THIRD SERIES, VOLUME 58, NUMBER 4 ***CONTENTS*** **OCTOBER 1998**

RAPID COMMUNICATIONS

General methods of statistical physics

Equilibria for discrete kinetic equations R4053
Iliya V. Karlin and S. Succi

Quenched disorder enhances chaotic diffusion R4057
M. N. Popescu, Y. Braiman, F. Family, and H. G. E. Hentschel

Nature of crossover from classical to Ising-like critical behavior R4060
Erik Luijten and Kurt Binder

Transition from propagating localized states to spatiotemporal chaos in phase dynamics R4064
Helmut R. Brand and Robert J. Deissler

Chaos and nonlinear dynamical systems

Quantum Frenkel-Kontorova model: A squeezed state approach R4068
Bambi Hu, Baowen Li, and Wei-Min Zhang

Synchronization of time-delay systems R4072
Martin J. Bünner and Wolfram Just

Diabolical points in the resonance spectra of vibrating smectic films R4076
M. Brazovskaia and P. Pieranski

Classical fluids

Phase behavior of additive binary mixtures in the limit of infinite asymmetry R4080
Yuri Martínez-Ratón and José A. Cuesta

Complex fluids, polymers, and granular materials

Shear-induced micellar crystal structures in an aqueous triblock copolymer solution R4084
T. M. Slawecki, C. J. Glinka, and B. Hammouda

Relationship between short-time self-diffusion and high-frequency viscosity in charge-stabilized dispersions R4088
J. Bergenholtz, F. M. Horn, W. Richtering, N. Willenbacher, and N. J. Wagner

Three-dimensional simulations of Ostwald ripening with elastic effects R4092
Celeste Sagui, Daniel Orlikowski, Andrés M. Somoza, and Christopher Roland

Directed polymers versus directed percolation R4096
Timothy Halpin-Healy

Structural relaxations in glass forming poly(butadiene): A molecular dynamics study R4100
A. van Zon and S. W. de Leeuw

Copyright 1998 by The American Physical Society

(Continued)

1063-651X(199810)58:4;1-Y

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 4** **OCTOBER 1998**

Phase diagram for avalanche stratification of granular media R4104
J. P. Koeppe, M. Enz, and J. Kakalios

Biological physics

Where do dispersion curves end? A basic question in theory of excitable media R4108
Yuri B. Chernyak, Joseph M. Starobin, and Richard J. Cohen

Classical physics, including nonlinear media

Interaction of incoherent two-dimensional photorefractive solitons R4112
A. Stepken, F. Kaiser, M. R. Belić, and W. Królikowski
Breathers on lattices with long range interaction R4116
S. Flach
Optical shock waves in media with quadratic nonlinearity R4120
S. Darmanyan, A. Kamchatnov, and F. Lederer

Computational physics

Lattice Boltzmann method on irregular meshes R4124
Gongwen Peng, Haowen Xi, Comer Duncan, and So-Hsiang Chou

ARTICLES

General methods of statistical physics

Long-time properties of random walks with a single trap 4128
Wolfgang Pfluegl and Robert J. Silbey
Thermodynamical fingerprints of fractal spectra 4134
Raúl O. Vallejos and Celia Anteneodo
Damped bistable system driven by colored noise: A digital simulation study 4141
Chitralekha Mahanta and T. G. Venkatesh
q calculus and entropy in nonextensive statistical physics 4147
Ramandeep S. Johal
Approach to equilibrium in *N*-body gravitational systems 4152
A. A. El-Zant
Korteweg–de Vries solitons under additive stochastic perturbations 4166
M. Scalerandi, A. Romano, and C. A. Condat
Yang-Lee edge singularity of a one-dimensional Ising ferromagnet with arbitrary spin 4174
Xian-Zhi Wang and Jai Sam Kim
One-dimensional asymmetric diffusion model without exclusion 4181
Tomohiro Sasamoto and Miki Wadati
Effect of quantum group invariance on trapped Fermi gases 4191
Marcelo R. Ubriaco
Unified approach to crossover phenomena 4197
S. Gluzman and V. I. Yukalov
Softening of the phase transition in a two-dimensional Potts model under quenched bond randomness 4210
Fatih Yaşar, Yiğit Gündüç, and Tarık Çelik
Weak selection and stability of localized distributions in Ostwald ripening 4213
Boaz Giron, Baruch Meerson, and Pavel V. Sasorov
Fingerprints of classical instability in open quantum dynamics 4217
Paul A. Miller and Sarben Sarkar

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 4** **OCTOBER 1998**

Reflection invariance of the current in the totally asymmetric simple exclusion process with disorder 4226
S. Goldstein and E. R. Speer
Braid description of collective fluctuations in a few-body system 4229
Sigmund Clausen, Geir Helgesen, and Arne T. Skjeltorp
Anomalous diffusion in disordered media and random quantum spin chains 4238
Ferenc Iglói and Heiko Rieger
Short-time dynamics of critical nonequilibrium spin models 4242
Tânia Tomé and Mário J. de Oliveira
Directed paths on hierarchical lattices with random sign weights 4246
Eduardo G. Aponte and Ernesto Medina
Transmission and scattering of a Lorentz gas on a slab 4254
Hernán Larralde, François Leyvraz, Gustavo Martínez-Mekler, Raúl Rechtman, and Stefano Ruffo
Ground state structure of random magnets 4261
S. Bastea and P. M. Duxbury
Moment ratios for absorbing-state phase transitions 4266
Ronald Dickman and Jafferson Kamphorst Leal da Silva
Thermodynamic theory for the jamming transition in traffic flow 4271
Takashi Nagatani
Dynamic magnetization-reversal transition in the Ising model 4277
Arkajyoti Misra and Bikas K. Chakrabarti
Chaos in the random field Ising model 4284
Mikko Alava and Heiko Rieger
Coherence correlations in the dissipative two-state system 4288
Gunther Lang, Elisabetta Paladino, and Ulrich Weiss
Tracer diffusion in a random barrier model: The crossover from static to dynamic disorder 4299
Andrey Milchev, Jordan Brankov, and Victor D. Pereyra
Quantum-statistical theory of nonlinear optical conductivity for an electron-phonon system 4307
Akira Suzuki and Masaki Ashikawa
Fokker-Planck description of particle transport in finite media: Boundary conditions 4321
A. Ziya Akcasu and James P. Holloway
Ground state entropy of Potts antiferromagnets and the approach to the two-dimensional thermodynamic limit 4332
Robert Shrock and Shan-Ho Tsai
Effect of trap clustering on Brownian particle trapping rate 4340
Yu. A. Makhnovskii, D.-Y. Yang, A. M. Berezhkovskii, Sheh-Yi Sheu, and S. H. Lin
Heat conduction in one-dimensional chains and nonequilibrium Lyapunov spectrum 4344
H. A. Posch and Wm. G. Hoover
Diffusion-limited coalescence, $A+A \rightleftharpoons A$, with a trap 4351
Daniel ben-Avraham
Spatial patterns induced by additive noise 4355
A. A. Zaikin and L. Schimansky-Geier
Nonequilibrium fluctuations in time-dependent diffusion processes 4361
Alberto Vailati and Marzio Giglio
First-order transition in the one-dimensional three-state Potts model with long-range interactions 4372
Zvonko Glumac and Katarina Uzelac

Chaos and nonlinear dynamical systems

Using nonharmonic forcing to switch the periodicity in nonlinear systems 4377
Miguel A. F. Sanjuán
Dynamics in a system with time-delayed feedback 4383
Zhao Hong, Liu Yaowen, Wang Yinghai, and Hu Bambi

PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 4 OCTOBER 1998

Closing the hierarchy of moment equations in nonlinear dynamical systems 4391
C. Nicolis and G. Nicolis
Scaling law for the Lyapunov spectra in globally coupled tent maps 4401
Satoru Morita
Dynamics of the two-frequency torus breakdown in the driven double scroll circuit 4413
M. S. Baptista and I. L. Caldas
Nonlinear dynamics of a solid-state laser with injection 4421
M. K. Stephen Yeung and Steven H. Strogatz
$\hbar$ expansion for the periodic orbit quantization by harmonic inversion 4436
Jörg Main, Kirsten Weibert, and Günter Wunner
Instability and controllability of linearly coupled oscillators: Eigenvalue analysis 4440
Gang Hu, Junzhong Yang, and Wenji Liu
Globally coupled maps with asynchronous updating 4454
Guillermo Abramson and Damián H. Zanette

Classical fluids

Growth morphology for a ballistic deposition model for multiple species 4461
Hassan F. El-Nashar, Wei Wang, and Hilda A. Cerdeira
Molecular dynamics of rupture phenomena in a liquid thread 4468
Satoyuki Kawano
Influence of the aspect ratio of a drop in the spreading process over a horizontal surface 4473
C. Treviño, F. Méndez, and C. Ferro-Fontán
Asymptotic analysis of axisymmetric drop spreading 4478
C. Treviño, C. Ferro-Fontán, and F. Méndez
Turing instability in a boundary-fed system 4485
S. Setayeshgar and M. C. Cross
Density probability distribution in one-dimensional polytropic gas dynamics 4501
Thierry Passot and Enrique Vázquez-Semadeni
Calculation of spectra of turbulence in the energy-containing and inertial ranges 4511
L. Ts. Adzhemyan, M. Hnatich, D. Horváth, and M. Stehlik
Differential flow induced chemical instability and Turing instability for Couette flow 4524
Y. Balinsky (Khazan) and L. M. Pismen
Asymptotic behavior of the solution of the two-dimensional stochastic vorticity equation 4532
Juha Honkonen
Density functional approximations for confined classical fluids 4541
Tai-Heui Yoon and Soon-Chul Kim
Numerical simulations of single-mode Richtmyer-Meshkov experiments 4548
Claude Mügler and Serge Gauthier
Helicoidal instability of a scroll vortex in three-dimensional reaction-diffusion systems 4556
Igor Aranson and Igor Mitkov
Effect of surfactants on single-bubble sonoluminescence 4560
Kyuichi Yasui
Collective ionic dynamics in a molten binary alloy 4568
R. Férnandez-Perea, M. Alvarez, F. J. Bermejo, P. Verkerk, B. Roessli, and E. Enciso
Low-power laser driving of a binary liquid 4582
F. B. Hicks and Carl Franck
Nonlinear response theory for time-periodic elongational flows 4587
B. D. Todd

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 4 OCTOBER 1998

Liquid crystals

Nematic order in polymer-stabilized liquid crystals 4594
R. E. Kraig, P. L. Taylor, Ruiqing Ma, and Deng-Ke Yang
Optical reorientation of nematic liquid crystals in the presence of photoisomerization 4598
I. Jánossy and L. Szabados
Partially polarized light-induced Fréedericksz transition in nematic liquid crystals 4605
T. V. Galstyan, A. A. Yesayan, and V. Drnoyan
Circular and helicoidal standing-wave-induced Fréedericksz transition in nematic liquid crystals 4614
E. Brasselet, T. V. Galstyan, and A. A. Yesayan
Thermodiffusive photorefractive phenomena in liquid crystals 4619
Nelson V. Tabiryan and Cesare Umeton

Complex fluids, polymers, and granular materials

Determination of surface complex nonlinear optical susceptibilities and molecular orientational distribution functions using resonant surface second-harmonic generation 4624
Byoungchoo Park, Jeong-Geun Yoo, Takahiro Sakai, Hajime Hoshi, Ken Ishikawa, and Hideo Takezoe
Control parameter in granular convection 4629
Keiko M. Aoki and Tetsuo Akiyama
Hydrodynamics for granular flow at low density 4638
J. Javier Brey, James W. Dufty, Chang Sub Kim, and Andrés Santos
Elastic effects in the foaming of thermoplastics 4654
Celeste Sagui, Luc Piché, Abdelhadi Sahnoune, and Martin Grant
Phase ordering of conserved vectorial systems with field-dependent mobility 4658
Federico Corberi and Claudio Castellano
Scaling description of the structure factor of fractal soot composites 4666
C. M. Sorensen, C. Oh, P. W. Schmidt, and T. P. Rieker
Colloidal glasses under shear strain 4673
M. D. Haw, W. C. K. Poon, P. N. Pusey, P. Hebraud, and F. Lequeux
Onset of the sharkskin phenomenon in polymer extrusion 4683
J. Molenaar, R. J. Koopmans, and C. F. J. den Doelder
Surface flows of granular materials: A modified picture for thick avalanches 4692
Thomas Boutreux, Elie Raphaël, and Pierre-Gilles de Gennes
Melting of hard cubes 4701
E. A. Jagla
Topological and spatial structure in the liquid-water–acetonitrile mixture 4706
Dan L. Bergman and Aatto Laaksonen
Solution of diffusion limited aggregation in a narrow cylindrical geometry 4716
Boaz Kol and Amnon Aharony
Numerical observation of nonaxisymmetric vesicles in fluid membranes 4730
Yan Jie, Liu Quanhui, Liu Jixing, and Ou-Yang Zhong-Can
Steady state properties of a driven granular medium 4737
Gongwen Peng and Takao Ohta
Static structure and dynamics of the liquid Li-Na and Li-Mg alloys 4747
M. Canales, D. J. González, L. E. González, and J. A. Padró
Statistical mechanics of vibration-induced compaction of powders 4758
S. F. Edwards and D. V. Grinev
Traffic equations and granular convection 4763
Daniel C. Hong and Su Yue

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 4 OCTOBER 1998

Nonlinear flow in porous media 4776
Sergio Rojas and Joel Koplik
Shear-induced microstructure distortion and its relaxation for colloids very close to the critical point 4783
Jan K. G. Dhont and Igor Bodnár

Biological physics

Onset of bioconvection in suspensions of *Bacillus subtilis* 4793
Imre M. Jánosi, John O. Kessler, and Viktor K. Horváth
Band broadening in gel electrophoresis of DNA: Measurements of longitudinal and transverse dispersion coefficients 4801
L. Meistermann and B. Tinland
Vesicle deformation by microtubules: A phase diagram 4807
Virginie Emsellem, Olivier Cardoso, and Patrick Tabeling
Information capacity of a hierarchical neural network 4811
David Renato Carreta Dominguez
Bending and twisting elasticity: A revised Marko-Siggia model on DNA chirality 4816
Zhou Haijun and Ou-Yang Zhong-can
Aperiodic stochastic resonance with correlated noise 4820
A. Capurro, K. Pakdaman, T. Nomura, and S. Sato
Flocks, herds, and schools: A quantitative theory of flocking 4828
John Toner and Yuhai Tu
Quantitative analysis by renormalized entropy of invasive electroencephalograph recordings in focal epilepsy 4859
K. Kopitzki, P. C. Warnke, and J. Timmer
Phase transitions of an oscillator neural network with a standard Hebb learning rule 4865
Toru Aonishi
Eigenvalue problem approach to the blind source separation: Optimization with a reference signal 4872
Jing-Yuan Ko, Ming-Chung Ho, Jyh-Long Chern, Rue-Ron Hsu, and Ching-Sheu Wang
Influence of surface charges on the rupture of black lipid membranes 4883
Anke Diederich, Günther Bähr, and Mathias Winterhalter

Plasma physics

Propagation of relativistically intense laser pulses in nonuniform plasmas 4890
N. L. Tsintsadze, J. T. Mendonça, and L. Oliveira e Silva
Spherical stratification of a glow discharge 4897
O. A. Nerushev, S. A. Novopashin, V. V. Radchenko, and G. I. Sukhinin
Femtosecond pulse propagation in argon: A pressure dependence study 4903
M. Mlejnek, E. M. Wright, and J. V. Moloney
Ion leakage from quasiparallel collisionless shocks: Implications for injection and shock dissipation 4911
M. A. Malkov
Measurement of x-ray emission and thermal transport in near-solid-density plasmas heated by 130 fs laser pulses 4929
B. K. F. Young, B. G. Wilson, D. F. Price, and R. E. Stewart
Propagation of a relativistic ultrashort laser pulse in a near-critical-density plasma layer 4937
K. Nagashima, Y. Kishimoto, and H. Takuma
Equation of state of fully ionized electron-ion plasmas 4941
Gilles Chabrier and Alexander Y. Potekhin
Calculations of the polarization spectrum by two-photon absorption in the hydrogen Lyman-α line 4950
Marco Antonio Gigosos and Manuel Ángel González
Transport integrals $\Omega^{(l,s)}(T)$ for binary collisions of open-shell atoms with uncertain interaction potentials 4960
Joseph A. Kunc

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 4 OCTOBER 1998

Pair correlations in strongly coupled dusty plasmas 4967
Xiaogang Wang and A. Bhattacharjee

Physics of beams

Unexpectedly wide rf-induced synchrotron sideband depolarizing resonances 4973
C. M. Chu, T. J. P. Ellison, S. Y. Lee, T. Rinckel, P. Schwandt, F. Sperisen, B. von Przewoski, V. A. Anferov, B. B. Blinov, M. A. Bychkov, D. D. Caussyn, E. D. Courant, D. A. Crandell, Ya. S. Derbenev, W. A. Kaufman, A. D. Krisch, W. Lorenzon, T. S. Nurushev, R. A. Phelps, L. G. Ratner, V. K. Wong, C. Ohmori, M. G. Minty, P. S. Martin, A. D. Russell, and D. W. Sivers
Halo formation in three-dimensional bunches 4977
R. L. Gluckstern, A. V. Fedotov, S. Kurennoy, and R. Ryne
Calculation of the output power in self-amplified spontaneous radiation using scaling of power with number of simulation particles 4991
Li Hua Yu
Three-dimensional relativistic electron scattering in an ultrahigh-intensity laser focus 5001
F. V. Hartemann, J. R. Van Meter, A. L. Troha, E. C. Landahl, N. C. Luhmann , Jr., H. A. Baldis, Atul Gupta, and A. K. Kerman
Emission of an intense electromagnetic field in a plasma-loaded-wiggler free electron device 5013
K. H. Tsui and A. Serbeto

Classical physics, including nonlinear media

Bistability and hysteresis of solitons in inhomogeneously doped fibers with saturating nonlinearity 5021
Ajit Kumar
Theory of multidimensional parametric band-gap simultons 5025
H. He and P. D. Drummond
Explicit expressions for the electric and magnetic fields of a moving magnetic dipole 5047
José A. Heras
Two-dimensional solitary waves in media with quadratic and cubic nonlinearity 5057
Ole Bang, Yuri S. Kivshar, Alexander V. Buryak, Alfredo De Rossi, and Stefano Trillo
Radiation by weakly nonlinear shallow-water solitons due to higher-order dispersion 5070
V. I. Karpman
Pure and cascaded magnetochiral anisotropy in optical absorption 5081
G. L. J. A. Rikken and E. Raupach

Computational physics

Bouncing towards the optimum: Improving the results of Monte Carlo optimization algorithms 5085
Johannes Schneider, Ingo Morgenstern, and Johannes Maria Singer
Quadratically convergent multiconfiguration Dirac-Fock and multireference relativistic configuration-interaction calculations for many-electron systems 5096
Marius J. Vilkas, Yasuyuki Ishikawa, and Konrad Koc
Loosening of the structure in a mixed alkali glass 5111
Junko Habasaki and Yasuaki Hiwatari
Estimating probability densities from short samples: A parametric maximum likelihood approach 5115
T. Dudok de Wit and E. Floriani
Path integral Monte Carlo calculation of electronic forces 5123
Fenghua Zong and D. M. Ceperley

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 58, NUMBER 4 OCTOBER 1998

Statistical characterization of simulated annealing applied to the x-ray phase problem 5131
Michael F. Zimmer and Wu-Pei Su

BRIEF REPORTS

General methods of statistical physics

Traveling waves in a reaction-diffusion system: Diffusion with finite velocity and Kolmogorov-Petrovskii-Piskunov kinetics 5143
Sergei Fedotov

Orbital magnetism in ensembles of parabolic potentials 5146
M. O. Terra, M. L. Tiago, and M. A. M. de Aguiar

Correct scaling relation for the conserved Kardar-Parisi-Zhang equation and growth models 5150
S. H. Yook, C. K. Lee, and Yup Kim

Chaos and nonlinear dynamical systems

Power of surrogate data testing with respect to nonstationarity 5153
J. Timmer

Adaptive annealing for chaotic optimization 5157
Isao Tokuda, Kazuyuki Aihara, and Tomomasa Nagashima

Multiple choice bifurcations as a source of unpredictability in dynamical systems 5161
T. Kapitaniak and Yu. Maistrenko

Classical fluids

Magnetic control of convection in nonconducting diamagnetic fluids 5164
Jie Huang, Donald D. Gray, and Boyd F. Edwards

Complex fluids, polymers, and granular materials

Scaling laws for a two-dimensional vibro-fluidized granular material 5168
J. M. Huntley

Modified weighted density approximation for binary hard-sphere solid mixtures 5171
Guiomar Ruiz and Carlos F. Tejero

Biological physics

Nonstationary stochastic resonance in a single neuronlike system 5175
Redouane Fakir

Classical physics, including nonlinear media

Error propagation in a model of impact fracture 5179
Hajime Inaoka, Eiji Toyosawa, and Hideki Takayasu

Computational physics

Using random number generators in Monte Carlo simulations 5183
F. J. Resende and B. V. Costa
