THIRD SERIES, VOLUME 56, NUMBER 6

CONTENTS

DECEMBER 1997

RAPID COMMUNICATIONS

General methods of statistical physics

- Self-organized criticality with complex scaling exponents in the train model R6225
Franz-Josef Elmer
- Modulational estimate for the maximal Lyapunov exponent in Fermi-Pasta-Ulam chains R6229
Thierry Dauxois, Stefano Ruffo, and Alessandro Torcini
- Relaxation process in a regime of quantum chaos R6233
Giulio Casati, Giulio Maspero, and Dima L. Shepelyansky
- Quantum relaxation in open chaotic systems R6237
Klaus M. Frahm
- Epidemic analysis of the second-order transition in the Ziff-Gulari-Barshad surface-reaction model R6241
Christopher A. Voigt and Robert M. Ziff

Classical fluids

- Two-component radiation model of the sonoluminescing bubble R6245
David Tsiklauri
- Velocity interferometry technique used to measure the expansion and compression phases of a sonoluminescent bubble R6248
Gerardo A. Delgadino and Fabian J. Bonetto
- Criticality of dipolar fluids: Liquid-vapor condensation versus phase separation in systems of living polymers . . . R6252
J. M. Tavares, M. M. Telo da Gama, and M. A. Osipov
- Soft-mode turbulence in electrohydrodynamic convection of a homeotropically aligned nematic layer R6256
Yoshiki Hidaka, Jong-Hoon Huh, Ken-ichi Hayashi, Shoichi Kai, and Michael I. Tribelsky

Liquid crystals

- First-order nematic-smectic phase transition for hard spherocylinders in the limit of infinite aspect ratio R6260
James M. Polson and Daan Frenkel
- Intermolecular transitions observed by electric-quadrupole-resonant second-harmonic generation in a discotic liquid crystal of phthalocyanine R6264
Masao Sato, Akira Takeuchi, Toshiki Yamada, Hajime Hoshi, Ken Ishikawa, Takehiko Mori, and
Hideo Takezoe

Complex fluids, diffusion-limited aggregation, and dendritic growth

- Oscillatory instabilities in rapid directional solidification R6267
M. Conti
- Maximum angle of stability in wet and dry spherical granular media R6271
Réka Albert, István Albert, Daniel Hornbaker, Peter Schiffer, and Albert-László Barabási
- Dynamics of inelastically colliding rough spheres: Relaxation of translational and rotational energy R6275
Martin Huthmann and Annette Zippelius

(Continued)

1063-651X(199712)56:6;1-V

Electrofreezing of water in molecular dynamics simulation accelerated by oscillatory shear	R6279
István Borzsák and Peter T. Cummings	
Pathway to surface-induced phase transition of a confined fluid	R6283
Ka Lum and Alenka Luzar	

Biological physics

Critical scaling and type-III intermittent chaos in isolated rabbit resistance arteries	R6287
T. M. Griffith, D. Parthimos, J. Crombie, and D. H. Edwards	

Classical physics, including nonlinear media

Absolute photonic band gap in a two-dimensional square lattice of square dielectric rods in air	R6291
Chul-Sik Kee, Jae-Eun Kim, and Hae Yong Park	
Walking solitons in type II second-harmonic generation	R6294
D. Mihalache, D. Mazilu, L.-C. Crasovan, and L. Torner	

ARTICLES

General methods of statistical physics

Wave competition in excitable modulated media	6298
I. Sendiña-Nadal, M. Gómez-Gesteira, V. Pérez-Muñuzuri, V. Pérez-Villar, J. Armero, L. Ramírez-Piscina, J. Casademunt, F. Sagués, and J. M. Sancho	
Encoding and decoding messages with chaotic lasers	6302
P. M. Alsing, A. Gavrielides, V. Kovanis, R. Roy, and K. S. Thornburg, Jr.	
Quantum mechanical diffusion in complex surroundings	6311
Shoujiro Mizutori and Sven Åberg	
Symbolic dynamics of the hyperbolic potential	6317
Wei-Mou Zheng	
Bifurcation and chaos in the double-well Duffing–van der Pol oscillator: Numerical and analytical studies	6321
A. Venkatesan and M. Lakshmanan	
Diffusion and correlations in lattice-gas automata	6331
David Hanon and Jean Pierre Boon	
Josephson junction with noise	6340
V. Berdichevsky and M. Gitterman	
Lévy walks and generalized stochastic collision models	6355
E. Barkai and V. N. Fleurov	
Kinetics of XY and Ising ordering in a time-dependent Ginzburg-Landau model with $O(2) \times Z_2$ ground-state degeneracy	6362
Sung Jong Lee, Bongsoo Kim, and Jong-Rim Lee	
Copolymer networks and stars: Scaling exponents	6370
C. von Ferber and Yu. Holovatch	
Reaction-diffusion front in a system with strong quenched disorder	6387
Zbigniew Koza and Haim Taitelbaum	
Locally and globally riddled basins in two coupled piecewise-linear maps	6393
Yu. Maistrenko, T. Kapitaniak, and P. Szuminski	
Nonlinear magnetic stochastic resonance: Noise-strength–constant-force diagrams	6400
Yu. L. Raikher, V. I. Stepanov, A. N. Grigorenko, and P. I. Nikitin	
Control of chaos by oscillating feedback	6410
H. G. Schuster and M. B. Stemmler	

Regular and chaotic dynamics in time-dependent relativistic mean-field theory	6418
D. Vretenar, P. Ring, G. A. Lalazissis, and W. Pöschl	
Analogy between scale symmetry and relativistic mechanics. I. Lagrangian formalism	6427
F. Graner and B. Dubrulle	
Analogy between scale symmetry and relativistic mechanics. II. Electric analog of turbulence	6435
B. Dubrulle and F. Graner	
Dynamics of fracture in dissipative systems	6443
T. T. Rautiainen, M. J. Alava, and K. Kaski	
Non-normal parameter blowout bifurcation: An example in a truncated mean-field dynamo model	6451
Eurico Covas, Peter Ashwin, and Reza Tavakol	
Reasonable and robust Hamiltonians violating the third law of thermodynamics	6459
Greg Watson, Geoff Canright, and Frank L. Somer, Jr.	
Aging exponents in self-organized criticality	6466
Stefan Boettcher	
Synchronized chaos in extended systems and meteorological teleconnections	6475
Gregory S. Duane	
Inhomogeneous eigenmode localization, chaos, and correlations in large disordered clusters	6494
Mark I. Stockman	
Scaling of the durations of chaotic transients in windows of attracting periodicity	6508
Joeri Jacobs, Edward Ott, and Brian R. Hunt	
Approximate analytic solutions for noise-induced coherent oscillations in autonomous nonlinear systems	6516
J. Plata	
Spatiotemporal patterns and localized structures in nonlinear optics	6524
M. Tlidi, Paul Mandel, and M. Haelterman	
Characterization of the natural measure by unstable periodic orbits in nonhyperbolic chaotic systems	6531
Ying-Cheng Lai	
Crossover scaling in two dimensions	6540
Erik Luijten, Henk W. J. Blöte, and Kurt Binder	
Hyperbolic reaction-diffusion equations for a forest fire model	6557
Vicenç Méndez and Josep E. Llebot	
Synchronization of a laser system to a modulation signal artificially constructed from its strange attractor	6564
Takayuki Tsukamoto, Maki Tachikawa, Takehisa Tohei, Takuya Hirano, Takahiro Kuga, and Tadao Shimizu	
Critique of primitive model electrolyte theories	6569
Daniel M. Zuckerman, Michael E. Fisher, and Benjamin P. Lee	
Phase diagram for area scaling in bistable hysteresis	6581
Debashish Bose and Subir K. Sarkar	
Percolation threshold of a class of correlated lattices	6586
Kenneth S. Mendelson	
Intermittent and quasiperiodic behavior in a Zeeman laser model with large cavity anisotropy	6589
Javier Redondo, Germán J. de Valcárcel, and Eugenio Roldán	
Speckle from phase-ordering systems	6601
Gregory Brown, Per Arne Rikvold, Mark Sutton, and Martin Grant	
Bifurcations in a parametrically forced magnetic pendulum	6613
Sang-Yoon Kim, Seung-Ho Shin, Jaichul Yi, and Chi-Woong Jang	
Dynamics and thermodynamics of complex fluids. I. Development of a general formalism	6620
Miroslav Grmela and Hans Christian Öttinger	
Dynamics and thermodynamics of complex fluids. II. Illustrations of a general formalism	6633
Hans Christian Öttinger and Miroslav Grmela	
Green's functions and first passage time distributions for dynamic instability of microtubules	6656
D. J. Bicoût	

Fluctuation and dissipation in classical many-particle systems	6668
L. P. Csernai, S. Jeon, and J. I. Kapusta	
Dynamics of a stochastic linear-growth equation with spatiotemporal correlated noise	6676
Ning-Ning Pang	
Stationary velocity distributions in traffic flows	6680
E. Ben-Naim and P. L. Krapivsky	
Cycle expansions for intermittent diffusion	6687
C. P. Dettmann and Predrag Cvitanović	
Electrons and fractons on percolation structures at criticality: Sublocalization and superlocalization	6693
Jan W. Kantelhardt and Armin Bunde	
Nonconservative sandpile models	6702
Peyman Ghaffari, Stefano Lise, and Henrik Jeldtoft Jensen	
Fluctuations at the self-organized critical state	6710
Hans-Henrik Stølum	

Classical fluids

Fokker-Planck equation for the energy cascade in turbulence	6719
A. Naert, R. Friedrich, and J. Peinke	
Application of transient-time correlation functions to nonequilibrium molecular-dynamics simulations of elongational flow	6723
B. D. Todd	
Nonlinear heat transport in a dilute gas in the presence of gravitation	6729
Mohamed Tij, Vicente Garzó, and Andrés Santos	
Thermal instabilities in a mixed convection phenomenon: Nonlinear dynamics	6735
C. Abid and F. Papini	
Sonoluminescence from an isolated bubble on a solid surface	6745
K. R. Weninger, H. Cho, R. A. Hiller, S. J. Putterman, and G. A. Williams	
Alternative model of single-bubble sonoluminescence	6750
Kyuichi Yasui	
Probability distribution functions and coherent structures in a turbulent channel	6761
E. Lamballais, M. Lesieur, and O. Métais	
Linear stability analysis of convective chemical fronts	6767
Desiderio A. Vasquez	
Variational bound on energy dissipation in plane Couette flow	6774
Rolf Nicodemus, Siegfried Grossmann, and Martin Holthaus	
Probing asymmetry and self-similarity of fully developed turbulence	6787
Samuel I. Vainshtein	
Intermittent chaos in dense gaseouslike media driven by coupling cross thermodiffusive effects	6801
Stefano A. Mezzasalma and Andrea Mazzino	
Theory of the lattice Boltzmann method: From the Boltzmann equation to the lattice Boltzmann equation	6811
Xiaoyi He and Li-Shi Luo	
Dynamic properties of liquid alkaline-earth metals	6818
M. M. G. Alemany, J. Casas, C. Rey, L. E. González, and L. J. Gallego	

Liquid crystals

Theory of the lamellar-hexagonal transformation: Tilted mesophases in lyotropic systems	6829
B. Mettout, P. Tolédano, H. Vasseur, E. A. Oliveira, and A. M. Figueiredo Neto	
Dynamics of nematic loop disclinations	6834
André M. Sonnet and Epifanio G. Virga	

Phase ordering in bulk uniaxial nematic liquid crystals	6843
Robert A. Wickham	
Chiral nematic droplets with parallel surface anchoring	6853
F. Xu and P. P. Crooker	
Complex fluids, diffusion-limited aggregation, and dendritic growth	
Analytical model of propagating sand ripples	6861
R. B. Hoyle and A. W. Woods	
Further insights on dynamic morphological transitions in quasi-two-dimensional electrodeposition	6869
M.-Q. López-Salvans, F. Sagués, J. Claret, and J. Bassas	
Lattice-gas simulations of minority-phase domain growth in binary immiscible and ternary amphiphilic fluids . . .	6877
Florian W. J. Weig, Peter V. Coveney, and Bruce M. Boghosian	
Theory of reconstructive phase transitions in lyotropic complex fluids	6889
B. Mettout, P. Tolédano, H. Vasseur, and A. M. Figueiredo Neto	
Random sequential adsorption on a triangular lattice	6904
Lj. Budinski-Petković and U. Kozmidis-Luburić	
Early-time kinetics of ordering in the presence of interactions with a concentration field	6909
H. P. Fischer and W. Dieterich	
High-order amplitude equation for steps on the creep curve	6917
Mulugeta Bekele and G. Ananthakrishna	
Foam patterning in porous media	6929
Raphail Dautov, Konstantin Kornev, and Valerii Mourzenko	
Determination of light-scattering form factors of latex particle dimers with simultaneous static and dynamic light scattering in an aggregating suspension	6945
Helmut Holthoff, Michal Borkovec, and Peter Schurtenberger	
Percus-Yevick bridge functions in a thermodynamic self-consistent theory of hard sphere mixtures	6954
C. Caccamo, G. Pellicane, and E. Enciso	
Brownian motion in quasibidimensional colloidal suspensions	6962
M. D. Carbajal-Tinoco, G. Cruz de León, and J. L. Arauz-Lara	
Effect of shear flow on the stability of domains in two-dimensional phase-separating binary fluids	6970
Amalie Frischknecht	
Avalanche-mediated transport in a rotated granular mixture	6981
Vidar Frette and Joel Stavans	
Surface effects on spinodal decomposition in binary mixtures: The case with long-ranged surface fields	6991
Sanjay Puri, Kurt Binder, and Harry L. Frisch	
Hydrodynamic effects in phase separation: An explicit solution approach	7001
Mariapia Riva and Vincenzo Gino Benza	
Stratification instability in granular flows	7008
Hernán A. Makse	
Nonexponential dynamic relaxation of randomly branched polymers in good solvents	7017
Josh Kemp and Zheng Yu Chen	
Effects of self-avoidance on the tubular phase of anisotropic membranes	7023
M. Bowick and E. Gutter	
Structure of liquid Ga and the liquid-vapor interface of Ga	7033
Meishan Zhao, Dmitriy S. Chekmarev, Zhong-Hou Cai, and Stuart A. Rice	
Polymer chain in a flow through a porous medium: A Monte Carlo simulation	7043
V. Yamakov and A. Milchev	
Interaction between randomly charged rods and plates: Energy landscapes, stick slip, and recognition at a distance	7053
Sergei Panyukov and Yitzhak Rabin	

Colloidal microdynamics: Pair-drag simulations of model-concentrated aggregated systems	7067
L. E. Silbert, J. R. Melrose, and R. C. Ball	

Biological physics

Global aspects in the algebraic approach to the genetic code	7078
Michael Forger, Yvone M. M. Hornos, and José Eduardo Martinho Hornos	
Microtubule dynamics. II. Kinetics of self-assembly	7083
Henrik Flyvbjerg and Elmar Jobs	
Theory of DNA melting based on the Peyrard-Bishop model	7100
Yong-li Zhang, Wei-Mou Zheng, Ji-Xing Liu, and Y. Z. Chen	
Enzyme kinetics, self-organized molecular machines, and parametric resonance	7116
Manfred Schienbein and Hans Gruler	
Simple model of evolution with variable system size	7128
Claus Wilke and Thomas Martinetz	
Deformation of giant lipid bilayer vesicles in shear flow	7132
K. H. de Haas, C. Blom, D. van den Ende, M. H. G. Duits, and J. Mellema	

Plasma physics

Determination of the dust screening length by laser-excited lattice waves	7138
A. Homann, A. Melzer, S. Peters, and A. Piel	
Analytical description of a plasma diffraction grating induced by two crossed laser beams	7142
Luis Plaja and Luis Roso	
Measurements of planar target heating by an intense lithium ion beam	7147
J. E. Bailey, J. J. MacFarlane, P. Wang, A. L. Carlson, T. A. Hail, D. J. Johnson, P. Lake, E. J. McGuire, and T. A. Mehlhorn	
Relaxation of the distribution function tails for gases with power-law interaction potentials	7159
I. F. Potapenko, A. V. Bobylev, C. A. de Azevedo, and A. S. de Assis	
Dust acoustic waves in strongly coupled dusty plasmas	7166
M. Rosenberg and G. Kalman	
Propagation of a short laser pulse in a plasma	7174
Borge Nodland and C. J. McKinstrie	
Experimental study of the interaction of subpicosecond laser pulses with solid targets of varying initial scale lengths	7179
S. Bastiani, A. Rousse, J. P. Geindre, P. Audebert, C. Quoi, G. Hamoniaux, A. Antonetti, and J. -C. Gauthier	
Stark broadening of the B III $2s-2p$ lines	7186
Hans R. Griem, Yuri V. Ralchenko, and Igor Bray	
Short-pulse high-intensity laser-generated fast electron transport into thick solid targets	7193
J. R. Davies, A. R. Bell, M. G. Haines, and S. M. Guérin	

Physics of beams

Electromagnetic wake fields and beam stability in slab-symmetric dielectric structures	7204
A. Tremaine, J. Rosenzweig, and P. Schoessow	
Impedance and resonance issues for a long rectangular slot in a coaxial liner	7217
Alexei V. Fedotov and Robert L. Gluckstern	

Classical physics, including nonlinear media

Unfolding of the period-two bifurcation in a fiber laser pumped with two modulation tones	7223
T. C. Newell, A. Gavrielides, V. Kovanis, D. Sukow, T. Erneux, and S. A. Glasgow	
Energy conservation equation for a radiating pointlike charge in the context of the Abraham-Lorentz versus the Abraham-Becker radiation-reaction force	7232
U. Bellotti and M. Bornatici	
Influence of the shape of small scatterers upon their resonance features	7235
F. Bass and M. Fix	
Shock waves in a chain of two-level atoms with exchange and dipole-dipole interactions	7240
V. V. Konotop, M. Salerno, and S. Takeno	
Resonance in the collision of two discrete intrinsic localized excitations	7246
David Cai, A. R. Bishop, and Niels Grønbech-Jensen	
Analytic solutions of some coupled nonlinear equations	7253
F. T. Hioe	
Stationary solutions and self-trapping in discrete quadratic nonlinear systems	7257
Ole Bang, Peter Leth Christiansen, and Carl Balslev Clausen	
Information transfer between solitary waves in the saturable Schrödinger equation	7267
Mariusz H. Jakubowski, Ken Steiglitz, and Richard Squier	
Cylindrical vector wave functions and applications in a source-free uniaxial chiral medium	7273
Dajun Cheng and Yahia M. M. Antar	
Analytical approximation of the soliton solutions of the quintic complex Ginzburg-Landau equation	7288
J. M. Soto-Crespo and Luis Pesquera	

BRIEF REPORTS**General methods of statistical physics**

Synchronization of strange nonchaotic attractors	7294
Ramakrishna Ramaswamy	
Symbolic analysis of generalized synchronization of chaos	7297
Zonghua Liu and Shigang Chen	
Properties of the interface generated by the collision of two growing interfaces	7301
Ezequiel V. Albano	
Diffusional relaxation in a random sequential adsorption model	7304
B. Bonnier	

Biological physics

Categorization by a three-state attractor neural network	7306
D. R. C. Dominguez and D. Bollé	

Plasma physics

Longitudinal and transversal collective modes in strongly correlated plasmas	7310
P. Schmidt, G. Zwicknagel, P. -G. Reinhard, and C. Toepffer	
Momentum relaxation of a charged particle by small-angle Coulomb collisions	7314
K. Nanbu	
Reflection of an electromagnetic pulse incident on a nonlinear medium	7315
A. B. Shvartsburg, L. Stenflo, and P. K. Shukla	

Computational physics

- Correlation functions for a time-dependent calculation of linear-response functions 7318
 Toshiaki Iitaka

COMMENTS

- Comment on “Strange nonchaotic attractors in autonomous and periodically driven systems” 7320
 Arkady Pikovsky and Ulrike Feudel
- Reply to “Comment on ‘Strange nonchaotic attractors in autonomous and periodically driven systems’” 7322
 V. S. Anishchenko, T. E. Vadivasova, and O. Sosnovtseva
- Comment on “Periodic distortions in lyotropic nematic calamitic liquid crystals” 7323
 Maren Grigutsch and Ralf Stannarius
- Reply to “Comment on ‘Periodic distortions in lyotropic nematic calamitic liquid crystals’” 7326
 M. Simões, A. J. Palangana, and L. R. Evangelista

ERRATA

- Erratum: Temperature-dependent phase transitions in water-oil-surfactant mixtures: Experiment and theory
 [Phys. Rev. E 54, 3028 (1996)] 7329
 D. Vollmer, J. Vollmer, and R. Strey

- Cumulative Author Index** 7330
