THIRD SERIES, VOLUME 57, NUMBER 5
PARTS A AND B

CONTENTS

MAY 1998

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R4863–5472, and Part B pages 5473–6228.*

PART A

Note to Reader i

General methods of statistical physics

Noise reduction and universality in limited-mobility models of nonequilibrium growth R4863
P. Punyindu and S. Das Sarma

Chaos and nonlinear dynamical systems

Dynamical structure factors in models of turbulence R4867
F. Hayot and C. Jayaprakash

Classical fluids

Relative diffusion and memory effects in supercooled water R4871
Alberto De Santis, Alessandro Ercoli, and Dario Rocca

Liquid crystals

Tilt, polarity, and spontaneous symmetry breaking in liquid crystals R4875
Alexandros G. Vanakaras, Demetri J. Photinos, and Edward T. Samulski

Complex fluids, diffusion-limited aggregation, and dendritic growth

Three-dimensional mesoscale dynamics of block copolymers under shear: The dynamic density-functional approach R4879
A. V. Zvelindovsky, G. J. A. Sevink, B. A. C. van Vlimmeren, N. M. Maurits, and J. G. E. M. Fraaije

Incomplete phase separation in mixed monolayers R4883
A. Weinstein and S. A. Safran

Long-term gelation of laponite aqueous dispersions R4887
A. Mouchid and P. Levitz

Spatial correlations in compressible granular flows R4891
T. P. C. van Noije, M. H. Ernst, and R. Brito

Plasma physics

Measurement of the stimulated Brillouin scattering reflectivity from a spatially smoothed laser beam in a homogeneous large scale plasma R4895
S. D. Baton, F. Amiranoff, V. Malka, A. Modena, M. Salvati, C. Coulaud, C. Rousseaux, N. Renard, Ph. Mounaix, and C. Stenz

Guiding of a 10-TW picosecond laser pulse through hollow capillary tubes R4899
M. Borghesi, A. J. Mackinnon, R. Gaillard, O. Willi, and A. A. Offenberger

(Continued)

1063-651X(199805)57:5:A;1-D

Classical physics, including nonlinear media

Controlling friction	R4903
Franz-Josef Elmer	
Traversal time of acoustic plate waves through a tunneling section	R4907
A. Alippi, M. Germano, A. Bettucci, F. Farrelly, and G. Muzio	
Traveling-wave–standing-wave competition in a generalized complex Swift-Hohenberg equation	R4911
V́ctor J. Śnchez-Morcillo, Germán J. de Valcárcel, Eugenio Roldán, and Kestutis Staliunas	

ARTICLES**General methods of statistical physics**

Anomalous diffusion resulting from strongly asymmetric random walks	4915
Eric R. Weeks and Harry L. Swinney	
Aperiodic mean-field evolutions in coupled map lattices	4921
Jérôme Losson, Stéphane Vannitsem, and Grégoire Nicolis	
Interaction-driven equilibrium and statistical laws in small systems: The cerium atom	4933
V. V. Flambaum, A. A. Gribakina, G. F. Gribakin, and I. V. Ponomarev	
Soliton approach to the noisy Burgers equation: Steepest descent method	4943
Hans C. Fogedby	
Isomorphic multifractal shear flows for hard disks via adiabatic and isokinetic nonequilibrium molecular dynamics	4969
Christoph Dellago, Wm. G. Hoover, and Harald A. Posch	
Geometric cluster Monte Carlo simulation	4976
J. R. Heringa and H. W. J. Blöte	
Stochastic resonance in nonpotential systems	4979
T. Alarcón, A. Pérez-Madrid, and J. M. Rubí	
Bifurcations from steady sliding to stick slip in boundary lubrication	4986
A. A. Batista and J. M. Carlson	
Smooth phases, roughening transitions, and novel exponents in one-dimensional growth models	4997
U. Alon, M. R. Evans, H. Hinrichsen, and D. Mukamel	
Critical lines of the Yang-Lee edge singularity of Ising ferromagnets on square, triangular, and honeycomb lattices	5013
Xian-Zhi Wang and Jai Sam Kim	
Self-organized criticality in dynamics without branching	5019
Prashant M. Gade and M. P. Joy	
Fluctuation-dissipation theorem and quantum tunneling with dissipation	5023
Kazuo Fujikawa	
Glass synchronization in the network of oscillators with random phase shifts	5030
Kibeom Park, Sung Wu Rhee, and M. Y. Choi	
Adiabatic reduction near a bifurcation in stochastically modulated systems	5036
François Drolet and Jorge Viñals	
Sensitivity of ballistic deposition to pseudorandom number generators	5044
Raissa M. D'Souza, Yaneer Bar-Yam, and Mehran Kardar	
Dynamics and roughness of reaction fronts in heterogeneous solid-state chemical reactions	5053
V. I. Yudson, M. Schulz, and S. Stepanow	
Disordered one-dimensional contact process	5060
Raffaele Cafiero, Andrea Gabrielli, and Miguel A. Muñoz	
Dynamics of ordering of Heisenberg spins with torque: Nonconserved case	5069
Jayajit Das and Madan Rao	

Tricritical behavior in the Sherrington-Kirkpatrick spin glass under a bimodal random field	5079
E. Nogueira, Jr., F. D. Nobre, F. A. da Costa, and S. Coutinho	
Hydrodynamic limits for the monomer-dimer surface reaction: Chemical diffusion, wave propagation, and equistability	5087
M. Tamaro and J. W. Evans	
Self-organized criticality as an absorbing-state phase transition	5095
Ronald Dickman, Alessandro Vespignani, and Stefano Zapperi	
Molecular-dynamics investigation of the desensitization of detonable material	5106
Betsy M. Rice, William Mattson, and Samuel F. Trevino	
Stochastic resonant media: Effect of local and nonlocal coupling in reaction-diffusion models	5112
F. Castelpoggi and H. S. Wio	
Stochastic resonant media: Signal-to-noise ratio for the activator-inhibitor system through a quasivariational approach	5122
M. N. Kuperman, H. S. Wio, G. Izús, and R. Deza	
Localized vibrations in slider-block models	5126
Gleb Morein and Donald L. Turcotte	
Riemannian geometric approach to critical points: General theory	5135
George Ruppeiner	
Characterizations of natural patterns	5146
Gemunu H. Gunaratne, David K. Hoffman, and Donald J. Kouri	
Generalized-Lorentzian path integrals	5150
Rudolf A. Treumann	
Rocked thermal ratchets: The high-frequency limit	5154
J. Plata	
Short-time regime propagator in fractals	5160
L. Acedo and S. Bravo Yuste	
Damage spreading for one-dimensional, nonequilibrium models with parity conserving phase transitions	5168
Géza Ódor and Nóra Menyhárd	
Physical limits on the notion of very low temperatures	5178
Juhao Wu and A. Widom	
Isotropic transverse XY chain with energy and magnetization currents	5184
T. Antal, Z. Rácz, A. Rákos, and G. M. Schütz	
Finite-size scaling in space-time	5190
Michael F. Zimmer	
Front interaction on a ring electrode	5196
Oleksiy Orlychenko, Yi Ye, and Hsueh-Chia Chang	
Fluctuational phase-flip transitions in parametrically driven oscillators	5202
M. I. Dykman, C. M. Maloney, V. N. Smelyanskiy, and M. Silverstein	
Chaos and nonlinear dynamical systems	
Phase transitions in lattices of coupled chaotic maps and their dependence on the local Lyapunov exponent	5213
Francisco Sastre and Gabriel Pérez	
Hierarchical globally coupled systems	5217
Sudeshna Sinha, Gabriel Pérez, and Hilda A. Cerdeira	
Controlling quasiperiodicity in a CO ₂ laser with delayed feedback	5230
A. Labate, M. Ciofini, and R. Meucci	
Deterministic transport in biased maps: Crossover from dispersive to regular transport	5237
E. Barkai and J. Klafter	
Observation of generalized synchronization of chaos in a driven chaotic system	5247
D. Y. Tang, R. Dykstra, M. W. Hamilton, and N. R. Heckenberg	

Quantum wells in tilted fields: Semiclassical analysis and experimental evidence for effects “beyond” periodic orbits	5252
D. S. Saraga and T. S. Monteiro	
Planck’s-constant dependence of the scaling of localization length in quantum dynamics	5266
G. O. Morrow and L. E. Reichl	
Failure of linear control in noisy coupled map lattices	5271
David A. Egolf and Joshua E. S. Socolar	
Dynamics of vortex lines in the three-dimensional complex Ginzburg-Landau equation: Instability, stretching, entanglement, and helices	5276
I. S. Aranson, A. R. Bishop, and L. Kramer	
Breaking the symmetry in bimodal frequency distributions of globally coupled oscillators	5287
J. A. Acebrón, L. L. Bonilla, S. De Leo, and R. Spigler	
Quantum-classical correspondence in energy space: Two interacting spin particles	5291
F. Borgonovi, I. Guarneri, and F. M. Izrailev	
Computing the diffusion coefficient for intermittent maps: Resummation of stability ordered cycle expansions . . .	5303
Carl P. Dettmann and Per Dahlqvist	
Second topological conjugate transformation in symbolic dynamics	5311
Shou-Li Peng and Xu-Sheng Zhang	
Arnold diffusion in many weakly coupled mappings	5325
Allan J. Lichtenberg and Anish M. Aswani	
Nonchaotic attractors with highly fluctuating finite-time Lyapunov exponents	5332
J. W. Shuai and K. W. Wong	
Targeting in chaotic scattering	5337
Elbert E. N. Macau	
Weak turbulence and structure evolution in N -body Hamiltonian systems with long-range force	5347
Mickaël Antoni, Yves Elskens, and Caroline Sandoz	
Extended pole placement technique and its applications for targeting unstable periodic orbit	5358
Zhao Hong, Wang Yinghai, and Zhang Zhibin	
Gluings bifurcations in optothermal nonlinear devices	5366
R. Herrero, J. Farjas, R. Pons, F. Pi, and G. Orriols	
Symbolic dynamics analysis of the Lorenz equations	5378
Bai-lin Hao, Jun-Xian Liu, and Wei-mou Zheng	
Numerical verification of Percival’s conjecture in a quantum billiard	5397
Gabriel Carlo, Eduardo Vergini, and Alejandro J. Fendrik	
Semiclassical theory of flexural vibrations of plates	5404
E. Bogomolny and E. Hugues	
Rate of quantum ergodicity in Euclidean billiards	5425
A. Bäcker, R. Schubert, and P. Stifter	
Experimental measurement of the degree of chaotic synchronization using a distribution exponent	5448
P. Khoury, M. A. Lieberman, and A. J. Lichtenberg	
Quantum-classical correspondence of entropy contours in the transition to chaos	5467
Raphael Zarum and Sarben Sarkar	

PART B

Note to Reader	i
----------------------	---

Classical fluids

Cylindrical solitary waves and their interaction in Bénard-Marangoni layers	5473
Guoxiang Huang, Manuel G. Velarde, and Vadim N. Kurdyumov	

Transport of turbulent vorticity increments	5483
R. A. Antonia, M. Ould-Rouis, Y. Zhu, and F. Anselmet	
Improved multifractal box-counting algorithm, virtual phase transitions, and negative dimensions	5489
Markus Alber and Joachim Peinke	
Spatial structure of the thermal boundary layer in turbulent convection	5494
Siu-Lung Lui and Ke-Qing Xia	
Observability of the bulk Casimir effect: Can the dynamical Casimir effect be relevant to sonoluminescence?	5504
Kimball A. Milton and Y. Jack Ng	
Multiscaling in passive scalar advection as stochastic shape dynamics	5511
Omri Gat and Reuven Zeitak	
Oscillations in confined gases	5520
O. L. de Lange and J. Pierrus	
Dynamo bifurcations in an array of driven convectionlike rolls	5533
S. Rüdiger, F. Feudel, and N. Seehafer	
Structure of a hard-sphere fluid near a rough surface: A density-functional approach	5539
D. Henderson, S. Sokołowski, and D. Wasan	
Magnetotransport in the two-dimensional Lorentz gas	5544
A. Kuzmany and H. Spohn	
Linear and weakly nonlinear analysis of doubly diffusive vertical slot convection	5554
Y. Young and R. Rosner	
Thermoconvective instability of paramagnetic fluids in a nonuniform magnetic field	5564
Jie Huang, Donald D. Gray, and Boyd F. Edwards	
Proton-proton pair distribution in dense fluid hydrogen	5572
Stefan Nagel, Ronald Redmer, Gerd Röpke, Michael Knaup, and Christian Toepffer	
Effect of spatial and temporal variations of the boundary temperature on the thermal stability of horizontal flows .	5578
Olaf Stiller, Wolfgang Schöpf, John C. Patterson, and Andrew Schultz	
Liquid crystals	
Molecular-dynamics simulation of the smectic-A* twist grain-boundary phase	5585
Michael P. Allen, Mark A. Warren, and Mark R. Wilson	
Hydrodynamics of smectic-C liquid crystals: Field and flow induced instabilities in confined geometries	5597
Sreejith Sukumaran and G. S. Ranganath	
Orientation mode selection mechanisms for sheared nematic liquid crystalline materials	5609
Tomohiro Tsuji and Alejandro D. Rey	
Stability of traveling waves in smectic-C liquid crystals	5626
I. W. Stewart	
Type-II phase-matched second-harmonic generation in ferroelectric liquid crystals	5634
J. Etxebarria, Naia Pereda, C. L. Folcia, and J. Ortega	
Surface dynamics of a freely standing smectic-A film	5639
Hsuan-Yi Chen and David Jasnow	
Alignment of liquid crystals on polyimide films exposed to ultraviolet light	5644
Jae-Hoon Kim, Satyendra Kumar, and Sin-Doo Lee	
Structural transitions in surface-stabilized smectic-C cells near the smectic-C–smectic-A phase-transition temperature	5651
N. Vaupotič, M. Čopič, and T. J. Sluckin	

Complex fluids and polymers

Temperature of a granular material “fluidized” by external vibrations	5660
V. Kumaran	
Relaxation of a supercritical fluid after a heat pulse in the absence of gravity effects: Theory and experiments . . .	5665
Y. Garrabos, M. Bonetti, D. Beysens, F. Perrot, T. Fröhlich, P. Carlès, and B. Zappoli	
Gas-liquid coexistence and demixing in systems with highly directional pair potentials	5682
M. J. Blair and G. N. Patey	
Orientational effects in the channel flow of flexible and rigid molecules	5687
Y. Radzyner and D. C. Rapaport	
Beyond the harmonic bending theory of ionic surfactant interfaces	5694
A. Fogden, I. Carlsson, and J. Daicic	
Molecular-dynamics study of long-lived structures in a fragile glass-forming liquid	5707
Gregory Johnson, Andrew I. Mel’cuk, Harvey Gould, W. Klein, and Raymond D. Mountain	
Model ground state of polyampholytes	5719
Shay Wolfling and Yacov Kantor	
Physics of thermohydraulic explosions	5726
Ralf Büttner and Bernd Zimanowski	
Peierls-Boltzmann equation for ballistic deposition	5730
Moshe Schwartz and S. F. Edwards	
Polar orientational phase transition in smectic monolayers induced by monolayer compression	5740
Chen-Xu Wu and Mitsumasa Iwamoto	
Density jumps across phase transitions in soft-matter systems	5744
Hartmut Graf and Hartmut Löwen	
Growth of unstable interfaces in disordered media	5754
A. M. Lacasta, L. Ramírez-Piscina, J. Casademunt, A. Hernández-Machado, and M. A. Rodríguez	
Structural transitions of an electrorheological and magnetorheological fluid	5761
R. Tao and Qi Jiang	
Light absorption study of aggregating porphyrin in aqueous solutions	5766
Norberto Micali, Luigi Monsu’ Scolaro, Andrea Romeo, and Francesco Mallamace	
Growing length scale related to the solidlike behavior in a supercooled liquid	5771
Rajeev Ahluwalia and Shankar P. Das	
Unfold dynamics of generalized Gaussian structures	5775
H. Schiessel	
Adsorption-induced reversible colloidal aggregation	5782
B. M. Law, J.-M. Petit, and D. Beysens	
Effect of criticality on wetting layers: A Monte Carlo simulation study	5795
Nigel B. Wilding and Michael Krech	
Discrete-to-continuum simulation approach to polymer chain systems: Subdiffusion, segregation, and chain folding	5802
Grace M. Foo and R. B. Pandey	
Mechanical confinement effects on the phase separation morphology of polymer blend thin films	5811
K. Dalnoki-Veress, J. A. Forrest, and J. R. Dutcher	
Effective forces between macroions: The cases of asymmetric macroions and added salt	5818
E. Allahyarov, H. Löwen, and S. Trigger	
Pore-scale model for fluid injection and <i>in situ</i> gelation in porous media	5825
Karsten E. Thompson and H. Scott Fogler	
Mode-coupling theory for the shear viscosity in supercooled liquids	5833
T. Franosch and W. Götze	
Nonlocal approach to the analysis of the stress distribution in granular systems. I. Theoretical framework	5841
V. M. Kenkre, J. E. Scott, E. A. Pease, and A. J. Hurd	

Nonlocal approach to the analysis of the stress distribution in granular systems. II. Application to experiment . . .	5850
J. E. Scott, V. M. Kenkre, and A. J. Hurd	
Theory of anomalous chemical transport in random fracture networks	5858
Brian Berkowitz and Harvey Scher	
Biological physics	
Auditory nerve fiber modeling: A stochastic Melnikov approach	5870
Marek Franaszek and Emil Simiu	
Simulating cancer-cell kinetics after drug treatment: Application to cisplatin on ovarian carcinoma	5877
F. Montalenti, G. Sena, P. Cappella, and P. Ubezio	
Chromosome structure predicted by a polymer model	5888
Christian Munkel and Jörg Langowski	
Dynamics of coevolutionary processes	5897
J. Fernández, A. Plastino, L. Diambra, and C. Mostaccio	
Dripping faucet with ants	5904
Eric Bonabeau, Guy Theraulaz, Jean-Louis Deneubourg, Arnaud Lioni, François Libert, Christian Sauwens, and Luc Passera	
Effect of the slow transient phenomenon of a synaptic modification on vestibulo-ocular reflex adaptation	5908
K. Tsusaka	
Effect of random synaptic dilution on recalling dynamics in an oscillator neural network	5914
Katsunori Kitano and Toshio Aoyagi	
Plasma physics	
Computer simulations of cathodeless, high-brightness electron-beam production by multiple laser beams in plasmas	5920
R. G. Hemker, K.-C. Tzeng, W. B. Mori, C. E. Clayton, and T. Katsouleas	
Evidence for coherent structures within tokamak plasma turbulence	5929
Lifang Dong, Long Wang, Chunhua Feng, Zanliang Li, Qingxun Zhao, and Guiding Wang	
Confinement of a mirror plasma with an anisotropic electron distribution function	5937
A. V. Turlapov and V. E. Semenov	
Electrical conductivity of dense copper and aluminum plasmas	5945
A. W. DeSilva and J. D. Katsouros	
Electron-density measurements in hohlraums using soft-x-ray deflectometry	5952
C. D. Decker, R. A. London, J. A. Harte, L. V. Powers, and J. E. Trebes	
Karhunen-Loève analysis of spatiotemporal flame patterns	5958
Antonio Palacios, Gemunu H. Gunaratne, Michael Gorman, and Kay A. Robbins	
Stark broadening along the berylliumlike sequence	5972
Th. Wrubel, I. Ahmad, S. Büscher, H.-J. Kunze, and S. H. Glenzer	
Trapping of an electromagnetic wave by the boundary of a time-varying plasma	5978
M. I. Bakunov and A. V. Maslov	
Perturbative hypernetted-chain equation for mixtures: Applications to Coulomb plasma and $H_2 + H$ mixtures	5988
Hong Seok Kang and Francis H. Ree	
Physics of beams	
Amplification regimes of the orotron: A single-resonator amplifier	5993
D. M. Vavriv and K. Schünemann	
Reaction forces on a relativistic point charge moving above a dielectric or a metallic half-space	6008
D. Schieber and L. Schächter	

Experimental results on the fast beam-ion instability	6016
M. Kwon, J. Y. Huang, T.-Y. Lee, I. S. Ko, Y. H. Chin, H. Fukuma, M. Isawa, K. Ohmi, and M. Tobiyama	
Self-consistent distribution of a high brightness beam in a continuous focusing channel and application to halo-free beam transport	6020
Yuri K. Batygin	
Classical physics, including nonlinear media	
Angular momentum loss by a radiating toroidal dipole	6030
E. E. Radescu and D. H. Vlad	
Macroscopic dynamics in quadratic nonlinear lattices	6038
Peter D. Miller and Ole Bang	
Breakup of two-dimensional into three-dimensional Kadomtsev-Petviashvili solitons	6050
A. Senatorski and E. Infeld	
Cross-modulation coupling of incoherent soliton modes in photorefractive crystals	6056
V. Kutuzov, V. M. Petnikova, V. V. Shuvalov, and V. A. Vysloukh	
Solitary waves and their critical behavior in a nonlinear nonlocal medium with power-law response	6066
Sumiyoshi Abe and Akihiro Ogura	
Optical bandpass characteristics of reflectance from random media	6071
Yang Hua and Joseph M. Schmitt	
Diffusion effects in a nonlinear electrical lattice	6075
P. Marquié, S. Binczak, J. C. Comte, B. Michaux, and J. M. Bilbault	
Evolution of higher-order bright solitons in a nonlinear medium with memory	6079
L. Gilles, H. Bachiri, and L. Vázquez	
Conservation of wave action and radiative energy transfer in space- and time-varying media	6088
U. Bellotti and M. Bornatici	
Observation of self-amplified spontaneous emission in the near-infrared and visible wavelengths	6093
M. Babzien, I. Ben-Zvi, P. Catravas, J.-M. Fang, T. C. Marshall, X. J. Wang, J. S. Wurtele, V. Yakimenko, and L. H. Yu	
Waves in open systems via a biorthogonal basis	6101
P. T. Leung, W. M. Suen, C. P. Sun, and K. Young	
Instability of solitons in an inhomogeneous array of optical fibers	6105
I. Relke	
Transversal parametric oscillation and its external stability in photorefractive sillenite crystals	6112
Evgeny V. Podivilov, Henrik C. Pedersen, Per M. Johansen, and Boris I. Sturman	
Wave-front curvature in geometrical optics	6127
Richard M. More and Keiji Kosaka	
Generation of time-aligned picosecond pulses on wavelength-division-multiplexed beams in a nonlinear fiber	6135
C. Yeh, L. Bergman, J. Morookian, and S. Monacos	
Computational physics	
Optimization of Monte Carlo calculations of the effective potential	6140
A. Ardekani and A. G. Williams	
Interpolating distributed approximating functionals	6152
D. K. Hoffman, G. W. Wei, D. S. Zhang, and D. J. Kouri	
Simplified spherical harmonic method for coupled electron-photon transport calculations	6161
J. A. Josef and J. E. Morel	

BRIEF REPORTS**General methods of statistical physics**

Domain growth controlled by interfacial transport in two-dimensional systems	6172
György Szabó	
Structure and instability of high-density equations for traffic flow	6176
Dirk Helbing	
Integral equation for the resonant activation rate	6180
I. Klik and Y. D. Yao	

Chaos and nonlinear dynamical systems

Experimental observation of a periodic rotating wave in rings of unidirectionally coupled analog Lorenz oscillators	6184
E. Sánchez and M. A. Matías	

Classical fluids

Energy spectra of strongly stratified and rotating turbulence	6187
Alex Mahalov, Basil Nicolaenko, and Ye Zhou	
Viscosity and force corrections induced by the elimination of scales of motion in randomly forced turbulence . . .	6191
L. Machiels	
Binary collision contribution to the longitudinal current correlation function of dense fluids: Numerical results . . .	6195
K. N. Pathak, S. Ranganathan, R. E. Johnson, R. K. Sharma, and K. Tankeshwar	

Complex fluids and polymers

Competitive evaporation in arrays of droplets	6198
A. M. Lacasta, I. M. Sokolov, J. M. Sancho, and F. Sagués	
Probability distribution of m -branch subsets in diffusion-limited aggregation	6202
Haruo Honjo and Shonosuke Ohta	

Classical physics, including nonlinear media

Asymptotic dynamics of short waves in nonlinear dispersive models	6206
M. A. Manna and V. Merle	

COMMENTS

Comment on “Model kinetic equation for low-density granular flow”	6210
A. Goldshtein and M. Shapiro	
Reply to “Comment on ‘Model kinetic equation for low-density granular flow’ ”	6212
J. J. Brey, F. Moreno, and James W. Dufty	

ERRATA

Erratum: Effects of changes in the chain conformation on the kinetics of order-disorder transitions in block copolymer melts [Phys. Rev. E 56 , 3240 (1997)]	6214
Toshihiro Kawakatsu	
Erratum: Classical specific heat of an atomic lattice at low temperature, revisited [Phys. Rev. E 57 , 100 (1998)] ..	6215
Andrea Perronace and Alexander Tenenbaum
