THIRD SERIES, VOLUME 57, NUMBER 3
PARTS A AND B

CONTENTS

MARCH 1998

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R2491–3062, and Part B pages 3063–3694.*

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

- Anomalous scaling in a nonlocal growth model in the Kardar-Parisi-Zhang universality class R2491
Mario Castro, Rodolfo Cuerno, Angel Sánchez, and Francisco Domínguez-Adame
Nonequilibrium transitions induced by multiplicative noise R2495
Walter Genovese, Miguel A. Muñoz, and J. M. Sancho

Chaos and nonlinear dynamical systems

- Spatial coherence in an open flow model R2499
Yu Jiang and P. Parmananda
Directed percolation universality in asynchronous evolution of spatiotemporal intermittency R2503
Juri Rolf, Tomas Bohr, and Mogens H. Jensen
Targeting chaos through adaptive control R2507
Ramakrishna Ramaswamy, Sudeshna Sinha, and Neelima Gupte
Spatially localized unstable periodic orbits of a high-dimensional chaotic system R2511
Scott M. Zoldi and Henry S. Greenside

Classical fluids

- Helicity transfer in turbulent models R2515
L. Biferale, D. Pierotti, and F. Toschi

Liquid crystals

- Abrupt orientational changes for liquid crystals adsorbed on a graphite surface R2519
V. Palermo, F. Biscarini, and C. Zannoni

Complex fluids and polymers

- Raman correlation spectroscopy: A method for studying chemical composition and dynamics of disperse systems R2523
Wolfgang Schrof, Jüring F. Klingler, Stanislaw Rozouvan, and Dieter Horn

Biological physics

- Firing and signal transduction associated with an intrinsic oscillation in neuronal systems R2527
Wei Wang, Yuqing Wang, and Z. D. Wang

(Continued)

1063-651X(199803)57:3:A;1-L

Plasma physics

- Harmonic generation by relativistic electrons during irradiance of a solid target by a short-pulse ultraintense laser R2531
 Wei Yu, M. Y. Yu, J. Zhang, and Z. Xu

Computational physics

- Algorithm for multiple minima search R2535
 Marcelo A. Moret, Paulo M. Bisch, and Fernando de M. C. Vieira

ARTICLES**General methods of statistical physics**

- Ordering kinetics of defect structures 2539
 Gene F. Mazenko and Robert A. Wickham
- Collective behavior in globally coupled systems consisting of two kinds of competing cells 2543
 Y. Zhang, G. Hu, H. Liu, and J. H. Xiao
- Number of distinct sites visited by Lévy flights injected into a d -dimensional lattice 2549
 G. Berkolaiko and S. Havlin
- Multicanonical methods, molecular dynamics, and Monte Carlo methods: Comparison for Lennard-Jones glasses 2553
 Kamal K. Bhattacharya and James P. Sethna
- Annihilating random walks in one-dimensional disordered media 2563
 G. M. Schütz and K. Mussawisade
- Statistical mechanical approach to Fukui-Ishibashi traffic flow models 2568
 Bing-Hong Wang, Yvonne-Roamy Kwong, and Pak-Ming Hui
- Driven dynamics of periodic elastic media in disorder 2574
 Stefan Scheidl and Valerii M. Vinokur
- Correlation length and the scaling parameter in the renormalization group 2594
 F. Dolcini, L. Ferrari, A. Rioli, and C. Degli Esposti Boschi
- Anisotropic multi-phase-field model: Interfaces and junctions 2602
 B. Nestler and A. A. Wheeler
- Simulation study of nucleation in a phase-field model with nonlocal interactions 2610
 A. Roy, J. M. Rickman, J. D. Gunton, and K. R. Elder
- Noise delayed decay of unstable states 2618
 N. V. Agudov
- Critical point shift in a fluid confined between opposing walls 2626
 Enrico Carlon and Andrzej Drzewiński
- Aspects of self-organized criticality in a random driven interface model 2634
 M. Jost
- Stability of current filaments in a bistable semiconductor system with global coupling 2640
 A. Alekseev, S. Bose, P. Rodin, and E. Schöll
- Identification of domain walls in coarsening systems at finite temperature 2650
 Haye Hinrichsen and Mickaël Antoni
- Localized sensitivity of spiral waves in the complex Ginzburg-Landau equation 2656
 I. V. Biktasheva, Yu. E. Elkin, and V. N. Biktashev
- Coherent structures in quantum systems with two coupled types of excitation 2660
 J. M. Dixon, M. L. A. Nip, J. A. Tuszyński, and K. J. E. Vos
- Interface dynamics in a uniaxial anisotropic n -vector model 2675
 Hiroki Tutu

Effect of static disorder and reactant segregation on the $A + B \rightarrow 0$ reaction	2681
Michael W. Deem and Jeong-Man Park	
Large- q series expansion for the ground-state degeneracy of the q -state Potts antiferromagnet on the $(3 \cdot 12^2)$ lattice	2686
Shan-Ho Tsai	
Fluctuation-response relation for steady states	2690
Marco Paniconi	
Similarities and differences between Bose and Fermi gases	2697
R. K. Pathria	

Chaos and nonlinear dynamical systems

Fuzzy transition region in a one-dimensional coupled-stable-map lattice	2703
F. Cecconi, R. Livi, and A. Politi	
Transverse instability and riddled basins in a system of two coupled logistic maps	2713
Yu. L. Maistrenko, V. L. Maistrenko, A. Popovich, and E. Mosekilde	
Loss of synchronization in lasers via parameter degradation	2725
Carlos L. Pando L.	
Nonlinear supersymmetric σ model for scalar classical waves	2733
B. Elattari, V. Kagalovsky, and H. A. Weidenmüller	
General approach to the localization of unstable periodic orbits in chaotic dynamical systems	2739
P. Schmelcher and F. K. Diakonos	
Morse-type Frenkel-Kontorova model	2747
Chung-I Chou, Choon-Lin Ho, Bambi Hu, and Hsuan Lee	
A few basic structures determine the behavior of a coupled map lattice	2757
Valter Franceschini and Cecilia Vernia	
Statistical mechanics and computer simulation of systems with attractive positive power-law potentials	2763
Lj. Milanović, H. A. Posch, and W. Thirring	
Solitons, chaos, and energy transfer in the Zakharov equations	2776
F. B. Rizzato, G. I. de Oliveira, and R. Erichsen	
Synchronization of coupled systems via parameter perturbations	2787
P. J. Aston and C. M. Bird	
Chaos in wavelength with a feedback tunable laser diode	2795
Jean-Pierre Goedgebuer, Laurent Larger, Henri Porte, and Franck Delorme	
Onset of chaos in a pendulum coupled to a thermal environment	2799
S. Fahy, S. Twohig, M. Stefansson, and D. Courtney	
Observing and modeling nonlinear dynamics in an internal combustion engine	2811
C. S. Daw, M. B. Kennel, C. E. A. Finney, and F. T. Connolly	
Identification of continuous, spatiotemporal systems	2820
H. Voss, M. J. Bünner, and M. Abel	

Classical fluids

Three applications of scaling to inhomogeneous, anisotropic turbulence	2824
Piero Olla	
Advection in chaotically time-dependent open flows	2832
Z. Neufeld and T. Tél	
Phase diffusion in the vicinity of an oscillatory secondary bifurcation	2843
F. Giorgiutti, L. Limat, and J. E. Wesfreid	
Cellular structures in three-dimensional directional solidification: Simulation and analysis	2849
K. Kassner, J.-M. Debierre, B. Billia, N. Noël, and H. Jamgotchian	

Thermodynamically self-consistent theory of structure for three-dimensional lattice gases	2862
Davide Pini, George Stell, and Ronald Dickman	
Two-layer Bénard-Marangoni instability and the limit of transverse and longitudinal waves	2872
A. Ye. Rednikov, P. Colinet, M. G. Velarde, and J. C. Legros	
Statistical mechanics of vortex lines	2885
V. Berdichevsky	
Pattern formation in drying water films	2906
N. Samid-Merzel, S. G. Lipson, and D. S. Tannhauser	
Structure of the three-point correlation function of a passive scalar in the presence of a mean gradient	2914
Alain Pumir	
Fluid particle model	2930
Pep Español	
Pattern formation in interface depinning and other models: Erratically moving spatial structures	2949
Supriya Krishnamurthy and Mustansir Barma	
Anomalous scaling for a passive scalar near the Batchelor limit	2965
Boris I. Shraiman and Eric D. Siggia	
Monte Carlo simulation of a charged fluid separated by a charged wall of finite thickness	2978
Léo Degreève and Marcelo Lozada-Cassou	
Energy spectrum in the inertial and dissipation ranges of two-dimensional steady turbulence	2984
Toshiyuki Gotoh	
Heat conduction in one-dimensional chains	2992
Bambi Hu, Baowen Li, and Hong Zhao	

Liquid crystals

Light-scattering measurement of the nematic correlation length in a liquid crystal with quenched disorder	2996
Tommaso Bellini, Noel A. Clark, Vittorio Degiorgio, Francesco Mantegazza, and Giorgio Natale	
Director configuration of planar solitons in nematic liquid crystals	3007
Henryk Arodź and Joachim Stelzer	
Generalized smectic-hexatic phase diagram	3015
Z. Kutnjak and C. W. Garland	
Phase behavior of liquid crystals confined to controlled porous glass studied by deuteron NMR	3021
S. Kralj, A. Zidanšek, G. Lahajnar, S. Žumer, and R. Blinc	
Liquid crystal reorientation induced by completely unpolarized light	3033
L. Marrucci, P. Maddalena, G. Arnone, L. Sirleto, and E. Santamato	
Topological properties of singular fingers in frustrated cholesteric liquid crystals	3038
J. Baudry, S. Pirkel, and P. Oswald	
Light-scattering study of modulated structure in a chiral smectic-A liquid crystal	3050
Anlun Tang and S. Sprunt	
Electric-field-induced layer buckling in chiral smectic-A liquid crystals	3059
R. E. Geer, S. J. Singer, J. V. Selinger, B. R. Ratna, and R. Shashidhar	

PART B

Note to Reader	i
----------------------	---

Complex fluids and polymers

Dynamics of closed interfaces in two-dimensional Laplacian growth	3063
Silvina Ponce Dawson and Mark Mineev-Weinstein	
Spin-glass-like complex susceptibility of frozen magnetic fluids	3073
Susamu Taketomi	

Reptation in linear systems	3088
G. Sartoni and J. M. J. van Leeuwen	
Effects of thermal history on the dynamics of relaxation of poly(<i>N</i> -isopropylacrylamide) adsorbed at latex interfaces in water	3101
Peng Wei Zhu and Donald H. Napper	
Monte Carlo study of the magnetic critical properties of a two-dimensional Ising fluid	3107
A. L. Ferreira and W. Korneta	
Viscoelastic behavior of an ordering latex suspension in a steady shear flow	3115
B. van der Vorst, D. van den Ende, N. A. Tekin, and J. Mellema	
Wetting controlled phase transitions in two-dimensional systems of colloids	3123
Tamir Gil, John Hjort Ipsen, and Carlos F. Tejero	
Quasistatic reduced yield stress number in London-van der Waals interacting solid-liquid media: Influence of high solid mass concentrations	3134
Stefano A. Mezzasalma	
Topological and geometrical properties of crack patterns produced by the thermal shock in ceramics	3142
W. Korneta, S. K. Mendiratta, and J. Menteiro	
X-ray diffraction and molecular-dynamics studies: Structural analysis of phases in diglyceride monolayers	3153
G. H. Peters, N. B. Larsen, T. Bjørnholm, S. Toxvaerd, K. Schaumburg, and K. Kjaer	
Force distribution in a granular medium	3164
Daniel M. Mueth, Heinrich M. Jaeger, and Sidney R. Nagel	
Forces on bins: The effect of random friction	3170
E. Bruce Pitman	
Scaling behavior of three-dimensional dendrites	3176
Q. Li and C. Beckermann	
Onset of sidebranching in directional solidification	3189
M. Georgelin and A. Pocheau	
Average stresses and force fluctuations in noncohesive granular materials	3204
Joshua E. S. Socolar	
Simulating fractal pattern formation in metal-oil electrorheological fluids	3216
F. Kun and K. F. Pál	
Singular Laplacian growth	3221
Mark A. Peterson	
Interaction forces in quasi-two-dimensional charged dispersions	3227
K. Srinivasa Rao and Raj Rajagopalan	
Ostwald ripening in a semi-infinite system	3234
R. Burghaus	
Lattice Boltzmann simulation of nonideal vapor-liquid flow in porous media	3237
A. D. Angelopoulos, V. N. Paunov, V. N. Burganos, and A. C. Payatakes	
Interaction between Hopf and convective instabilities in a flow reactor with cubic autocatalator kinetics	3246
Razvan Satnoianu, John Merkin, and Stephen Scott	
Biological physics	
Effective degrees of freedom in genetic algorithms	3251
C. R. Stephens and H. Waelbroeck	
Role of biases in on-line learning of two-layer networks	3265
Ansgar H. L. West and David Saad	
Coherence resonance in a Hodgkin-Huxley neuron	3292
Sang-Gui Lee, Alexander Neiman, and Seunghwan Kim	
Stability of preferable structures for a hydrophobic-polar model of protein folding	3298
M. R. Ejtehadi, N. Hamedani, H. Seyed-Allaei, V. Shahrezaei, and M. Yahyanejad	

Stability of the replica-symmetric solution for the information conveyed by a neural network	3302
Simon Schultz and Alessandro Treves	
Long-range correlations in computer diskettes	3311
G. F. Zebende, P. M. C. de Oliveira, and T. J. P. Penna	
Water dynamical anomalies evidenced by molecular-dynamics simulations at the solvent-protein interface	3315
Claudia Rocchi, Anna Rita Bizzarri, and Salvatore Cannistraro	
Phase transitions in optimal unsupervised learning	3326
Arnaud Buhot and Mirta B. Gordon	
Effect of pressure on dimyristoylphosphatidylcholine headgroup dynamics	3334
Darius C. Fiech, Boyan B. Bonev, and Michael R. Morrow	
Controlled disordered patterns and information transfer between coupled neural lattices with oscillatory states . . .	3344
V. I. Nekorkin, V. B. Kazantsev, M. I. Rabinovich, and M. G. Velarde	

Plasma physics

Reduction of increment of Rayleigh-Taylor instability in specially designed multilayer inertial-confinement-fusion targets	3352
N. A. Inogamov	
Dense plasma diagnostics by fast proton beams	3363
A. Golubev, M. Basko, A. Fertman, A. Kozodaev, N. Mesheryakov, B. Sharkov, A. Vishnevskiy, V. Fortov, M. Kulish, V. Gryaznov, V. Mintsev, E. Golubev, A. Pukhov, V. Smirnov, U. Funk, S. Stoewe, M. Stetter, H.-P. Flierl, D. H. H. Hoffmann, J. Jacoby, and I. Iosilevski	
Time-dependent stopping power and influence of an infinite magnetic field	3368
Cord Seele, Günter Zwicknagel, Christian Toepffer, and Paul-Gerhard Reinhard	
Clusters of ionization clumps in weakly ionized annular rf discharges	3379
Chih-Yi Liu and Lin I	
Thomson scattering from ion acoustic waves in laser plasmas	3383
J. F. Myatt, W. Rozmus, V. Yu. Bychenkov, and V. T. Tikhonchuk	
Hamiltonian dynamics of dust-plasma interactions	3392
Osamu Ishihara and Sergey V. Vladimirov	
Long waves in a relativistic pair plasma in a strong magnetic field	3399
M. Gedalin, D. B. Melrose, and E. Gruman	
Increase in Rosseland mean opacity for inertial fusion hohlraum walls	3411
D. Colombant, M. Klapisch, and A. Bar-Shalom	
Laser-driven implosion of a cylindrical plasma	3417
T. R. Clark and H. M. Milchberg	
Kinetic theory of photon acceleration: Time-dependent spectral evolution of ultrashort laser pulses	3423
L. Oliveira e Silva and J. T. Mendonça	

Physics of beams

Dynamic aperture extrapolation in the presence of tune modulation	3432
M. Giovannozzi, W. Scandale, and E. Todesco	
Madey's and Liouville's theorems relating to free-electron lasers without inversion	3444
Dmitri E. Nikonov, Yuri V. Rostovtsev, and Georg Sussmann	
Suppression and enhancement of coherent synchrotron radiation in the presence of two parallel conducting plates	3454
R. Kato, T. Nakazato, M. Oyamada, S. Urasawa, T. Yamakawa, M. Yoshioka, M. Ikezawa, K. Ishi, T. Kanai, Y. Shibata, and T. Takahashi	

Spectrum of single bunch longitudinal dipole modes	3461
Nathan Towne and Jiunn-Ming Wang	
Classical physics, including nonlinear media	
Solutions and laws of conservation for coupled nonlinear Schrödinger equations: Lie group analysis	3468
V. I. Pulov, I. M. Uzunov, and E. J. Chacarov	
Refraction and reflection of a wave when the interface and the media are moving at relativistic speeds	3478
G. Cavalleri and E. Tonni	
Two-color cross-correlation in small-angle static light scattering	3485
Luca Cipelletti, Marina Carpineti, and Marzio Giglio	
Autoresonance of coupled nonlinear waves	3494
L. Friedland	
Superstructure gratings in the tight-binding approximation	3502
C. Martijn de Sterke	
Breather solutions to the focusing nonlinear Schrödinger equation	3510
Masayoshi Tajiri and Yosuke Watanabe	
Strongly localized vectorial modes in nonlinear waveguide arrays	3520
S. Darmanyán, A. Kobayakov, E. Schmidt, and F. Lederer	
Dielectric breakdown in media with defects	3531
Jeffrey Boksiner and P. L. Leath	
Stability criterion of coupled soliton states	3542
Yijiang Chen	
Multicolor solitons due to four-wave mixing	3551
Paul B. Lundquist, David R. Andersen, and Yuri S. Kivshar	
Sampling theorem in macroscopic electrodynamics of crystal lattices	3556
E. O. Kamenetskii	
Theory of bianisotropic crystal lattices	3563
E. O. Kamenetskii	
Statistical properties of the cumulative phase of electromagnetic radiation transmitted through a waveguide with random scatterers	3574
A. Bulatov, D. Livdan, and Joseph L. Birman	
Computational physics	
Detection of subthreshold oscillations in a sinusoid-crossing sampling	3579
Marisciel Litong and Caesar Saloma	
Computing with cellular automata: Three cases for nonuniformity	3589
Moshe Sipper	
Discrete wavelet transform power spectrum estimator	3593
Jesús Pando and Li-Zhi Fang	
Transfer matrix method for a dynamical mesoscopic system	3602
K. Yakubo	
Evolutionary optimization algorithm by entropic sampling	3611
Chang-Yong Lee and Seung Kee Han	

BRIEF REPORTS**General methods of statistical physics**

Disorder-induced anomalous kinetics in the $A + A \rightarrow 0$ reaction	3618
Jeong-Man Park and Michael W. Deem	
Epidemic models with an infected-infectious period	3622
Vicenç M��ndez	
Kinetic phase transition in the antiferromagnetic Ising model with competing dynamics	3625
Yu-qiang Ma, Ji-wen Liu, and W. Figueiredo	
Monte Carlo simulations of the violation of the fluctuation-dissipation theorem in domain growth processes	3629
A. Barrat	
Boundary effects in a random neighbor model of earthquakes	3633
Stefano Lise and Attilio L. Stella	
Markovian kinetic equations in a nonequilibrium statistical ensemble formalism	3637
Justino R. Madureira, ��urea R. Vasconcellos, Roberto Luzzi, and Leonardo Lauck	
Appearance and nonappearance of self-organized criticality in sandpiles	3641
R. O. Dendy and P. Helander	

Chaos and nonlinear dynamical systems

Controlling one-dimensional unimodal population maps by harvesting at a constant rate	3645
Shay Gueron	
Experimental evidence of frequency entrainment between coupled chaotic oscillations	3649
D. Y. Tang, R. Dykstra, M. W. Hamilton, and N. R. Heckenberg	

Complex fluids and polymers

Pattern formation in a dendrimer model	3652
Zheng Yu Chen and Chengzhen Cai	
Two-dimensional experimental simulation of polymers in annealed disordered media	3656
Irene Ippolito, Daniel Bideau, and Alex Hansen	

Biological physics

Multifractal <i>a priori</i> probability distribution for the perceptron	3660
C. Van den Broeck and G. J. Bex	

Classical physics, including nonlinear media

Exact localized solution for nonconservative systems with delayed nonlinear response	3664
N. N. Akhmediev, M. J. Lederer, and B. Luther-Davies	
Dynamics of electrons in a double quantum dot biased by an ac voltage: Nonlinear effect of Coulomb interaction	3668
Zhi-Yong Zhang and Shi-Jie Xiong	

COMMENTS

Comment on "Invariance principle for extension of hydrodynamics: Nonlinear viscosity"	3672
Francisco J. Uribe and E. Pi���a	
Reply to "Comment on 'Invariance principle for extension of hydrodynamics: Nonlinear viscosity' "	3674
Iliya V. Karlin, G. Du��ek, and T. F. Nonnenmacher	
Comment on "Thermodynamic and transport properties of dense hydrogen plasmas"	3676
I. M. Tkachenko	

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 57, NUMBER 3

MARCH 1998

Reply to “Comment on ‘Thermodynamic and transport properties of dense hydrogen plasmas’ ”	3678
Ronald Redmer	
Comment on “Action at a distance as a full-value solution of Maxwell equations: The basis and application of the separated-potentials method”	3680
Tomislav Ivezić and Ljuba Škovrlj	
Reply to “Comment on ‘Action at a distance as a full-value solution of Maxwell equations: The basis and application of the separated-potentials method’ ”	3683
Andrew E. Chubykalo and Roman Smirnov-Rueda	
Cumulative Author Index	3687
