CONTENTS

JANUARY 1998

Guidelines for PRE Section Selection	iii
Editorial Policies and Procedures of Physical Review E	v
General Information for Contributors	ix
Guidelines for Estimating Length	xiii

RAPID COMMUNICATIONS

General methods of statistical physics

Thermodynamic approach to electrical tree formation	R1
J. L. Vicente, A. C. Razzitte, M. C. Cordero, and E. E. Mola	

Chaos and nonlinear dynamical systems

Quantum perturbation theory for the level splitting in billiards	R5
G. Hackenbroich, E. Narimanov, and A. D. Stone	

Classical fluids

Spatial properties of velocity structure functions in turbulent wake flows	R9
E. Gaudin, B. Protas, S. Goujon-Durand, J. Wojciechowski, and J. E. Wesfreid	
Discrete Boltzmann equation model for nonideal gases	R13
Xiaoyi He, Xiaowen Shan, and Gary D. Doolen	
Thermal walls in computer simulations	R17
Riina Tehver, Flavio Toigo, Joel Koplik, and Jayanth R. Banavar	
von Kármán–Howarth equation for magnetohydrodynamics and its consequences on third-order longitudinal structure and correlation functions	R21
H. Politano and A. Pouquet	
Lattice Boltzmann simulation of viscous fluid systems with elastic boundaries	R25
Haiping Fang, Zhifang Lin, and Zuowei Wang	
Magnetic control of convection in nonconducting paramagnetic fluids	R29
Jie Huang, Boyd F. Edwards, and Donald D. Gray	
Ambient pressure and single-bubble sonoluminescence	R32
Ljubinko Kondic, Chi Yuan, and C. K. Chan	

Liquid crystals

Unipolar electro-optic effect in a nematic cell	R36
V. G. Nazarenko, R. Klouda, and O. D. Lavrentovich	

Complex fluids and polymers

Macroscopic glassy relaxations and microscopic motions in a frustrated lattice gas	R39
Mario Nicodemi and Antonio Coniglio	

(Continued)

1063-651X(199801)57:1;1-#

Plasma physics

- Time resolved optical emission spectroscopy of an inductively coupled plasma in argon and oxygen R43
Masahiro Tadokoro, Hajime Hirata, Nobuhiko Nakano, Zoran Lj. Petrović, and Toshiaki Makabe

ARTICLES**General methods of statistical physics**

- Stability of a nonequilibrium interface in a driven phase-segregating system 47
Claude A. Laberge and Sven Sandow
- Quantum lattice-gas model for the many-particle Schrödinger equation in d dimensions 54
Bruce M. Boghosian and Washington Taylor IV
- Amplitude to phase noise conversion in electronic circuits 67
Edoardo Milotti
- Coarsening dynamics of adsorption processes with diffusional relaxation 74
Marcelo D. Grynberg
- Zero-dispersion stochastic resonance in a model for a superconducting quantum interference device 78
I. Kh. Kaufman, D. G. Luchinsky, P. V. E. McClintock, S. M. Soskin, and N. D. Stein
- Invaded cluster dynamics for frustrated models 88
Giancarlo Franzese, Vittorio Cataudella, and Antonio Coniglio
- Averaged master equation for a quantum system coupled to a heat bath with fluctuating energy levels 94
Elmar G. Petrov
- Classical specific heat of an atomic lattice at low temperature, revisited 100
Andrea Perronace and Alexander Tenenbaum
- Short-time dynamics of a two-dimensional majority vote model 108
J. F. F. Mendes and M. A. Santos
- Continuum limit of two-dimensional spin models with continuous symmetry and conformal quantum field theory 111
Adrian Patrascioiu and Erhard Seiler
- Fine structure and complex exponents in power-law distributions from random maps 120
Per Jögi, Didier Sornette, and Michael Blank
- Domain size in the presence of random fields 135
Weinan E and P. Palffy-Muhoray
- Search for universality in one-dimensional ballistic annihilation kinetics 138
Pierre-Antoine Rey, Michel Droz, and Jarosław Piasecki
- Accurate path integral representations of the Fokker-Planck equation with a linear reference system: Comparative study of current theories 146
A. N. Drozdov and J. J. Brey
- Annular ballast resistor: Symmetry breaking, pinning, and coarsening in a globally constrained reaction-diffusion system 159
Baruch Meerson and Yoav Tsoi
- Transverse stability of the one-dimensional kink solution of the discrete Cahn-Hilliard equation 169
David Bettinson and George Rowlands
- Bose-Einstein condensation of a quantum group boson gas 179
Marcelo R. Ubriaco
- Two-point correlation function of three-dimensional $O(N)$ models: The critical limit and anisotropy 184
Massimo Campostrini, Andrea Pelissetto, Paolo Rossi, and Ettore Vicari
- Density-functional theory of pair correlations in metallic hydrogen 211
Hong Xu and Jean-Pierre Hansen

Dynamics of an anharmonic oscillator that is harmonically coupled to a many-body system and the notion of an appropriate heat bath	224
Donald P. Visco, Jr. and Surajit Sen	
Precise determination of the bond percolation thresholds and finite-size scaling corrections for the sc, fcc, and bcc lattices	230
Christian D. Lorenz and Robert M. Ziff	
Spatiotemporal properties of diffusive systems with a mobile imperfect trap	237
Zbigniew Koza and Haim Taitelbaum	
Rosenfeld-Prigogine complementarity of descriptions in the context of informational statistical thermodynamics	244
Roberto Luzzi, J. Galvão Ramos, and Aurea R. Vasconcellos	
Unification of one-dimensional Fokker-Planck equations beyond hypergeometrics: Factorizer solution method and eigenvalue schemes	252
A. Debosscher	
Chaos and nonlinear dynamical systems	
Condensation in globally coupled populations of chaotic dynamical systems	276
D. H. Zanette and A. S. Mikhailov	
Evolution of complex oscillations in a quasiperiodically forced chain	282
O. Sosnovtseva, T. E. Vadivasova, and V. S. Anishchenko	
Characterization of homoclinic chaos through double-valued return time maps	288
A. R. Zeni, T. Braun, R. R. B. Correia, P. Alcantara, Jr., L. Guidoni, and E. Arimondo	
Propagation failure in excitable media	299
A. Hagberg and E. Meron	
Signature of non-Newtonian orbits in ray-splitting cavities	304
Sz. Bauch, A. Błędowski, L. Sirko, P. M. Koch, and R. Blümel	
Synchronization of switching processes in coupled Lorenz systems	316
V. S. Anishchenko, A. N. Silchenko, and I. A. Khovanov	
Structure of eigenstates and local spectral density of states: A three-orbital schematic shell model	323
Wen-ge Wang, F. M. Izrailev, and G. Casati	
Liénard systems, limit cycles, and Melnikov theory	340
Miguel A. F. Sanjuán	
Chaos and exponentially localized eigenstates in smooth Hamiltonian systems	345
M. S. Santhanam, V. B. Sheorey, and A. Lakshminarayan	
Partially chaotic ensembles	350
Nazakat Ullah	
Mixing internal and external atomic dynamics in the kicked rotor	354
Hubert Ammann and Nelson Christensen	
Signature of chaotic diffusion in band spectra	359
T. Dittrich, B. Mehlig, H. Schanz, and U. Smilansky	
Controlling Hamiltonian chaos by medium perturbation in periodically driven systems	366
Zhihua Wu, Zhaoxuan Zhu, and Chengfu Zhang	
Method for distinguishing between ordered and chaotic orbits in four-dimensional maps	372
N. Voglis, G. Contopoulos, and C. Efthymiopoulos	
Controlling continuous chaotic dynamics by periodic proportional pulses	378
Nguyen Phong Chau	
Pattern competition and homoclinic crossing	381
Yu Tan and Jian-min Mao	

Solvable model for spatiotemporal chaos	388
R. O. Grigoriev and H. G. Schuster	
Experimentally tracking unstable steady states by large periodic modulation	397
R. Dykstra, A. Rayner, D. Y. Tang, and N. R. Heckenberg	
Multiple devil's staircase and type-V intermittency	402
Shi-Xian Qu, Shunguang Wu, and Da-Ren He	

Classical fluids

Noise and pattern formation in periodically driven Rayleigh-Bénard convection	412
Omar Osenda, Carlos B. Briozzo, and Manuel O. Cáceres	
Bifurcations in two-dimensional Rayleigh-Bénard convection	428
E. Zienicke, N. Seehafer, and F. Feudel	
Equilibration near the liquid-vapor critical point in microgravity	436
R. Allen Wilkinson, G. A. Zimmerli, Hong Hao, Michael R. Moldover, Robert F. Berg, William L. Johnson, Richard A. Ferrell, and Robert W. Gammon	
Vortex merging, oscillation, and quasiperiodic structure in a linear array of elongated vortices	449
Hiroaki Fukuta and Youichi Murakami	
Optimized random-phase approximations for arbitrary reference systems: Extremum conditions and thermodynamic consistence	460
G. Pastore, O. Akinlade, F. Matthews, and Z. Badirkhan	
Ferromagnetic order-disorder transition in an Ising fluid	465
M. J. P. Nijmeijer, A. Parola, and L. Reatto	
Thermal properties in surface-tension-driven convection	475
C. Pérez-García, B. Echebarria, and M. Bestehorn	
Eulerian diagnostics for Lagrangian chaos in three-dimensional Navier-Stokes flows	482
A. N. Yannacopoulos, I. Mezić, G. Rowlands, and G. P. King	
Effects of distant boundaries on pattern forming instabilities	491
Patrick J. Fox and Michael R. E. Proctor	
Reconstructing random media	495
C. L. Y. Yeong and S. Torquato	
Mutual diffusion in a binary mixture under shear flow	507
C. Marín and V. Garzó	
Macroscopic surface tension in a lattice Bhatnagar-Gross-Krook model of two immiscible fluids	514
I. Halliday, S. P. Thompson, and C. M. Care	
Confined states in large-aspect-ratio thermosolutal convection	524
Alejandro Spina, Juri Toomre, and Edgar Knobloch	
Stability of uniform shear flow	546
José M. Montanero, Andrés Santos, Mirim Lee, James W. Dufty, and J. F. Lutsko	
Matched boundary layers in turbulent Rayleigh-Bénard convection of mercury	557
Takehiko Segawa, Antoine Naert, and Masaki Sano	
Perturbation analysis of droplet deformation under electrical double layer forces	561
S. J. Miklavcic	
Diffusion process in a flow	569
Piotr Garbaczewski	

Liquid crystals

Phase transition between the cholesteric and twist grain boundary C phases	574
I. Luk'yanchuk	
Nature of the Blue-Phase-III-isotropic critical point: An analogy with the liquid-gas transition	582
M. A. Anisimov, V. A. Agayan, and P. J. Collings	

Effect of the nematic range on the critical behavior and anisotropy of the heat transport parameters at the smectic- <i>A</i> -nematic phase transition	596
F. Mercuri, U. Zammit, and M. Marinelli	
Calorimetric study of the smectic- <i>A</i> -hexatic- <i>B</i> transition in 3(10)OBC	603
H. Haga and C. W. Garland	
Topological defects and interactions in nematic emulsions	610
T. C. Lubensky, David Pettey, Nathan Currier, and Holger Stark	
Inverted and multiple nematic emulsions	626
P. Poulin and D. A. Weitz	
Patterns of electroconvection in a nematic liquid crystal	638
Michael Dennin, David S. Cannell, and Guenter Ahlers	
Complex fluids and polymers	
Coefficient of normal restitution of viscous particles and cooling rate of granular gases	650
Thomas Schwager and Thorsten Pöschel	
Line tension between fluid phases and a substrate	655
T. Getta and S. Dietrich	
Coarsening and pinning in the self-consistent solution of polymer blends phase-separation kinetics	672
Claudio Castellano and Federico Corberi	
Frequency-dependent shear viscosity, sound velocity, and sound attenuation near the critical point in liquids. I. Theoretical results	683
R. Folk and G. Moser	
Frequency-dependent shear viscosity, sound velocity, and sound attenuation near the critical point in liquids. II. Comparison with experiment	705
R. Folk and G. Moser	
Sound wave propagation and existence of a two step relaxation process in a glass-former melt	720
M. Soltwisch, G. Ruocco, B. Balschun, J. Bosse, V. Mazzacurati, and D. Quitmann	
Polymer release out of a spherical vesicle through a pore	730
Pyeong Jun Park and Wokyung Sung	
Nonmonotonical behavior in correlated site-bond percolation	735
A. J. Ramirez-Cuesta, R. J. Faccio, and J. L. Riccardo	
Invasion percolation with viscous forces	739
B. Xu, Y. C. Yortsos, and D. Salin	
Langevin equation for driven diffusive systems	752
P. L. Garrido, F. de los Santos, and M. A. Muñoz	
Structure and dynamics of electrorheological fluids	756
James E. Martin, Judy Odinek, Thomas C. Halsey, and Randall Kamien	
Small-angle neutron scattering study of micellar structures of dimeric surfactants	776
V. K. Aswal, S. De, P. S. Goyal, S. Bhattacharya, and R. K. Heenan	
Structure factor of diffusion-limited aggregation clusters: Local structure and non-self-similarity	784
C. Oh and C. M. Sorensen	
Solvent diffusion outside macromolecular surfaces	791
Erik Lindahl and Olle Edholm	
Electric-field effects on a droplet microemulsion	797
M. E. Edwards, X. L. Wu, J.-S. Wu, J. S. Huang, and H. Kellay	
Flow-induced transition from cylindrical to layered patterns in magnetorheological suspensions	804
S. Cutillas, G. Bossis, and A. Cebers	
Extending polysoaps in the presence of free amphiphiles	812
O. V. Borisov and A. Halperin	

Multipole expansion for inclusions in a lamellar phase	823
M. S. Turner and P. Sens	
Logarithmic density relaxation in compaction of granular materials	829
Gongwen Peng and Takao Ohta	
Bending moduli of a nonadsorbing-polymer-containing lyotropic lamellar phase: An experimental study	834
G. Bouglet, C. Ligoure, A. M. Bellocq, E. Dufourc, and G. Mosser	
Molecular-dynamics simulations of the thermal glass transition in polymer melts: α -relaxation behavior	843
Christoph Bennemann, Wolfgang Paul, Kurt Binder, and Burkhard Dünweg	
Lattice-gas model of avalanches in a granular pile	852
Antal Károlyi and János Kertész	
Cooling dynamics of a dilute gas of inelastic rods: A many particle simulation	857
Timo Aspelmeier, Götz Giese, and Annette Zippelius	
Continuous behavior in a simple model of the adhesive failure of a layer	866
M. Ferer and Duane H. Smith	
Structure factor scaling in aggregating systems	875
H. Huang, C. Oh, and C. M. Sorensen	
Droplet nucleation and Smoluchowski's equation with growth and injection of particles	881
Stéphane Cueille and Clément Sire	
Structure formation and phase transitions in Gibbs and Langmuir monolayers of amphiphilic acid amides	901
V. Melzer, D. Vollhardt, G. Weidemann, G. Brezesinski, R. Wagner, and H. Möhwald	
Relaxation dynamics in dense binary colloidal mixtures: Brownian dynamics simulations	908
Subrata Sanyal and Ajay K. Sood	

Biological physics

Quantitative analysis of cell motion during sorting in two-dimensional aggregates of dissociated hydra cells	924
Jean Paul Rieu, Naoki Kataoka, and Yasuji Sawada	
Time-frequency analysis of electroencephalogram series. III. Wavelet packets and information cost function	932
S. Blanco, A. Figliola, R. Quián Quiroga, O. A. Rosso, and E. Serrano	
Growth patterns of the slime mold <i>Physarum</i> on a nonuniform substrate	941
Ragnhild Halvorsrud and Geri Wagner	
Influence of the distance on the interaction between an autonomous pacemaker and a reentry	949
M. deCastro, M. Gómez-Gesteira, and V. Pérez-Villar	
Multifractal analysis of perceptron learning with errors	955
M. Weigt	
Vesicle-vesicle adhesion by mobile lock-and-key molecules: Debye-Hückel theory and Monte Carlo simulation	964
Daniel M. Zuckerman and Robijn F. Bruinsma	

Plasma physics

Temperature relaxation in hot spots in a laser-produced plasma	978
V. K. Senecha, A. V. Brantov, V. Yu. Bychenkov, and V. T. Tikhonchuk	
Time-resolved x-ray emission spectra from optically ionized helium and neon plasmas	982
T. E. Glover, J. K. Crane, M. D. Perry, R. W. Lee, and R. W. Falcone	
Parametric decays of a circularly polarized electromagnetic wave in an electron-positron magnetized plasma	994
V. Muñoz and L. Gomberoff	
Wave packets, rays, and the role of real group velocity in absorbing media	1005
Elazar Sonnenschein, Igor Rutkevich, and Dan Censor	
Average-ion level-population correlations in off-equilibrium plasmas	1017
Pierre Dallot, Gérald Faussurier, Alain Decoster, and Alessandro Mirone	

Beam acceleration by plasma-loaded free-electron devices	1029
K. H. Tsui, A. Serbeto, and J. B. D'Olival	
Microbunching of relativistic electrons using a two-frequency laser	1035
D. Gordon, C. E. Clayton, T. Katsouleas, W. B. Mori, and C. Joshi	
Absorption spectroscopy of a radiatively heated samarium plasma	1042
H. Merdji, T. Mißalla, T. Blenski, F. Perrot, J. C. Gauthier, K. Eidmann, and C. Chenais-Popovics	
Vortex formation in sheared flow driven fluctuations in nonuniform magnetized dusty gases	1047
Arshad M. Mirza, R. T. Faria, P. K. Shukla, and G. Murtaza	

Physics of beams

Coherent and self-amplified infrared synchrotron radiation emitted by a 50-MeV electron beam	1053
J. M. Ortega, R. Prazeres, F. Glotin, and D. A. Jaroszynski	
Coherent Smith-Purcell radiation in the millimeter-wave region from a short-bunch beam of relativistic electrons	1061
Yukio Shibata, Shigeru Hasebe, Kimihiro Ishi, Shuichi Ono, Mikihiro Ikezawa, Toshiharu Nakazato, Masayuki Oyamada, Shigekazu Urasawa, Toshiharu Takahashi, Tomochika Matsuyama, Katsuhei Kobayashi, and Yoshiaki Fujita	
Spontaneous Smith-Purcell radiation described through induced surface currents	1075
J. H. Brownell, J. Walsh, and G. Doucas	
Reversible and irreversible emittance growth	1081
Patrick G. O'Shea	

Classical physics, including nonlinear media

Bound states of dark solitons in the quintic Ginzburg-Landau equation	1088
V. V. Afanasjev, P. L. Chu, and B. A. Malomed	
Asymmetric solitons in coupled second-harmonic-generating waveguides	1092
William C. K. Mak, Boris A. Malomed, and P. L. Chu	
Analysis of self-written waveguides in photopolymers and photosensitive materials	1104
Tanya M. Monro, L. Poladian, and C. Martijn de Sterke	
N -soliton pattern in a self-gravitating fluid disk	1114
Hang Zhang, Xiao-qing Li, and Yue-hua Ma	
Retardation correction to the Lorentz-Lorenz formula for the refractive index of a disordered system of polarizable point dipoles	1118
B. Ersfeld and B. U. Felderhof	
Discrete bright solitary waves in quadratically nonlinear media	1127
T. Peschel, U. Peschel, and F. Lederer	
Localized vibrations and standing waves in anharmonic lattices	1134
Jacob Szeftel and Pascal Laurent	
Spatiotemporal dynamics of discrete sine-Gordon lattices with sinusoidal couplings	1139
Zhigang Zheng, Bambi Hu, and Gang Hu	
Ward identities for transport of classical waves in disordered media	1145
H. T. Nieh, Liu Chen, and Ping Sheng	

Computational physics

Monte Carlo simulation of ice models	1155
G. T. Barkema and M. E. J. Newman	

BRIEF REPORTS**General methods of statistical physics**

- Self-organized criticality can emerge even if the range of interactions is infinite 1167
 N. Vandewalle, H. Van Puyvelde, and M. Ausloos
- Density fluctuations and phase transition in the Nagel-Schreckenberg traffic flow model 1171
 S. Lübeck, M. Schreckenberg, and K. D. Usadel

Chaos and nonlinear dynamical systems

- Torus on-off intermittency in coupled Lorenz systems 1175
 Andrzej Stefański, Tomasz Kapitaniak, John Brindley, and Vladimir Astakhov
- Analysis of resonances in action space for symplectic maps 1178
 A. Bazzani, L. Bongini, and G. Turchetti
- Waiting time paradox applied to transient times 1181
 P. J. Aston and P. K. Marriott

Classical fluids

- Linear stability analysis of doubly diffusive vertical slot convection 1183
 Y. Young and R. Rosner

Complex fluids and polymers

- Slow relaxation near structural and orientational transitions in glass-forming liquids and solids 1187
 V. B. Kokshenev

Biological physics

- Quantum mechanics versus classical probability in biological evolution 1191
 E. Baake, M. Baake, and H. Wagner

Physics of beams

- Observation of the dynamic beta effect at the Cornell Electron-Positron Storage Ring with the CLEO detector . . . 1193
 D. Cinabro, M. Chadha, S. Chan, C. O'Grady, J. S. Miller, J. Urheim, A. J. Weinstein, F. Würthwein,
 S. Prell, M. Sivertz, V. Sharma, D. M. Asner, A. Eppich, J. Gronberg, C. M. Korte, T. S. Hill, R. Kutschke,
 D. J. Lange, R. J. Morrison, H. N. Nelson, T. K. Nelson, C. Qiao, A. Ryd, D. Roberts, H. Tajima,
 M. S. Witherell, B. H. Behrens, W. T. Ford, J. P. Alexander, E. Anderson, T. Banta, M. Billing, K. Bloom,
 S. Chapman, G. Codner, R. Cutler, D. J. Dumas, R. Eshelman, A. D. Foland, P. Gaidarev, M. Giannella,
 S. Greenwald, Z. Greenwald, D. Hartill, S. Henderson, P. I. Hopman, J. Hylas, J. Kandaswamy, N. Katayama,
 D. Kematick, R. Kersevan, D. L. Kreinick, D. Kubik, Y. Li, W. Liu, R. Meller, N. B. Mistry,
 D. Peterson, K. Ormond, S. Peck, T. Pelaia, D. Rice, J. Rogers, G. Rouse, D. Rubin, D. Sagan, J. Sikora,
 M. Sloand, S. Smith, A. Soffer, R. Sproul, J. Swat, C. Tan, S. Temnykh, C. Ward, J. Welch,
 E. Young, P. R. Avery, C. Prescott, R. A. Briere, D. Y.-J. Kim, H. Yamamoto, T. Bergfeld, J. Ernst,
 G. E. Gladding, I. Karliner, M. Palmer, M. Selen, J. J. Thaler, R. Janicek, S. J. Richichi, W. R. Ross, J. Fast,
 D. H. Miller, S. E. Roberts, C. P. Jessop, K. Lingel, M. Artuso, V. Jain, K. W. McLean, and R. Godang

Classical physics, including nonlinear media

- Electromagnetic soliton damping in a ferromagnetic medium 1197
 V. Veerakumar and M. Daniel

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 57, NUMBER 1

JANUARY 1998

Equivalence regime for magnetohydrodynamic and lossy electromagnetic waves	1201
Richard T. Hammond, Jon Davis, and Lloyd Bobb	

ERRATA

Erratum: Surface effects on spinodal decomposition in the framework of a linearized theory [Phys. Rev. E 52 , 2848 (1995)]	1205
H. L. Frisch, P. Nielaba, and K. Binder	

Cumulative Author Index	1207
