PHYSICAL REVIEW E

THIRD SERIES, VOLUME 58, NUMBER 6

DECEMBER 1998

Phase separation kinetics of nematic polymers: Coupling between compositional order and orientational order . . . Jun-ichi Fukuda	R6939
--	-------

Plasma physics

Electronic broadening model for high- n Balmer line profiles S. Ferri, A. Calisti, R. Stamm, B. Talin, R. W. Lee, and L. Klein	R6943
Observation of dust Coulomb clusters in a plasma trap Wen-Tau Juan, Zen-Hong Huang, Ju-Wang Hsu, Yin-Ju Lai, and Lin I	R6947

Classical physics, including nonlinear media

Unified model based on $U(1)$ duality symmetry of polarization and magnetization José A. Heras	R6951
---	-------

ARTICLES

General methods of statistical physics

Controlled movement and suppression of spiral waves in excitable media Grigory V. Osipov, Boris V. Shulgin, and James J. Collins	6955
Multiple scaling in a one-dimensional sandpile V. B. Priezzhev and K. Sneppen	6959
Nondecay probability of the “correct” state of a memory cell: Analytic approach versus numeric simulation Svetlana P. Nikitenkova and Andrey L. Pankratov	6964
Eigenvector-eigenvalue rate calculations for the fluctuating barrier problem: Two examples Joachim Ankerhold and Philip Pechukas	6968
Linear stochastic models of nonlinear dynamical systems Gregory L. Eyink	6975
Generalization of the persistent random walk to dimensions greater than 1 Marián Boguñá, Josep M. Porrà, and Jaume Masoliver	6992
Anomalous roughening of wood fractured surfaces Stéphane Morel, Jean Schmittbuhl, Juan M. López, and Gérard Valentin	6999
Fisher zeros of the Q -state Potts model in the complex temperature plane for nonzero external magnetic field Seung-Yeon Kim and Richard J. Creswick	7006
Modeling $1/f$ noise B. Kaulakys and T. Meškauskas	7013
Relaxation of initial conditions in systems with infinitely many absorbing states Géza Ódor, J. F. Mendes, M. A. Santos, and M. C. Marques	7020
Thermodynamic and relativistic aspects of thermal inertia in fluids Stanislaw Sieniutycz	7027
Volume changes in binary alloy ordering: A binary classical density functional theory approach David L. Olmsted	7040
Numerical study of the out-of-equilibrium phase space of a mean-field spin glass model Andrea Baldassarri	7047
Modeling urban growth patterns with correlated percolation Hernán A. Makse, José S. Andrade, Jr., Michael Batty, Shlomo Havlin, and H. Eugene Stanley	7054
Fluctuation-dissipation theorem and quantum tunneling with dissipation at finite temperature Kazuo Fujikawa and Hiroaki Terashima	7063
Transition from continuous to discontinuous material failure in a simple model of an adhesive layer M. Ferer and Duane H. Smith	7071
