THIRD SERIES, VOLUME 56, NUMBER 5

CONTENTS

NOVEMBER 1997

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 4907–5548, and Part B pages 5549–6224.*

PART A

Note to Reader i

General methods of statistical physics

- Stochastic resonance at higher harmonics in monostable systems R4907
A. N. Grigorenko, S. I. Nikitin, and G. V. Roschepkin
- Quantum versus classical decay laws in open chaotic systems R4911
Dmitry V. Savin and Valentin V. Sokolov
- Sandpile model with activity inhibition R4914
S. S. Manna and D. Giri
- Anomalous scaling in the Bak-Chen-Tang forest fire model R4918
Hans-Martin Bröker and Peter Grassberger
- Specific heat anomalies associated with Cantor-set energy spectra R4922
Constantino Tsallis, Luciano R. da Silva, Renio S. Mendes, Raúl O. Vallejos, and Ananias M. Mariz

Classical fluids

- Derivation of amplitude equations by the renormalization group method R4926
Ken-ichi Matsuba and Kazuhiro Nozaki
- Transverse structure functions in high-Reynolds-number turbulence R4928
Brindesh Dhruva, Yoshiyuki Tsuji, and Katepalli R. Sreenivasan
- Complete and exact solutions of a class of nonlinear diffusion equations and problem of velocity selection R4931
X. Y. Wang, S. Fan, and T. Kyu

Liquid crystals

- Chiral symmetry breaking in three-dimensional smectic-C liquid-crystal domains R4935
P. A. Pramod, Yashodhan Hatwalne, and N. V. Madhusudana

Complex fluids, diffusion-limited aggregation, and dendritic growth

- Effects of electric charges on hydrophobic forces R4939
D. Bulone, V. Martorana, P. L. San Biagio, and M. B. Palma-Vittorelli
- Finite thermal conductivity at the vapor-liquid critical line of a binary fluid mixture R4943
E. P. Sakonidou, H. R. van den Berg, C. A. ten Seldam, and J. V. Sengers

Plasma physics

- Effect of electron-ion equilibration on optical emission from a shock wave R4947
G. Chiu, A. Ng, and A. Forsman

Classical physics, including nonlinear media

- Enhanced power breathing soliton in communication systems with dispersion management R4951
Elena G. Shapiro and Sergei K. Turitsyn
- Phonon scattering by localized equilibria of nonlinear nearest-neighbor chains R4955
S. Kim, C. Baesens, and R. S. MacKay
- Symmetry-breaking instabilities of spatial parametric solitons R4959
Alfredo De Rossi, Stefano Trillo, Alexander V. Buryak, and Yuri S. Kivshar

(Continued)

1063-651X(199711)56:5:B;1-R

Rapid relaxation in a one-dimensional gravitating system	R4963
V. Paige Youngkins and Bruce N. Miller	

ARTICLES

General methods of statistical physics

Survival probability in a random velocity field	4967
S. Redner	
Condensation vs phase ordering in the dynamics of first-order transitions	4973
C. Castellano, F. Corberi, and M. Zannetti	
Nonexponential relaxation in fully frustrated models	4990
Annalisa Fierro, Antonio de Candia, and Antonio Coniglio	
n -tree approximation for the largest Lyapunov exponent of a coupled-map lattice	4998
F. Cecconi and A. Politi	
Transport properties of a two-dimensional “chiral” persistent random walk	5004
H. Larralde	
Coexisting two-phase flow in correlated two-dimensional percolation	5009
D. D. Nolte and L. J. Pyrak-Nolte	
Critical discussion of the two-loop calculations for the Kardar-Parisi-Zhang equation	5013
Kay Jörg Wiese	
Equilibrium free-energy differences from nonequilibrium measurements: A master-equation approach	5018
C. Jarzynski	
Ordering process and Bloch wall dynamics in a two-dimensional anisotropic spin system	5036
Hiroki Tutu	
Bohr billiard: Decay in the chaotic Hamiltonian system with two integrals of motion	5044
P. V. Elyutin and B. V. Pavlov-Verevkin	
Hamilton-Jacobi-Bellman theory of dissipative thermal availability	5051
Stanislaw Sieniutycz	
Anisotropic dynamical scaling in a spin model with competing interactions	5065
E. N. M. Cirillo, G. Gonnella, and S. Stramaglia	
Hyperchaos in the generalized Rössler system	5069
Th. Meyer, M. J. Bünner, A. Kittel, and J. Parisi	
Recovery of the time-evolution equation of time-delay systems from time series	5083
M. J. Bünner, Th. Meyer, A. Kittel, and J. Parisi	
Volume-preserving and volume-expanding synchronized chaotic systems	5090
Louis M. Pecora, Thomas L. Carroll, Gregg Johnson, and Doug Mar	
Survival probability and field theory in systems with absorbing states	5101
M. A. Muñoz, G. Grinstein, and Yuhai Tu	
Chaos properties and localization in Lorentz lattice gases	5106
C. Appert and M. H. Ernst	
Simple procedure for correcting equations of evolution: Application to Markov processes	5123
Gregory Ryskin	
Monte Carlo entropic sampling for the study of metastable states and relaxation paths	5128
Isidor Shteto, Jorge Linares, and François Varret	
Bak-Tang-Wiesenfeld sandpile model around the upper critical dimension	5138
S. Lübeck and K. D. Usadel	
Statistical theory of finite Fermi systems based on the structure of chaotic eigenstates	5144
V. V. Flambaum and F. M. Izrailev	
Morphology of early stage phase ordering	5160
N. A. Gross, W. Klein, and K. Ludwig	
Chaos and Lyapunov exponents in classical and quantal distribution dynamics	5174
Arjendu K. Pattanayak and Paul Brumer	

Noise-induced transitions in spatially distributed and coupled pendulums	5178
Seon Hee Park, Seunghwan Kim, and Chang Su Ryu	
Conditional Lyapunov exponents from time series	5183
K. Pyragas	
Lyapunov exponent, stretching numbers, and islands of stability of the kicked top	5189
V. Constantoudis and N. Theodorakopoulos	
Ground-state configurations for Toom cellular automata: Experimental hints	5195
Danuta Makowiec	
Tricriticality and the Blume-Capel model: A Monte Carlo study within the microcanonical ensemble	5204
Markus Deserno	
Information entropy of complex structures	5211
Clinton DeW. Van Siclen	
Equation of state for a partially ionized gas	5216
George A. Baker, Jr.	
Monte Carlo simulation of an Ising antiferromagnet with competing Glauber and Kawasaki dynamics	5240
B. C. S. Grandi and W. Figueiredo	
Chaotic one-dimensional harmonic oscillator	5245
Seung-Woo Lee and Hai-Woong Lee	
Conjugate points in stadium and circle billiards	5251
W. A. Lin and R. V. Jensen	
Transient solution of the Kramers problem in the weak noise limit	5257
Vitaly A. Shneidman	
Analysis and observer design in synchronization via a state feedback control method	5265
Yu-Min Liaw and Pi-Cheng Tung	
Kolmogorov-Sinai entropy for dilute gases in equilibrium	5272
H. van Beijeren, J. R. Dorfman, H. A. Posch, and Ch. Dellago	
Ground states of two-dimensional polyampholytes	5278
Eilon Brenner and Yacov Kantor	
Multifractal properties of power-law time sequences: Application to rice piles	5284
Romualdo Pastor-Satorras	
Nonlinear response theory: Transport coefficients for driving fields of arbitrary magnitude	5295
P. E. Parris, M. Kuś, D. H. Dunlap, and V. M. Kenkre	
Regularity and reversibility of cascading systems	5306
Scott Pratt and Eric Eslinger	
Maxwell's demon as a dynamical model	5310
G. M. Zaslavsky and M. Edelman	
Nonlinear and chaotic oscillations of an india-rubber band	5321
R. Chacón, P. Suárez, F. Sánchez-Bajo, and P. Muñoz	
System identification for the Ott-Grebogi-Yorke controller design	5327
Bogdan I. Epureanu and Earl H. Dowell	
Thermal conductivity in a chain of alternately free and bound particles	5332
D. J. R. Mimmagh and L. E. Ballentine	
Localization-delocalization transition of a reaction-diffusion front near a semipermeable wall	5343
Bastien Chopard, Michel Droz, Jérôme Magnin, and Zoltán Rácz	
Classical fluids	
Phase defects and spatiotemporal disorder in traveling-wave convection patterns	5351
A. La Porta and C. M. Surko	
Quasihydrodynamics of nanofluid mixtures	5367
Liudmila A. Pozhar and Keith E. Gubbins	

Supercooled water and the kinetic glass transition. II. Collective dynamics	5397
Francesco Sciortino, Linda Fabbian, Sow-Hsin Chen, and Piero Tartaglia	
Front propagation in spatially modulated media	5405
J. Armero, A. M. Lacasta, L. Ramírez-Piscina, J. Casademunt, J. M. Sancho, and F. Sagués	
Fluctuations in the irreversible decay of turbulent energy	5413
Gregory L. Eyink	
Quasiperiodic patterns in Rayleigh-Bénard convection under gravity modulation	5423
Ulrike E. Volmar and Hanns Walter Müller	
Chaotic motion of nonspherical particles settling in a cellular flow field	5431
H. Shin and M. R. Maxey	
Lévy statistics in Taylor dispersion	5445
Albert Compte and Juan Camacho	
Dynamics of the rotational degrees of freedom in a supercooled liquid of diatomic molecules	5450
Stefan Kämmerer, Walter Kob, and Rolf Schilling	
Geometric effects on convective coupling and interfacial structures in bilayer convection	5462
D. Johnson and R. Narayanan	
Application of extended self-similarity in turbulence	5473
Siegfried Grossmann, Detlef Lohse, and Achim Reeh	
Distribution of droplets in a turbulent spray	5479
E. A. Novikov and D. G. Dommermuth	
Inverse cascade and intermittency of passive scalar in one-dimensional smooth flow	5483
M. Chertkov, I. Kolokolov, and M. Vergassola	
Effective correlation times in turbulent scalar transport	5500
A. Mazzino	
Bifurcation to oscillations in three-dimensional Rayleigh-Bénard convection	5511
S. Scheel and N. Seehafer	
Ergodicity, mixing, and time reversibility for atomistic nonequilibrium steady states	5517
Wm. G. Hoover and Oyeon Kum	
Statistical geometry of particle packings. I. Algorithm for exact determination of connectivity, volume, and surface areas of void space in monodisperse and polydisperse sphere packings	5524
Srikanth Sastry, David S. Corti, Pablo G. Debenedetti, and Frank H. Stillinger	
Statistical geometry of particle packings. II. “Weak spots” in liquids	5533
Srikanth Sastry, Pablo G. Debenedetti, and Frank H. Stillinger	
Damping of nearly inviscid water waves	5544
Carlos Martel and Edgar Knobloch	

PART B

Note to Reader	i
----------------------	---

Liquid crystals

Scaling theory of critical ultrasonics near the isotropic-to-nematic transition	5549
J. K. Bhattacharjee and R. A. Ferrell	
Structure and dynamics of solitons in a nematic liquid crystal in a rotating magnetic field	5553
Chun Zheng and Robert B. Meyer	
Monte Carlo simulation of topological defects in the nematic liquid crystal matrix around a spherical colloid particle	5561
R. W. Ruhwandl and E. M. Terentjev	
Influence of nematic range on birefringence, heat capacity and elastic modulus near a nematic-smectic-A phase transition	5566
F. Beaubois, T. Claverie, J. P. Marcerou, J. C. Rouillon, H. T. Nguyen, C. W. Garland, and H. Haga	

High resolution x-ray diffraction study of smectic polymorphism and fluctuations in a mixture of octyl- and decyl-oxyphenyl nitrobenzoyloxy benzoate	5575
Yushan Shi, George Nounesis, Carl W. Garland, and Satyendra Kumar	
Complex fluids, diffusion-limited aggregation, and dendritic growth	
Evolution of spatially structured elastic materials using a harmonic density function	5585
M. A. Koenders	
Entropy-driven demixing in binary hard-core mixtures: From hard spherocylinders towards hard spheres	5594
Marjolein Dijkstra and René van Roij	
Chain-segment order and dynamics in a grafted polymer melt: A deuterium NMR study	5603
M. Zeghal, B. Deloche, P.-A. Albouy, and P. Auroy	
Nucleation theorems, the statistical mechanics of molecular clusters, and a revision of classical nucleation theory	5615
I. J. Ford	
Distribution of the order parameter of the coil-globule transition	5630
J. B. Imbert, A. Lesne, and J. M. Victor	
Interface dynamics for layered structures	5648
Takao Ohta and David Jasnow	
Theory for the reorientational dynamics in glass-forming liquids	5659
T. Franosch, M. Fuchs, W. Götze, M. R. Mayr, and A. P. Singh	
Viscous and capillary pressures during drainage: Network simulations and experiments	5675
S. C. van der Marck, T. Matsuura, and J. Glas	
Electrohydrodynamic patterns in macroion dispersions under a strong electric field	5688
H. Isambert, A. Ajdari, J.-L. Viovy, and J. Prost	
Interface and chain confinement effects on the glass transition temperature of thin polymer films	5705
J. A. Forrest, K. Dalnoki-Veress, and J. R. Dutcher	
Measurements of collisional properties of spheres using high-speed video analysis	5717
Laurent Labous, Anthony D. Rosato, and Rajesh N. Dave	
Linear viscoelastic behavior of aggregated colloidal dispersions	5726
W. Wolthers, D. van den Ende, V. Breedveld, M. H. G. Duits, A. A. Potanin, R. H. W. Wientjes, and J. Mellema	
Systematic smoothing of constrained interface profiles	5734
C. J. Boulter and J. O. Indekeu	
Diffusive evolution of stable and metastable phases. I. Local dynamics of interfaces	5738
R. M. L. Evans and M. E. Cates	
Diffusive evolution of stable and metastable phases. II. Theory of nonequilibrium behavior in colloid-polymer mixtures	5748
R. M. L. Evans and W. C. K. Poon	
Avalanche dynamics in model two-dimensional grain piles	5759
Surajit Sen and Somnath Pal	
Dielectric relaxation of glass-forming epoxy resin under high pressure	5764
M. Paluch, J. Ziolo, and S. J. Rzoska	
Deposition-rate effects on rough surfaces formed by sedimenting particles	5768
K. V. McCloud, M. L. Kurnaz, and J. V. Maher	
Static structure factor of polymerlike micelles: Overall dimension, flexibility, and local properties of lecithin reverse micelles in deuterated isooctane	5772
Götz Jerke, Jan Skov Pedersen, Stefan Ulrich Egelhaaf, and Peter Schurtenberger	
Dielectric and conduction effects in non-Ohmic electrorheological fluids	5789
C. W. Wu and H. Conrad	

Molecular dynamics study of the structure organization in a strongly coupled chain of charged particles	5798
Motohiko Tanaka, A. Yu Grosberg, V. S. Pande, and Toyochi Tanaka	
Biological physics	
Intrinsic modulation of pulse-coupled integrate-and-fire neurons	5809
S. Coombes and G. J. Lord	
Kinetic model of random DNA cleavage by radiation	5819
W. C. Parke	
Tempo-induced transitions in polyrhythmic hand movements	5823
R. Engbert, C. Scheffczyk, R. T. Krampe, M. Rosenblum, J. Kurths, and R. Kliegl	
Dipole interactions in axonal microtubules as a mechanism of signal propagation	5834
J. A. Brown and J. A. Tuszyński	
Plasma physics	
Lower hybrid drift wave in a plasma in the presence of dust particles of variable charge	5841
M. Bose	
Stochastically stable fluctuations in a model of electrical discharge with external illumination	5847
Lorena Zogaib and Javier E. Vitela	
Phase-space energy of charged particles with negligible radiation: Proof of spontaneous formation of magnetic structures and new effective forces	5858
Hanno Essén	
Influence of different coil geometries on the spatial distribution of the plasma density in planar inductively coupled plasmas	5866
A. Schwabedissen, E. C. Benck, and J. R. Roberts	
Validation of the activity expansion method with ultrahigh pressure shock equations of state	5876
Forrest J. Rogers and David A. Young	
Alternative principle and method in x-ray diagnostics for plasma electron temperatures	5884
J. Kohagura, T. Cho, M. Hirata, T. Tamano, K. Yatsu, and S. Miyoshi	
Propagation and stability of intense laser pulses in partially stripped plasmas	5894
P. Sprangle, E. Esarey, and B. Hafizi	
Computer simulations of H^+ and H_3^+ transport parameters in hydrogen drift tubes	5908
T. Šimko, V. Martišovič, J. Bretagne, and G. Gousset	
Temporal and constriction behavior of low-pressure, cathode-dominated argon discharges	5920
Z. Lj. Petrović and A. V. Phelps	
Nonequilibrium positive column	5932
J. H. Ingold	
Power enhancement by increasing the initial array radius and wire number of tungsten Z pinches	5945
C. Deeney, T. J. Nash, R. B. Spielman, J. F. Seaman, G. C. Chandler, K. W. Struve, J. L. Porter, W. A. Stygar, J. S. McGurn, D. O. Jobe, T. L. Gilliland, J. A. Torres, M. F. Vargas, L. E. Ruggles, S. Breeze, R. C. Mock, M. R. Douglas, D. L. Fehl, D. H. McDaniel, M. K. Matzen, D. L. Peterson, W. Matuska, N. F. Roderick, and J. J. MacFarlane	
Spectroscopic investigation of highly transient pinch plasmas	5959
K. Bergmann, O. N. Rosmej, F. B. Rosmej, A. Engel, C. Gavrilescu, W. Neff, and R. Lebert	
Stability of ionizing shock waves in monatomic gases	5968
M. Mond, I. Rutkevich, and E. Toffin	
Negative-energy perturbations in cylindrical equilibria with a radial electric field	5979
G. N. Throumoulopoulos and D. Pfirsch	

Physics of beams

Interference effects on the coupling impedance of many holes in a coaxial beam pipe	5990
S. De Santis, A. Mostacci, and L. Palumbo	
Normal and anomalous Doppler effects in a dielectric-loaded stripline cyclotron-resonance maser oscillator	5996
M. Einat and E. Jerby	
Experimental test of coherent betatron resonance excitations	6002
M. Bai, S. Y. Lee, J. W. Glenn, H. Huang, L. Ratner, T. Roser, M. J. Syphers, and W. van Asselt	

Classical physics, including nonlinear media

Multiply scattered light correlations in an expanded temporal range	6008
V. L. Kuzmin and V. P. Romanov	
Stability of bound states of pulses in the Ginzburg-Landau equations	6020
V. V. Afanasjev, B. A. Malomed, and P. L. Chu	
Chern-Simons contribution to the structure of the zero mode of the gauged nonlinear (2+1)-dimensional Schrödinger equation	6026
L. A. Abramyan, V. I. Berezhiani, and A. P. Protogenov	
Horseshoe chaos in a bistable optical system under a modulated incident field	6033
Majid Taki	
Propagation and kinetic roughening of wave fronts in disordered lattices	6042
Jan Åström, Markku Kellomäki, Mikko Alava, and Jussi Timonen	
Kink's internal modes in the Frenkel-Kontorova model	6050
Oleg M. Braun, Yuri S. Kivshar, and Michel Peyrard	
Stokes parameters as a Minkowskian four-vector	6065
D. Han, Y. S. Kim, and Marilyn E. Noz	
Molecular-dynamics simulation of solitary waves in polyethylene	6077
Fei Zhang	
Spatiotemporal behavior in a ϕ^4 model of lattice dynamics	6082
Afshin Montakhab and Jeremy Levy	
Example of self-averaging in three dimensions: Anderson localization of electromagnetic waves in random distributions of pointlike scatterers	6090
Marian Rusek and Arkadiusz Orłowski	
Asymptotic analysis of classical wave localization in multiple-scattering random media	6095
Gregory Samelsohn and Reuven Mazar	
Solitary waves in a chain of beads under Hertz contact	6104
C. Coste, E. Falcon, and S. Fauve	
Dynamics of stimulated emission from random media	6118
G. A. Berger, M. Kempe, and A. Z. Genack	
Discreteness and local fields in weakly rarefied media	6123
A. V. Ghiner and G. I. Surdutovich	
Rayleigh-Ritz procedure for the Zakharov-Shabat system	6142
Marek Jaworski	
Perturbation theory for the Manakov soliton and its applications to pulse propagation in randomly birefringent fibers	6147
T. I. Lakoba and D. J. Kaup	

BRIEF REPORTS**General methods of statistical physics**

Controlling chaos via backstepping design	6166
Saverio Mascolo and Giuseppe Grassi	

Spatial complex behavior in nonchaotic flow systems	6170
D. Vergni, M. Falcioni, and A. Vulpiani	
Berry's phase, chaos, and the deformations of Riemann surfaces	6173
P��ter L��vay	
Determination of nucleation rates near the critical point	6177
Larissa V. Bravina and Eugene E. Zabrodin	

Classical fluids

Experimental study of the evolution of a velocity perturbation in fully developed turbulence	6181
R. Camussi, S. Ciliberto, and C. Baudet	

Liquid crystals

Flow-induced birefringence in a lyotropic liquid crystal in the isotropic phase: An order diffusion approach	6185
P. R. G. Fernandes and A. M. Figueiredo Neto	
Pseudomolecular models for nematic liquid crystals	6189
G. Barbero and L. R. Evangelista	

Plasma physics

Nonlinear Debye-Onsager relaxation effect in weakly ionized plasmas	6193
J. Ortner	

Classical physics, including nonlinear media

Soliton bistability in triply doped fiber with saturating nonlinearity	6196
Ajit Kumar and Thomas Kurz	

Computational physics

Effective way for determination of multicanonical weights	6200
Ulrich H. E. Hansmann	

COMMENTS

Comment on "Crossover time of diffusion-limited reactions on a tubular lattice"	6204
Anna L. Lin, Raoul Kopelman, and Panos Argyrakis	
Comment on "Exact solution of a one-dimensional continuum percolation model"	6206
Luis A. Pugnali, Ricardo D. Gianotti, and Fernando Vericat	
Comment on "Stopping power of nonmonochromatic heavy-ion clusters with two-ion correlation effects"	6208
I. M. Tkachenko, J. L. Mu��oz-Cobo, and A. Mu��oz	
Reply to "Comment on 'Stopping power of nonmonochromatic heavy-ion clusters with two-ion correlation effects'"	6211
M. Lontano and F. Raimondi	

ERRATA

Erratum: Quantum tunneling and stochastic resonance [Phys. Rev. E 53 , 5890 (1996)]	6213
Milena Grifoni, Ludwig Hartmann, Sabine Berchtold, and Peter H��nggi	
Erratum: Particle simulation of Lyapunov exponents in one-component strongly coupled plasmas [Phys. Rev. E 55 , 3439 (1997)]	6214
Y. Ueshima, K. Nishihara, D. M. Barnett, T. Tajima, and H. Furukawa	

Cumulative Author Index	6215
