THIRD SERIES, VOLUME 56, NUMBER 2 ***CONTENTS*** **AUGUST 1997**

RAPID COMMUNICATIONS

Surface effects in invasion percolation R1291
Raffaele Cafiero, Guido Caldarelli, and Andrea Gabrielli
Geometric magnetism in classical transport theory R1295
Jochen Rau
Distribution function analysis of the structure of depleted particle configurations R1299
Paul R. Van Tassel, Julian Talbot, Pascal Viot, and Gilles Tarjus
High-Reynolds-number thermal turbulence in mercury R1302
A. Naert, T. Segawa, and M. Sano
Sources and sinks separating domains of left- and right-traveling waves: Experiment versus amplitude equations R1306
Roberto Alvarez, Martin van Hecke, and Wim van Saarloos
Surface-induced ordering in ionic and surfacted magnetic fluids R1310
C. Y. Matuo, A. Bourdon, A. Bee, and A. M. Figueiredo Neto
Elasticity of entangled polymer loops: Olympic gels R1314
Thomas A. Vilgis and Matthias Otto
Two-dimensional polymers with random short-range interactions R1318
Ido Golding and Yacov Kantor
Optical nonlinearity enhancement via geometric anisotropy R1322
K. P. Yuen, M. F. Law, K. W. Yu, and Ping Sheng
Solution of the master equation for the Bak-Sneppen model of biological evolution in a finite ecosystem R1326
Yu. M. Pis'mak
Elastohydrodynamic study of actin filaments using fluorescence microscopy R1330
D. Riveline, C. H. Wiggins, R. E. Goldstein, and A. Ott
Linear time-delay feedback control of a pathological rhythm in a cardiac conduction model R1334
Michael E. Brandt, Hue-Teh Shih, and Guanrong Chen
Field distributions in the crossover from ballistic to diffusive wave propagation R1338
A. A. Chabanov and A. Z. Genack

ARTICLES

General methods of statistical physics

Families of graphs with chromatic zeros lying on circles 1342
Robert Shrock and Shan-Ho Tsai
Earthquake statistics and fractal faults 1346
R. Hallgass, V. Loreto, O. Mazzella, G. Paladin, and L. Pietronero
Statistical mechanics of the random *K*-satisfiability model 1357
Rémi Monasson and Riccardo Zecchina
Critical dynamics of nonperiodic Ising chains 1371
Peiqing Tong
Theory of continuum percolation. III. Low-density expansion 1379
Alon Drory, Brian Berkowitz, Giorgio Parisi, and I. Balberg
Global investigation of the influence of the phase of subharmonic excitation of a driven system 1396
Didier Dangoisse, Jean-Christophe Celet, and Pierre Glorieux

(Continued)

1063-651X(199708)56:2;1-I

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 2** **AUGUST 1997**

Scaling laws for symmetry breaking by blowout bifurcation in chaotic systems 1407
Ying-Cheng Lai
Monte Carlo study of cluster-diameter distribution: An observable to estimate correlation lengths 1414
Wolfhard Janke and Stefan Kappler
Combined influence of random and regular external fields on long-range electron transfer 1421
I. A. Goychuk, E. G. Petrov, and V. May
Ising model on a Cayley tree with competing and aperiodic interactions 1429
R. F. S. Andrade and S. R. Salinas
Fluid n-vector model and its hydrodynamic ordering processes 1437
H. Furukawa
Biased continuous time random walks between parallel plates 1445
Albert Compte, Ralf Metzler, and Juan Camacho
Percolation and cluster structure parameters: The enhanced Hoshen-Kopelman algorithm 1455
J. Hoshen, M. W. Berry, and K. S. Minser
Spatiotemporal fractal pattern in interfacial motion with quenched disorder 1461
Ning-Ning Pang and N. Y. Liang
Control of noise-induced oscillations of a pendulum with a randomly vibrating suspension axis 1465
P. S. Landa, A. A. Zaikin, M. G. Rosenblum, and J. Kurths
Perturbation theory for the Rosenzweig-Porter matrix model 1471
Alexander Altland, Martin Janssen, and Boris Shapiro
Harmonic structure of one-dimensional quadratic maps 1476
G. Pastor, M. Romera, and F. Montoya
Generalized Bloch equations and dissipation of longitudinal magnetic-field energy 1484
Anatoly Yu. Smirnov
Stationary states and phase diagram for a model of the Gunn effect under realistic boundary conditions 1490
G. Gomila, J. M. Rubí, I. R. Cantalapiedra, and L. L. Bonilla
Asymptotic analysis of the Gunn effect with realistic boundary conditions 1500
L. L. Bonilla, I. R. Cantalapiedra, G. Gomila, and J. M. Rubí
Adsorption of a macromolecule in an external field: An exactly solvable model with bicritical behavior 1511
Leonid I. Klushin, Aleksander M. Skvortsov, and Aleksey A. Gorbunov
Continuum model description of thin-film growth morphology 1522
Chung-Yu Mou and J. W. P. Hsu
Evolving artificial neural networks to control chaotic systems 1531
Eric R. Weeks and John M. Burgess
Geometrical resonance analysis of chaos suppression in the bichromatically driven van der Pol oscillator 1541
R. Chacón, M. Sánchez, and J. A. Martínez
Dynamics and transitions of the coupled Lorenz system 1550
Hsien-Chen Ma, Chien-Chong Chen, and Bai-Wei Chen
Symbolic dynamics of the stadium billiard 1556
Wei-Mou Zheng
Nonclassical dimension-dependent kinetics of a photobleaching reaction in a focused laser beam ''phototrap'' . . . 1561
Anna L. Lin, Eric Monson, and Raoul Kopelman
Clustering dynamics in globally coupled map lattices 1567
Fagen Xie and Gang Hu
Order parameter and segregated phases in a sandpile model with two particle sizes 1571
Brigita Urbanc and Luis Cruz
Attractor splitting induced by resonant perturbations 1580
V. N. Chizhevsky, R. Corbalán, and A. N. Pisarchik
Synchronization of a conservative map 1585
Liu Zonghua and Chen Shigang

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 2 AUGUST 1997

Large-scale simulations of the Zhang sandpile model 1590
S. Lübeck
Generalized synchronization of spatiotemporal chemical chaos 1595
P. Parmananda
Digital communication robust to transmission error via chaotic synchronization based on contraction maps 1599
Chang-song Zhou and Tian-lun Chen
Stretch-twist-fold and *ABC* nonlinear dynamos: Restricted chaos 1605
Samuel I. Vainshtein, Roald Z. Sagdeev, and Robert Rosner
Bifurcation to strange nonchaotic attractors 1623
Tolga Yalçınkaya and Ying-Cheng Lai
Transition to spatiotemporal chaos in the damped Kuramoto-Sivashinsky equation 1631
K. R. Elder, J. D. Gunton, and Nigel Goldenfeld
Influence of noise near blowout bifurcation 1635
Peter Ashwin and Emily Stone

Classical fluids

Casimir forces in binary liquid mixtures 1642
Michael Krech
Diffusion in spatially and temporarily inhomogeneous media: Effects of turbulent mixing 1660
H. Lehr, F. Sagués, and J. M. Sancho
Structural and dynamical properties of the percolation backbone in two and three dimensions 1667
Markus Porto, Armin Bunde, Shlomo Havlin, and H. Eduardo Roman
Static and dynamic properties of dissipative particle dynamics 1676
C. A. Marsh, G. Backx, and M. H. Ernst
Binary tree models of high-Reynolds-number turbulence 1692
Erik Aurell, Emmanuel Dormy, and Peter Frick
Origin of waves in surface-tension-driven convection 1699
Angel Garcimartín, Nathalie Mukolobwiez, and François Daviaud
Weakly nonlinear analysis of electroconvection in a suspended fluid film 1706
V. B. Deyirmenjian, Zahir A. Daya, and Stephen W. Morris
Invading interfaces and blocking surfaces in high-dimensional disordered systems 1714
Omri Gat and Zeev Olami
Behavior of the reaction front for $A+B\rightarrow C$ diffusion-reaction systems: An analytic approach 1724
Miguel A. Rodriguez and Horacio S. Wio
Reaction-diffusion fronts under stochastic advection 1729
A. C. Martí, F. Sagués, and J. M. Sancho
Transport far from equilibrium: Uniform shear flow 1733
Mirim Lee and James W. Dufty
Universality of the Kolmogorov constant in numerical simulations of turbulence 1746
P. K. Yeung and Ye Zhou
Long-tailed probability distributions in turbulent-pipe-flow mixing 1753
J. E. Guilkey, A. R. Kerstein, P. A. McMurtry, and J. C. Klewicki
Static and dynamic structure of liquid metals: Role of the different parts of the interaction potential 1759
M. Canales and J. A. Padró

Liquid crystals

Photoinduced molecular reorientation of absorbing liquid crystals 1765
L. Marrucci and D. Paparo
Phase diagram of cholesteric liquid crystals in a field 1773
R. Seidin, D. Mukamel, and D. W. Allender

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 2 AUGUST 1997

Dynamics of cylindrical domain walls in nematic liquid crystals 1784
Joachim Stelzer and Henryk Arodź
Dynamics of kinks in smectic-*C* liquid crystals in periodically varying external fields 1791
Sreejith Sukumaran and G. S. Ranganath
Fokker-Planck calculations of the viscosities of biaxial fluids 1804
Martin Kröger and Shaun Sellers
Quasicritical heat capacity at a smectic-*A*–hexatic-*B* phase transition 1808
H. Haga, Z. Kutnjak, G. S. Iannacchione, S. Qian, D. Finotello, and C. W. Garland
Arrays of nematic point defects evolving towards neutral equilibria 1819
G. Guidone Peroli and E. G. Virga
Anchoring and droplet deformation in polymer dispersed liquid crystals: NMR study in an electric field 1825
M. Ambrožič, P. Formoso, A. Golemme, and S. Žumer
Relating domain shape to growth velocity anisotropy: Inherent symmetry of the Wulff construction 1833
Qi Jiang, Joseph E. Maclennan, and Noel A. Clark
Measurements of surface elasticity and thickness of 4′-*n*-octyl-4-cyanobiphenyl film at an air-water interface ... 1838
Naoto Sakamoto, Keiji Sakai, and Kenshiro Takagi
X-ray reflectivity study of layering transitions and the internal multilayer structure of films of three-block organosiloxane amphiphilic smectic liquid crystals at the air-water interface 1844
M. Ibn-Elhaj, H. Riegler, H. Möhwald, M. Schwendler, and C. A. Helm

Complex fluids, diffusion-limited aggregation, and dendritic growth

Quasicrystals and strong interactions between square modes 1853
H. G. Solari and G. B. Mindlin
Boojums and the shapes of domains in monolayer films 1859
Jiyu Fang, Ellis Teer, Charles M. Knobler, Kok-Kiong Loh, and Joseph Rudnick
Rheology, birefringence, and small-angle neutron scattering in a charged micellar system: Evidence of a shear-induced phase transition 1869
E. Cappelaere, J. F. Berret, J. P. Decruppe, R. Cressely, and P. Lindner
Thermal undulations in salt-free charged lamellar phases: Theory versus experiment 1879
Renko de Vries
Hydrodynamic fluctuations, nonequilibrium equations of state, and the shift of the spinodal line in polymer solutions under flow 1887
M. Criado-Sancho, J. Casas-Vázquez, and D. Jou
Nonlinear response of membranes to pinning sites 1891
R. Menes and S. A. Safran
Nonequilibrium relaxation of a stretched polymer chain 1900
Yu-Jane Sheng, Pik-Yin Lai, and Heng-Kwong Tsao
Incomplete symmetry breaking and anomolous crystallization kinetics at close-packed crystal-liquid interfaces ... 1910
Rita Khanna and Peter Harrowell
Structure and arrangement of clusters in cluster aggregation 1918
M. D. Haw, W. C. K. Poon, and P. N. Pusey
Translational diffusion of liquids at surfaces of microporous materials: Theoretical analysis of field-cycling magnetic relaxation measurements 1934
J.-P. Korb, M. Whaley-Hodges, and R. G. Bryant
Monomer-mediated relaxation in living polymers 1946
A. Milchev, Y. Rouault, and D. P. Landau
Four-point correlation functions and average Gaussian curvature in microemulsions 1954
A. Ciach

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 2** **AUGUST 1997**

Size of microvesicles from charged surfactant bilayers: Neutron scattering data compared to an electrostatic model 1965
J. Oberdisse and G. Porte

Slowly driven sandpile formation with granular mixtures 1976
D. A. Head and G. J. Rodgers

Evaluation of thermodynamic functions of elemental crystals and liquids 1981
Duane C. Wallace

Monolayer flow and in-plane orientation induced by a rotating disk in Langmuir and Langmuir-Blodgett films of a merocyanine dye 1987
Keiichi Ikegami, Christophe Mingotaud, and Pierre Delhaés

Investigation of apparent correlated motion of Brownian particles 1998
Richard V. Durand and Carl Franck

Molecular dynamics studies of grain segregation in sheared flow 2012
D. Hirshfeld and D. C. Rapaport

Internal anisotropy of collision cascades 2019
F. Kun and G. Bardos

Sorting of Brownian particles by the pulsed application of an asymmetric potential 2025
L. Gorre-Talini, S. Jeanjean, and P. Silberzan

Capillary penetration in fibrous matrices studied by dynamic spiral magnetic resonance imaging 2035
Atsushi Takahashi, Mats Häggkvist, and Tie-Qiang Li

Biological physics

Phase and frequency shifts in a population of phase oscillators 2043
Peter Tass

Steady state plane wave propagation speed in excitable media 2061
Yuri B. Chernyak

Streaming instability of slime mold amoebae: An analytical model 2074
Thomas Höfer and Philip K. Maini

Plasma physics

Relaxation of two-temperature plasma 2081
A. V. Bobylev, I. F. Potapenko, and P. H. Sakanaka

Magnetic flux tube tunneling 2094
R. B. Dahlburg, S. K. Antiochos, and D. Norton

Effect of ionization and recombination coefficients on the charge-state distribution of ions in laser-produced aluminum plasmas 2104
G. P. Gupta and B. K. Sinha

Comparison of soft-x-ray spectra from optical-field-ionized plasmas generated with linearly and elliptically polarized femtosecond laser pulses 2112
Georg Pretzler and Ernst E. Fill

Hopf bifurcations in balance equations of glow discharges 2118
B.-P. Koch, N. Goepp, and B. Bruhn

Dephasing time of an electron accelerated by a laser pulse 2130
C. J. McKinstrie and E. A. Startsev

Electron attachment to O_2 molecules in dense helium and argon gases 2137
Dino Neri, A. F. Borghesani, and M. Santini

Interaction of an electromagnetic wave with a rapidly created spatially periodic plasma 2143
S. P. Kuo and James Faith

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 2 AUGUST 1997

Implicit, partially linearized, electromagnetic particle simulation of plasma drift-wave turbulence 2151
Bruce I. Cohen and Andris M. Dimits

Physics of beams

Harmonic millimeter radiation from a microwave free-electron-laser amplifier 2161
Y-H. Liu and T. C. Marshall

Classical physics, including nonlinear media

Wave-function method for a waveguide with centered circular diaphragm 2166
N. Marinescu
Scattering amplitude for a plane angular sector 2172
Ahmad T. Abawi and Roger F. Dashen
Theory of force-free electromagnetic fields. I. General theory 2181
Toshio Uchida
Theory of force-free electromagnetic fields. II. Configuration with symmetry 2198
Toshio Uchida
Inelastic collision and switching of coupled bright solitons in optical fibers 2213
R. Radhakrishnan, M. Lakshmanan, and J. Hietarinta

Computational physics

Use of fast-Fourier-transform computational methods in radiation transport 2217
Burke Ritchie, Pieter G. Dykema, and Dennis Braddy
Generalized-ensemble Monte Carlo method for systems with rough energy landscape 2228
Ulrich H. E. Hansmann and Yuko Okamoto
Algorithm for the simulation of particle suspensions with inertia effects 2234
W. Kalthoff, S. Schwarzer, and H. J. Herrmann
Stability of lattice Boltzmann methods in hydrodynamic regimes 2243
Rodney A. Worthing, Joel Mozer, and Guy Seeley

BRIEF REPORTS

Berry's conjecture and information theory 2254
C. Jarzynski
Scattering matrices with block symmetries 2257
Karol Życzkowski
Spectral statistics for the evolution operator of a quantum particle showing chaotic diffusion of the coordinate . . . 2261
A. R. Kolovsky
Response of the Hopfield-Little model in an applied field 2265
Prabodh Shukla
Supersymmetric Fokker-Planck strict isospectrality 2269
Haret C. Rosu
Synchronization of spatiotemporal chaos with positive conditional Lyapunov exponents 2272
J. W. Shuai, K. W. Wong, and L. M. Cheng
Stabilization of coherent oscillations in spatially extended dynamical systems 2276
P.-M. Binder and Juan F. Jaramillo
Passive scalar advected by a very irregular random velocity field 2279
D. Gutman
Anomalous flow profile due to the curvature effect on slip length 2282
Kevin W. Tibbs, Florence Baras, and Alejandro L. Garcia

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 2** **AUGUST 1997**

Complete phase diagram for coherent vortex formation in a two-dimensional inviscid fluid in an annulus 2284
Peilong Chen and M. C. Cross
Enhancement of the reactivity by chaotic mixing 2287
O. Paireau and P. Tabeling
Tracer limit in a gas mixture under shear flow with repulsive interactions 2291
C. Marín, V. Garzó, and A. Santos
Comparison between densitometer and dilatometer measurements in liquid-crystal phases 2295
A. A. Barbosa and A. J. Palangana
Stability and phase transitions of single-molecular-layer free-standing liquid-crystal films 2298
M. Veum, C. C. Huang, C. F. Chou, and V. Surendranath
Slow dynamics of structure and fluctuations in supercooled colloidal fluids 2302
Michio Tokuyama, Yoshihisa Enomoto, and Irwin Oppenheim
Simulations of denaturation of adsorbed proteins 2306
V. P. Zhdanov and B. Kasemo
Universality in dynamic critical phenomena 2310
Fu-Gao Wang and Chin-Kun Hu
Evolution of electron temperature and electron density in indirectly driven spherical implosions 2314
N. C. Woolsey, B. A. Hammel, C. J. Keane, A. Asfaw, C. A. Back, J. C. Moreno, J. K. Nash, A. Calisti, C. Mossé, R. Stamm, B. Talin, L. Klein, and R. W. Lee
Acoustic resonant scattering by an ellipsoid air bubble in a liquid 2318
Zhen Ye
Vector–wave-function theory of uniaxial bianisotropic semiconductor material 2321
Dajun Cheng

COMMENTS

Comment on ‘‘Quantum suppression of chaos in the spin-boson model’’ 2325
Luca Bonci, Roberto Roncaglia, Bruce J. West, and Paolo Grigolini
Reply to ‘‘Comment on ‘Quantum suppression of chaos in the spin-boson model’ ’’ 2329
G. A. Finney and J. Gea-Banacloche
