THIRD SERIES, VOLUME 58, NUMBER 6
PARTS A AND B

CONTENTS

DECEMBER 1998

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R6899–7486, and Part B pages 7487–8084.*

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Tests of conformal invariance in randomness-induced second-order phase transitions R6899
Christophe Chatelain and Bertrand Berche

Chaos and nonlinear dynamical systems

Extensive scaling and nonuniformity of the Karhunen-Loève decomposition for the spiral-defect chaos state R6903
Scott M. Zoldi, Jun Liu, Kapil M. S. Bajaj, Henry S. Greenside, and Guenter Ahlers
Synchronization of randomly driven nonlinear oscillators R6907
R. V. Jensen
Analytic signals and the transition to chaos in deterministic flows R6911
Ying-Cheng Lai
Level spacing distribution of critical random matrix ensembles R6915
Shinsuke M. Nishigaki

Liquid crystals

Paired defects of nematic surfactant bilayers R6919
J.-B. Fournier and L. Peliti

Complex fluids, polymers, and granular materials

Simulation of mercury porosimetry on correlated grids: Evidence for extended correlated heterogeneity at the pore scale in rocks R6923
Mark A. Knackstedt, Adrian P. Sheppard, and W. V. Pinczewski
Level-set methods for the simulation of epitaxial phenomena R6927
Mark F. Gyure, Christian Ratsch, Barry Merriman, Russel E. Caflisch, Stanley Osher, Jennifer J. Zinck, and Dimitri D. Vvedensky
Analogies between colloidal sedimentation and turbulent convection at high Prandtl numbers R6931
P. Tong and B. J. Ackerson
Internal avalanches in a granular medium R6935
S. S. Manna and D. V. Khakhar

- Phase separation kinetics of nematic polymers: Coupling between compositional order and orientational order . . . R6939
Jun-ichi Fukuda

Plasma physics

- Electronic broadening model for high- n Balmer line profiles R6943
S. Ferri, A. Calisti, R. Stamm, B. Talin, R. W. Lee, and L. Klein
Observation of dust Coulomb clusters in a plasma trap R6947
Wen-Tau Juan, Zen-Hong Huang, Ju-Wang Hsu, Yin-Ju Lai, and Lin I

Classical physics, including nonlinear media

- Unified model based on $U(1)$ duality symmetry of polarization and magnetization R6951
José A. Heras

ARTICLES**General methods of statistical physics**

- Controlled movement and suppression of spiral waves in excitable media 6955
Grigory V. Osipov, Boris V. Shulgin, and James J. Collins
Multiple scaling in a one-dimensional sandpile 6959
V. B. Priezzhev and K. Sneppen
Nondecay probability of the “correct” state of a memory cell: Analytic approach versus numeric simulation 6964
Svetlana P. Nikitenkova and Andrey L. Pankratov
Eigenvector-eigenvalue rate calculations for the fluctuating barrier problem: Two examples 6968
Joachim Ankerhold and Philip Pechukas
Linear stochastic models of nonlinear dynamical systems 6975
Gregory L. Eyink
Generalization of the persistent random walk to dimensions greater than 1 6992
Marián Boguñá, Josep M. Porrà, and Jaume Masoliver
Anomalous roughening of wood fractured surfaces 6999
Stéphane Morel, Jean Schmittbuhl, Juan M. López, and Gérard Valentin
Fisher zeros of the Q -state Potts model in the complex temperature plane for nonzero external magnetic field 7006
Seung-Yeon Kim and Richard J. Creswick
Modeling $1/f$ noise 7013
B. Kaulakys and T. Meškauskas
Relaxation of initial conditions in systems with infinitely many absorbing states 7020
Géza Ódor, J. F. Mendes, M. A. Santos, and M. C. Marques
Thermodynamic and relativistic aspects of thermal inertia in fluids 7027
Stanislaw Sieniutycz
Volume changes in binary alloy ordering: A binary classical density functional theory approach 7040
David L. Olmsted
Numerical study of the out-of-equilibrium phase space of a mean-field spin glass model 7047
Andrea Baldassarri
Modeling urban growth patterns with correlated percolation 7054
Hernán A. Makse, José S. Andrade, Jr., Michael Batty, Shlomo Havlin, and H. Eugene Stanley
Fluctuation-dissipation theorem and quantum tunneling with dissipation at finite temperature 7063
Kazuo Fujikawa and Hiroaki Terashima
Transition from continuous to discontinuous material failure in a simple model of an adhesive layer 7071
M. Ferer and Duane H. Smith

Color effects in a near-threshold Schmitt trigger	7079
F. Marchesoni, F. Apostolico, L. Gammaitoni, and S. Santucci	
Array-induced collective transport in the Brownian motion of coupled nonlinear oscillator systems	7085
Zhigang Zheng, Bambi Hu, and Gang Hu	
Darboux-integrable nonlinear Liouville–von Neumann equation	7091
Sergei B. Leble and Marek Czachor	
Hierarchical noise in large systems of independent agents	7101
Claus Wilke and Thomas Martinetz	
Hexagon structures in a two-dimensional dc-driven gas discharge system	7109
E. Ammelt, Yu. A. Astrov, and H.-G. Purwins	
Stochastic resonance: Noise-enhanced phase coherence	7118
Alexander Neiman, Alexander Silchenko, Vadim Anishchenko, and Lutz Schimansky-Geier	
Scaling for domain growth in the Ising model with competing dynamics	7126
Zhi-Feng Huang, Bing-Lin Gu, and Yun Tang	
Submonolayer epitaxial growth with long-range (Lévy) diffusion	7130
Jacques G. Amar, Fereydoon Family, and David C. Hughes	
Trapping thresholds in ordinary site percolation	7137
Lincoln Paterson	
Critical exponents of the anisotropic Bak-Sneppen model	7141
Sergei Maslov, Paolo De Los Rios, Matteo Marsili, and Yi-Cheng Zhang	
Crossover scaling from classical to nonclassical critical behavior	7146
Andrea Pelissetto, Paolo Rossi, and Ettore Vicari	
Chaos and nonlinear dynamical systems	
Transformations of nonlinear dynamical systems to jerky motion and its application to minimal chaotic flows . . .	7151
Ralf Eichhorn, Stefan J. Linz, and Peter Hänggi	
Relaxation of classical many-body Hamiltonians in one dimension	7165
Stefano Lepri	
Universal scaling law of the power spectrum in the on-off intermittency	7172
Syuji Miyazaki and Hiroki Hata	
Level spacing of random matrices in an external source	7176
E. Brézin and S. Hikami	
Blowout bifurcation in a system of coupled chaotic lasers	7186
Peter Ashwin, John R. Terry, K. Scott Thornburg, Jr., and Rajarshi Roy	
Semiconductor laser with phase-conjugate feedback: Dynamics and bifurcations	7190
Bernd Krauskopf, George R. Gray, and Daan Lenstra	
Synchronized clusters and multistability in arrays of oscillators with different natural frequencies	7198
G. V. Osipov and M. M. Sushchik	
Hyperchaotic dynamics and synchronization of external-cavity semiconductor lasers	7208
Volker Ahlers, Ulrich Parlitz, and Werner Lauterborn	
Heredity in one-dimensional quadratic maps	7214
M. Romera, G. Pastor, G. Alvarez, and F. Montoya	
Coherent and incoherent chaotic tunneling near singlet-doublet crossings	7219
Sigmund Kohler, Ralf Utermann, Peter Hänggi, and Thomas Dittrich	
Critical behavior of period doublings in coupled inverted pendulums	7231
Sang-Yoon Kim and Bambi Hu	
Lyapunov instability of rigid diatomic molecules via diatomic potential molecular dynamics	7243
Oyeon Kum, Young Han Shin, and Eok Kyun Lee	
Nonfeedback control of chaos in a microchip solid-state laser by internal frequency resonance	7249
A. Uchida, T. Sato, T. Ogawa, and F. Kannari	

Memory difference control of unknown unstable fixed points: Drifting parameter conditions and delayed measurement	7256
Jens Christian Claussen, Thorsten Mausbach, Alexander Piel, and Heinz Georg Schuster	
Classical fluids	
Two-dimensional turbulence and dispersion in a freely decaying system	7261
A. E. Hansen, D. Marteau, and P. Tabeling	
Test of the semischematic model for a liquid of linear molecules	7272
Linda Fabbian, Rolf Schilling, Francesco Sciortino, Piero Tartaglia, and Christoph Theis	
Noise rectification in quasigeostrophic forced turbulence	7279
Alberto Álvarez, Emilio Hernández-García, and Joaquín Tintoré	
Lattice-Boltzmann models for high speed flows	7283
Chenghai Sun	
Algebraic decay of velocity fluctuations near a wall	7288
I. Pagonabarraga, M. H. J. Hagen, C. P. Lowe, and D. Frenkel	
Time-correlation functions in molecular liquids studied by the mode-coupling theory based on the interaction-site model	7296
Song-Ho Chong and Fumio Hirata	
Low and high Reynolds number flows inside Taylor cones	7309
A. Barrero, A. M. Gañán-Calvo, J. Dávila, A. Palacio, and E. Gómez-González	
Zigzag and Eckhaus instabilities in a quintic-order nonvariational Ginzburg-Landau equation	7315
R. B. Hoyle	
Strong shock waves in a dense gas: Burnett theory versus Monte Carlo simulation	7319
J. M. Montanero, M. López de Haro, V. Garzó, and A. Santos	
Normal and anomalous scaling of turbulence	7325
J. Qian	
Regular and chaotic advection in the flow field of a three-vortex system	7330
Leonid Kuznetsov and George M. Zaslavsky	
Entropy production and Lyapunov instability at the onset of turbulent convection	7350
V. M. Castillo and Wm. G. Hoover	
Observation and determination of abnormal rolls and abnormal zigzag rolls in electroconvection in homeotropic liquid crystals	7355
Jong-Hoon Huh, Yoshiki Hidaka, and Shoichi Kai	
Diffusion with intrinsic trapping in two-dimensional incompressible stochastic velocity fields	7359
M. Vlad, F. Spineanu, J. H. Misguich, and R. Balescu	
Density fluctuations in many-body systems	7369
Thomas M. Truskett, Salvatore Torquato, and Pablo G. Debenedetti	
Renormalization group and anomalous scaling in a simple model of passive scalar advection in compressible flow	7381
Loran Ts. Adzhemyan and Nikolaj V. Antonov	
Advection of a magnetic field by a turbulent swirling flow	7397
P. Odier, J.-F. Pinton, and S. Fauve	
Variable property similarity transform: Application to axisymmetric fluid flow against a heated disk	7402
David W. Weyburne	
Vortex model for the nonlinear evolution of the multimode Richtmyer-Meshkov instability at low Atwood numbers	7410
A. Rikanati, U. Alon, and D. Shvarts	

Liquid crystals

Response of a homeotropic nematic liquid crystal to rectilinear oscillatory shear	7419
T. Börzsönyi, Á. Buka, A. P. Krekhov, and L. Kramer	
Structural and elastic properties of the dipolar Gay-Berne model	7428
A. V. Zakharov and S. Romano	
Extended mean-field molecular theory for the smectic-C to smectic-A orientational transitions	7435
Liangbin Hu and Ruibao Tao	
First-order breaking transition of tilted nematic anchoring	7442
I. Dozov and Ph. Martinot-Lagarde	
Molecular dynamics study of nematic structures confined to a cylindrical cavity	7447
Z. Bradač, S. Kralj, and S. Žumer	
Dynamics of chevron structure formation	7455
A. N. Shalaginov, L. D. Hazelwood, and T. J. Sluckin	
Elastic effects of long-range quadrupolar interactions in nematic liquid crystals	7465
S. Faetti, L. R. Evangelista, and G. Barbero	
Generalized hydrodynamic equations for nematic liquid crystals	7475
Tiezheng Qian and Ping Sheng	

PART B

Note to Reader	i
--------------------------	---

Complex fluids, polymers, and granular materials

Critical exponents and fractal dimension at the sol-gel phase transition via <i>in situ</i> fluorescence experiments	7487
Y. Yilmaz, A. Erzan, and Ö. Pekcan	
Selection of doublet cellular patterns in directional solidification through spatially periodic perturbations	7492
W. Losert, D. A. Stillman, H. Z. Cummins, P. Kopczyński, W.-J. Rappel, and A. Karma	
Dynamics of postnucleation and domain growth: Domain-spatial correlation function	7507
Tao Huang, Tomohiro Tsuji, M. R. Kamal, and A. D. Rey	
Ostwald ripening kinetics in a magnetic fluid made metastable by a strengthening of an external magnetic field	7517
Alexey O. Ivanov and Andrej Yu. Zubarev	
Phase behavior of nonadditive hard-sphere mixtures	7523
Marjolein Dijkstra	
Phase transitions in a quasi-two-dimensional system	7529
Ronen Zangi and Stuart A. Rice	
Divine proportion shape preservation and the fractal nature of cluster-cluster aggregates	7545
C. M. Sorensen and C. Oh	
Polyelectrolyte-mediated undulation of surfactant bilayers	7549
Hans v. Berlepsch, Christian Burger, and Herbert Dautzenberg	
Dynamical structure of water in aqueous solutions of LiCl, NaCl, and KCl by low-frequency Raman scattering: Comparison between the multiple random telegraph model and Cole-Cole relaxation	7553
Yuko Amo and Yasunori Tominaga	
Fractal-polarization correction in time domain dielectric spectroscopy	7561
Yuri Feldman, Raul Nigmatullin, Evgeny Polygalov, and John Texter	
Conformal invariance in two-dimensional cluster-cluster aggregation	7566
J. C. Earnshaw and M. B. J. Harrison	
Domain growth and surface roughening in Monte Carlo simulations of $A_{0.5}B_{0.5}$ film growth	7571
Y. Shim, D. P. Landau, and S. Pal	

Generalized kinetic potential in binary nucleation	7580
Jin-Song Li, Kazumi Nishioka, and Igor L. Maksimov	
Velocity correlations in granular materials	7587
Tong Zhou	
Vibrations of microemulsion droplets and vesicles with compressible surface layer	7598
V. Lisy, B. Brutovsky, and A. V. Zatovsky	
Thermodynamic and hydrodynamic peculiarities of a foam lamella confined in a cylindrical pore	7606
Konstantin Kornev and Galina Shugai	
Shear-induced orientation of the body-centered-cubic phase in a diblock copolymer gel	7620
I. W. Hamley, J. A. Pople, C. Booth, L. Derici, M. Imp��rator-Clerc, and P. Davidson	
Dilatational rheology of insoluble polymer monolayers: Poly(vinylacetate)	7629
Francisco Monroy, Francisco Ortega, and Ram��n G. Rubio	
Optimal path in two and three dimensions	7642
Nehemia Schwartz, Alexander L. Nazaryev, and Shlomo Havlin	
From thin to thick granular surface flows: The stop flow problem	7645
Thomas Boutreux and Elie Rapha��l	
Surface level migration in vibrating beds of cohesionless granular materials	7650
Toshiya Ohtsuki, Daisuke Kinoshita, Yasushi Nakada, and Akihisa Hayashi	
Interparticle interactions in water-in-oil microemulsions: Dielectric and ir investigations	7657
M. D'Angelo, D. Fioretto, G. Onori, and A. Santucci	
Path-length-resolved dynamic light scattering in highly scattering random media: The transition to diffusing wave spectroscopy	7664
Kostadinka K. Bizheva, Andy M. Siegel, and David A. Boas	
Long-time translational self-diffusion in isotropic and nematic dispersions of colloidal rods	7668
M. P. B. van Bruggen, H. N. W. Lekkerkerker, G. Maret, and J. K. G. Dhont	
Absence of surface mode in a viscoelastic material with surface tension	7678
Hiizu Nakanishi and Satoshi Kubota	
Fractal-chain transition of field-induced colloid structure	7682
Weijia Wen, D. W. Zheng, and K. N. Tu	
Backbone orientational order in fatty acid monolayers at the air-water interface	7686
M. K. Durbin, A. G. Richter, C.-J. Yu, J. Kmetko, J. M. Bai, and P. Dutta	
Diffusion-driven phase separation of deeply quenched mixtures	7691
Natalia Vladimirova, Andrea Malagoli, and Roberto Mauri	
Dynamical characterization of one-dimensional stationary growth regimes in diffusion-limited electrodeposition processes	7700
C. L��ger, J. Elezgaray, and F. Argoul	
Critical viscoelastic behavior of colloids	7710
Jan K. G. Dhont and Gerhard N��gele	
Biological physics	
Spontaneous curvature-induced pearling instability	7733
Sahraoui Cha��ieb and Sergio Rica	
Attractor neural networks storing multiple space representations: A model for hippocampal place fields	7738
F. P. Battaglia and A. Treves	
Observation of two-mode binding to DNA by bipyridyl-(ethylenediamine)platinum(II): Isothermal titrational calorimetry and midinfrared absorption studies	7754
A. Szab��, R. A. Flowers, B. J. Carter, and S. A. Lee	
Temporal association in neural networks at finite temperatures	7761
M. Y. Choi, Jihyun Choi, and Kibeom Park	

Multiple mechanisms for critical behavior in the biologically relevant phase of lecithin bilayers	7769
John F. Nagle, Horia I. Petrache, Nikolai Gouliarov, Stephanie Tristram-Nagle, Yufeng Liu, Robert M. Suter, and Klaus Gawrisch	
Zipf-like behavior in procaryotic protein expression	7777
J. J. Ramsden and J. Vohradský	
ac separation of particles by biased Brownian motion in a two-dimensional sieve	7781
Imre Derényi and R. Dean Astumian	

Plasma physics

Modeling of nonlocal electron kinetics in a low-pressure afterglow plasma	7785
Robert R. Arslanbekov and Anatoly A. Kudryavtsev	
Ion motion and finite temperature effect on relativistic strong plasma waves	7799
Arsen G. Khachatryan	
Analyses of attractive forces between particles in Coulomb crystal of dusty plasmas by optical manipulations	7805
Kazuo Takahashi, Tomoko Oishi, Ken-ichi Shimomai, Yasuaki Hayashi, and Shigehiro Nishino	
Chaotic interaction of Langmuir solitons and long wavelength radiation	7812
R. Erichsen, G. I. de Oliveira, and F. B. Rizzato	
Population inversion due to charge-exchange interaction of plasma jets from plasma focus with residual gas	7819
A. Engel, K. N. Koshelev, Yu. V. Sidelnikov, S. S. Churilov, C. Gavrilescu, and R. Lebert	
Two-dimensional density distribution of metastable atoms in an inductively coupled plasma in Ar	7823
Masahiro Tadokoro, Hajime Hirata, Nobuhiko Nakano, Zoran Lj. Petrović, and Toshiaki Makabe	
Structure of Yukawa dusty plasma mixtures	7831
Hiroo Totsuji, Tokunari Kishimoto, Chieko Totsuji, and Takashi Sasabe	
Nonlinear filamentation instability driven by an inhomogeneous current in a collisionless plasma	7837
F. Califano, R. Prandi, F. Pegoraro, and S. V. Bulanov	
Electromagnetic-wave propagation and amplification in overdense plasmas: Application to free electron lasers . . .	7846
Andrey B. Matsko and Yuri V. Rostovtsev	
Emission from weakly nonideal helium plasmas produced in flash lamps	7855
Y. Vitel, M. El Bezzari, L. G. D'yachkov, and Yu. K. Kurilenkov	
Harmonic filtering in an optically thin laser-generated plasma	7864
Enrique Conejero Jarque and Luis Plaja	

Physics of beams

Single-particle dynamics in particle storage rings with integrable polynomial factorization maps	7868
Jicong Shi and Piriya Suwannakoon	
Proposal for electron acceleration by two collinear, overlapping laser beams	7874
Satoshi Takeuchi and Ryo Sugihara	

Classical physics, including nonlinear media

Dynamics of quasistatic directional crack growth	7878
O. Ronsin and B. Perrin	
Second-harmonic resonant excitation in optical periodic structures with nonlinear anisotropic layers	7887
A. A. Bulgakov, S. A. Bulgakov, and L. Vázquez	
Nature of the parametrically excited bound soliton state	7899
Xinlong Wang	
Observation of topological charge pair nucleation in parametric wave mixing	7903
Dmitri V. Petrov and Lluís Torner	
Defect modes in a two-dimensional square lattice of square rods	7908
Chul-Sik Kee, Jae-Eun Kim, Hae Yong Park, and K. J. Chang	

Solitons in highly excited matter: Dissipative-thermodynamic and supersonic effects	7913
Marcus V. Mesquita, Áurea R. Vasconcellos, and Roberto Luzzi	
Universal Gaussian falloff in soliton tails	7924
David A. Kessler and Jeremy Schiff	
Potential of interaction between two- and three-dimensional solitons	7928
Boris A. Malomed	
Nonlinear modulation of periodic waves in the small dispersion limit of the Benjamin-Ono equation	7934
Y. Matsuno	
Approximate method for gap soliton propagation in nonuniform Bragg gratings	7941
Neil G. R. Broderick and C. Martijn de Sterke	
Coupled-mode equations for quadratically nonlinear deep gratings	7951
Awdah Arraf and C. Martijn de Sterke	
Quasistatically controlled bianisotropic media: Dual composite materials	7959
E. O. Kamenetskii	
Quasistatic principles in the macroscopic electrodynamics of bianisotropic media	7965
E. O. Kamenetskii	
Induced gap solitons of a Korteweg–de Vries system	7974
Luqun Zhou, Kaifen He, and Z. Q. Huang	

Computational physics

Degeneracy algorithm for random magnets	7978
S. Bastea	
Invertibility of dynamical systems in granular phase space	7987
P.-M. Binder and Juan C. Idrobo	

BRIEF REPORTS

General methods of statistical physics

One-dimensional ferroelectric model with dipole-dipole interactions	7990
Satoshi Tanaka	
Colored-noise-induced multistability in nonequilibrium phase transitions	7994
Seunghwan Kim, Seon Hee Park, and C. S. Ryu	
Differences between regular and random order of updates in damage-spreading simulations	7998
Thomas Vojta and Michael Schreiber	
Interfering resonances in a quantum billiard	8001
E. Persson, K. Pichugin, I. Rotter, and P. Šeba	

Chaos and nonlinear dynamical systems

Synchronization-based noise reduction method for communication with chaotic systems	8005
Naresh Sharma and Edward Ott	
Deterministic stochastic resonance in a piecewise linear chaotic map	8009
Sitabhra Sinha and Bikas K. Chakrabarti	
Manifold reconnection in chaotic regimes	8013
G. Corso and F. B. Rizzato	
Mode fluctuation distribution of coupled quartic oscillators	8017
Mitsuyoshi Tomiya and Naotaka Yoshinaga	

Classical fluids

- Herringbone pattern for an anisotropic complex Swift-Hohenberg equation 8021
Hidetsugu Sakaguchi

Liquid crystals

- Surface-induced nematic ordering and the localization of a twisted distortion in a nematic cell 8024
G. Barbero, C. Ferrero, T. Günzel, G. Skačej, and S. Žumer

Complex fluids, polymers, and granular materials

- Surface induced ordering of micelles at the solid-liquid interface 8028
Michael C. Gerstenberg, Jan Skov Pedersen, and Gregory S. Smith
Evolution of a single defect in an ideal two-dimensional hexagonal soap froth 8032
W. Y. Tam

Biological physics

- Desynchronization and synchronization processes in a randomly coupled ensemble of neurons 8036
Vladimir E. Bondarenko and Teresa Ree Chay
Kink instability in circular DNA studied as Helfrich chiral chains 8040
Zhao Wei, Zhou Haijun, and Ou-Yang Zhong-can

Plasma physics

- Electron oscillations in a plasma slab 8044
L. Stenflo and O. M. Gradov
Evolution of Langmuir waves in a plasma contaminated by variable-charge impurities 8046
S. V. Vladimirov, K. N. Ostrikov, M. Y. Yu, and L. Stenflo

Computational physics

- Solving the time-dependent Schrödinger equation: Suppression of reflection from the grid boundary with a filtered split-operator approach 8049
P. Tran

ERRATA

- Erratum: Bifurcation from locally to globally riddled basins [Phys. Rev. E 57, R6253 (1998)] 8052
T. Kapitaniak, Yu. Maistrenko, A. Stefanski, and J. Brindley

- Cumulative Author Index** 8053
