PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 2 AUGUST 1998

Complex fluids, polymers, and granular materials

Subharmonic motion of particles in a vibrating tube R1218
Jysoo Lee
Topological effects on statics and dynamics of knotted polymers R1222
Yu-Jane Sheng, Pik-Yin Lai, and Heng-Kwong Tsao
Relaxation dynamics in ultrathin polymer films R1226
J. A. Forrest, C. Svanberg, K. Révész, M. Rodahl, L. M. Torell, and B. Kasemo
Real-time observation on deformation of bicontinuous phase under simple shear flow R1230
Feng Qiu, Jiandong Ding, and Yuliang Yang
Enormous stress response of anisotropic solution of poly(γ-benzyl-L-glutamate) to sinusoidal electric fields with low frequencies unexplained by the electrohydrodynamic instability R1234
Katsufumi Tanaka, Akio Takahashi, and Ryuichi Akiyama
Viscoelasticity of tightly entangled solutions of semiflexible polymers R1237
David C. Morse
Dynamic shear modulus of a semiflexible polymer network R1241
F. Gittes and F. C. MacKintosh

Plasma physics

Magnetically induced optical transparency of overdense plasmas due to ultrafast ionization R1245
D. Teychenné, A. Giulietti, D. Giulietti, and L. A. Gizzi
Interaction of femtosecond laser pulses with ultrathin foils R1248
A. Forsman, A. Ng, G. Chiu, and R. M. More

Classical physics, including nonlinear media

Instabilities of higher-order parametric solitons: Filamentation versus coalescence R1252
Dmitry V. Skryabin and William J. Firth
Breathing self-similar dynamics and oscillatory tails of the chirped dispersion-managed soliton R1256
Sergei K. Turitsyn

ARTICLES

General methods of statistical physics

Kinetics of a mixed Ising ferrimagnetic system 1260
G. M. Buendía and E. Machado
Smoothing of sandpile surfaces after intermittent and continuous avalanches: Three models in search of an experiment 1266
Parthapratim Biswas, Arnab Majumdar, Anita Mehta, and J. K. Bhattacharjee
Simplified cellular automaton model for city traffic 1286
P. M. Simon and K. Nagel
Generalized Einstein relation: A stochastic modeling approach 1296
E. Barkai and V. N. Fleurov
Traffic jams and hysteresis in driven one-dimensional systems 1311
O. M. Braun, B. Hu, A. Filippov, and A. Zeltser
Noise-induced transport of Brownian particles with consideration for their mass 1325
P. S. Landa
Resonance trapping and saturation of decay widths 1334
E. Persson, T. Gorin, and I. Rotter
Connection between energy spectrum, self-similarity, and specific heat log-periodicity 1346
Raúl O. Vallejos, Renio S. Mendes, Luciano R. da Silva, and Constantino Tsallis
