THIRD SERIES, VOLUME 57, NUMBER 2
PARTS A AND B

CONTENTS

FEBRUARY 1998

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 1211–1816, and Part B pages 1817–2490.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Model for surface fracture induced by dynamical stress R1211
Jørgen Vitting Andersen and Laurent J. Lewis

High-precision determination of the critical exponent γ for self-avoiding walks R1215
Sergio Caracciolo, Maria Serena Causo, and Andrea Pelissetto

Binary random cellular structures R1219
G. Schliecker

Chaos and nonlinear dynamical systems

Chaos in effective classical and quantum dynamics R1223
Lapo Casetti, Raoul Gatto, and Michele Modugno

Stochastic postponement of the domain transitions and destabilization of current in the Gunn diode R1227
Yuo-Hsien Shiau, Yi-Chen Cheng, and Chin-Kun Hu

Classical fluids

Two complementary descriptions of intermittency R1231
E. Balkovsky and G. Falkovich

Liquid crystals

Anticlinic structures at the surface of freely suspended smectic-*C* films R1235
D. Schlauf and Ch. Bahr

Complex fluids and polymers

Oscillons, spiral waves, and stripes in a model of vibrated sand R1239
Daniel H. Rothman

Symmetry breaking in phase separation of binary polymer mixtures induced by linearly polarized light R1243
Qui Tran-Cong, Katsunari Kataoka, and Osamu Urakawa

Biological physics

Characterizing the dynamics of constrained physical systems with an unsupervised neural network R1247
Christopher Monterola and Caesar Saloma

(Continued)

1063-651X(199802)57:2:A;1-P

PHYSICAL REVIEW E THIRD SERIES, VOLUME 57, NUMBER 2 FEBRUARY 1998

Classical physics, including nonlinear media

Optical gap solitons via second-harmonic generation: Exact solitary solutions R1251
Claudio Conti, Stefano Trillo, and Gaetano Assanto
Early-time dynamics of wave fronts in disordered triangular lattices R1255
M. Kellomäki, J. Åström, and J. Timonen
Crack dynamics and crack surfaces in elastic beam lattices R1259
Jan Åström, Mikko Alava, and Jussi Timonen

ARTICLES

General methods of statistical physics

Violation of scaling in the contact process with quenched disorder 1263
Ronald Dickman and Adriana G. Moreira
Percolation of finite-sized objects on a lattice 1269
R. E. Amritkar and Manojit Roy
Notion of integrability for time-dependent Hamiltonian systems: Illustrations from the relativistic motion of a charged particle 1273
S. Bouquet and A. Bourdier
Operator expansions in stochastic dynamics 1284
A. N. Drozdov and J. J. Brey
Interface pinning and slow ordering kinetics on infinitely ramified fractal structures 1290
Umberto Marini Bettolo Marconi
Unified solution of the inverse capacity problem 1302
Chen Nan-xian and and Rong Er-qian
Jamming transition in a cellular automaton model for traffic flow 1309
B. Eisenblätter, L. Santen, A. Schadschneider, and M. Schreckenberg
Dynamical evolution of escape probability in the presence of Sinai disorder 1315
S. Rajasekar and K. P. N. Murthy
Interavalanche correlations in the self-organized critical state of a multijunction superconducting quantum interference device 1319
S. L. Ginzburg, M. A. Pustovoit, and N. E. Savitskaya
Universal short-time behavior of the dynamic fully frustrated XY model 1327
H. J. Luo, L. Schülke, and B. Zheng
Complex-temperature partition function zeros of the Potts model on the honeycomb and kagomé lattices 1335
Heiko Feldmann, Robert Shrock, and Shan-Ho Tsai
Zipf's law is not a consequence of the central limit theorem 1347
G. Troll and P. beim Graben
Simplicity of state and overlap structure in finite-volume realistic spin glasses 1356
C. M. Newman and D. L. Stein
Classifying rational densities using two one-dimensional cellular automata 1367
H. F. Chau, K. K. Yan, K. Y. Wan, and L. W. Siu
Corrections to scaling in phase-ordering kinetics 1370
A. J. Bray, N. P. Rapapa, and S. J. Cornell
Nature of different types of absorbing states 1377
Miguel A. Muñoz
Rotational relaxation of rigid dipolar molecules in nonlinear dielectric spectra 1384
Kurt De Smet, Louis Hellemans, J. F. Rouleau, R. Courteau, and T. K. Bose
Aging in two- and three-particle annihilation processes 1388
K. P. N. Murthy and G. M. Schütz

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 57, NUMBER 2** **FEBRUARY 1998**

Wigner equation for particles obeying an exclusion-inclusion principle 1395
G. Kaniadakis, A. Lavagno, and P. Quarati
Entropy and entropy production in simple stochastic models 1403
Toyonori Munakata, Akito Igarashi, and Tadahiko Shiotani
Dynamical properties of the hypercell spin-glass model 1410
P. M. Gleiser and F. A. Tamarit
General projection operator formalism for the dynamics and thermodynamics of complex fluids 1416
Hans Christian Öttinger

Chaos and nonlinear dynamical systems

Dynamical tunneling in mixed systems 1421
S. D. Frischat and E. Doron
Dynamics of multimode Fabry-Perot lasers: A nonlinear analysis 1444
Ba An Nguyen and Paul Mandel
Ionization via chaos assisted tunneling 1458
Jakub Zakrzewski, Dominique Delande, and Andreas Buchleitner
Symmetry reduction and semiclassical analysis of axially symmetric systems 1475
Santanu Pal and Debabrata Biswas
Semischematic model for the center-of-mass dynamics in supercooled molecular liquids 1485
Linda Fabbian, Francesco Sciortino, Filippo Thiery, and Piero Tartaglia
Chaos in time-dependent variational approximations to quantum dynamics 1489
Fred Cooper, John Dawson, Salman Habib, and Robert D. Ryne
Nonlinear dynamics in a single mode three-level laser without inversion 1499
A. G. Vladimirov, Paul Mandel, S. F. Yelin, M. D. Lukin, and M. O. Scully
Chaos and bifurcations in ion traps of cylindrical and spherical design 1511
R. Blümel, E. Bonneville, and A. Carmichael
Chaotic scattering on a billiard 1519
Vincent J. Daniels, Michel Vallières, and Jian Min Yuan
Implementation of chaotic cryptography with chaotic synchronization 1532
Rong He and P. G. Vaidya
Kolmogorov-Arnold-Moser renormalization-group approach to the breakup of invariant tori in Hamiltonian systems 1536
C. Chandre, M. Govin, and H. R. Jauslin
Intermingled fractal Arnold tongues 1544
V. Paar and N. Pavin
Controlling physical systems with symmetries 1550
R. O. Grigoriev and M. C. Cross
Synchronizing broadband chaotic systems to narrow-band signals 1555
T. L. Carroll and G. A. Johnson
Chaos-induced synchronization in discrete-time oscillators driven by a random input 1559
Ali A. Minai and Tirunelveli Anand
Frequency locking in Josephson arrays: Connection with the Kuramoto model 1563
Kurt Wiesenfeld, Pere Colet, and Steven H. Strogatz
Collective motion occurs inevitably in a class of populations of globally coupled chaotic elements 1570
Naoko Nakagawa and Teruhisa S. Komatsu
Strange nonchaotic attractors in the quasiperiodically forced logistic map 1576
Awadhesh Prasad, Vishal Mehra, and Ramakrishna Ramaswamy
Renormalization group for scaling at the torus-doubling terminal point 1585
Sergey Kuznetsov, Ulrike Feudel, and Arkady Pikovsky

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 57, NUMBER 2 FEBRUARY 1998

Early-time critical dynamics of lattices of coupled chaotic maps 1591
Philippe Marcq and Hugues Chaté
Observer-based approach for controlling chaotic systems 1604
Teh-Lu Liao
Dynamic storage function by chaos control in a hybrid bistable system 1611
Ying Zhang, Jian-Bin Li, Zhi-Ren Zheng, Yun Jiang, and Jin-Yue Gao

Classical fluids

Numerical study of electronic impact and radiation in sonoluminescence 1615
Ning Xu, Long Wang, and Xiwei Hu
Stick-slip phase transitions in confined solidlike films from an equilibrium perspective 1621
Philippe Bordarier, Martin Schoen, and Alain H. Fuchs
Scaling law for coherent vortices in decaying drift Rossby wave turbulence 1636
Takeshi Watanabe, Takahiro Iwayama, and Hirokazu Fujisaka
Kinetic model for the hard-sphere fluid and solid 1644
Andrés Santos, José M. Montanero, James W. Dufty, and J. Javier Brey
Nearest-neighbor functions in a one-dimensional generalized ballistic deposition model 1661
P. Viot, P. R. Van Tassel, and J. Talbot
Dynamic correction to moment approximations 1668
Iliya V. Karlin, Alexander N. Gorban, G. Dukek, and T. F. Nonnenmacher
Melting and liquid structure of aluminum oxide using a molecular-dynamics simulation 1673
Rajeev Ahuja, A. B. Belonoshko, and Börje Johansson
Two-particle dispersion in turbulentlike flows 1677
J. C. H. Fung and J. C. Vassilicos
Interaction-site-model description of collective excitations in classical molecular fluids 1691
Song-Ho Chong and Fumio Hirata
Hydrodynamical perturbation effects in multibubble sonoluminescence 1702
David W. Kuhns, Anatol M. Brodsky, and Lloyd W. Burgess
Nature of roll to spiral-defect-chaos transition 1705
Xiao-jun Li, Hao-wen Xi, and J. D. Gunton
Liquid dynamics theory of high-temperature specific heat 1717
Duane C. Wallace
Iterative method to improve the Mott-Smith shock-wave structure theory 1723
Young Gie Ohr
Real-time diffusivity measurements in liquids at several temperatures with one sample 1727
Lyle B. Jalbert, R. Michael Banish, and Franz Rosenberger
Probability density and scaling exponents of the moments of longitudinal velocity difference in strong turbulence 1737
Victor Yakhot
Phase diagrams of aligned dipolar hard rods 1752
P. I. C. Teixeira, M. A. Osipov, and M. M. Telo da Gama
Time-dependent states in the Weissenberg effect 1761
Michael M. Degen, William J. Kahle, and C. David Andereck
Fracturing due to fluid intrusion into viscoelastic materials 1772
T. Hirata

Liquid crystals

Surface-induced nematic order variation: Intrinsic anchoring and subsurface director deformations 1780
G. Skačej, A. L. Alexe-Ionescu, G. Barbero, and S. Žumer

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 57, NUMBER 2** **FEBRUARY 1998**

Dielectric investigations of the dynamics of the hexatic-hexatic transition in a chiral liquid crystal 1789
S. Krishna Prasad, Geetha G. Nair, and Rajni kant
Computer-simulation studies of diskotic liquid crystals 1793
Habtamu Zewdie
Polar ordering of smectic liquid crystals within the interfacial region 1806
M. Harke, M. Ibn-Elhaj, H. Möhwald, and H. Motschmann
Anisotropic relaxation in liquid crystals 1812
V. Dvořák, P. Kužel, and P. Moch

PART B

Note to Reader i

Complex fluids and polymers

Long-time self-diffusion in a model ferrofluid 1817
M. Hernández-Contreras, P. González-Mozuelos, O. Alarcón-Waess, and H. Ruíz-Estrada
Adsorption of a hard sphere fluid in a slitlike pore filled with a disordered matrix by the inhomogeneous replica Ornstein-Zernike equations 1824
Andrij Kovalenko, Stefan Sokołowski, Douglas Henderson, and Orest Pizio
Elasticity, shape fluctuations, and phase transitions in the new tubule phase of anisotropic tethered membranes ... 1832
Leo Radzihovsky and John Toner
Dynamics of chainlike molecules on surfaces 1864
T. Hjelt, S. Herminghaus, T. Ala-Nissila, and S. C. Ying
Phase ordering dynamics in binary mixtures with annealed vacancies 1873
Sanjay Puri and Radhika Sharma
Dynamics of a ball bouncing on a rough inclined line 1886
Alexandre Valance and Daniel Bideau
Ostwald ripening in two dimensions: Correlations and scaling beyond mean field 1895
Boris Levitan and Eytan Domany
Time-resolved optical Kerr effect in a fragile glass-forming liquid, salol 1912
Renato Torre, Paolo Bartolini, and Robert M. Pick
Onset of self-assembly 1921
Shirish M. Chitanvis
Controlling the temperature of one-dimensional systems composed of elastic and inelastic particles 1929
Kenneth Geisshirt, Paz Padilla, Eigil Præstgaard, and Søren Toxvaerd
Modified weighted density-functional approach to the crystal-melt interface 1939
Niharendu Choudhury and Swapan K. Ghosh
Two-exponential decay of dynamic light scattering in near-critical fluid mixtures 1946
M. A. Anisimov, V. A. Agayan, A. A. Povodyrev, J. V. Sengers, and E. E. Gorodetskii
Structure and formation of a gel of colloidal disks 1962
Mark Kroon, Willem L. Vos, and Gerard H. Wegdam
Density fluctuations in vibrated granular materials 1971
Edmund R. Nowak, James B. Knight, Eli Ben-Naim, Heinrich M. Jaeger, and Sidney R. Nagel
Depletion driven adsorption of colloidal rods onto a hard wall 1983
Richard P. Sear
Analysis of statistical quantities in simulation of fluidized beds 1990
Kengo Ichiki and Hisao Hayakawa
Monte Carlo simulations of colloidal dispersions under shear 1997
N. Olivi-Tran, R. Botet, and B. Cabane
Dendritic growth during liquid to solid phase transitions 2004
V. Laxmanan

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 57, NUMBER 2** **FEBRUARY 1998**

Geometry and time scale of the rotational dynamics in supercooled toluene 2010
G. Hinze
Steady state of a fluidized granular medium between two walls at the same temperature 2019
J. J. Brey and D. Cubero
Dynamics of concentrated colloidal suspensions probed by x-ray correlation spectroscopy 2030
O. K. C. Tsui and S. G. J. Mochrie
Phase equilibria of a square-well monomer-dimer mixture: Gibbs ensemble computer simulation and statistical associating fluid theory for potentials of variable range 2035
Lowri A. Davies, Alejandro Gil-Villegas, George Jackson, Sofía Calero, and Santiago Lago
Winding angles for two-dimensional polymers with orientation-dependent interactions 2045
Thomas Prellberg and Barbara Drossel
Discrete element investigation of stress fluctuation in granular flow at high strain rates 2053
O. J. Schwarz, Y. Horie, and M. Shearer
Interface Hamiltonian with a position-dependent stiffness: A nonlinear functional renormalization group study 2062
C. J. Boulter
Radial mixing and segregation of a binary mixture in a rotating drum: Model and experiment 2073
Leonid Prigozhin and Haim Kalman
Molecular-dynamics simulations of polyampholytes: Instabilities due to excess charges and external fields 2081
T. Soddemann, H. Schiessel, and A. Blumen

Biological physics

Micro-bead mechanics with actin filaments 2091
A. C. Maggs
Random and systematic dilutions of synaptic connections in a neural network with a nonmonotonic response function 2095
Masato Okada, Tomoki Fukai, and Masatoshi Shiino
Thermal electrical fluctuations around a charged colloidal cylinder in an electrolyte 2104
José A. Fornés
Fluctuation-dissipation theorem and the polarizability of rodlike polyelectrolytes: An electric circuit view 2110
José A. Fornés
Unfolding dimension and the search for functional markers in the human electroencephalogram 2115
Rudolf M. Dünki and Gary Bruno Schmid
Deflection of a cell membrane under application of a local force 2123
A. A. Boulbitch
Observation of super-Poisson statistics of bacterial (*Photobacterium phosphoreum*) bioluminescence during the early stage of cell proliferation 2129
Masaki Kobayashi, B. Devaraj, and Humio Inaba
DNA under high tension: Overstretching, undertwisting, and relaxation dynamics 2134
John F. Marko
Delay-induced multistable synchronization of biological oscillators 2150
U. Ernst, K. Pawelzik, and T. Geisel
Spatial epidemic network models with viral dynamics 2163
Henry C. Tuckwell, Laurent Toubiana, and Jean-Francois Vibert
Learning with regularizers in multilayer neural networks 2170
David Saad and Magnus Rattray
Rectified Brownian movement in molecular and cell biology 2177
Ronald F. Fox

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 57, NUMBER 2 FEBRUARY 1998

Mean-field theory of fluid neural networks 2204
Jordi Delgado and Ricard V. Solé

Plasma physics

Nonequilibrium argon plasma generated by an electron beam 2212
A. V. Vasenkov
Transport properties of strongly coupled plasmas 2222
I. M. Tkachenko and P. Fernández de Córdoba
Ionization layer at the edge of a fully ionized plasma 2230
M. S. Benilov and G. V. Naidis
Experimental study of low-frequency electrostatic fluctuations in a magnetized toroidal plasma 2242
Frank J. Øynes, Ole-Morten Olsen, Hans L. Pécseli, Åshild Fredriksen, and Kristoffer Rypdal

Physics of beams

Dispersion relation and growth in a free-electron laser with ion-channel guiding 2256
Pallavi Jha and Punit Kumar
Electrostatic beam modes in a free-electron laser with a coaxial wiggler 2262
Joseph E. Willett, Un-Hak Hwang, Yildirim Aktas, and Hassan Mehdian
Wide ultrarelativistic plasma-beam–magnetic-barrier collision 2267
V. V. Usov and M. V. Smolsky
Quantum processes in the field of a two-frequency circularly polarized plane electromagnetic wave 2276
An Yu and H. Takahashi
Measurement of femtosecond electron bunches using a rf zero-phasing method 2283
D. X. Wang, G. A. Krafft, and C. K. Sinclair

Classical physics, including nonlinear media

Optical solitary waves in two- and three-dimensional nonlinear photonic band-gap structures 2287
Neşet Aközbek and Sajeev John
From kinks to compactonlike kinks 2320
S. Dusuel, P. Michaux, and M. Remoissenet
Heliconic band structure of one-dimensional periodic metallic composites 2327
Chul-Sik Kee, Jae-Eun Kim, and Hae Yong Park
Solitons and diffusive modes in the noiseless Burgers equation: Stability analysis 2331
Hans C. Fogedby
Radiation of relativistic charged particles in a system with one-dimensional randomness 2338
Zh. S. Gevorkian
Strongly localized modes in discrete systems with quadratic nonlinearity 2344
S. Darmanyan, A. Kobyakov, and F. Lederer
Bifurcation to multisoliton complexes in the ac-driven, damped nonlinear Schrödinger equation 2350
I. V. Barashenkov, Yu. S. Smirnov, and N. V. Alexeeva
Observation of an optical Wannier-Stark ladder 2365
C. Martijn de Sterke, J. N. Bright, Peter A. Krug, and T. E. Hammon
Designing localized multipulse solutions of the discrete nonlinear Schrödinger equation with an external potential 2371
D. Hennig and H. Gabriel
Multiple scattering of classical waves in systems with liquidlike correlations: Analytical and numerical results for isotropic scatterers 2377
C. J. Walden

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 57, NUMBER 2 FEBRUARY 1998

Solitonlike pulses in perturbed and driven Hertzian chains and their possible applications in detecting buried impurities 2386
Surajit Sen, Marian Manciu, and James D. Wright
Enhanced pulse compression in a nonlinear fiber by a wavelength division multiplexed optical pulse 2398
C. Yeh and L. Bergman
Oscillatory patterns composed of the parametrically excited surface-wave solitons 2405
Xinlong Wang and Rongjue Wei

Computational physics

Many-body diffusion algorithm: Harmonic fermions 2411
F. Luczak, F. Brosens, J. T. Devreese, and L. F. Lemmens
Traveling through potential energy landscapes of disordered materials: The activation-relaxation technique 2419
Normand Mousseau and G. T. Barkema
Orthorhombic phase of crystalline polyethylene: A constant pressure path-integral Monte Carlo study 2425
R. Martoňák, W. Paul, and K. Binder

BRIEF REPORTS

General methods of statistical physics

Early-time scaling for the reaction front of a ternary, $A+2B\rightarrow C$, reaction-diffusion system 2438
Andrew Yen, Zhong-You Shi, and Raoul Kopelman
Cellular automaton model for bidirectional traffic 2441
P. M. Simon and H. A. Gutowitz
Total and fractional densities of states from caloric relations 2445
S. F. Chekmarev and S. V. Krivov
First-order phase transitions in clustering 2449
J. Schneider

Chaos and nonlinear dynamical systems

Singularities at a dense set of temperature singularities in the Husimi tree 2452
A. E. Alahverdian, N. S. Ananikian, and S. K. Dallakian
Global reconstruction in application to multichannel communication 2455
Vadim S. Anishchenko and Alexey N. Pavlov
Chaos in a two-spin system with applied magnetic field 2458
Daniel T. Robb and L. E. Reichl

Classical fluids

Dynamical aspects of one-dimensional Maxwellian relaxation 2460
Pirooz Mohazzabi and Jeffrey R. Schmidt
Comparison between high-order velocity vector and temperature structure functions 2463
R. A. Antonia and B. R. Pearson

Complex fluids and polymers

Model for anisotropic directed percolation 2467
V. Lien Nguyen and Enrique Canessa

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 57, NUMBER 2** **FEBRUARY 1998**

Biological physics

Selection-mutation process of RNA viruses 2471
Amal Aafif and Juan Lin

Plasma physics

Large-amplitude radial-plasma-wave generation during high-intensity laser interactions with underdense plasmas 2475
K. Krushelnick, A. Ting, C. I. Moore, and H. R. Burris
Intense magnetic fields produced by neutrino beams in supernovae 2479
P. K. Shukla and L. Stenflo

Classical physics, including nonlinear media

Stretched exponentiality and Kohlrausch-Lévy decay of optical waveguide modes 2481
K. Hayata

ERRATA

Erratum: Primary instabilities in convective cells due to nonuniform heating [Phys. Rev. E **56**, 2916 (1997)] 2485
A. M. Mancho, H. Herrero, and J. Burguete

Cumulative Author Index 2486
