. Newman
Intermittency and the slow approach to Kolmogorov scaling 7000
B. Holdom
Spectra in helical three-dimensional homogeneous isotropic turbulence 7005
Vadim Borue and Steven A. Orszag

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 6** **JUNE 1997**

Stability analysis of a two-dimensional vortex pattern 7010
I. M. Lansky and T. M. O'Neil
Fragmentation and migration of invasion percolation clusters: Experiments and simulations 7015
G. Wagner, A. Birovljev, P. Meakin, J. Feder, and T. Jøssang
Temporal multiscaling in hydrodynamic turbulence 7030
Victor S. L'vov, Evgenii Podivilov, and Itamar Procaccia
Linear stability of two-dimensional combined buoyant-thermocapillary flow in cylindrical liquid bridges 7036
M. Wanschura, H. C. Kuhlmann, and H. J. Rath
Temperature fluctuations and anomalous scaling in low-Mach-number compressible turbulent flow 7043
Tov Elperin, Nathan Kleeorin, and Igor Rogachevskii
Geometric orbits of surface waves from a circular hydraulic jump 7048
S. H. Hansen, S. Hørlück, D. Zauner, P. Dimon, C. Ellegaard, and S. C. Creagh

PART B

Note to Reader i

Liquid crystals

Fracture in columnar phases 7063
M. Hébert
Linear stability analysis of bifurcations with a spatially periodic, fluctuating control parameter 7068
Joanna Röder, Heinrich Röder, and Lorenz Kramer
Local molecular order in the biaxial smectic mesophase of HpAB: A proton-^{14}N cross relaxation study 7079
E. Anoardo and D. J. Pusiol
Homeotropic surface anchoring of a Gay-Berne nematic liquid crystal 7085
Joachim Stelzer, Lech Longa, and Hans-Rainer Trebin
Statistical theory of elastic constants of biaxial nematic liquid crystals 7090
A. Kapanowski
Induced smectic phase in a nematic liquid crystal mixture 7105
Thein Kyu, Hao-Wen Chiu, and Tisato Kajiyama
Orientational states and phase transitions induced by microtextured substrates 7111
Tie-Zheng Qian and Ping Sheng
High-pressure mesomorphic behavior of a chiral polyacrylate by x-ray diffraction *in situ* 7121
O. Francescangeli, C. Ferrero, M. Lorenzen, P. Bösecke, B. Paci, and R. Caciuffo
Spiral waves in nematic liquid crystals: Experimental analysis of selection rules 7128
A. Vierheilig, C. Chevallard, and J. M. Gilli

Complex fluids, diffusion-limited aggregation, and dendritic growth

Equilibrium model for agglomeration phenomena in solid polydispersions subject to adsorption from liquid solution 7137
Stefano A. Mezzasalma
Displacement of inactive phases by the reactive regime in a lattice gas model for a dimer-monomer irreversible surface reaction 7144
Ezequiel V. Albano
Asymptotic laws and preasymptotic correction formulas for the relaxation near glass-transition singularities 7153
T. Franosch, M. Fuchs, W. Götze, M. R. Mayr, and A. P. Singh
Invasion percolation with memory 7177
Hooshang Kharabaf and Yanis C. Yortsos
Kinetics of a magnetic fluid phase separation induced by an external magnetic field 7192
Andrej Yu. Zubarev and Alexey O. Ivanov
Kinetic theory of jamming in hard-sphere startup flows 7203
R. S. Farr, J. R. Melrose, and R. C. Ball
Model-independent reconstruction of smooth electron density profiles from reflectivity data of liquid surfaces 7212
Chien-Heng Chou, M. J. Regan, P. S. Pershan, and X.-L. Zhou

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 55, NUMBER 6** **JUNE 1997**

Subpicosecond pump-probe absorption of the hydrated electron: Nonlinear response theory and computer simulation 7217
S. Bratos, J.-Cl. Leicknam, D. Borgis, and A. Staib
Phase diagram of hard spheres confined between two parallel plates 7228
Matthias Schmidt and Hartmut Löwen
Phase diagrams of the classical Heisenberg fluid within the extended van der Waals approximation 7242
A. Oukouiss and M. Baus
Self-organization of growing and decaying particles 7253
V. G. Karpov and David W. Oxtoby
Confined fluid between two walls: The case of micelles inside a soap film 7260
Oleg Krichevsky and Joel Stavans
Homogeneous nucleation and growth in the critical three-dimensional Ising regime of a binary polymer blend . . . 7267
G. Müller, D. Schwahn, and T. Springer
High-frequency dielectric relaxation of polyelectrolyte gels 7283
Hiroshi Furusawa, Kohzo Ito, and Reinosuke Hayakawa
Variational calculation of the effective fluid permeability of heterogeneous media 7288
Dionissios T. Hristopulos and George Christakos
Self-organization with traveling waves: A case for a convective torus 7299
Bice S. Martincigh, Cordelia R. Chinake, Tony Howes, and Reuben H. Simoyi
Scaling and scaling crossover for transport on anisotropic fractal structures 7304
A. Adrover, W. Schwalm, M. Giona, and D. Bachand
Numerical studies of second- and fourth-order correlation functions in cluster-cluster aggregates in application to optical scattering 7313
Vadim A. Markel, Vladimir M. Shalaev, Evgeni Y. Poliakov, and Thomas F. George

Biological physics

Noise and randomlike behavior of perceptrons: Theory and application to protein structure prediction 7334
M. Compiani, P. Fariselli, and R. Casadio
Dynamical phase diagrams of neural networks with asymmetric couplings 7344
M. N. Tamashiro, O. Kinouchi, and S. R. Salinas
Relaxation in a perfect funnel 7354
Maxim Skorobogatyy, Hong Guo, and Martin Zuckermann
Conformations of linear DNA 7364
Boris Fain, Joseph Rudnick, and Stellan Östlund
Storage capacity of correlated perceptrons 7369
D. Malzahn, A. Engel, and I. Kanter
Internal-noise-enhanced signal transduction in neuronal systems 7379
Wei Wang and Z. D. Wang
Dynamics of gelatin ablation due to free-electron-laser irradiation 7385
Jerri Tribble, Don C. Lamb, Lou Reinisch, and Glenn Edwards
Calculation of the binding affinity of the anticancer drug daunomycin to DNA by a statistical mechanics approach 7390
Y. Z. Chen and Yong-Li Zhang
Two plateau moduli for actin gels 7396
A. C. Maggs
Properties of associative memory analog neural networks with asymmetric synaptic couplings 7401
Masahiko Yoshioka and Masatoshi Shiino
Effect of drug-binding-induced deformation on the vibrational spectrum of a DNA·daunomycin complex 7414
Y. Z. Chen, A. Szabó, D. F. Schroeter, J. W. Powell, S. A. Lee, and E. W. Prohofsky

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 6 JUNE 1997

Effect of random synaptic dilution in oscillator neural networks 7424
Toshio Aoyagi and Katsunori Kitano
Raman studies of the C═C and C═O stretching modes in various cholesteryl alkanoates 7429
S. Bresson, D. Bormann, and B. Khelifa
Finite size scaling of the Bayesian perceptron 7434
Arnaud Buhot, Juan-Manuel Torres Moreno, and Mirta B. Gordon

Plasma physics

Trajectory of the wave field centroid 7441
A. G. Litvak, V. A. Mironov, and E. M. Sher
Negative-energy perturbations in general axisymmetric and helical Maxwell-Vlasov equilibria 7449
Darío Correa-Restrepo and Dieter Pfirsch
Quantum theory of frequency shifts of an electromagnetic wave interacting with a plasma 7457
A. Laio, G. Rizzi, and A. Tartaglia
Anomalous loss of ionization in argon-hydrogen plasma studied by fast flow glow discharge mass spectrometry . . 7462
R. S. Mason, P. D. Miller, and I. P. Mortimer
Demixing in free-burning arcs 7473
A. B. Murphy
Heating and phase transitions of dust-plasma crystals in a flowing plasma 7495
Frank Melandsø
Collisional-radiative average-atom model for hot plasmas 7507
Balazs F. Rozsnyai
Weibel instability due to inverse bremsstrahlung absorption 7522
A. Bendib, K. Bendib, and A. Sid
Multiple scale derivation of the relativistic ponderomotive force 7527
E. A. Startsev and C. J. McKinstrie
Two-dimensional nonlocal heating theory of planar-type inductively coupled plasma discharge 7536
N. S. Yoon, S. M. Hwang, and Duk-In Choi

Physics of beams

Numerical study for the two-beam instability due to ions in electron-storage rings 7550
Kazuhito Ohmi
Halo formation and chaos in root-mean-square matched beams propagating through a periodic solenoidal focusing channel 7557
Y. Fink, C. Chen, and W. P. Marable
Envelope analysis of intense relativistic quasilaminar beams in rf photoinjectors: A theory of emittance compensation 7565
Luca Serafini and James B. Rosenzweig
Bunched beam envelope equations including image effects from a cylindrical pipe 7591
Christopher K. Allen and Martin Reiser
Calibration of the polarization of a beam of arbitrary energy in a storage ring 7606
R. E. Pollock, W. A. Dezarn, M. Dzemidzic, J. Doskow, J. G. Hardie, H. O. Meyer, B. v. Przewoski, T. Rinckel, F. Sperisen, W. Haeberli, B. Lorentz, F. Rathmann, T. Wise, and P. V. Pancella

Classical physics, including nonlinear media

Nonlinear dynamics of classical Heisenberg chains 7612
V. Constantoudis and N. Theodorakopoulos

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 55, NUMBER 6 JUNE 1997

Photonic band gap phenomenon and optical properties of artificial opals 7619
V. N. Bogomolov, S. V. Gaponenko, I. N. Germanenko, A. M. Kapitonov, E. P. Petrov, N. V. Gaponenko, A. V. Prokofiev, A. N. Ponyavina, N. I. Silvanovich, and S. M. Samoilovich
Perturbation theory for solitons of the Manakov system 7626
V. S. Shchesnovich and E. V. Doktorov
Unstable higher modes of a three-dimensional nonlinear Schrödinger equation 7636
Darran E. Edmundson
Propagation of plane waves and of waveguide modes in quasiperiodic dielectric heterostructures 7645
R. Pelster, V. Gasparian, and G. Nimtz
Generalized eikonal equation in excitable media 7656
M. Wellner and A. M. Pertsov
Instability of continuous waves and rotating solitons in waveguide arrays 7662
S. Darmanyan, I. Relke, and F. Lederer
Statistical mechanics of cracks: Fluctuations, breakdown, and asymptotics of elastic theory 7669
Alex Buchel and James P. Sethna
Long-range self-affine correlations in a random soliton gas 7691
L. E. Guerrero, E. López-Atencio, and J. A. González
Time-derivative Lorentz materials and their utilization as electromagnetic absorbers 7696
Richard W. Ziolkowski
Vectorial solitary waves in optical media with a quadratic nonlinearity 7704
U. Peschel, C. Etrich, F. Lederer, and B. A. Malomed
Nonresonance optical breathers in nonlinear and dispersive media 7712
G. T. Adamashvili and A. A. Maradudin
Properties of an optical soliton gas 7720
A. Schwache and F. Mitschke

Computational physics

Smart covering for a box-counting algorithm 7726
Marcos Yamaguti and Carmen P. C. Prado
Monte Carlo multiple-scattering simulation and data correction in small-angle static light scattering 7733
Luca Cipelletti

BRIEF REPORTS

Semiclassical analysis of spectral correlations in regular billiards with point scatterers 7741
Olivier Legrand, Fabrice Mortessagne, and Richard L. Weaver
Irrelevance of spatial correlations in models with extremal dynamics 7745
R. Cafiero, A. Gabrielli, and M. Marsili
Simple and exactly solvable model for queue dynamics 7749
Yūki Sugiyama and Hiroyasu Yamada
Effect of correlated flights on particle mobilities during single-file diffusion 7753
David S. Sholl and Kristen A. Fichthorn
Existence of a long time scale in quantum chaos 7757
Giulio Casati, B. V. Chirikov, and O. V. Zhirov
Thermalization of an electron-phonon system in a nonequilibrium state characterized by fractal distribution of phonon excitations 7759
Ismo Koponen
Chaotic family with smooth Lyapunov dependence 7763
R. Stoop and W.-H. Steeb

(Continued)
