THIRD SERIES, VOLUME 57, NUMBER 6

CONTENTS

JUNE 1998

RAPID COMMUNICATIONS

General methods of statistical physics

- Shape-dependent thermodynamics and nonlocal hydrodynamics in a non-Gibbsian steady-state of a drift-diffusion system R6229
Francis J. Alexander and Gregory L. Eyink
- Anomalous diffusion as a signature of a collapsing phase in two-dimensional self-gravitating systems R6233
Mickaël Antoni and Alessandro Torcini
- Does stochastic resonance occur in periodic potentials? R6237
Yong Woon Kim and Wokyung Sung
- Mean-field behavior of the sandpile model below the upper critical dimension R6241
Alessandro Chessa, Enzo Marinari, Alessandro Vespignani, and Stefano Zapperi
- Connectivity-dependent properties of diluted systems in a transfer-matrix description R6245
S. L. A. de Queiroz and R. B. Stinchcombe

Chaos and nonlinear dynamical systems

- Phase chaos in the anisotropic complex Ginzburg-Landau equation R6249
Roland Faller and Lorenz Kramer
- Bifurcations from locally to globally riddled basins R6253
T. Kapitaniak, Yu. Maistrenko, A. Stefanski, and J. Brindley

Classical fluids

- Asymptotic formulas for the Lyapunov spectrum of fully developed shell model turbulence R6257
Michio Yamada and Koji Ohkitani
- Mimicking a turbulent signal: Sequential multifractal processes R6261
L. Biferale, G. Boffetta, A. Celani, A. Crisanti, and A. Vulpiani

Liquid crystals

- Magnetic-field induced orientation and anisotropic susceptibility of normal alkanes R6265
Henry H. Shao, Hu Gang, and E. B. Sirota
- Cholesteric cellular patterns with electric-field-controlled line tension R6269
O. D. Lavrentovich and D.-K. Yang

Complex fluids and polymers

- Phase separation of ultrathin polymer-blend films on patterned substrates R6273
A. Karim, J. F. Douglas, B. P. Lee, S. C. Glotzer, J. A. Rogers, R. J. Jackman, E. J. Amis, and
G. M. Whitesides

Biological physics

- Molecular-dynamics simulation evidences of a boson peak in protein hydration water R6277
Alessandro Paciaroni, Anna Rita Bizzarri, and Salvatore Cannistraro

(Continued)

1063-651X(199806)57:6;1-G

Detection and identification of a single DNA base molecule using surface-enhanced Raman scattering (SERS) . . .	R6281
Katrin Kneipp, Harald Kneipp, V. Bhaskaran Kartha, Ramasamy Manoharan, Geurt Deinum, Irving Itzkan, Ramachandra R. Dasari, and Michael S. Feld	

Classical physics, including nonlinear media

Intensity distribution for waves in disordered media: Deviations from Rayleigh statistics	R6285
A. D. Mirlin, R. Pnini, and B. Shapiro	

ARTICLES

General methods of statistical physics

Application of a renormalization group algorithm to nonequilibrium cellular automata with one absorbing state . .	6289
Roberto A. Monetti and Javier E. Satulovsky	
Aging and diffusion in low dimensional environments	6296
Laurent Laloux and Pierre Le Doussal	
Order statistics of diffusion on fractals	6327
S. Bravo Yuste	
Quantifying stochastic resonance in bistable systems: Response vs residence-time distribution functions	6335
Mee H. Choi, R. F. Fox, and P. Jung	
How self-organized criticality works: A unified mean-field picture	6345
Alessandro Vespignani and Stefano Zapperi	
Barkhausen pulse structure in an amorphous ferromagnet: Characterization by high-order spectra	6363
J. R. Petta, M. B. Weissman, and Gianfranco Durin	
Exact solution of a one-parameter family of asymmetric exclusion processes	6370
M. Alimohammadi, V. Karimipour, and M. Khorrami	
Hamiltonian dynamics and the phase transition of the XY model	6377
Xavier Leoncini, Alberto D. Verga, and Stefano Ruffo	
Results in trapping reactions for mobile particles and a single trap	6390
A. D. Sánchez, M. A. Rodríguez, and H. S. Wio	
Facilitated model for glasses	6398
Michael Schulz and Steffen Trimper	
Anomalous scaling of fracture surfaces	6405
Juan M. López and Jean Schmittbuhl	
Fractional diffusion, waiting-time distributions, and Cattaneo-type equations	6409
Ralf Metzler and Theo F. Nonnenmacher	
Delay effect on phase transitions in traffic dynamics	6415
Takashi Nagatani and Ken Nakanishi	
Determinism and correlation dimension of Barkhausen noise	6422
P. Plewka, J. J. Żebrowski, and M. Urbński	
Spot bifurcations in three-component reaction-diffusion systems: The onset of propagation	6432
M. Or-Guil, M. Bode, C. P. Schenk, and H.-G. Purwins	
Critical phenomena of nonequilibrium dynamical systems with two absorbing states	6438
WonMuk Hwang, Sungchul Kwon, Heungwon Park, and Hyunggyu Park	
Self-organized criticality in deterministic systems with disorder	6451
Paolo De Los Rios, Angelo Valleriani, and José Luis Vega	
Statistical description of model systems of interacting particles and phase transitions accompanied by cluster formation	6460
B. I. Lev and A. Ya. Zhugayevych	
Evaluation of stochastic-resonance-based detectors of weak harmonic signals in additive white Gaussian noise . . .	6470
V. Galdi, V. Pierro, and I. M. Pinto	

Interaction of self-organized quasiparticles in a two-dimensional reaction-diffusion system: The formation of molecules	6480
C. P. Schenk, P. Schütz, M. Bode, and H.-G. Purwins	
Minimax games, spin glasses, and the polynomial-time hierarchy of complexity classes	6487
Peter Varga	
Speed of fronts of generalized reaction-diffusion equations	6493
R. D. Benguria and M. C. Depassier	
Generalized Huber kinetics for nonlinear rate processes in disordered systems: Nonlinear analogs of stretched exponential	6497
Marcel Ovidiu Vlad, Ralf Metzler, and John Ross	
Anomaly in numerical integrations of the Kardar-Parisi-Zhang equation	6506
Chi-Hang Lam and F. G. Shin	
Stochastic hysteresis and resonance in a kinetic Ising system	6512
S. W. Sides, P. A. Rikvold, and M. A. Novotny	
Quantum-mechanical and quasiclassical dynamics of coupled quasiparticle-boson systems	6534
R. Steib, J. L. Schoendorff, H. J. Korsch, and P. Reineker	
Nonequilibrium relaxation of the two-dimensional Ising model: Series-expansion and Monte Carlo studies	6548
Jian-Sheng Wang and Chee Kwan Gan	
Periodically driven linear system with multiplicative colored noise	6555
A. V. Barzykin, K. Seki, and F. Shibata	
Time series generation by multilayer networks	6564
Liat Ein-Dor and Ido Kanter	

Chaos and nonlinear dynamical systems

Improving a method for the study of limit cycles of the Liénard equation	6573
Hector Giacomini and Sébastien Neukirch	
Calculating topological entropy for transient chaos with an application to communicating with chaos	6577
Joeri Jacobs, Edward Ott, and Brian R. Hunt	
Analysis and comparison of multiple-delay schemes for controlling unstable fixed points of discrete maps	6589
Joshua E. S. Socolar and Daniel J. Gauthier	
Experimental control of single-mode laser chaos by using continuous, time-delayed feedback	6596
R. Dykstra, D. Y. Tang, and N. R. Heckenberg	
Analytic estimation of the Lyapunov exponent in a mean-field model undergoing a phase transition	6599
Marie-Christine Firpo	
Two-band random matrices	6604
E. Kanzieper and V. Freilikher	
Universality for the breakup of invariant tori in Hamiltonian flows	6612
C. Chandre, M. Govin, H. R. Jauslin, and H. Koch	
Optical encryption system using hyperchaos generated by an optoelectronic wavelength oscillator	6618
Laurent Larger, Jean-Pierre Goedgebuer, and Franck Delorme	
Anomalous diffusion and ballistic peaks: A quantum perspective	6625
M. Stefancich, P. Allegrini, L. Bonci, P. Grigolini, and B. J. West	

Classical fluids

Microscopic dynamics of the nonlinear Fokker-Planck equation: A phenomenological model	6634
Lisa Borland	
Dynamical organization around turbulent bursts	6643
Fridolin Okkels and Mogens H. Jensen	
Time-dependent patterns in the two-layer Rayleigh-Bénard system	6647
Michael M. Degen, Peter W. Colovas, and C. David Andereck	

Dynamically maintained steady-state pressure gradients	6660
D. P. Sheehan	
Generalized dipolar modes of a Stockmayer fluid in high-order approximations	6667
I. P. Omelyan, I. M. Mryglod, and M. V. Tokarchuk	
Liquid crystals	
Crossover from <i>XY</i> critical to tricritical behavior of heat capacity at the smectic-A–chiral-smectic-C liquid-crystal transition	6677
Kenji Ema and Haruhiko Yao	
Effects of elongation on the phase behavior of the Gay-Berne fluid	6685
Julian T. Brown, Michael P. Allen, Elvira Martín del Río, and Enrique de Miguel	
Ray propagation in nematic droplets	6700
J. A. Reyes	
Shear induced melting of smectic-A liquid crystals	6706
S. J. Elston and M. J. Towler	
Electrostriction tensor of the cubic blue phases: The role of amplitudes	6711
M. Želazna, L. Longa, H.-R. Trebin, and H. Stark	
Determination of orientational distribution function of organic molecular surfaces using the modified maximum-entropy method	6717
Byoungchoo Park, Yoshitaka Kinoshita, Takahiro Sakai, Jeong-Geun Yoo, Hajime Hoshi, Ken Ishikawa, and Hideo Takezoe	
Solitonlike dynamics in submicron ferroelectric liquid-crystal cells	6725
M. Škarabot, I. Muševič, and R. Blinc	
Dynamic response of a nematic liquid crystal in silica aerogel in an external electric field	6732
I. Drevenšek Olenik, A. Mertelj, and M. Čopič	
Uniform textures of smectic liquid-crystal phase formed by bent-core molecules	6737
A. Jáklí, S. Rauch, D. Löttsch, and G. Heppke	
Splay-bend surface elastic constant of nematic liquid crystals: A solution of the Somoza-Tarazona paradox	6741
Massimo Faetti and Sandro Faetti	
Phase behavior of liquid-crystal films exhibiting the surface smectic- <i>L</i> phase	6757
C. Y. Chao, J. E. MacLennan, J. Z. Pang, S. W. Hui, and J. T. Ho	
Effect of surface alignment layers on the configurational transitions in cholesteric liquid crystals	6761
J. V. Gandhi, X.-D. Mi, and D.-K. Yang	
Complex fluids and polymers	
Band formation during gaseous diffusion in aerogels	6767
M. A. Einarsrud, Frank A. Maaß, Alex Hansen, M. Kirkedelen, and J. Samseth	
Electrophoretic mobility of interacting colloidal spheres	6774
M. Evers, N. Garbow, D. Hessinger, and T. Palberg	
Depletion forces in fluids	6785
B. Götzelmann, R. Evans, and S. Dietrich	
Conformational transitions of heteropolymers in dilute solutions	6801
E. G. Timoshenko, Yu. A. Kuznetsov, and K. A. Dawson	
Curvature instability in fluid membranes with polymer lipids subject to tension	6815
T. Kohyama	
Bending elasticity of the surfactant monolayer in droplet microemulsions: Determination by a combination of dynamic light scattering and neutron spin-echo spectroscopy	6825
Thomas Hellweg and Dominique Langevin	
Hydrogen-bond control of structure and conductivity of Langmuir films	6835
Vitor B. P. Leite, Ailton Cavalli, and Osvaldo N. Oliveira, Jr.	

Critical and oscillatory behavior of a dimer-monomer catalyzed reaction process	6840
Ezequiel V. Albano	
Fringe field NMR diffusometry of anomalous self-diffusion in molecular sieves	6844
Mika Ylihautila, Jukka Jokisaari, Elmar Fischer, and Rainer Kimmich	
Simple model for anisotropic step growth	6851
J. Heinonen, I. Bukharev, T. Ala-Nissila, and J. M. Kosterlitz	
Direct observation of oscillatory-shear-induced order in colloidal suspensions	6859
M. D. Haw, W. C. K. Poon, and P. N. Pusey	
Elasticity in strongly interacting soft solids: A polyelectrolyte network	6865
J. Wilder and T. A. Vilgis	
Branching and percolation in lecithin wormlike micelles studied by dielectric spectroscopy	6875
P. A. Cirkel, J. P. M. van der Ploeg, and G. J. M. Koper	
Modeling the singularity dynamics of a Hele-Shaw flow	6884
J. Elezgaray	
Interaction of ballistic particles with irregular pore walls, Knudsen diffusion, and catalytic efficiency	6888
S. B. Santra and B. Sapoval	
Viscoelastic response of a coarsening foam	6897
Sylvie Cohen-Addad, Hussein Hoballah, and Reinhard Höhler	
Microphase separation in correlated random copolymers: Mean-field theory and fluctuation corrections	6902
I. I. Potemkin and S. V. Panyukov	
Diffusion-limited aggregation and viscous fingering in a wedge: Evidence for a critical angle	6913
D. A. Kessler, Z. Olami, J. Oz, I. Procaccia, E. Somfai, and L. M. Sander	
Transport and retention in fractured rock: Consequences of a power-law distribution for fracture lengths	6917
S. Painter, V. Cvetkovic, and J.-O. Selroos	
Pull-off of a polyelectrolyte chain from an oppositely charged surface	6923
Xavier Châtelier and Jean-François Joanny	
Self-organized critical random directed polymers	6936
Per Jögi and Didier Sornette	
Liquid-vapor interface of an ionic fluid	6944
B. Groh, R. Evans, and S. Dietrich	
Kinetic selection of morphology and growth velocity in electrochemical deposition	6955
F. Oberholtzer, D. Barkey, and Q. Wu	
Continuum description of granular flows: Simulation and experiment	6962
Eirik G. Flekkøy and Knut Jørgen Måløy	

Biological physics

Calculation of the phase behavior of lipids	6973
M. Müller and M. Schick	
Intrinsic kinetics fluctuations as cause of growth inhomogeneity in protein crystals	6979
Peter G. Vekilov and Franz Rosenberger	
Impedance analysis of fibroblastic cell layers measured by electric cell-substrate impedance sensing	6982
Chun-Min Lo and Jack Ferrier	
Interaction of conical membrane inclusions: Effect of lateral tension	6988
T. R. Weikl, M. M. Kozlov, and W. Helfrich	
Nonstationary stochastic resonance	6996
Redouane Fakir	
Noise and synchronization in chaotic neural networks	7002
J. W. Shuai and K. W. Wong	
Error threshold in finite populations	7008
D. Alves and J. F. Fontanari	

Interbilayer interactions from high-resolution x-ray scattering	7014
Horia I. Petrache, Nikolai Gouliarov, Stephanie Tristram-Nagle, Ruitian Zhang, Robert M. Suter, and John F. Nagle	
Wave-front propagation in a discrete model of excitable media	7025
A. B. Feldman, Y. B. Chernyak, and R. J. Cohen	
Plasma physics	
Excitation of electromagnetic wake fields in a magnetized plasma	7041
Gert Brodin and Jonas Lundberg	
Kinetic saturation of the Weibel instability in a collisionless plasma	7048
F. Califano, F. Pegoraro, S. V. Bulanov, and A. Mangeney	
Model of K-edge absorption in a hot, dense plasma	7060
J. Al-Kuzee, T. A. Hall, and H-D. Frey	
Positive streamer in a weak field in air: A moving avalanche-to-streamer transition	7066
A. A. Kulikovskiy	
Dielectric function of a two-component plasma including collisions	7075
G. Röpke and A. Wierling	
Dynamics of the ordered structure formation in a thermal dusty plasma	7086
Yaroslav K. Khodataev, Sergei A. Khrapak, Anatoli P. Nefedov, and Oleg F. Petrov	
Proposal of a longitudinally pumped saturated Ni-like Mo ion x-ray laser at 18.9 nm	7093
Ruxin Li, Tsuneyuki Ozaki, Teruto Kanai, and Hiroto Kuroda	
Shear Langmuir vortex: An elementary mode of plasma collective behavior	7103
Andria D. Rogava, George D. Chagelishvili, and Swadesh M. Mahajan	
Turbulent cascades in anisotropic magnetohydrodynamics	7111
R. M. Kinney and J. C. McWilliams	
Electron cavitation and relativistic self-focusing in underdense plasma	7122
M. D. Feit, A. M. Komashko, S. L. Musher, A. M. Rubenchik, and S. K. Turitsyn	
Hybrid model of a rectangular hollow cathode discharge	7126
Z. Donkó	
Optically field-ionized He plasmas	7138
A. Egbert, D. M. Simanovskii, B. N. Chichkov, and B. Wellegehausen	
Physics of beams	
Impedance and wake field in a superconducting beam pipe	7146
Frank Zimmermann	
Storage-ring FEL amplifiers and electron beam longitudinal mode-damping times	7153
G. Dattoli, L. Mezi, P. L. Ottaviani, A. Renieri, and M. Vaccari	
Mechanisms of efficiency enhancement by a tapered waveguide in gyrotron backward wave oscillators	7162
C. S. Kou, C. H. Chen, and T. J. Wu	
Space-charge waves in the wiggler field of a Raman free-electron laser	7169
Joseph E. Willett, Bruce Bolon, Yildirim Aktas, and Hassan Mehdian	
Beam-quality and guiding-magnetic-field requirements for a high-power traveling-wave amplifier operating at 35 GHz	7176
L. Schächter and J. A. Nation	
Multistage cyclotron autoresonance accelerator	7184
Changbiao Wang and J. L. Hirshfield	

Classical physics, including nonlinear media

Dynamics of viscoplastic deformation in amorphous solids	7192
M. L. Falk and J. S. Langer	
Influence of a resonant surface nonlinearity on the scattering of light from a randomly rough surface	7206
Tamara A. Leskova, Alexei A. Maradudin, and Andrei V. Shchegrov	
Inversion of the Bloch equations with T_2 relaxation: An application of the dressing method	7216
David E. Rourke and Seth D. Bush	
Effect of radiative loss on pulses in periodically inhomogeneous birefringent optical fibers	7231
Noel F. Smyth and Adrian H. Pincombe	
Maxwell's equations and accelerated frames	7239
Pierre Hillion	
Time-resolved photon-scattering measurements from scattering media fitted to non-Euclidean and conventional diffusion models	7244
M. E. Zevallos, A. Ya Polischuck, B. B. Das, Feng Liu, and R. R. Alfano	
Resonant tunneling of electromagnetic waves through polariton gaps	7254
Lev I. Deych, D. Livdan, and A. A. Lisyansky	

Computational physics

Coupling continuum to molecular-dynamics simulation: Reflecting particle method and the field estimator	7259
Ju Li, Dongyi Liao, and Sidney Yip	
Convergence accelerator approach for the high-precision evaluation of three-electron correlated integrals	7268
Paul J. Pelzl and Frederick W. King	
Simplified recursive algorithm for Wigner $3j$ and $6j$ symbols	7274
James H. Luscombe and Marshall Luban	
Efficient molecular dynamics scheme for the calculation of dopant profiles due to ion implantation	7278
Keith M. Beardmore and Niels Grønbech-Jensen	
Symmetry-enhanced spectral analysis via the spectral method and filter diagonalization	7288
Rongqing Chen and Hua Guo	

BRIEF REPORTS**General methods of statistical physics**

Fractal-to-Euclidean crossover of the isotropy restoration feature in a family of fractal resistor networks	7294
Jianjun Xu, Zhifang Lin, and Zuowei Wang	
Reversible ratchets as Brownian particles in an adiabatically changing periodic potential	7297
Juan M. R. Parrondo	
Escape from a metastable well under a time-ramped force	7301
Julian Shillcock and Udo Seifert	
Universal features of the off-equilibrium fragmentation with Gaussian dissipation	7305
Robert Botet and Marek Płoszajczak	

Chaos and nonlinear dynamical systems

Feedback control in coupled map lattices	7309
Prashant M. Gade	
Random matrix elements and eigenfunctions in chaotic systems	7313
Sanjay Hortikar and Mark Srednicki	
Stabilizing effect of periodic or eventually periodic constant pulses on chaotic dynamics	7317
Nguyen Phong Chau	

Amplification and displacement of chaotic attractors by means of unidirectional chaotic driving	7321
J. M. González-Miranda	
Uniform semiclassical approximations for umbilic bifurcation catastrophes	7325
Jörg Main and Günter Wunner	

Classical fluids

Velocity correlations in weakly turbulent surface waves	7329
Elsebeth Schröder and Preben Alstrøm	
Structural properties of confined sticky hard-sphere fluids	7332
Ji-Young Hwang and Soon-Chul Kim	
Influence of aspect ratio in convection due to nonuniform heating	7336
H. Herrero and A. M. Mancho	

Complex fluids and polymers

Controlling chaotic frictional forces	7340
M. G. Rozman, M. Urbakh, and J. Klafter	
Packing fraction of a disk assembly randomly close packed on a plane	7344
D. E. G. Williams	
Correlation between the secondary β -relaxation time at T_g with the Kohlrausch exponent of the primary α relaxation or the fragility of glass-forming materials	7346
K. L. Ngai	
Dynamical heterogeneity in the Ising spin glass	7350
Sharon C. Glotzer, Naeem Jan, Turab Lookman, Allan B. MacIsaac, and Peter H. Poole	
Ancestral cells in two-dimensional soap froth	7354
W. Y. Tam, K. M. Cheung, and K. Y. Szeto	

Classical physics, including nonlinear media

Exact solitary waves of a nonlinear network equation	7358
Wen Zhang, Yanzhao Huang, and Yi Xiao	

COMMENTS

Comment on "Deformation of fluid interfaces under double-layer forces stabilizes bubble dispersions"	7362
V. S. J. Craig, B. W. Ninham, and R. M. Pashley	
Reply to "Comment on 'Deformation of fluid interfaces under double-layer forces stabilizes bubble dispersions' "	7364
S. J. Miklavcic
