THIRD SERIES, VOLUME 59, NUMBER 3
PARTS A AND B

CONTENTS

MARCH 1999

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R2493–3064, and Part B pages 3065–3782.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Zero-temperature dynamics of the weakly disordered Ising model R2493
S. Jain

Microscopic foundation of nonextensive statistics R2497
Marek Czachor and Jan Naudts

Distribution of the area enclosed by a two-dimensional random walk in a disordered medium R2501
K. V. Samokhin

Cellular automata simulating experimental properties of traffic flow R2505
Dirk Helbing and Michael Schreckenberg

Branching annihilating random walks with parity conservation on a square lattice R2509
György Szabó and Maria Augusta Santos

Lifetimes of agents under external stress R2512
Claus O. Wilke and Thomas Martinetz

Chaos and nonlinear dynamical systems

Quantum localization and cantori in the stadium billiard R2516
Giulio Casati and Tomaž Prosen

Synchronization of coupled systems with spatiotemporal chaos R2520
Peter Grassberger

Switching manifold approach to chaos synchronization R2523
Jin-Qing Fang, Yiguang Hong, and Guanrong Chen

Classical fluids

Analysis of subgrid scale turbulence using the Boltzmann Bhatnagar-Gross-Krook kinetic equation R2527
Hudong Chen, Sauro Succi, and Steven Orszag

Copyright 1999 by The American Physical Society

1063-651X(199903)59:3:B;1-F

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Liquid crystals

Surface variations of the density and scalar order parameter and the elastic constants of a uniaxial nematic phase R2531
V. M. Pergamenshchik and S. Žumer

Complex fluids, polymers, and granular materials

Tests of dynamical scaling in three-dimensional spinodal decomposition R2535
S. I. Jury, P. Bladon, S. Krishna, and M. E. Cates
Equilibrium size of large ring molecules R2539
J. M. Deutsch
Pattern formation during delamination and buckling of thin films R2542
Kevin M. Crosby and R. Mark Bradley
Universal dynamics of phase-field models for dendritic growth R2546
Yung-Tae Kim, Nikolas Provatas, Nigel Goldenfeld, and Jonathan Dantzig
Effective forces between macroions in highly charged colloidal suspensions R2550
Michio Tokuyama
Curvature distributions of spinodal interface in a condensed matter system R2554
Hiroshi Jinnai, Yukihiro Nishikawa, and Takeji Hashimoto

Plasma physics

Dust-lower-hybrid instability in a dusty plasma with a background of neutral atoms and streaming electrons and ions R2558
M. Salimullah and G. E. Morfill

ARTICLES

General methods of statistical physics

Front propagation in the one-dimensional autocatalytic $A+B\rightarrow 2A$ reaction with decay 2561
V. N. Kuzovkov, J. Mai, I. M. Sokolov, and A. Blumen
Stochastic resonance of the visually evoked potential 2566
R. Srebro and P. Malladi
Computational complexity of determining the barriers to interface motion in random systems 2571
A. Alan Middleton
Universal properties of interacting Brownian motors 2578
Yashar Aghababaie, Gautam I. Menon, and Michael Plischke
Stability analysis of flame fronts: Dynamical systems approach in the complex plane 2587
Oleg Kupervasser, Zeev Olami, and Itamar Procaccia
Computer simulations of the two-dimensional melting transition using hard disks 2594
A. Jaster
Fractional calculus as a macroscopic manifestation of randomness 2603
P. Grigolini, A. Rocco, and B. J. West
Comparison of rigidity and connectivity percolation in two dimensions 2614
C. Moukarzel and P. M. Duxbury
Transition from damage to fragmentation in collision of solids 2623
Ferenc Kun and Hans J. Herrmann
Stationary-state skewness in two-dimensional Kardar-Parisi-Zhang type growth 2633
Chen-Shan Chin and Marcel den Nijs
Rotationally invariant order parameter equations for natural patterns in nonequilibrium systems 2642
M. Bestehorn and R. Friedrich

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 3** **MARCH 1999**

Ising spin glasses: Corrections to finite size scaling, freezing temperatures, and critical exponents 2653
P. O. Mari and I. A. Campbell
van der Waals loops and the melting transition in two dimensions 2659
Juan J. Alonso and Julio F. Fernández
Anomalous coarsening process of voids, steps, and denuded zones on a Si(111)7×7 surface 2664
Y. Manassen, N. Ramesh Rao, I. Mukhopadhyay, E. Ter-Ovanesyan, and Z. Olami
Critical behavior of a traffic flow model 2672
L. Roters, S. Lübeck, and K. D. Usadel
Dynamics of driven interfaces in algebraically correlated random media 2677
M.-P. Kuittu, M. Haataja, and T. Ala-Nissila
Amplitude ratios and the approach to bulk criticality in parallel plate geometries 2683
M. M. Leite, M. Sardelich, and M. D. Coutinho-Filho
Spectral properties of weakly coupled Landau-Ginzburg stochastic models 2689
Ricardo Schor, João C. A. Barata, Paulo A. Faria da Veiga, and Emmanuel Pereira
Chaotic Langevin equation with the deterministic algebraically correlated noise 2695
T. Srokowski
Growth models and the question of universality classes 2699
W. E. Hagston and H. Ketterl
Nonlocal effects associated with shading in surface growth 2707
H. Ketterl and W. E. Hagston
Kinetic Ising model in an oscillating field: Avrami theory for the hysteretic response and finite-size scaling for the dynamic phase transition 2710
S. W. Sides, P. A. Rikvold, and M. A. Novotny
Nontrivial stochastic resonance temperature for the kinetic Ising model 2730
Kwan-tai Leung and Zoltán Néda
Lévy flights in external force fields: Langevin and fractional Fokker-Planck equations and their solutions 2736
Sune Jespersen, Ralf Metzler, and Hans C. Fogedby
Equilibrium and dynamical properties of two-dimensional ***N***-body systems with long-range attractive interactions 2746
Alessandro Torcini and Mickaël Antoni
Dynamics of scroll rings in a parameter gradient 2764
Michael Vinson and Arkady Pertsov
Field-induced ordering in critical antiferromagnets 2772
S. L. A. de Queiroz, Thereza Paiva, Jorge S. de Sá Martins, and Raimundo R. dos Santos
Multifractal characterization of liquid water in clouds 2778
Kristinka Ivanova and Thomas Ackerman
Transport phenomena at a critical point: Thermal conduction in the Creutz cellular automaton 2783
K. Saito, S. Takesue, and S. Miyashita
Dynamic scaling behavior of the Ziff-Gulari-Barshad model on regular fractal lattices: The influence of lacunarity 2795
Zhuo Gao and Z. R. Yang
Stochastic resonance for quantum channels 2801
Julian Juhi-Lian Ting
Walker diffusion method for calculation of transport properties of composite materials 2804
Clinton DeW. Van Siclen
Energy distribution of maxima and minima in a one-dimensional random system 2808
Andrea Cavagna, Juan P. Garrahan, and Irene Giardina
Scaling properties in off-equilibrium dynamical processes 2812
Antonio Coniglio and Mario Nicodemi

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Chaos and nonlinear dynamical systems

Coupled synchronization of spatiotemporal chaos 2817
Zonghua Liu, Shigang Chen, and Bambi Hu
Average patterns of spatiotemporal chaos: A boundary effect 2822
V. M. Eguíluz, P. Alstrøm, E. Hernández-García, and O. Piro
Influence of control loop latency on time-delayed feedback control 2826
Wolfram Just, Dirk Reckwerth, Ekkehard Reibold, and Hartmut Benner
Self-organizing dynamics of coupled map systems 2830
Michał Zochowski and Larry S. Liebovitch
Crossover from Selberg's type to Ruelle's type zeta function in classical kinetics 2838
Daniel L. Miller
Chaotic dynamics of cold atoms in far-off-resonant donut beams 2842
X. M. Liu and G. J. Milburn
Experimental evidence for the role of cantori as barriers in a quantum system 2846
K. Vant, G. Ball, H. Ammann, and N. Christensen
Level spacings at the metal-insulator transition in the Anderson Hamiltonians and multifractal random matrix ensembles 2853
Shinsuke M. Nishigaki
Energy dissipation in the dynamics of a bouncing ball 2863
K. Szymanski and Y. Labaye
When noise decreases deterministic diffusion 2872
Renate Wackerbauer
Improvement of the renormalization method for the transition to stochastic instability in a Hamiltonian system and application to a harmonically forced double well potential 2880
Soo-Young Lee, Sunghwan Rim, Eui-Soon Yim, and C. H. Lee
Intermittency in coupled maps 2887
Sang-Yoon Kim
Universality in three-frequency resonances 2902
Julyan H. E. Cartwright, Diego L. González, and Oreste Piro
Modeling of deterministic chaotic systems 2907
Ying-Cheng Lai, Celso Grebogi, and Jürgen Kurths
Reconstructing chaotic dynamics through spike filters 2911
Rolando Castro and Tim Sauer
Statistics and scaling behavior of chaotic domains in a liquid crystal light valve with rotated feedback 2918
Eric Yao, Francesco Papoff, and Gian-Luca Oppo

Classical fluids

Critical behavior of binary gaseous mixtures 2927
E. V. Matizen, P. P. Bezverkhy, and V. G. Martynets
Phase separation in two-dimensional additive mixtures 2939
Arnaud Buhot and Werner Krauth
Nature of the many-particle potential in the monatomic liquid state: Energetics, kinetics, and stability 2942
D. C. Wallace and B. E. Clements
Nature of the many-particle potential in the monatomic liquid state: Radial and angular structure 2955
B. E. Clements and D. C. Wallace
Turbulent scales smaller than the flame thickness 2966
Bruno Denet
Turbulence without pressure in d dimensions 2971
S. A. Boldyrev

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Analysis of transients for binary mixture convection in cylindrical geometry 2975
Kristina Lerman, David S. Cannell, and Guenter Ahlers
Computed optical emissions from a sonoluminescing bubble 2986
William C. Moss, David A. Young, Judith A. Harte, Joanne L. Levatin, Balazs F. Rozsnyai, George B. Zimmerman, and I. Harold Zimmerman
Dynamics of atomic pairs in a Lennard-Jones fluid: Mean relative displacement analysis 2993
Ten-Ming Wu and S. L. Chang
Modeling sonoluminescence 3001
Alan Chodos and Sarah Groff
Anomalous scalings and dynamics of magnetic helicity 3008
I. Rogachevskii and N. Kleeorin
Diffusivity and pore distribution in fractal and random media 3012
Anwar Hasmy and Nathalie Olivi-Tran
Effects of the second harmonic on the secondary Bjerknes force 3016
Alexander A. Doinikov
Lattice Boltzmann simulations of three-dimensional single droplet deformation and breakup under simple shear flow 3022
Haowen Xi and Comer Duncan

Liquid crystals

Role of boundary conditions in the annihilation of nematic point defects 3027
G. Guidone Peroli and E. G. Virga
Anchoring and orientational wetting of nematic liquid crystals on self-assembled monolayer substrates: An evanescent wave ellipsometric study 3033
B. Alkhairalla, H. Allinson, N. Boden, S. D. Evans, and J. R. Henderson
Left- and right-handed helical tubule intermediates from a pure chiral phospholipid 3040
Britt N. Thomas, Christopher M. Lindemann, and Noel A. Clark
Dynamic critical behavior of the Landau-Peierls fluctuations: Scaling form of the dynamic density autocorrelation function for smectic-*A* films 3048
A. Poniewierski, Robert Hołyst, A. C. Price, and L. B. Sorensen
Z-scan measurement of the nonlinear refractive indices of micellar lyotropic liquid crystals with and without the ferrofluid doping 3059
S. L. Gómez, F. L. S. Cuppo, A. M. Figueiredo Neto, T. Kosa, M. Muramatsu, and R. J. Horowicz

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Liquid-vapor coexistence in fluids of dipolar hard dumbbells and spherocylinders 3065
J. C. Shelley, G. N. Patey, D. Levesque, and J. J. Weis
Properties of *AB* copolymers with a special adsorption-tuned primary structure 3071
Ekaterina A. Zheligovskaya, Pavel G. Khalatur, and Alexei R. Khokhlov
Morphology transition observed in a phase separating fluid 3079
F. Perrot, D. Beysens, Y. Garrabos, T. Fröhlich, P. Guenoun, M. Bonetti, and P. Bravais
Relaxational dynamics of supercooled water in porous glass 3084
J.-M. Zanotti, M.-C. Bellissent-Funel, and S.-H. Chen
Glassy behavior of the parking lot model 3094
Amy J. Kolan, Edmund R. Nowak, and Alexei V. Tkachenko
Disorder and order in sheared colloidal suspensions. II. Stochastic simulations 3100
B. Morin and D. Ronis

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 3** **MARCH 1999**

Micellar structures of dimeric surfactants with phosphate head groups and wettable spacers: A small-angle neutron scattering study 3116
V. K. Aswal, S. De, P. S. Goyal, S. Bhattacharya, and R. K. Heenan

Free energy landscape of a dense hard-sphere system 3123
Chandan Dasgupta and Oriol T. Valls

Role of buoyancy in the onset of dendritic growth in thin layer electrodeposition 3135
M. Rosso, E. Chassaing, and J.-N. Chazalviel

Nonlinear theory of metal-solvent interface using the density functional approach 3140
Sanjib Senapati and Amalendu Chandra

Steady shear behavior of polymerically stabilized suspensions: Experiments and lubrication based modeling 3147
P. A. Nommensen, M. H. G. Duits, D. van den Ende, and J. Mellema

Finite-amplitude instability in growth step trains with overlapping step supply fields 3155
Franz Rosenberger, Hong Lin, and Peter G. Vekilov

Hebbian learning in the agglomeration of conducting particles 3165
M. Sperl, A. Chang, N. Weber, and A. Hübler

Small-angle neutron scattering study of a pressure-induced phase transition in a ternary microemulsion composed of AOT, D_2O, and *n*-decane 3169
M. Nagao and H. Seto

Influences of the size and dielectric properties of particles on electrorheological response 3177
Zhi-Jie Tan, Xian-Wu Zou, Wen-Bing Zhang, and Zhun-Zhi Jin

Hydrodynamic interactions between two spheres at contact 3182
M. L. Ekiel-Jeżewska, F. Feuillebois, N. Lecoq, K. Masmoudi, R. Anthore, F. Bostel, and E. Wajnryb

Fractionation of polydisperse systems: Multiphase coexistence 3192
R. M. L. Evans

Thermodynamics of an extended Fredrickson-Andersen model 3196
C. Pigorsch, J. C. Kimball, and H. L. Frisch

Shock propagation in a granular chain 3202
Erwan Hascoët, Hans J. Herrmann, and Vittorio Loreto

Dependence of supercooled liquid dynamics on elevation in the energy landscape 3207
T. Keyes

Collective dynamics on a crystal composed by disparate-mass particles: $Li_{22}Pb_5$ 3212
R. Fernández-Perea, F.J. Bermejo, J.L. Martínez, E. Enciso, and P. Verkerk

Molecular dynamics study of a phase-separating fluid mixture under shear flow 3223
Ryoichi Yamamoto and Xiao Cheng Zeng

Dynamics of vertically vibrated two-dimensional granular layers 3231
A. Alexeev, V. Royzen, V. Dudko, A. Goldshtein, and M. Shapiro

Structure and rheology of composite soft solids: Particles in lamellar phases 3242
J. Arrault, W. C. K. Poon, and M. E. Cates

Cloud chambers and crystal growth: Effects of electrically enhanced diffusion on dendrite formation from neutral molecules 3253
Kenneth G. Libbrecht and Victoria M. Tanusheva

Structural properties of invasion percolation with and without trapping: Shortest path and distributions 3262
Stefan Schwarzer, Shlomo Havlin, and Armin Bunde

Analytical structure factor of a two-species polydisperse Percus-Yevick fluid with bimodal Schulz distributed diameters 3270
M. Ginoza and M. Yasutomi

Phase separation kinetics of liquid crystalline polymers: Effect of orientational order 3275
Jun-ichi Fukuda

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Dynamics and stress in gravity-driven granular flow 3289
Colin Denniston and Hao Li

Biological physics

Energy transfer between carotenoids and bacteriochlorophylls in light-harvesting complex II of purple bacteria . . . 3293
Ana Damjanović, Thorsten Ritz, and Klaus Schulten
Nonlinear properties of cardiac rhythm abnormalities 3312
Larry S. Liebovitch, Angelo T. Todorov, Michal Zochowski, Daniela Scheurle, Laura Colgin, Mark A. Wood, Kenneth A. Ellenbogen, John M. Herre, and Robert C. Bernstein
Effects of local feedback on dispersion of electrical waves in the cerebral cortex 3320
C. J. Rennie, P. A. Robinson, and J. J. Wright
Content-addressable memory with spiking neurons 3330
R. Mueller and A. V. M. Herz
Stochastic resonance using noise generated by a neural network 3339
G. Mato
Unsupervised and supervised learning: Mutual information between parameters and observations 3344
Didier Herschkowitz and Jean-Pierre Nadal
Small angle neutron scattering and calorimetric studies of large unilamellar vesicles of the phospholipid dipalmitoylphosphatidylcholine 3361
P. C. Mason, B. D. Gaulin, R. M. Epand, G. D. Wignall, and J. S. Lin
Long-term properties of time series generated by a perceptron with various transfer functions 3368
Avner Priel and Ido Kanter
Second mechanism for transitions in a reaction diffusion system 3376
F. Marty Ytreberg and Susan R. McKay
Theoretical results which strengthen the hypothesis of electroweak bioenantioselection 3382
R. Zanasi, P. Lazzeretti, A. Ligabue, and A. Soncini
Canonical ensemble approach to graded-response perceptrons 3386
D. Bollé and R. Erichsen, Jr.
Strain of a biomembrane caused by a local tangential force: Application to magnetic tweezer measurements 3402
A. A. Boulbitch
Exact method for numerically analyzing a model of local denaturation in superhelically stressed DNA 3408
Richard M. Fye and Craig J. Benham
Time-scale matching in the response of a leaky integrate-and-fire neuron model to periodic stimulus with additive noise 3427
T. Shimokawa, K. Pakdaman, and S. Sato
Self-regulation phenomenon of electron-conformational transitions in biological electron transfer under nonequilibrium conditions 3444
Alexander O. Goushcha, Alfred R. Holzwarth, and Valery N. Kharkyanen
Frequency sensitivity in weak signal detection 3453
Feng Liu, JiaFu Wang, and Wei Wang
Stochastic resonance and spike-timing precision in an ensemble of leaky integrate and fire neuron models 3461
T. Shimokawa, A. Rogel, K. Pakdaman, and S. Sato
Asymptotic model of electroporation 3471
John C. Neu and Wanda Krassowska
Sterols sense swelling in lipid bilayers 3483
Frank Richter, Leonard Finegold, and Gert Rapp
Fractal fluctuations in transcranial Doppler signals 3492
B. J. West, R. Zhang, A. W. Sanders, S. Miniyar, J. H. Zuckerman, and B. D. Levine

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Plasma physics

Accuracy of simplified methods for ion dynamics in Stark profile calculations 3499
S. Alexiou, P. Sauvan, A. Poquérusse, E. Leboucher-Dalimier, and R. W. Lee
Parametric coupling of a light wave and surface plasma waves 3503
Hee J. Lee and Sang-Hoon Cho
Effect of configuration interaction on shift widths and intensity redistribution of transition arrays 3512
A. Bar-Shalom, J. Oreg, M. Klapisch, and T. Lehecka
uv continuum emission and diagnostics of hydrogen-containing nonequilibrium plasmas 3526
Boris P. Lavrov, Alexei S. Melnikov, Marko Käning, and Jürgen Röpcke
Electron densities, temperatures, and the dielectric function of femtosecond-laser-produced plasmas 3544
W. Theobald, R. Häßner, R. Kingham, R. Sauerbrey, R. Fehr, D. O. Gericke, M. Schlanges, W.-D. Kraeft, and K. Ishikawa
Green's-function calculation of electron screening in a plasma 3554
M. J. Watrous, L. Wilets, and J. J. Rehr
Polarization measurements of the Al XII resonance line emitted from micropinch plasmas of a vacuum spark discharge 3562
F. Walden, H.-J. Kunze, A. Petoyan, A. Urnov, and J. Dubau
Numerical modeling of the constriction of the dc positive column in rare gases 3571
G. M. Petrov and C. M. Ferreira
Model for transmission of ultrastrong laser pulses through thin foil targets 3583
Wei Yu, Z. M. Sheng, M. Y. Yu, J. Zhang, Z. M. Jiang, and Z. Xu

Physics of beams

Tunable fluid-loaded free-electron laser in the low-electron-energy and long-wavelength extreme 3588
R. Drori and E. Jerby
Three-dimensional laser cooling method based on resonant linear coupling 3594
T. Kihara, H. Okamoto, Y. Iwashita, K. Oide, G. Lamanna, and J. Wei
Transverse beam stability with an ''electron lens'' 3605
A. Burov, V. Danilov, and V. Shiltsev
Propagation of finite length laser pulses in plasma channels 3614
P. Sprangle, B. Hafizi, and P. Serafim

Classical physics, including nonlinear media

Density of states for a dielectric superlattice: TE polarization 3624
I. Alvarado-Rodríguez, P. Halevi, and J. J. Sánchez-Mondragón
Transition from diffusing to dynamic light scattering in solutions of monodisperse polystyrene spheres 3631
Matthew F. Clapper, Joseph S. Collura, Daniel Harrison, and Michael R. Fisch
Finite-time singularity in the vortex dynamics of a string 3637
A. Thess, O. Zikanov, and A. Nepomnyashchy
Mode instability in one-dimensional anharmonic lattices: Variational equation approach 3641
K. Yoshimura
Anderson localization of electromagnetic waves in confined dielectric media 3655
Marian Rusek and Arkadiusz Orłowski
Resonant enhancement of the field within a single ground-plane cavity: Comparison of different rectangular shapes 3661
Diana C. Skigin and Ricardo A. Depine
Electromagnetic fields in ferrofluids 3669
Mario Liu

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Optically induced angular alignment of trapped birefringent micro-objects by linearly polarized light 3676
E. Higurashi, R. Sawada, and T. Ito
Information-theoretic wavelet noise removal for inverse elastic wave scattering theory 3682
Alan J. Van Nevel, Brian DeFacio, and Steven P. Neal

Computational physics

Fast algorithm for calculating two-photon absorption spectra 3694
Yoshiyuki Kurokawa, Shintaro Nomura, Tadashi Takemori, and Yoshinobu Aoyagi
Monte Carlo quasi-heat-bath by approximate inversion 3698
Philippe de Forcrand

BRIEF REPORTS

General methods of statistical physics

First-passage times in phase space for the strong collision model 3702
D. J. Bicout, A. M. Berezhkovskii, Attila Szabo, and G. H. Weiss
Percolation in simple patchwise lattices 3706
F. Nieto, A. J. Ramirez Cuesta, and R. J. Faccio
Predictions from information-theoretical models of nonequilibrium radiation 3710
J. Fort
Chemically induced diffusion-limited interface growth 3714
V. P. Zhdanov
Reconsideration of continuum percolation of isotropically oriented sticks in three dimensions 3717
Z. Néda, R. Florian, and Y. Brechet

Chaos and nonlinear dynamical systems

Higher-order parametric level statistics in disordered systems 3720
E. Kanzieper and V. Freilikher

Classical fluids

Intermittency of two-dimensional decaying electron magnetohydrodynamic turbulence 3724
G. Boffetta, A. Celani, A. Crisanti, and R. Prandi
Bound and estimate for the maximum compression of single shocks 3727
J. D. Johnson
Statistical properties of chaos at onset of electroconvection in a homeotropically aligned nematic layer 3729
Michael I. Tribelsky
Velocity Verlet algorithm for dissipative-particle-dynamics-based models of suspensions 3733
Nicos S. Martys and Raymond D. Mountain

Complex fluids, polymers, and granular materials

Influence of salt content on crack patterns formed through colloidal suspension desiccation 3737
L. Pauchard, F. Parisse, and C. Allain

Physics of beams

Self-consistent relaxation of the electron energy distribution function in excited H_2 postdischarges 3741
K. Hassouni, A. Gicquel, and M. Capitelli

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Classical physics, including nonlinear media

Asymptotic solitons of the extended Korteweg–de Vries equation 3745
T. R. Marchant
Hybrid solitary waves in quadratic nonlinear media 3749
Antonio Picozzi and Marc Haelterman

Computational physics

Method for enhanced sampling in the simulations of dynamical systems 3753
Igor M. Svishchev and Peter G. Kusalik

COMMENTS

Comment on ''Self-similarity and transport in the standard map'' 3756
G. Zumofen and J. Klafter
Reply to ''Comment on 'Self-similarity and transport in the standard map' '' 3761
S. Benkadda, S. Kassibrakis, R. White, and G. M. Zaslavsky
Comment on ''Thermal fluctuations of the shapes of droplets in dense and compressed emulsions'' 3765
V. Lisy and B. Brutovsky
Comment on ''Eigenfunction expansion of the dyadic Green's function in a gyroelectric chiral medium by cylindrical vector wave functions'' 3767
Le-Wei Li, Mook-Seng Leong, Pang-Shyan Kooi, and Tat-Soon Yeo
Comment on ''Eigenfunction expansion of the dyadic Green's function in a gyroelectric chiral medium by cylindrical vector wave functions'' 3772
Wei Ren

ERRATA

Erratum: Electrical conductivity of dense copper and aluminum plasmas [Phys. Rev. E **57**, 5945 (1998)] 3774
A. W. DeSilva and J. D. Katsouros
Erratum: Dynamics of driven interfaces near isotropic percolation transition [Phys. Rev. E **58**, 1514 (1998)] 3774
