THIRD SERIES, VOLUME 56, NUMBER 3
PARTS A AND B

CONTENTS

SEPTEMBER 1997

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 2339–3020, and Part B pages 3021–3740.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Exact solution of a two-dimensional random Ising model R2339
Maurizio Serva
Analysis of a dissipative model of self-organized criticality with random neighbors R2343
Marie-Line Chabanol and Vincent Hakim
Universal macroscopic background formation in surface super-roughening R2347
H.-W. Lee and Doochul Kim
Rectification by hopping motion through nonsymmetric potentials with strong bias R2351
K. W. Kehr, K. Mussawisade, T. Wichmann, and W. Dieterich
Noise, order, and spatiotemporal intermittency R2355
H. L. Yang, Z. Q. Huang, and E. J. Ding

Classical fluids

Chaotic nucleation of metastable domains R2359
M. Argentina and P. Coullet
Pressure statistics for locally isotropic turbulence R2363
Reginald J. Hill and Oluş N. Boratav
Propagation of surface deformation coupled with convection waves under the excitation of a chemical wave train R2367
Tatsunari Sakurai, Etsuro Yokoyama, and Hidetoshi Miike
Towards a simple model of compressible Alfvénic turbulence R2371
M. V. Medvedev and P. H. Diamond

Liquid crystals

Weakly nonlinear analysis of the secondary bimodal instability in planar nematic convection R2375
Emmanuel Plaut and Roland Ribotta

Complex fluids, diffusion-limited aggregation, and dendritic growth

Self-organized percolation R2379
A. M. Alencar, J. S. Andrade, Jr., and L. S. Lucena
Crossover of a block copolymer brush in a polymer melt from a stretched to collapsed conformation R2383
Robert Oslanec, Petr Vlcek, William A. Hamilton, and Russell J. Composto

Biological physics

Scale-similar activity in the brain R2387
E. Novikov, A. Novikov, D. Shannahoff-Khalsa, B. Schwartz, and J. Wright
Dynamics of a polyampholyte hooked around an obstacle R2390
H. Schiessel, I. M. Sokolov, and A. Blumen

(Continued)

1063-651X(199709)56:3:A;1-7

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 3 SEPTEMBER 1997

Plasma physics

Channeling of intense laser beams in underdense plasmas R2394
M. D. Feit, J. C. Garrison, and A. M. Rubenchik

ARTICLES

General methods of statistical physics

Data-based control trajectory planning for nonlinear systems 2398
Carl Rhodes, Manfred Morari, Lev S. Tsimring, and Nikolai F. Rulkov
Nonequilibrium phase transition in the kinetic Ising model: Critical slowing down and the specific-heat singularity 2407
Muktish Acharyya
Target patterns arising from the short-wave instability in near-critical regimes of reaction-diffusion systems 2412
Arkady B. Rovinsky, Anatol M. Zhabotinsky, and Irving R. Epstein
Finite-size scaling of the density of zeros of the partition function in first- and second-order phase transitions 2418
Richard J. Creswick and Seung-Yeon Kim
Time series investigations on an experimental system driven by phase transitions 2423
M. Frank and M. Schmidt
Ergodic properties and equilibrium of one-dimensional self-gravitating systems 2429
Kenneth R. Yawn and Bruce N. Miller
Topological proof for the Alexander-Orbach conjecture 2437
Alexander V. Milovanov
Coadsorption of two monomer species on a square lattice with first- and second-neighbor interactions 2447
Alain J. Phares, Francis J. Wunderlich, Joseph P. Martin, Patrick M. Burns, and Gintaras K. Duda
Reversal effects in stochastic kink dynamics 2457
A. V. Savin, G. P. Tsironis, and A. V. Zolotaryuk
Phase transitions in a nonequilibrium percolation model 2467
Siegfried Clar, Barbara Drossel, Klaus Schenk, and Franz Schwabl
Correlations between resonances in a statistical scattering model 2481
T. Gorin, F.-M. Dittes, M. Müller, I. Rotter, and T. H. Seligman
Transport properties in disordered ratchet potentials 2492
F. Marchesoni
Quantum scattering from arbitrary boundaries 2496
M. G. E. da Luz, A. S. Lupu-Sax, and E. J. Heller
Curvature fluctuations and the Lyapunov exponent at melting 2508
Vishal Mehra and Ramakrishna Ramaswamy
Stochastic resonance in maps and coupled map lattices 2518
Prashant M. Gade, Renuka Rai, and Harjinder Singh
Active walker model for the formation of human and animal trail systems 2527
Dirk Helbing, Frank Schweitzer, Joachim Keltsch, and Péter Molnár
Relaxation fluctuations about an equilibrium in quantum chaos 2540
Arul Lakshminarayan
Cluster, backbone, and elastic backbone structures of the multiple invasion percolation 2548
Roberto N. Onody and Reginaldo A. Zara
Analytic calculation of arbitrary matrix elements for the boson exponential quadratic operator 2553
Jian-wei Pan, Qin-xi Dong, Yong-de Zhang, Guang Hou, and Xiang-bin Wang
Short time expansion for first passage distributions 2560
Reuven Zeitak

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 3** **SEPTEMBER 1997**

Selection and stabilization of spatiotemporal patterns in two-dimensional coupled map lattices 2568
Yu Jiang, A. Antillón, P. Parmananda, and J. Escalona
Experimental evidence of characteristic relations of type-I intermittency in an electronic circuit 2573
Chil-Mim Kim, Geo-Su Yim, Yeon Soo Kim, Jeong-Moog Kim, and H. W. Lee
Stretched relaxation after switching off the strong electric field in a near-critical solution under high pressure 2578
Sylwester J. Rzoska, Jerzy Ziolo, and Aleksandra Drozd-Rzoska
Dichotomously switched phase flows 2582
Simon J. Fraser and Raymond Kapral
Symmetry between laminar and burst phases for on-off intermittency 2592
A. Čenys, A. N. Anagnostopoulos, and G. L. Bleris
Shift in the velocity of a front due to a cutoff 2597
Eric Brunet and Bernard Derrida
Correlations in sea-level elevations 2605
P. Dimon, J. D. Pietrzak, and H. Svensmark
Burst avalanches in solvable models of fibrous materials 2615
M. Kloster, A. Hansen, and P. C. Hemmer
Adhesion of solids 2626
Maxim Vergeles, Amos Maritan, Joel Koplik, and Jayanth R. Banavar
Nonlinear dynamics of coupled charged rotators 2635
Shinji Chiba and Yasuji Sawada
Onset of oscillatory instabilities under stochastic modulation 2649
François Drolet and Jorge Viñals
First-order nonequilibrium phase transition in a spatially extended system 2658
R. Müller, K. Lippert, A. Kühnel, and U. Behn
Generalized functional-integral approach to time evolution of a coupled photon system 2663
Feng Peng
Stochastic master-equation approach to aggregation in freeway traffic 2666
R. Mahnke and N. Pieret
Phase transitions in two-variable coupled map lattices 2672
Yu Jiang
Universality class for a one-dimensional evolution model 2676
L. Anton
Distribution of the wave function inside chaotic partially open systems 2680
P. Šeba, F. Haake, M. Kuś, M. Barth, U. Kuhl, and H.-J. Stöckmann
Nonequilibrium time evolution in quantum field theory 2687
Christof Wetterich
Ray splitting in a class of chaotic triangular step billiards 2691
A. Kohler, G. H. M. Killesreiter, and R. Blümel
Persistence exponents for fluctuating interfaces 2702
J. Krug, H. Kallabis, S. N. Majumdar, S. J. Cornell, A. J. Bray, and C. Sire
Stationary, dynamical, and chaotic states of the two-dimensional damped Kuramoto-Sivashinsky equation 2713
Marco Paniconi and K. R. Elder
Geometric interpretation of chaos in two-dimensional Hamiltonian systems 2722
Henry E. Kandrup
Ground-state entropy of Potts antiferromagnets: Bounds, series, and Monte Carlo measurements 2733
Robert Shrock and Shan-Ho Tsai
Synchronization of spatiotemporal chaos and its applications 2738
Gang Hu, Jinghua Xiao, Junzhong Yang, Fagen Xie, and Zhilin Qu

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 3** **SEPTEMBER 1997**

Two-time correlation functions of a harmonic system nonbilinearly coupled to a heat bath: Spontaneous Raman spectroscopy 2747
K. Okumura and Y. Tanimura
Two-dimensional frustrated Ising model with four phases 2751
M. Pasquini and M. Serva
Vortex velocity pair correlations 2757
Gene F. Mazenko
Dependence of Barkhausen pattern reproducibility on hysteresis loop size 2776
J. R. Petta, M. B. Weissman, and G. Durin
Correlation functions in first-order phase transitions 2781
V. Garrido and D. Crespo
Critical line of an anisotropic Ising antiferromagnet on square and honeycomb lattices 2793
Xian-Zhi Wang and Jai Sam Kim
Critical behavior of magnetic films in the Ising model 2805
J. T. Ou, Furong Wang, and D. L. Lin
Thermodynamics of frost heaving: A thermodynamic proposition for dynamic phenomena 2811
Hisashi Ozawa
Scaling range and cutoffs in empirical fractals 2817
Ofer Malcai, Daniel A. Lidar, Ofer Biham, and David Avnir
Controlling chaos by negative feedback of subharmonic components 2829
R. Meucci, A. Labate, and M. Ciofini
Local field probability distribution in random media 2835
Marc Barthélémy and Henri Orland

Classical fluids

Experimental and theoretical study of adiabatic, intermediate, and isothermal oscillations in air 2841
J. Pierrus and O. L. de Lange
Nonideal gas of clusters at equilibrium 2851
Rodrigo Soto and Patricio Cordero
Chaotic particle dynamics in viscous flows: The three-particle Stokeslet problem 2858
Imre M. Jánosi, Tamás Tél, Dietrich E. Wolf, and Jason A. C. Gallas
Screw dynamo and the generation of nonaxisymmetric magnetic fields 2869
Abhik Basu
General second-rank correlation tensors for homogeneous magnetohydrodynamic turbulence 2875
S. Oughton, K.-H. Rädler, and W. H. Matthaeus
Thermodynamic perturbative approach for simple fluids: Structure of a confined square-well fluid 2889
Soon-Chul Kim and Soong-Hyuck Suh
Similarity solutions in one-dimensional relativistic gas dynamics 2896
P. Carbonaro
Generalized collective modes in a binary $He_{0.65}$-$Ne_{0.35}$ mixture 2903
Taras Bryk, Ihor Mryglod, and Gerhard Kahl
Primary instabilities in convective cells due to nonuniform heating 2916
A. M. Mancho, H. Herrero, and J. Burguete
Bjerknes forces between small cavitation bubbles in a strong acoustic field 2924
R. Mettin, I. Akhatov, U. Parlitz, C. D. Ohl, and W. Lauterborn
Mode coupling approach to the ideal glass transition of molecular liquids: Linear molecules 2932
Rolf Schilling and Thomas Scheidsteger
Scaling of transient hydrodynamic interactions in hard sphere suspensions 2950
H. J. H. Clercx

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 3 SEPTEMBER 1997

Correlation of charged fluids separated by a wall of finite thickness: Dependence on the charge of the fluid and the wall . . . 2958
Marcelo Lozada-Cassou and Jiang Yu
Numerical study on lateral movements of cellular flames . . . 2966
Satoshi Kadowaki
Lateral diffusive migration of massive particles in high-velocity vertical pipe flow of moderately dense gas-solid suspensions . . . 2972
Piroz Zamankhan, Hooman Vahedi Tafreshi, and John C. Chen
Generalized hydrodynamics and shock waves . . . 2981
Mazen Al-Ghoul and Byung Chan Eu
Microscopic structure of the hydrogen-xenon mixture . . . 2993
R. Senesi, M. Nardone, F. P. Ricci, M. A. Ricci, and A. K. Soper
Effects of uniform injection at the wall on the stability of Couette-like flows . . . 3000
F. Nicoud and J. R. Angilella
Boundary layer length scales in convective turbulence . . . 3010
Y.-B. Xin and K.-Q. Xia
Nonlinear front evolution of hydrodynamic chemical waves in vertical cylinders . . . 3016
Joseph W. Wilder, Desiderio A. Vasquez, and Boyd F. Edwards

PART B

Note to Reader . . . i

Liquid crystals

Forces in an inhomogeneously ordered nematic liquid crystal: Stable and metastable states . . . 3021
A. Borštnik and S. Žumer
Dynamic behavior of oscillatory plastic flow in a smectic liquid crystal . . . 3028
Richard A. Herke, Noel A. Clark, and Mark A. Handschy
Effect of silica aerosil particles on liquid-crystal phase transitions . . . 3044
Hisashi Haga and Carl W. Garland
Dynamics of electric-field-induced molecular reorientation and segmental mobility in the smectic-*C* phase of a ferroelectric liquid crystal: Faster reorientation of cores than the alkyl chains revealed by time-resolved infrared spectroscopy . . . 3053
A. L. Verma, B. Zhao, S. M. Jiang, J. C. Sheng, and Y. Ozaki
One-dimensional walls in liquid crystals . . . 3061
M. Simões

Complex fluids, diffusion-limited aggregation, and dendritic growth

Dendritic crystal growth for weak undercooling . . . 3068
M. D. Kunka, M. R. Foster, and S. Tanveer
Energy exchange dynamics of the discrete nonlinear Schrödinger equation lattice and intrinsic formation of strongly localized states . . . 3101
D. Hennig
Domain growth in the presence of quenched disorder . . . 3112
Arthur E. Bailey, B. J. Frisken, and David S. Cannell
Shear viscosity of an ordering latex suspension . . . 3119
B. van der Vorst, D. van den Ende, N. J. J. Aelmans, and J. Mellema
Chemical freezing of phase separation in immiscible binary mixtures . . . 3127
Daniele Carati and René Lefever
Wigner-Seitz model of charged lamellar colloidal dispersions . . . 3137
Emmanuel Trizac and Jean-Pierre Hansen

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 56, NUMBER 3** **SEPTEMBER 1997**

Osmotic pressure and viscoelastic shear moduli of concentrated emulsions 3150
T. G. Mason, Martin-D. Lacasse, Gary S. Grest, Dov Levine, J. Bibette, and D. A. Weitz
Fracture deformation and influence on permeability 3167
V. V. Mourzenko, O. Galamay, J.-F. Thovert, and P. M. Adler
Liquid-liquid phase separation in cylindrical pores: Quench molecular dynamics and Monte Carlo simulations . . . 3185
Lev D. Gelb and K. E. Gubbins
Growth of a needle crystal from an undercooled alloy melt 3197
M. Conti
Statistical reconstruction of three-dimensional porous media from two-dimensional images 3203
Anthony P. Roberts
Critical behavior of a polydisperse polymer solution as revealed by turbidity 3213
Rio Kita, Kenji Kubota, and Toshiaki Dobashi
Nonequilibrium size distributions of fluid membrane vesicles 3219
Leonardo Golubović and Mirjana Golubović
Theory of ferroelectric phase transition of polymers 3231
Susumu Ikeda and Hiroyuki Suda
Effects of changes in the chain conformation on the kinetics of order-disorder transitions in block copolymer melts 3240
Toshihiro Kawakatsu
Evolution of a two-dimensional foam containing a single topological defect: An experimental study 3251
A. Abd el Kader and J. C. Earnshaw
Static and dynamic profiles of tethered polymer layers probed by analyzing the noise of an atomic force microscope 3256
Andreas Roters, Martin Gelbert, Martin Schimmel, Jürgen Rühe, and Diethelm Johannsmann
Density-functional theory of the kinetics of crystallization of hard-sphere suspensions: Single conserved order parameter 3265
Robert Wild and Peter Harrowell
Universality of an irreversible kinetic gelation model 3274
Sang Bub Lee and Hyun Joo Jeon
Yield stress thixotropic clay suspension: Investigations of structure by light, neutron, and x-ray scattering 3281
Frédéric Pignon, Albert Magnin, Jean-Michel Piau, Bernard Cabane, Peter Lindner, and Olivier Diat
Effects of container geometry on granular convection 3290
E. L. Grossman
Diffusion-limited aggregation as a growth process statistically invariant under an infinitesimal affine transformation of mass and multiple spatial coordinates 3301
John Jarecki
Two-dimensional magnetic liquid froth: Coarsening and topological correlations 3310
Florence Elias, Cyrille Flament, Jean-Claude Bacri, Olivier Cardoso, and François Graner
Permeability and effective porosity of porous media 3319
A. Koponen, M. Kataja, and J. Timonen
Physical and electrochemical contributions to the cell voltage in the thin-layer electrochemical deposition of copper at constant current 3326
John R. de Bruyn
Coil-globule transition of poly(methyl methacrylate) in isoamyl acetate 3338
Mitsuo Nakata and Tomohide Nakagawa
Scaling theory of self-avoiding crumpled membranes in solution 3346
Dah-Yen Yang and Sheh-Yi Sheu
Influence of the geometry of a rough substrate on wetting 3353
K. Topolski, D. Urban, S. Brandon, and J. De Coninck

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 3 SEPTEMBER 1997

Collective, short-wavelength excitations in liquid gallium 3358
F. J. Bermejo, R. Fernández-Perea, M. Alvarez, B. Roessli, H. E. Fischer, and J. Bossy
Organization of polymers at interfaces 3370
Miguel Aubouy
Channel flow in a Langmuir monolayer: Unusual velocity profiles in a liquid-crystalline mesophase 3378
M. L. Kurnaz and D. K. Schwartz

Biological physics

Volume distributions of avalanches in lung inflation: A statistical mechanical approach 3385
Mamatha K. Sujeer, Sergey V. Buldyrev, Stefano Zapperi, José S. Andrade, Jr., H. Eugene Stanley, and Béla Suki
Crystallization of proteins accompanied by formation of a cylindrical surface 3395
A. A. Boulbitch
Unstable periodic orbits in human epileptic activity 3401
Michel Le Van Quyen, Jacques Martinerie, Claude Adam, and Francisco J. Varela
Conformation fluctuations of polymerized vesicles in the inextensible and flexible limit 3412
Hyoungsoo Yoon and J. M. Deutsch
Emergent spatial correlations in stochastically evolving populations 3421
Marek Grabowski and R. E. Camley
On-line learning with adaptive back-propagation in two-layer networks 3426
Ansgar H. L. West and David Saad
Particle trapping and self-focusing in temporally asymmetric ratchets with strong field gradients 3446
Maurice J. Chacron and Gary W. Slater
Effects of nonlocalized target shape in the random walk description of transillumination experiments for optical imaging 3451
George H. Weiss and Amir H. Gandjbakhche
Thermal fluctuations of electric field and solute density in biological cells 3460
J. A. Fay
Diffusion constant for the repton model of gel electrophoresis 3468
M. E. J. Newman and G. T. Barkema

Plasma physics

Statistical mechanics of highly charged ion plasmas in local thermodynamic equilibrium 3474
G. Faussurier, C. Blancard, and A. Decoster
Statistical treatment of radiative transitions in local thermodynamic equilibrium plasmas 3488
G. Faussurier, C. Blancard, and A. Decoster
Many particle simulations of the quantum electron gas using momentum-dependent potentials 3498
W. Ebeling and F. Schautz
Nature of the density–magnetic-field-intensity correlation observed in the solar wind 3508
Francesco Malara, Pierluigi Veltri, and Leonardo Primavera
Particle simulations of efficient fast electron generation near the cutoff layer of an electrostatic wave 3515
S. J. Karttunen, T. J. H. Pättikangas, T. J. J. Tala, and R. A. Cairns
Dispersion and birefringence in a synchrotron-emitting gas 3527
D. B. Melrose
Dense hydrogen plasma: Comparison between models 3534
J. G. Clérouin and S. Bernard

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 56, NUMBER 3 SEPTEMBER 1997

Analyzing time-resolved spectroscopic data from an azimuthally symmetric, aluminum-wire array, z-pinch implosion 3540
K. G. Whitney, J. W. Thornhill, P. E. Pulsifer, J. P. Apruzese, T. W. L. Sanford, T. J. Nash, R. C. Mock, and R. B. Spielman

Physics of beams

Spectral analysis of correction techniques for linear colliders 3558
Andrey Sery and Alban Mosnier

Experimental confirmation of transverse focusing and adiabatic damping in a standing wave linear accelerator . . . 3572
S. Reiche, J. B. Rosenzweig, S. Anderson, P. Frigola, M. Hogan, A. Murokh, C. Pellegrini, L. Serafini, G. Travish, and A. Tremaine

Polarization lifetime near an intrinsic depolarizing resonance 3578
H. O. Meyer, B. Lorentz, M. Dzemidzic, J. Doskow, W. Haeberli, P. V. Pancella, R. E. Pollock, B. v. Przewoski, F. Rathmann, T. Rinckel, F. Sperisen, and T. Wise

Analytic and numerical analysis of the longitudinal coupling impedance of a rectangular slot in a thin coaxial liner 3583
Alexei V. Fedotov and Robert L. Gluckstern

Integrability of cyclotron motion 3602
Sang Wook Kim and Hai-Woong Lee

Generation of ultrashort radiation pulses by injection locking a regenerative free-electron-laser amplifier 3606
G. Shvets and J. S. Wurtele

Classical physics, including nonlinear media

Dark and bright shock waves on oscillating backgrounds in a discrete nonlinear Schrödinger equation 3611
V. V. Konotop and M. Salerno

Statistics of the cumulative phase of microwave radiation in random media 3619
P. Sebbah, O. Legrand, B. A. van Tiggelen, and A. Z. Genack

Classical tunneling as a consequence of radiation reaction forces 3624
Frederik Denef, Joris Raeymaekers, Urban M. Studer, and Walter Troost

Universality of the Gunn effect: Self-sustained oscillations mediated by solitary waves 3628
L. L. Bonilla and I. R. Cantalapiedra

Inductive instability in heterogeneous nonstationary systems 3633
Yu. Dolinsky and T. Elperin

Variational approach to the problem of dark-soliton generation 3638
F. Kh. Abdullaev, N. K. Nurmanov, and E. N. Tsoy

How transversal fluctuations affect the friction of a particle on a rough incline 3645
S. Dippel, G. G. Batrouni, and D. E. Wolf

Phase plane of moving discrete breathers 3657
Paul A. Houle

Computational physics

Simulating Ising spin glasses on a quantum computer 3661
Daniel A. Lidar and Ofer Biham

Pruned-enriched Rosenbluth method: Simulations of θ polymers of chain length up to 1 000 000 3682
Peter Grassberger

BRIEF REPORTS

General methods of statistical physics

Experimental study of a ternary $A+2B\rightarrow C$ reaction-diffusion system with a propagating reaction front: Scaling exponents 3694
Andrew Yen and Raoul Kopelman
Mechanism of chaos synchronization and on-off intermittency 3697
Chil-Min Kim
Synchronization of the trajectory as a way to control the dynamics of a coupled system 3701
Michał Żochowski and Larry S. Liebovitch
Extracting information from interimpact intervals in a mechanical oscillator 3705
K. N. Slade, L. N. Virgin, and P. V. Bayly
Robust synchronization 3709
Ioan Grosu
Stochastic resonance and symmetry breaking in a one-dimensional system 3713
Moshe Gitterman, Richard I. Shrager, and George H. Weiss

Complex fluids, diffusion-limited aggregation, and dendritic growth

Solute trapping in directional solidification at high speed: A one-dimensional study with the phase-field model . . 3717
M. Conti
Analysis of dielectric relaxation time of organic monolayer films on a material surface 3721
Mitsumasa Iwamoto and Chen-Xu Wu

Biological physics

Autocorrelations of *R*-*R* distributions as a measure of heart variability 3725
Michał Żochowski, Katarzyna Winkowska-Nowak, Andrzej Nowak, Grzegorz Karpinski, and Andrzej Budaj
40-Hz coherent oscillations in neuronal systems 3728
Wei Wang, Guang Chen, and Z. D. Wang

ERRATA

Erratum: Clustering properties of *d*-dimensional overlapping spheres [Phys. Rev. E **54**, 5331 (1996)] 3732
J. Quintanilla and S. Torquato
Erratum: Percolation thresholds and universal formulas [Phys. Rev. E **55**, 1514 (1997)] 3732
S. C. van der Marck

Cumulative Author Index 3733
